YOUNG, J.A. and MARTIN, C.J. (Australia). Water and electrolyte excretion in exocrine glands studied by micropuncture and microperfusion techniques.	122
ZACHAR, J. (Czechoslovakia). Comparative aspects of the excitation contraction coupling in skeletal muscle cells.	124

SYMPOSIA

Cardiac Metabolism and Contractile Function

- LÜBBERS, D. W. and SCHUCHHARDT, S. (German Fed. Rep.). Supply and utilization of oxygen in myocardium 129
- MAYER, S. E. (USA). Role of cyclic AMP in cardiac metabolism and contraction 131
- PAGE, E. (USA). New aspects of the transport, state and function of magnesium in heart muscle. 133
- MEERSON, F. Z. (USSR). Mechanism of the development of hypertrophy of the heart 135

Cutaneous Sensibility

- ANDRES, K. H. (German Fed. Rep). Structure of cutaneous receptors 136
- PERL, E. R. (USA). Functional specificity of cutaneous sense organs 138
- DARIAN-SMITH, I. (USA). Information coding in the neural input from the skin 140
- BROWN, A. G. (Scotland). Ascending spinal sensory mechanisms. 143

Energy Transformation in Skeletal Muscle

- GILLIS, J. M. (Belgium). Structural and functional aspects of the control of muscular contraction 145
- JÖBSS, F. F. (USA). The control of energy utilization in muscle. 147
- EDMAN, K. A. P. (Sweden). Time course of active state in skeletal muscle: relation to sarcomere length and movement 149
- WILKIE, D. R. (England). Energy production and its origin 151

Environmental Physiology

- WEINER, J. S. and COLLINS, K. J. (England). Long-term adaptation of man to environmental temperatures. 153
- HINKLE, L. E., Jr. (USA). Features of the man-environment relationship which lend distinctive characteristics to human ecology 155
- BIANCA, W. (Switzerland). Environmental physiology of domesticated animals in ecological perspective 157
- MACFARLANE, W. V. (Australia). Environmental physiology of wild animals in ecological perspective: the ecophysiology of mammals. 159

Frontal Cortex and Behavior

- LURIA, A. R. and HOMSKAYA, E. D. (USSR). The human frontal lobes and their role in the organization of activity 161
- TEUBER, H. L. (USA). The frontal lobes and their function. 163
- KONORSKI, J. (Poland). Higher control of behavioral acts by the prefrontal cortex in animals 165

Hormonal Aspects in Prenatal Ontogenesis

- GOY, R. W. and PHOENIX, C. H. (USA). The development of sexual and sex-related behaviour in female mammals masculinized by early treatment with androgens 167
- COHEN, A., DUPOUY, J. P., GELOSO-MEYER, A. and JOST, A. (France). The fetal hypothalamo-hypophyseal system 169
- NIXON, D. A. (England). Pancreatic hormones and foetal development 171
- GREENGARD, O. (USA). Hormones and enzymic differentiation of the liver 173

Intestinal Absorption and Secretion

- SEMENZA, G. (Switzerland). Digestion and absorption of sugars in the intestine 175
- SIMMONDS, W. J. (Australia). The role of aqueous dispersion in fat and cholesterol absorption 177

