# Table of Contents

---

Preface .....	13
Directory of Contributors .....	15
<b>PÁRT I APPROACHES TO RIVER POLLUTION CONTROL</b>	
<b>Chapter 1 The application of charges for discharges to rivers</b>	
<b>D. J. Kinnersley, National Water Council</b>	
1.1 Introduction .....	21
1.2 The desire for amenity and the decline of rights .....	21
1.3 The new rôle of the public agencies .....	22
1.4 Revised dispositions and their implications .....	24
1.5 The level of charge .....	25
1.6 The need for information .....	26
1.7 Brief conclusions .....	27
1.8 Notes and References .....	28
<b>Chapter 2 Quality objectives and fixed emission standards – an industrial view</b>	
<b>A. I. Biggs, Confederation of British Industry</b>	
2.1 Introduction .....	31
2.2 Protection of the environment .....	31
2.3 Risk assessment .....	32
2.4 Previous UK experience – fixed emission standards .....	33
2.5 UK experience – river quality objectives .....	34
2.6 The EEC proposals .....	34
2.7 The UK attitude .....	35
2.8 The CBI view .....	35
<b>Chapter 3 The European Community and water pollution control</b>	
<b>V. Mandl, European Economic Community, Brussels</b>	
3.1 Introduction .....	37
3.2 A common method for the organized protection of water .....	39

3.3	Definition of quality objectives and emission standards for water . . . . .	40
3.4	Conclusions . . . . .	42
<b>Chapter 4 River pollution control by quality objectives</b>		
D. D. Young, Severn-Trent Water Authority		
4.1	Existing use of river quality objectives . . . . .	45
4.2	Existing use of emission standards . . . . .	46
4.3	Pollution abatement since 1950 . . . . .	46
4.4	The EEC environmental programme . . . . .	46
4.5	The National Water Council (NWC) and river water quality objectives . . . . .	47
4.6	The EEC attitude to quality objectives and uniform emission standards . . . . .	48
4.7	Future control of effluent discharges in England and Wales by RQOs . . . . .	50
4.8	Implementation in the Severn-Trent Water Authority area . . . . .	53
4.9	Summary and Conclusions . . . . .	54
4.10	Acknowledgement and Disclaimer . . . . .	54
4.11	References . . . . .	55
	Discussion . . . . .	59
<b>PART 2 THE PROBLEMS OF INTERNATIONAL RIVERS</b>		
<b>Chapter 5 The World Health Organization and pollution control in Europe</b>		
J. Ian Waddington, World Health Organization		
5.1	Introduction . . . . .	65
5.2	Water quality surveillance . . . . .	66
5.3	Toxic hazards . . . . .	68
5.4	International rivers . . . . .	70
5.5	World Health Organization co-operation with individual countries . . . . .	72
5.6	Disclaimer . . . . .	74
5.7	References . . . . .	74
<b>Chapter 6 Water pollution control on the River Danube</b>		
P. Benedek and B. Hock, Research Centre for Water Resources Development, F. Papp, National Water Authority, Hungary		
6.1	Introduction . . . . .	77
6.2	Monitoring problems . . . . .	81
6.3	Main outlines of the Gabčíkovo-Nagymaros hydro-electric project . . . . .	86
6.4	Estimation of the effect of the Barrage system . . . . .	88
6.5	Summary and Conclusions . . . . .	92
6.6	References . . . . .	93

**Chapter 7 Political aspects of cleaning the River Rhine****M. Schalekamp, Water Supply Zurich**

7.1	Introduction . . . . .	95
7.2	Why the River Rhine and the environment are polluted . . . . .	95
7.3	Pollution of the River Rhine and of the waterways in its catchment area . . . . .	96
7.4	Water treatment by the supply authorities in the River Rhine catchment area — some examples . . . . .	101
7.5	What has been, and is being, done against pollution of the River Rhine? . . . . .	103
7.6	Keeping the River Rhine clean is essentially a political duty of each individual country concerned . . . . .	105
7.7	The River Rhine — some good examples, and some not so good . . . . .	105
7.8	Conclusion . . . . .	110
7.9	Summary . . . . .	110

