二、阅读理解(20 分)

Dear Abby,

This is my first letter to you, although I have been reading your column for many years. I need an outside opinion.

I am a grandmother in my 70s and have just returned from visiting my daughter, her husband and their three dearly loved children—all under the age of 5—and I'm upset with some of their parenting ways.

For example:

They lock the doors to their children's bedrooms at night because "the children might get out of their beds and wander around the house, and we may not hear them."

If one child should get punishment, all three are punished, and if one child says a naughty word, all three are given hot sauce(辣酱汁) in the mouth.

I know these parents love their children very much, but are these ways of disciplining them wise? Please understand, it is not my aim to interfere(干涉).

—Gram

Dear Gram,

Children's bedroom doors should not be locked. Should a flash fire break out, it would be a nightmare. Punishing all the children when only one has earned the punishment is a good way to make them grow up to hate each other.

Children who use "naughty" words should not be punished with hot sauce in the mouth—they should be taught the proper and acceptable word to use instead of the "naughty" word.

11. From the passage we can see that Abby is probably _____.
A. a famous writer
B. a columnist(专栏作者)
C. a friend of hers
D. a government official
12. Gram's daughter _____.
A. is very strict with her children
B. does not love her three children
C. always punishes her children at night
D. often gives her children hot sauce
13. The passage doesn't say so, but from the lines you'll find that _____.
A. Gram likes writing letters
B. Gram like watching children
C. Gram likes reading newspapers
D. Gram likes visiting her daughter
14. Gram writes the letter in order to _____.
A. disclose her daughter's ways as a mother
B. criticize her daughter's ways as a mother
C. express her anger about her daughter's ways as a mom
D. get other's opinion about her daughter's ways as a mom

任务型阅读(50 分)

看图并阅读有关信息,写一篇文章介绍三峡工程。

Three Gorges (San Xia) Dam
Construction Site

Three Gorges Dam:

Location: Sandouping, Yichang, Hubei province

Height: 181 meters

Expected investment: 203.9 billion RMB/yuan(US \$ 24.65 billion)

Number of migrants: 1.13 million

Installed power generation capacity: 18.2 million kilowatts

Functions: Flood control, power generation, improved navigation

Construction timetable.

1993 ~ 1997: The Yangtze River was diverted after four years in November 1997.

1998 ~ 2003: The first batch of generators began to generate power in 2003 and a permanent ship lock was scheduled to open for navigation the same year.

2004 ~ 2009: The entire project is to be completed by 2009 when all 26 generators will be able to generate power.

Disadvantages:

The dam may also cause problems, such as causing flooding upstream, possibly causing an earthquake, displacing people, eliminating tourist trade to the area, and destroying important archaeological artifacts

Advantages:

Environment: Hydroelectric power is cleaner than coal burning and safer than nuclear plants, and steps will be taken to protect the environment.

Local culture and natural beauty: Many historical relics are being moved, and the scenery will not change that much.

Navigation: Shipping will become faster, cheaper and safer as the rapid waters are tamed and ship locks are installed.

Power generation: The alternatives are not viable yet and there is a huge potential demand for the relatively cheap hydroelectricity.

Flood control: The huge flood storage capacity will lessen the frequency of major floods. The risk that the dam will increase flooding is remote.

三、阅读理解(10 分)

Around the world more and more people are taking part in dangerous sports and activities. Of course, there have always been people who have looked for adventures—those who have climbed the highest mountains, explored unknown parts of

the world or sailed in small boats across the greatest oceans. Now, however, there are people who seek an immediate thrill(刺激) from risky activity which may only last few minutes or seconds.

I would consider bungee jumping(蹦极跳) to be a good example of such an activity. You jump from a high place—200 metres above the ground with an elastic(弹性的) rope tied to your ankle(脚踝). You fall at up to 150 kilometres an hour until the rope stops you from hitting the ground. It is estimated(估计) that 2 million people around the world have tried the activity. Other activities which people would say as risky as bungee jumping involve(包括) jumping from tall buildings and diving into the sea from the top of high cliffs(悬崖).

Why do people take part in such activities as these? Some psychologists(心理学家) suggest that it is because life in modern society has become safe and boring. Not very long ago, people's lives were constantly under threat(威胁). They had to go out and hunt for food, diseases could not easily be cured, and life was a continuous battle for survival(生存).

Nowadays, according to many people, life offers little excitement. They live and work in comparatively safe environments; they buy food in shops; and there are doctors and hospitals in activities such as bungee jumping.

- A. they have a lot of free time
 - B. they can go to hospital if they are injured