	PAGE
WHEELER, H. O. (USA). The mechanisms of bile secretion	179
SCRATCHERD, T. (Scotland). The mechanism of water, electrolyte and protein secretion by the pancreas	181
Mechanism of Inhibition in the Central Nervous System	
✓ DUDEL, J. (German Fed. Rep.). Mechanisms of inhibition in the central nervous system	183
UCHIZONO, K. (Japan). Morphological correlates of inhibitory mechanisms in the CNS of the cat.	184
✓ APRISON, M. H. (USA). Biochemical aspects of inhibitory mechanisms in the CNS	186
✓ WERMAN, R. (Israel). Electrophysiological aspects of the pharmacology of CNS inhibition	188
ITO, M. (Japan). The roles of inhibitory neurones in central nervous mechanisms.	190
Neuronal Activity in Human and Primate Forebrain	
EVARTS, E. V. (USA). Unit studies of the organization of the motor system in unanesthetized monkeys	192
HUBEL, D. H. and WIESEL, T. N. (USA). Organization of the visual system in the cat and monkey	194
BERTRAND, G. (Canada). Studies of unit activity in the human thalamus during stereotaxic surgery	195
BATES, J. A. V. (England). Analysis of unit discharge in the human forebrain during stereotaxic surgery	197
Neuronal Mechanism of the Conditioned Reflex and Habituation	
VORONIN, L. L. (USSR). Microelectrode study of cellular analogs of conditioning	199
TAUC, L. (France). Synaptic mechanism in long term changes in neural activity	201
KANDEL, E. R. (USA). Cellular analysis of habituation and dishabituation of a defensive withdrawal reflex in aplysia	203
HORN, G. (England). Selective mechanisms of habituation	205
Neurophysiology of Hearing	
HIND, J. E. (USA). Coding of information in auditory nerve fibers	207
DESMEDT, J. E. (Belgium). The centrifugal auditory system.	209
ALTMAN, J. A. (USSR). Neurophysiological knowledge pertaining to localization of a sound source in space	211
KEIDEL, W.D. (German Fed. Rep.). Information processing in the higher parts of the auditory pathway	213
Photochemical Aspects of the Receptor Process in Vision	
BLAUROCK, A. E., WILKINS, M. F. and WEBB, N. G. (England). Molecular structure of photoreceptor membranes	215
BONTING, S. L. (Netherlands). Biochemical aspects of the visual process	217
BAUMANN, CH. (German Fed. Rep.). Thermal reactions following the irradiation of rhodopsin in vertebrate photoreceptors	219
RUSHTON, W. A. H. (USA). Visual adaptation by bleaching. What becomes insensitive? . . .	221
Physiology of Mammalian Superior Colliculus and Pretectum	
SPRAGUE, J. M. and BERLUCCHI, G. (Italy). Role of the pretectum-superior colliculus in form discrimination in the cat	223
DIAMOND, I. T. (USA). Two visual systems in tree shrews (<i>Tupaia glis</i>) and squirrels (<i>Sciurus carolinensis</i>)	225
MICHAEL, CH. R. (USA). Visual receptive fields and functional architecture in the superior colliculus of the ground squirrel.	227

RIZZOLATTI, G. (Italy). Directional properties of cat's superior colliculus after visual cortex ablation	229
--	-----

Regulation of Respiration and Acid Base Balance

LOESCHCKE, H. H. (German Fed. Rep.). The acid-base status of cerebrospinal fluid and the regulation of breathing	231
ASTRUP, P. (Denmark). Acid-base status of blood	233
RELMAN, A. S. (USA). Tissue acid-base status	234
RECTOR, F. C. Jr., (USA). Renal regulation of acid-base balance.	236

Regulation of Tubular Transport

WINDHAGER, E. E. (USA). Peritubular control of proximal tubular fluid reabsorption . .	238
BURG, M. B. and ORLOFF, J. (USA). The mechanism of salt and water transport in proximal renal tubules	240
STUMPE, K. O. and OCHWADT, B. (German Fed. Rep.). Fluid reabsorption and filtration rate in single superficial and juxtamedullary nephrons in rats with chronic hypertension	242
MALNIC, G., MELLO AIRES, M. and GIEBISCH, G. (USA). Mechanism of acidification in cortical tubules of rat kidneys	244

Release of Neural Transmitter Substances

KATZ, B. (England). Current views on the mechanism of quantal transmitter release. .	246
SMITH, A. D. (England). Release of catecholamines by exocytosis	247
KRAVITZ, E. A. (USA). Gaba: release from inhibitory axons and the mechanism of its selective accumulation	249
USHERWOOD, P. N. R. (Scotland). Evidence for release of glutamate from arthropod motor nerve endings.	251

Releasing Factors

MCCANN, S. M., FAWCETT, C. P., BISHOP, W., DONOSO, A. O., ILLNER, P., KALRA, P. S., KALRA, S., QUIJADA, M., SCHNEIDER, H. P. G., WAKABAYASHI, K., WATSON, J. T. and KRULICH, L. (USA). Regulation of the adenohypophysis by hypothalamic neurohormones	253
SCHALLY, A. V., ARIMURA, A. and KASTIN, A. J. (USA). Recent advances in hypothalamic hormones regulating pituitary function.	255
GUILLEMIN, R. (USA). Physiological studies and chemical characterization of the hypothalamic thyrotropin — and gonadotropin — releasing factors	257
MARTINI, L. (Italy). New physiological data on hypothalamic releasing factors	259

Transcapillary Exchange in the Peripheral Circulation

WIEDERHIELM, C. A. (USA). Dynamics of capillary fluid exchange.	261
RENKIN, E. M. (USA). Diffusional components of transcapillary exchange	263
YUDILEVICH, D. L. (Chile). Tracer methods for transcapillary exchange studies	265
KARNOVSKY, M. J. (USA). Ultrastructural basis of capillary permeability.	267

What is New in Epithelial Transport?