**Chapter 8 The pollution of the River Rhine — the perspective for improvement****P. Santema, National Institute for Water Supply, The Netherlands**

8.1	Physical characteristics of the River Rhine basin . . . . .	113
8.2	The rôle of the River Rhine in the water management of The Netherlands . . . . .	119
8.3	Quality of the River Rhine water in The Netherlands . . . . .	128
8.4	Present waste loads in the waters of the River Rhine basin . . . . .	128
8.5	Potential waste load of the waters of the River Rhine basin and sanitation requirements . . . . .	137
8.6	Concluding remarks . . . . .	144

<b>Discussion</b> . . . . .	145
-----------------------------	-----

**PART 3 RIVER POLLUTION CONTROL IN PRACTICE****Chapter 9 French measures against River Rhine Pollution****F. Langenfeld, Agence Financière de Bassin Rhin-Meuse**

9.1	Introduction . . . . .	149
9.2	The means provided for the struggle against pollution in France . . . . .	151
9.3	Application of the policy to the French part of the River Rhine basin . . . . .	152
9.4	First surveys and future prospects . . . . .	154
9.5	References . . . . .	156

**Chapter 10 The River Rhine monitoring programme in Germany****F. Malz, Emschergerossenschaft**

10.1	Introduction . . . . .	157
10.2	The water quality monitoring stations at Honnef and Mainz . . . . .	158
10.3	Monitoring programmes . . . . .	159

**Chapter 11 The River Trent system – 20 years of improvement****G. M. Woodward, Severn-Trent Water Authority**

11.1	Introduction . . . . .	163
11.2	The River Trent basin . . . . .	163
11.3	The Trent research programme . . . . .	165
11.4	The Trent economic model . . . . .	166
11.5	The Trent research programme and present management of the Trent basin . . . . .	166
11.6	Changes in forecast water demands since completion of the Trent economic model . . . . .	168
11.7	Effluent quality and river water quality . . . . .	168
11.8	Recent changes in water quality within the River Trent basin . . . . .	169
11.9	Future prospects . . . . .	173
11.10	Summary and Conclusions . . . . .	173
11.11	References . . . . .	174
11.12	Acknowledgement and Disclaimer . . . . .	174

**Chapter 12 Water supply intake protection****Section 1. River Water data collection and pollution monitoring****J. F. Wallwork, Sunderland and South Shields Water Company**

12.1	Introduction . . . . .	175
12.2	The need for river monitoring . . . . .	176
12.3	The River Wear monitoring station . . . . .	173
12.4	The monitoring system . . . . .	178
12.5	Data collection and transmission . . . . .	180
12.6	Monitoring station performance . . . . .	181
12.7	Current developments . . . . .	184
12.8	Computer training . . . . .	186
12.9	Conclusions . . . . .	186
12.10	Acknowledgements . . . . .	187
12.11	Reference . . . . .	187

**Section 2 Development of a monitoring station****J. W. Schofield, Water Research Centre, Stevenage Laboratory**

12.12	Introduction . . . . .	188
12.13	Improving the reliability of water-quality monitors . . . . .	188
12.14	Specification and programming of the computer . . . . .	190
12.15	Training . . . . .	191
12.16	The fish monitor . . . . .	191
12.17	Conclusions . . . . .	192
12.18	Acknowledgements . . . . .	192
12.19	References . . . . .	192

