## PART ONE INTRODUCTION TO FUTURES TRADING

A number of people have contributed to the ideas expressed in this book. It's not possible to enumerate all of those individuals but we do wish to thank those who at one time or another participated in discussions on financial futures and, wittingly or not, touched off a new avenue of exploration for us. Our thanks go to all of them.

Special mention, however, goes to the International Monetary Market in Chicago and Arthur Andersen for permitting us to utilize the special report prepared by Arthur Andersen & Company, "Interest Rate Futures Contracts—Federal Income Tax Implications." It is the best and most complete treatment in existence today on the subject of taxes and accounting for interest rate futures. Chapters 18, 19, and 20 are extracted from that publication.

Special thanks also go to Richard Wrightson, who provided some of the material and tables in Chapters 7 and 17.

*Commodities Magazine* and Investor Publications, 219 Parkade, Cedar Falls, Iowa, also kindly granted permission for the use of material that had previously appeared in articles we wrote for *Commodities Magazine* and that appeared in the book *Getting Started in Commodity Futures Trading* by Mark J. Powers.

A tip of the hat also goes to our employer while most of this book was being written, Thomson McKinnon Securities Inc. Nevertheless, Thomson McKinnon takes no responsibility for anything that appears in the book.

Last but not least special thanks goes to Concetta Fontana, who so tirelessly gave of her own time to type the manuscript, all the while maintaining good cheer.