HOUSE, C. R. (Scotland). Coupling of salt and water movement in epithelia.	269
HAYS, R. M. (USA). The movement of water across epithelial cells	271
LINDEMANN, B. (German Fed. Rep.). Electrical excitation of the outer resistive cell membrane in frog skin epithelium	273
ZERAHN, K. (Denmark). Active transport of the alkalimetals by the midgut of hyalophora cecropia	275

Physiology of Mammalian Superior Colliculus and Pretectum	
SPRAGUE, J. M. and BERLUCCHI, G. (Italy). Role of the pretectum-superior colliculus in form discrimination in the cat	223
DIAMOND, I. T. (USA). Two visual systems in tree shrews (<i>Tupaia glis</i>) and squirrels (<i>Sciurus carolinensis</i>)	225
MICHAEL, CH. R. (USA). Visual receptive fields and functional architecture in the superior colliculus of the ground squirrel.	227

RIZZOLATTI, G. (Italy). Directional properties of cat's superior colliculus after visual cortex ablation	229
--	-----

Regulation of Respiration and Acid Base Balance

LOESCHCKE, H. H. (German Fed. Rep.). The acid-base status of cerebrospinal fluid and the regulation of breathing	231
ASTRUP, P. (Denmark). Acid-base status of blood	233
RELMAN, A. S. (USA). Tissue acid-base status	234
RECTOR, F. C. Jr., (USA). Renal regulation of acid-base balance.	236

Regulation of Tubular Transport

WINDHAGER, E. E. (USA). Peritubular control of proximal tubular fluid reabsorption . .	238
BURG, M. B. and ORLOFF, J. (USA). The mechanism of salt and water transport in proximal renal tubules	240
STUMPE, K. O. and OCHWADT, B. (German Fed. Rep.). Fluid reabsorption and filtration rate in single superficial and juxtamedullary nephrons in rats with chronic hypertension	242
MALNIC, G., MELLO AIRES, M. and GIEBISCH, G. (USA). Mechanism of acidification in cortical tubules of rat kidneys	244

Release of Neural Transmitter Substances

KATZ, B. (England). Current views on the mechanism of quantal transmitter release. .	246
SMITH, A. D. (England). Release of catecholamines by exocytosis	247
KRAVITZ, E. A. (USA). Gaba: release from inhibitory axons and the mechanism of its selective accumulation.	249
USHERWOOD, P. N. R. (Scotland). Evidence for release of glutamate from arthropod motor nerve endings.	251

Releasing Factors

MCCANN, S. M., FAWCETT, C. P., BISHOP, W., DONOSO, A. O., ILLNER, P., KALRA, P. S., KALRA, S., QUIJADA, M., SCHNEIDER, H. P. G., WAKABAYASHI, K., WATSON, J. T. and KRULICH, L. (USA). Regulation of the adenohypophysis by hypothalamic neurohormones	253
SCHALLY, A. V., ARIMURA, A. and KASTIN, A. J. (USA). Recent advances in hypothalamic hormones regulating pituitary function.	255
GUILLEMIN, R. (USA). Physiological studies and chemical characterization of the hypothalamic thyrotropin — and gonadotropin — releasing factors	257
MARTINI, L. (Italy). New physiological data on hypothalamic releasing factors	259

Transcapillary Exchange in the Peripheral Circulation

WIEDERHIELM, C. A. (USA). Dynamics of capillary fluid exchange.	261
RENKIN, E. M. (USA). Diffusional components of transcapillary exchange	263
YUDILEVICH, D. L. (Chile). Tracer methods for transcapillary exchange studies	265
KARNOVSKY, M. J. (USA). Ultrastructural basis of capillary permeability.	267

What is New in Epithelial Transport?

HOUSE, C. R. (Scotland). Coupling of salt and water movement in epithelia.	269
HAYS, R. M. (USA). The movement of water across epithelial cells	271
LINDEMANN, B. (German Fed. Rep.). Electrical excitation of the outer resistive cell membrane in frog skin epithelium	273
ZERAHN, K. (Denmark). Active transport of the alkalimetals by the midgut of hyalophora cecropia	275

AUTHOR INDEX	277