**Chapter 13 Water quality surveillance****H. A. C. Montgomery, Southern Water Authority**

13.1	Introduction . . . . .	195
13.2	Quality requirements of Southern Water Authority rivers . . . . .	195

13.3	Laboratory organization and responsibilities . . . . .	197
13.4	Sampling programmes . . . . .	198
13.5	Processing and use of data . . . . .	199
13.6	Discussion . . . . .	200
13.7	Acknowledgement and Disclaimer . . . . .	201
13.8	References . . . . .	201
<b>Discussion . . . . .</b>		<b>203</b>
 <b>PART 4 DATA REQUIREMENTS FOR POLLUTION CONTROL</b>		
<b>Chapter 14 Archiving data — an archivist's viewpoint</b>		
D. H. Newsome, Water Data Unit		
14.1	Introduction . . . . .	209
14.2	Part 1 — Development of data collection schemes . . . . .	211
14.3	Part 2 — Archives or databanks . . . . .	216
14.4	Conclusions . . . . .	221
14.5	Acknowledgement and Disclaimer . . . . .	222
14.6	References . . . . .	222
 <b>Chapter 15 The interaction between data collection and water quality modelling</b>		
J. B. H. J. Linders, National Institute for Water Supply, The Netherlands		
15.1	Introduction . . . . .	223
15.2	Models for different types of water contaminants . . . . .	224
15.3	Immission and emission data . . . . .	227
15.4	Model building process . . . . .	229
15.5	Examples for the River Rhine . . . . .	230
15.6	Final considerations . . . . .	235
15.7	References . . . . .	236
 <b>Chapter 16 The importance of flow measurement</b>		
J. H. N. Garland, Water Research Centre, Stevenage Laboratory		
16.1	Introduction . . . . .	237
16.2	The need for flow measurement . . . . .	238
16.3	Mass flow analysis . . . . .	240
16.4	Flow-quality relationships . . . . .	241
16.5	Conclusions . . . . .	244
16.6	References . . . . .	245
 <b>Chapter 17 Sampling: defining the task and planning the scheme</b>		
J. C. Ellis and R. F. Lacey, Water Research Centre, Medmenham Laboratory		
17.1	Introduction . . . . .	247
17.2	Stream and sample . . . . .	248
17.3	The design of a sampling scheme . . . . .	253
17.4	Estimating mean concentration . . . . .	256
17.5	Detecting changes . . . . .	262

17.6	Estimating percentiles . . . . .	264
17.7	Testing for compliance with a standard . . . . .	269
17.8	Further remarks . . . . .	272
17.9	Summary . . . . .	273
17.10	References . . . . .	273
<b>Chapter 18 Time-of-travel and its significance</b>		
K. E. White, P. J. Lee and A. S. B. Belcher, Water Research Centre, Stevenage Laboratory		
18.1	Introduction. . . . .	275
18.2	Theoretical aspects . . . . .	276
18.3	Experimental survey data . . . . .	277
18.4	Discussion . . . . .	285
18.5	Conclusions . . . . .	286
18.6	Acknowledgements . . . . .	287
18.7	References . . . . .	287
<b>Chapter 19 Water quality data requirements of the United Kingdom Government</b>		
E. A. Simpson, Department of the Environment		
19.1	Introduction. . . . .	289
19.2	The river pollution survey . . . . .	291
19.3	The Harmonised Monitoring Scheme . . . . .	292
19.4	Water archive . . . . .	295
19.5	International obligations . . . . .	295
19.6	Global Environmental Monitoring System (GEMS) . . . . .	295
19.7	Council directive on pollution caused by certain dangerous substances . . . . .	296
19.8	Council decision on the exchange of information on the quality of surface fresh water . . . . .	297
19.9	Special requirements . . . . .	298
19.10	Disclaimer . . . . .	298
19.11	References . . . . .	298
19.12	Appendix I – Classification of river quality . . . . .	299
Discussion . . . . .		301
<b>PART 5 WATER QUALITY ASSESSMENT</b>		
<b>Chapter 20 Ecologic value scales for small streams</b>		
Richard J. Benoit, EcoScience Laboratory, USA		
20.1	Introduction. . . . .	305
20.2	Values in society . . . . .	305
20.3	Values in ecology . . . . .	307
20.4	The value scales. . . . .	308
20.5	Validation of the value scales. . . . .	316
20.6	References . . . . .	316
20.7	Appendix I. . . . .	318

