前 言

随着中国海员不断融入国际海员市场,对中国海员英语能力的要求也越来越高。航海英语作为航海学习者一门重要的学习和考证课程,也是学习难度最大的课程之一。除了有些学习者英语底子薄外,更主要是由于:专业词汇量多而难,而且有些从专业英语词典中也无法查阅,有很多词汇由于词典等资料中无加注音标而读不准;其次专业用法多,且无足够的资料供查阅其确切意思,而导致理解困难;再就是专业性强,且有些知识点在相关专业课程中无介绍,而不能理解其真正的含义,等等。这些都给学习者在学习中增添了不少困难。

本书根据新的《中华人民共和国海船船员考试大纲》对二、三副的要求,本着人性化的理念进行编写的。除了尽量做到内容丰富、知识点全面外,在选材上力争内容精和资料新,编排上做到深入浅出,尽量使学习者易学、易理解和易接受,并且每课都编写了加注音标的生词表和对疑难句子或知识点的注解,以帮助学习者理解和提高学习效率,另外在许多地方利用了插图,以帮助对相关内容的理解和增强感性认识。

全书由陈宏权主编和统稿,其中第3章由杨晓编写,第4、7章由范耀天编写,第5、12章由陈刚编写,第6章由王当利编写,第8章由张进峰编写,第11章由刘成勇(第一、二部分)和张品生(第三、四、五部分及附录)共同编写,第14章由牟军敏编写,第15章由吴建华编写,第16章由张兢编写,第18章由郭国平编写,其他章由陈宏权编写。

编者希望通过本书的出版,能够给读者更快、更有效地学习航海英语知识有所帮助,但由于编者水平有限,错误难免,恳请同行及广大读者不吝指教。

Chapter 1 Standard Orders on Board Vessel

Part 1 Helm (Wheel) Orders

When a ship proceeds at sea or into a harbor, it should be steered with great care. The pilot or the captain gives the helm orders to the steersman. The steersman must repeat and carry out all the orders correctly and immediately. When the orders have been carried out, the steersman must report the fact and the course being steered. The steersman is never allowed to mistake the starboard helm for the port helm and vice versa. A little carelessness may cause great damage or loss. (See Fig. 1-1)

Part 2 Engine Orders

Any engine order given should be repeated by the person operating the bridge telegraph(s) and the officer on watch should ensure the order is carried out correctly and immediately. (See Fig. 1-2)

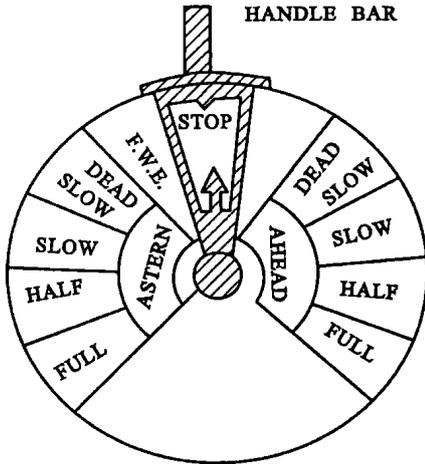

Fig. 1-2 Telegraph dial

In vessels fitted with twin propellers, the “both” should be added to all orders affecting both shafts, e. g. “Full ahead both”, and “Slow astern both”, except that the words “stop all engines” should be used, when appropriate. When required to manoeuvre twin propellers independently, this should be indicated, i. e. “full ahead starboard”, “half astern port”, etc.

Where thrusters are used, see the following orders in the table.

For vessels with variable pitch propellers, the meaning of the order would include the combination of pitch and revolutions as indicated in ship’s orders.

Each line has a large eye spliced in the end. The eye is placed over a bollard on the quayside. If there is another line already on the bollard, the eye of the second line should be taken up through the eye of the first line before placing it over the bollard. This makes it possible for either line to be let go first. (See Fig. 1-3)

Part 4 Anchor Orders

When preparing to anchor, it is necessary to take a hammer, an oil can and some goggles to the forecastle. Before going to the forecastle, ask the engine room for power and water on deck. As each shackle goes out, ring the forecastle bell (1 ring for 1 shackle, 2 rings for 2 shackles, etc). When the anchor reaches the bottom, hoist the anchor ball or turn on the anchor lights. When enough cable has been paid out, apply the brake and put on the compressor bar. Finally inform the engine room that power and water are finished with. (See Fig. 1-4)
