PREFACE

The Proceedings of the 20th International Conference on Fluidized Bed Combustion (FBC) collect 9 plenary lectures and 175 peer-reviewed technical papers presented in the conference held in Xi'an China in May 18-21, 2009. The conference was the 20th conference in a series, covering the latest fundamental research results, as well as the application experience from pilot plants, demonstrations and industrial units regarding to the FBC science and technology. It was co-hosted by Tsinghua University, Southeast University, Zhejiang University, China Electricity Council and Chinese Machinery Industry Federation.

A particular feature of the proceedings is the balance between the papers submitted by experts from industry and the papers submitted by academic researchers, aiming to bring academic knowledge to application as well as to define new areas for research.

The authors of the proceedings are the most active researchers, technology developers, experienced and representative facility operators and manufacturers. They presented the latest research results, state-of-the-art development and projects, and the useful experience.

The proceedings are divided into following sections:

- CFB Boiler Technology, Operation and Design
- Fundamental Research on Fluidization and Fluidized Combustion
- CO₂ Capture and Chemical Looping
- Gasification
- Modeling and Simulation on FBC Technology
- Environments and Pollutant Control
- Sustainable Fuels

The proceedings can be served as idea references for researchers, engineers, academia and graduate students, plant operators, boiler manufacturers, component suppliers, and technical managers who work on FBC fundamental research, technology development and industrial application.

The editors would like to take this opportunity to thank our FBC colleagues around the world who devoted much of their time to review the manuscripts to keep the scientific standard of the proceedings.

Xi'an, China

Steering Committee Members:

Anthony, J. Edward	CETC-O, Natural Resources, Canada
Basu, Prabir	Dalhousie University, Canada
Bonk, L. Donald	National Energy Technology Laboratory, USA
Bulewicz, M. Elzbieta.	Cracow University of Technology, Poland
Cabanillas, Andres	CIEMAT, Spain
Chen, Hanping	Huazhong Science and Technology University, China
Chyang, Chien-Song	Chung Yuan Christian University, Taiwan, China
DeLallo, R. Michael	Parsons Infrastructure & Technology Group, Inc., USA
Grace, John	University of British Columbia, Canada
Gulyurtlu, Ibrahim	INETI, Portugal
Horio, Masayuki	Tokyo University of Agriculture & Technology, Japan
Hotta, Arto	Foster Wheeler Power Group, Inc., Finland
Hrdlicka, Frantisek	CVUT Prague, Czech Republic
Hupa, Mikko	Abo Akademi University, Finland
Jaud, Philippe	R&D Division EDF, France
Jia, Lufei	CETC-O, Natural Resources, Canada
Kim, Sang Done	Korea Advanced Institute of Science and Technology, South Korea
Leckner, Bo	Chalmers University of Technology, Sweden
Luo, Zhongyang	Zhejiang University, China
Maryamchik, Mikhail	Babcock & Wilcox, USA
Miccio, Michele	University of Salerno, Italy
Mustonen, John	Stone & Webster Consultants, USA
Newby, A. Richard	Siemens-Westinghouse Power Corp., USA
Nowak Wojciech	Czestochowa University of Technology, Poland
Pham, Hoang Luong	Hanoi University of Technology, Vietnam
Preto, Fernando	CETC-O, Natural Resources, Canada
Rozelle, Peter	Department of Energy, USA
Rubow, N. Lynn	Parsons Energy and Chemicals Group, USA
Selcuk, Nevin	Middle East Technical University, Turkey
Skowyr, Richard	Alstom Power, USA
Wedel, von George	Lurgi Energie und Entsorgung, Germany
Werther, Joachim	Technical University Hamburg-Harburg, Germany
Wietzke, L. Donald	Babcock & Wilcox Company, USA
Winter, Franz	Vienna University of Technology, Austria
Yue, Guangxi	Tsinghua University, China
Zhao, Changsui	Southeast University, China