<b>Chapter 21 Water quality assessment using the theory of entropy</b>	
S. Tai and T. Goda, National Institute for Environmental Studies, Japan	
21.1 Introduction . . . . .	319
21.2 The entropy of discrete information . . . . .	319
21.3 The evaluation of water quality using diversity index . . . . .	320
21.4 Entropy in thermodynamics . . . . .	321
21.5 The evaluation of the reverse osmosis process using entropy in thermodynamics . . . . .	324
21.6 The relationship between the entropy of discrete information and the entropy of thermodynamics . . . . .	328
21.7 Conclusion . . . . .	329
21.8 References . . . . .	330
Discussion . . . . .	331
<b>PART 6 WATER QUALITY MODELLING</b>	
<b>Chapter 22 The systems analytical approach</b>	
Rolf A. Deininger, University of Michigan, USA	
22.1 Introduction . . . . .	335
22.2 Descriptive or simulation models . . . . .	337
22.3 Prescriptive or optimization models . . . . .	338
22.4 Conclusions . . . . .	339
22.5 Bibliography . . . . .	340
<b>Chapter 23 Modelling for management</b>	
M. B. Beck, International Institute for Applied Systems Analysis, Austria	
23.1 Introduction . . . . .	341
23.2 Water quality management and technological innovation . . . . .	342
23.3 Data and models for real-time management . . . . .	346
23.4 Conclusions . . . . .	354
23.5 References . . . . .	354
<b>Chapter 24 The River Ouse mathematical model</b>	
M. J. Pearson, Anglian Water Authority	
24.1 Introduction . . . . .	359
24.2 Brief description of Cam/Rhee catchment area . . . . .	360
24.3 Water quality in the Cam/Rhee catchment area . . . . .	360
24.4 The steady-state water quality planning model . . . . .	362
24.5 Application of the model to the Cam/Rhee catchment . . . . .	364
24.6 The concept of river quality objectives and water quality criteria . . . . .	371
24.7 Flow and quality conditions adopted for derivation of consent conditions . . . . .	372
24.8 Derivation of effluent quality specification by catchment optimization . . . . .	373
24.9 Limitations of the model . . . . .	378
24.10 Conclusion . . . . .	378

24.11	Acknowledgement and Disclaimer . . . . .	378
24.12	References . . . . .	378
<b>Chapter 25 Mathematical modelling of the River Thames</b>		
<b>P. Casapieri and P. J. Owers, Thames Water Authority</b>		
25.1	Introduction . . . . .	381
25.2	Future predictions . . . . .	382
25.3	Acknowledgement and Disclaimer . . . . .	391
25.4	References . . . . .	391
<b>Chapter 26 Water quality modelling for wastewater management</b>		
<b>William M. Leo and John P. St. John, Hydrosience Inc., USA</b>		
26.1	Introduction . . . . .	393
26.2	Methodology . . . . .	393
26.3	Engineering evaluations . . . . .	396
26.4	Summary . . . . .	397
26.5	Acknowledgements . . . . .	397
<b>Discussion . . . . .</b>		<b>400</b>
<b>Perspective Summing Up . . . . .</b>		<b>401</b>
<b>List of Delegates . . . . .</b>		<b>405</b>
<b>Index . . . . .</b>		<b>419</b>

## PART 2 THE PROBLEMS OF INTERNATIONAL RIVERS

### Chapter 5 The World Health Organization and pollution control in Europe

J. Ian Waddington, World Health Organization

5.1	Introduction . . . . .	65
5.2	Water quality surveillance . . . . .	66
5.3	Toxic hazards . . . . .	68
5.4	International rivers . . . . .	70
5.5	World Health Organization co-operation with individual countries . . . . .	72
5.6	Disclaimer . . . . .	74
5.7	References . . . . .	74

### Chapter 6 Water pollution control on the River Danube

P. Benedek and B. Hock, Research Centre for Water Resources Development, F. Papp, National Water Authority, Hungary

6.1	Introduction . . . . .	77
6.2	Monitoring problems . . . . .	81
6.3	Main outlines of the Gabčíkovo-Nagyymaros hydro-electric project . . . . .	86
6.4	Estimation of the effect of the Barrage system . . . . .	88
6.5	Summary and Conclusions . . . . .	92
6.6	References . . . . .	93
