20世纪以来,科学技术特别是工程科学技术得到迅猛发展,成为世界经济繁荣和人类社会进步的关键因素和推动力量。新中国的社会主义建设事业创造了50年的辉煌,几代工程科技先驱为此做出了不朽的贡献。

目前,在中国 2000 多万科技人员中,工程科技工作者占一半以上,中国工程院院士是他们的优秀代表。院士们是新中国各项工程建设的发起人、设计师和指挥员,他们始终奋斗在科研、设计、制造、施工的第一线。作为新中国大规模工程建设的首代奠基人,他们的功勋将彪炳史册。

现在敬献给读者的这本《中国工程院院士》大型画册,收录了院士们的工作照、手迹和简介。这既是他们劳动的现场写真,也是留给千万代后人的珍贵史料。面如其心,照片中那睿智的神态,深邃的目光,舒徐的笑容,表现了院士们坚定的信念,执著的追求和独特的风采;字如其人,院士们的手迹,或恣肆雄放,或敦朴古拙,或秀美圆润,都映射出他们深厚的文化修养和率真的生活情趣。在光与影的交错中,黑与白的反差里,读者可悟到人格之紧要,精神之伟力,生命之永恒。

新中国 50 年的成就是伟大的,但那仅仅是振兴中华伟业中的一个短暂的序幕。实现中国的现代化建设还需要几十年、上百年。工程建设的高潮还在21 世纪。我们需要培养规模更大的工程科技队伍,造就一大批出类拔萃的青年科学家和工程师,青蓝相继,世代相续,完成中华民族复兴的夙志。

诚望青年一代从这本画册中得到启迪,受到激励,勃发豪情,立下投身 工程科技事业的决心,传承老一辈科学家手中的火炬,攀着巨人的肩头,登 上新的高峰。

天赋人责, 舍我其谁?

PREFACE

Since the beginning of the 20th century the rapid development of science and technology, particularly engineering science and technology, has become the key factor and real momentum for global economic prosperity and social enhancement. The socialist construction of New China has created fifty-year's glories, to which generations of pioneers in engineering science and technology have indelibly contributed.

Representing half of the more than 20 million strong S&T community currently in China, the members of the Chinese Academy of Engineering (CAE) are the leading lights among them in the related fields. They are playing an important part as initiators, designers and commanders in diverse projects of engineering construction, and always striving at the front of scientific research, designing, manufacturing and construction. As the first founders of large-scale engineering projects in New China, their integral contributions will go down the history.

Presented herewith is a large photograph album "Members of the Chinese Academy of Engineering", which contains their photographs, manuscripts and profiles. The photographs have truly recorded the scenes where they work, which will leave the precious historical data for the future generations. As one's face portrays his heart, their savvy expressions, deep gazes and relaxed smiles in the pictures speak of their resolute faith, persistent commitment and distinctive grace. As one's handwritings depict his personalities, their manuscripts, some with free and vigorous strokes, some primitive and crude, some elegant and round, suggest their cultural cultivation and sincere life interests. Coupled with a contrast between lights and shadows, and black and white, the readers can sense the essence of characters, the strength of spirit and eternity of life.

China has made splendid accomplishments in the last fifty years, but it is only a short prelude to vitalizing China. It takes tens of years, or even hundreds of years, to realize the modernization of China. No doubt the 21st century will embrace some payoff in engineering construction development. In that perspective we have to forge a massive lineup in engineering S&T and a lot of pre-eminent young scientists and engineers, and achieve the goal of national rejuvenation, with generations after generations and beyond generations.

It is to be wished that the album will inspire the young generation as well as motivate them, to be dedicated to engineering S&T cause, take over the torch from the older generation of scientists and scale new heights by standing on the shoulders of these giants.

The mission is endowed by nature, and who but myself can do it?

Song Jian