Keynotes

LATEST DEVELOPMENT OF CFB BOILERS IN CHINA	G. X. Yue, H. R. Yang, J. F. Lu, H. Zhang	3
GASIFICATION OF BIOMASS IN FLUIDISED BED: REVIEW OF MODELLING	A. Gómez-Barea, B. Leckner	13
POTENTIALS OF BIOMASS CO-COMBUSTION IN COAL-FIRED BOILERS	J. Werther	27
Formation and Reduction of Pollutants in CFBC: From Heavy Metals, Particulates, Alkali, NO _x , N ₂ O, SO _x , HCl	Franz Winter	43
LATEST EVOLUTION OF OXY-FUEL COMBUSTION TECHNOLOGY IN CIRCULATING FLUIDIZED BED	C .S. Zhao, L. B. Duan, X .P. Chen, C. Liang	49
FOSTER WHEELER'S SOLUTIONS FOR LARGE SCALE CFB BOILER TECHNOLOGY: FEATURES AND OPERATIONAL PERFORMANCE OF ŁAGISZA 460 MWe CFB BOILER	Arto Hotta	59
FLUIDIZED COMBUSTION OF LIQUID FUELS: PIONEERING WORKS, PAST APPLICATIONS, TODAY'S KNOWLEDGE AND OPPORTUNITIES	M. Miccio, F. Miccio	71
DIRECT NUMERICAL SIMULATION OF VERTICAL PARTICULATE CHANNEL FLOW IN THE TURBULENT REGIME	M. Uhlmann, A. Pinelli	83
GASIFICATION IN FLUIDIZED BEDS – PRESENT STATUS & DESIGN	Prabir Basu, Bishnu Acharya, Animesh Dutta	97

CFB Boiler Technology, Operation and Design

RESEARCH AND DEVELOPMENT OF LARGE CAPACITY CFB BOILERS IN TPRI	Sun Xianbin, Jiang Minhua	107
EXPERIENCE FROM THE 300 MWe CFB DEMONSTRATION PLANT IN CHINA	P. Gauvillé, J.-C. Semedard, S. Darling	113
PROJECT MAXAU – FIRST APPLICATION OF HYBRID CFB TECHNOLOGY BY AUSTRIAN ENERGY & ENVIRONMENT	Kurt Kaufmann, Herbert Köberl, Thomas Zotter	121
1300°F 800 MWe USC CFB BOILER DESIGN STUDY	Archie Robertson, Steve Goidich, Zhen Fan	125
STRUCTURE AND PERFORMANCE OF A 600MWe SUPERCRITICAL CFB BOILER WITH WATER COOLED PANELS	Y. Li, L. Nie, X. K. Hu, G. X. Yue, W. K. Li, Y.X. Wu, J. F. Lu, D. F. Che	132
STARTUP, COMMISSIONING AND OPERATION OF FENYI 100MW CFB BOILER	Zhiwei Wang, Wugao Yu, Shi Bo	137
DESIGN AND OPERATION OF LARGE SIZE CIRCULATING FLUIDIZED BED BOILER FIRED SLURRY AND GANGUE	Zhang Man, Bie Rushan, Wang Fengjun	143
PERFORMANCE IMPROVEMENT OF 235 MWe AND 260 MWe CIRCULATING FLUIDIZED BED BOILERS	W. Nowak, R. Walkowiak, T. Ozimowski, J. Jablonski, T. Trybala S.	151
B&W IR-CFB: OPERATING EXPERIENCE AND NEW DEVELOPMENTS	M. Maryamchik, D.L. Wietzke	157
NO _x EMISSION REDUCTION BY THE OPTIMIZATION OF THE PRIMARY AIR DISTRIBUTION IN THE 235MWe CFB BOILER	P. Mirek, T. Czakiert, W. Nowak	162

HEAT TRANSFER COEFFICIENT DISTRIBUTION IN THE FURNACE OF A 300MWe CFB BOILER P. Zhang, J. F. Lu, H. R. Yang, J. S. Zhang, H. Zhang, G. X. Yue	167
CALCULATION AND ANALYSIS OF HEAT TRANSFER COEFFICIENTS IN A CIRCULATING FLUIDIZED BED BOILER FURNACE Zhiwei Wang, Jianhua Yang, Qinghai Li	172
RESEARCH ON THE HYDRAULIC CHARACTERISTICS OF A 600MW SUPERCRITICAL PRESSURE CFB BOILER D. Yang, J. Pan, Q. C. Bi, Y. J. Zhang, X. G. Jiang, L. Yu	180
STUDY OF NOX EMISSION CHARACTERISTICS OF A 1025t/h COAL-FIRED CIRCULATING FLUIDIZED BED BOILER Q. Y. Li, Z.D. Mi, Q.F. Zhang	186
MERCURY EMISSION AND REMOVAL OF A 135 MW CFB UTILITY BOILER Y.F. Duan, Y.Q. Zhuo, Y.J. Wang, L. Zhang, L.G. Yang, C.S. Zhao	189
NOVEL CFB BOILER TECHNOLOGY WITH RECONSTRUCTION OF ITS FLUIDIZATION STATE H. R. Yang, H. Zhang, J. F. Lu, Q. Liu, Y. X. Wu1, G. X. Yue, J. SU, Z. P. Fu	195
DEVELOPMENT OF FLEXI-BURN™ CFB POWER PLANT TO MEET THE CHALLENGE OF CLIMATE CHANGE Horst Hack, Zhen Fan, Andrew Seltzer, Arto Hotta, Timo Eriksson, Ossi Sippu	200
DESIGN AND APPLICATION OF NOVEL HORIZONTAL CIRCULATING FLUIDIZED BED BOILER Q. H. Li, Y. G. Zhang, A. H. Meng	206
DESIGN AND OPERATION OF CFB BOILERS WITH LOW BED INVENTORY Jun Su, Xiaoxing Zhao, Jianchun Zhang, Aicheng Liu, Hairui Yang, Guangxi Yue, Zhiping Fu	212
OPERATIONAL STATUS OF 135MWe CFB BOILERS IN CHINA J.F. Li, S. Yang, J. H. Hao, J. H. Mi, J. F. Lu, H. M. Ji, H. T. Huang, H. R. Yang, G. X. Yue	219
IN DEVELOPPING A BENCH-SCALE CIRCULATING FLUIDIZED BED COMBUSTOR TO BURN HIGH ASH BRAZILIAN COAL-DOLOMITE MIXTURES Jhon Jairo Ramírez Behainne, Rogério Ishikawa Hory, Leonardo Goldstein Jr, Araújo Augusta Bernárdez Pécora	224
INDUSTRIAL APPLICATION STUDY ON NEW-TYPE MIXED-FLOW FLUIDIZED BED BOTTOM ASH COOLER B.Zeng, X.F.Lu, H.Z.Liu	231
OPERATION EXPERIENCE AND PERFORMANCE OF THE FIRST 300MWe CFB BOILER DEVELOPED BY DBC IN CHINA Q. Guo, X.S. Zheng, Q. Zhou, L. Nie, T.S. Liu, X.K. Hu, J.F. Lu	237
OPERATIONAL STATUS OF 300MWe CFB BOILER IN CHINA J.F. Li, J. H. Mi, J. H. Hao, S. Yang, H. T. Huang, H. M. Ji, J. F. Lu, G. X. Yue	243
ADVANCED REFRACTORY AND ANTI-WEARING TECHNOLOGY OF CYCLONE SEPARATOR IN CFB BOILER H. P. Chen, Y. Q. Shen X. H. Wang.X. M. Dai H. Y. Xue D. C. Liu	247
ABRASION-RESISTANT TECHNOLOGY AND ITS PROSPECT FOR CFB BOILERS H. Zheng, Y. J. Li, L. J. Wang, S. H. Liu, Q. R. Dou	250
COMPARION OF MERCURY EMISSIONS BETWEEN CIRCULATING FLUIDIZED BED BOILER AND PULVERIZED COAL BOILER Y. J. Wang, Y. F. Duan, C. S. Zhao	256
CO-COMBUSTION OF REFUSE DERIVED FUEL WITH ANTHRACITES IN A CFB BOILER Dong-Won Kim, Jong-Min Lee, Jae-Sung Kim	262
COMBUSTION OF POULTRY-DERIVED FUEL IN A CFBC Lufei Jia and Edward J. Anthony	271
THERMAL EFFECTS BY FIRING OIL SHALE FUEL IN CFB BOILERS D. Neshumayev, A. Ots, T. Parve, T. Pihu, K. Plamus, A. Prikk	277
ECONOMICAL COMPORISON PC AND CFB BOILERS FOR RETROFIT AND NEW POWER PLANTS IN RUSSIA G. A. Ryabov	282

Fundamental Research on Fluidization and Fluidized Combustion

CHARACTERIZATION OF FINE POWDERS

..... Matthew Krantz, Hui Zhang, Jesse Zhu	291
VELOCITY OF COMPLETE FLUIDIZATION OF A POLYDISPERSE MIXTURE OF VARIOUS FUELS	
..... Yu. S. Teplitskii, V. I. Kovenskii, V. A. Borodulya	298
EFFECTS OF TEMPERATURE AND PARTICLE SIZE ON MINIMUM FLUIDIZATION AND TRANSPORT VELOCITIES IN A DUAL FLUIDIZED BED	
..... J. H. Goo, M. W. Seo, S. D. Kim, B. H. Song	305
FLUIDIZATION CHARACTERISTICS OF STALK-SHAPED BIOMASS IN BINARY PARTICLE SYSTEM	
..... Y. Zhang, B. S. Jin, W. Q. Zhong	311
BOTTOM ZONE FLOW PROPERTIES OF A SQUARE CIRCULATING FLUIDIZED BED WITH AIR STAGING	
..... Zhengyang Wang, Shaozeng Sun, Xiangbin Qin, Qigang Deng, Shaohua Wu	317
EXPERIMENTAL STUDY ON PARTICLE FEEDING AND MIXING IN THE BOTTOM ZONE OF A CIRCULATING FLUIDIZED BED	
..... X. P. Chen, D. Y. Liu, Z. D. Chen, C. S. Zhao	324
AN EXPERIMENTAL INVESTIGATION INTO THE FRAGMENTATION OF COAL PARTICLES IN A FLUIDIZED-BED COMBUSTOR	
..... Monika Kosowska-Galachowska, Adam Luckos	330
AXIAL AND RADIAL SOLIDS HOLDUP MODELING OF CIRCULATING FLUIDIZED BED RISERS	
..... Q. Miao, J. Zhu, S. Barghi, C. Wang, X. L. Yin, C. Z. Wu	335
RESEARCH ON FLOW NON-UNIFORMITY IN MAIN CIRCULATION LOOP OF A CFB BOILER WITH MULTIPLE CYCLONES	
..... S. Yang, H. R. Yang, Q. Liu, H. Zhang, Y. X. Wu, G. X. Yue, Y. Z. Wang	341
FLOW REGIME STUDY IN A CIRCULATING FLUIDIZED BED RISER WITH AN ABRUPT EXIT: FULLY DEVELOPED FLOW IN CFB RISER	
..... J. S. Mei, G. T. Lee, S. M. Seachman, J. Spenik	345
HEAT TRANSFER AT A LONG ELECTRICALLY-SIMULATED WATER WALL IN A CIRCULATING FLUIDISED BED	
..... R. Sundaresan, Ajit Kumar Kolar	350
DESIGN AND OPERATION OF EXPERIMENTAL SYSTEM FOR STUDYING HEAT TRANSFER IN A SMOOTH TUBE AT NEAR- AND SUPER CRITICAL PRESSURE	
..... W. K. Li, Y. X. Wu, Y. Li, J. F. Lu, H. Zhang	357
EXPERIMENTAL AND MODELING INVESTIGATION OF LIGNITE DRYING IN A FLUIDIZED BED DRYER	
..... K. Zhang, C. F. You	361
EXPERIMENTAL RESEARCH ON GAS-SOLID FLOW IN AN EXTERNAL HEAT EXCHANGER WITH DOUBLE OUTLETS	
..... H. Z. Liu, X. F. Lu	367
THE EXPERIMENTAL STUDY ON HEAT TRANSFER CHARACTERISTICS OF THE EXTERNAL HEAT EXCHANGER	
..... X. Y. Ji, X. F. Lu, L. Yang, H. Z. Liu	373
EXPERIMENTAL STUDY ON MASS AND HEAT TRANSFER CHARACTERISTICS IN A HORIZONTAL CIRCULATING DIVISIONAL FLUIDIZED BED	
..... P. Lu, R. ZHANG, J. Pu, C. S. Bu, W. P. Pan	379
EXPERIMENTAL STUDY OF GAS SOLID FLOW CHARACTERISTICS IN CYCLONE INLET DUCTS OF A 300MWE CFB BOILER	
..... J. Y. Tang, X. F. Lu, J. Lai, H. Z. Liu	386
EXPERIMENTAL RESEARCH ON GAS-SOLID FLOW IN A SQUARE CYCLONE SEPARATOR WITH DOUBLE INLETS	
..... B. Xiong, X. F. Lu, R. S. Amano, C. Shu	393
GAS-PHASE COMBUSTION IN THE FREEBOARD OF A FLUIDIZED BED-FREEBOARD CHARACTERIZATION	
..... Jean-Philippe Laviolette, Gregory S. Patience and Jamal Chaouki	398

CHARACTERISTICS OF PYROLYTIC TOPPING IN FLUIDIZED BED FOR DIFFERENT VOLATILE COALS	
.....R. Xiong, L. Dong, G. W. Xu	404
FLUIDISED BED COMBUSTION OF TWO SPECIES OF ENERGY CROPS	
.....P. Abelha, C. Franco, H. Lopes, I. Gulyurtlu, I. Cabrita	410
PREDICTION OF AGGLOMERATION, FOULING, AND CORROSION TENDENCY OF FUELS IN CFB CO-COMBUSTION

OPTIMIZATION OF BIOMASS GASIFICATION PROCESS FOR F-T BIO-DIESEL SYNTHESIS

Jae Hun Song, Yeon Kyung Sung, Tae U Yu, Young Tae Choi, Uen Do Lee

Korea Institute of Industrial Technology, Cheonan, Korea

Abstract: The characteristics of biomass steam gasification were investigated to make an optimum syngas for Fischer Tropsch (F-T) synthesis of bio-diesel. Korean pine wood chip was used as a fuel and the experiment was conducted in a lab scale bubbling fluidized bed (0.1m I.D. x 3.0m height). Gas composition was evaluated by changing operating parameters such as gasifier temperature, and steam to fuel ratio. Major syngas was monitored by on-line gas analyzer (ND-IR spectroscopy) and gas chromatography (GC). As the temperature of gasifier increases hydrogen in the syngas increases while CO in the product gas decreases. The low concentration of sulfur compound and nitrogen in the product gas shows the potential advantages in the purification process of the syngas for F-T process. Optimum operating condition of the gasifier was found concerning the following gas cleaning and F-T process; H₂-CO ratio and total gas yield increase while decreasing methane and CO₂ concentrations in the syngas.

Keywords: steam gasification, biomass, syngas, bubbling fluidized bed, F-T synthesis

INTRODUCTION

With the depletion of fossil fuel as well as the global warming issues, people have a renewed interest in biomass as an alternative for fossil fuel. Regarding the economic feasibility and application area, making bio-syngas from biomass is the most competitive technology. The bio-syngas mainly composed of H₂, CO, CH₄ and CO₂ can be used as a gas fuel, ingredient for chemical synthesis or bio-diesel. Due to the recent sky-rocketing oil price, synthesis of liquid fuel with bio-syngas becomes very promising technology of biomass to energy. With the help of gas to liquid (GTL) technologies, better known as Fisher-Tropsch (F-T) process we can synthesis alcohol, dimethylether (DME), and bio-diesel. Liquid fuel, obtained from F-T process, offers important emission benefits compared with conventional diesel, reducing nitrogen oxide, carbon monoxide, and particulate matter. In general, F-T process synthesis reacts one mole of CO with two moles of H₂ to form hydrocarbons over catalysts (Boerigter and Den Uil, 2002). Hence, proper composition of syngas is essential to optimize the F-T synthesis and highly purified syngas is necessary for avoiding any contamination of catalyst. Some recent studies indicated that possibility for production of F-T liquid via biomass gasification (Tijmensen et al., 2002) and F-T technology application for biomass conversion to synthetic hydrocarbons (Srinivas et al., 2007). Tristantini et al. (2007) studied the effect of syngas composition on F-T synthesis over catalysts. The proper condition of gasification is important in attempts to provide a desirable gas for the effective synthesis of liquid fuel from F-T technology. In this paper, we investigated the optimum condition of biomass gasification using steam which increases hydrogen content in the syngas to meet the necessary condition for F-T bio-diesel synthesis.

EXPERIMENTAL

Korean pine wood chips were used as fuel for the gasification. The properties of wood chip used in this work is given in Table 1. The experiment was carried out at atmospheric, on a lab scale bubbling fluidized bed (0.1m I.D. × 3.0m height) gasifier. A schematic diagram of the experimental set-up is shown in Fig. 1. The gasifier was placed inside an electric furnace, which provided necessary heat to maintain the gasifier temperature for each case. Steam was used as fluidizing/gasifying agent and introduced into the reactor through the distributor and the flow rate of the steam was measured by a vortex flowmeter. Gas composition was evaluated by changing various operating parameters such as gasifier temperature, and steam to fuel ratio. The gasification conditions of this work were as follows: reaction temperature 700 ~ 900°C, steam flow rate 2.7 ~ 8.0kg/hr (steam to biomass ratio 0.5 ~ 1.6), fuel size ≤ 10 mm. The gas produced from gasification was cooled through a quenching system to remove condensable compounds. The composition of major syngas was monitored by gas analyzer(ABB CO. Ltd., Germany, Model: AO2020).

Table 1 Properties of wood chip used in the experiments

Proximate analysis(wt.%, wet basis)		Ultimate analysis (Dry basis)	
Moisture	6.4	C (wt %)	50.8
Volatile matter	75.9	H (wt %)	5.37
Fixed carbon	17.4	O (wt %)	43.6
Ash	0.3	N (wt %)	0
LHV(J/g)	19700	S (mg/kg)	61.8

RESULTS AND DISCUSSION

Effect of temperature

Figure 2 illustrates effect of temperature, ranging from 700 to 860°C on the syngas composition while keeping the amount of steam and biomass (S/B: 0.5). As shown in Fig. 2, H₂ increases with increasing the temperature while CO decreases on the contrary. As temperature increases, CH₄ slightly decreases and there is no significant changes in CO₂ content which was around 15%. This result can be explained by the influence of water-gas shift reaction above 700°C, as suggested by Walawender et al.(1985), Brink and Massoudi(1978), and Franco et al.(2003) also reported that the presence of steam favoured that reaction leading to an increase in H₂ and a decrease in CO content with the rise of temperature. H₂/CO ratio of the syngas varies from 0.87 to 1.15 as the temperature changes from 770 and 860°C.
