ISBN: 0-442-25687-6 (v. 6)

# PREFACE

---

This is the sixth volume of a multi-volume treatise on the Principles and Techniques employed for studying biological specimens with the aid of a scanning electron microscope. Since its inception in 1974, the treatise has successfully reflected the growth of scanning electron microscopy in instrumentation as well as in methodology. There was a pressing need to keep the readers abreast of the remarkable expansion of the field in recent years and the ever growing importance of its contributions to the understanding of many problems in the biological and medical sciences. This treatise serves as an international authoritative source, and is designed to cover important new developments systematically. The treatise departs from the tradition that books on methodology present only the contemporary consensus of knowledge. It is written by scholars, and when they have anticipated the potential usefulness of a new method, they have so stated. The authors have not hesitated to include ideas in progress. The treatise should serve as a guide and survey, which can save a newcomer the tedious search for information scattered in biological journals.

This volume has developed over the years through the joint effort of 25 distinguished author-scientists. As a result, a most comprehensive compilation of methods developed and used by a large number of competent scientists has been achieved. The book contains new viewpoints with particular regard to current problems. Areas of disagreement and potential research problems have been pointed out. It is hoped that the readers will become aware that correct interpretation of the information retrieved from electron micrographs is dependent upon an understanding of the principles underlying the methodology and instrumentation.

The basic approach in this volume is similar to that in the previous five volumes in that the methods presented have been tested for their reliability, and are the best of those currently available. The instructions for the preparation and use of various solutions, media, stains, apparatus are straightforward and complete, and should enable the worker to prepare his specimens without outside help. It is suggested that prior to undertaking the processing, the entire procedure should be read and necessary solutions and other media prepared. Each chapter is provided with an exhaustive list of references with complete titles. Full author and subject indexes are included at the end of the book.

It is encouraging to know that the previous five volumes have been received

#### **iv PREFACE**

favorably. It is my impression that this volume will also fulfill its purpose: to provide an understanding of the usefulness, limitations, and potential applications of special methods employed for studying the surface structure, composition, size, number, and location of cellular components, and to provide details of current improvements in the instrumentation.

**M. A. HAYAT**

# Contents of

## Volume 1

- The Scanning Electron Microscope, *J. Temple Black*  
Critical Point Drying, *Arthur L. Cohen*  
Cryotechniques, *Tokio Nei*  
Frozen Resin Cracking Method and Its Role in  
Cytology, *Keiichi Tanaka*  
Preparation of Stereo Slides and Electron Micrograph  
Stereopairs, *Michael Nemanic*  
Low-Magnification Study of Uncoated Specimens,  
*H. F. Howden and L. E. C. Ling*  
Spores, *Ann W. Nickerson, Lee A. Bulla, Jr., and*  
*Cletus P. Kurtzman*  
The Aerial Surfaces of Higher Plants, *P. J. Holloway*  
*and E. A. Baker*  
Plant Cell Walls and Intracellular Structures,  
*Lewis G. Briarty*  
Intracellular Structures, *Barbara J. Panessa and*  
*Joseph P. Gennaro, Jr.*  
Wood, *Karl Borgin*

## Volume 2

- Cathodoluminescence of Organic Chemicals, *M. De Mets*  
Cathodoluminescence of Herbicides, *Richard H. Falk*  
Silver as a Stain, *H. D. Geissinger*  
Sections Incubated in the Histochemical Media,  
*Takashi Makita*  
Scanning and Transmission Electron Microscopy of  
Single Tissue Specimens, *M. Gary Wickham and*  
*David M. Worthen*  
Soft Tissues of Marine Teleosts, *Gary Hobson Dobbs, III*  
Ciliated Epithelia, *Ellen Roter Dirksen*  
Embryonic and Fetal Tissues of Vertebrates,  
*Robert E. Waterman*  
Lung, *Charles Kuhn, III*  
Bone and Other Hard Tissues, *Alan Boyde and*  
*Sheila J. Jones*  
Fossil Palynomorphs, *H. A. Leffingwell*

### **Volume 3**

**Isolated Giant Chromosomes, *Ch. Holderegger***

**Microorganisms, *Agnes C. Kormendy***

**Very Small Biological Specimens, *Thomas L. Hayes and James B. Pawley***

**Microdissection, *J. B. Pawley, Thomas L. Hayes, and J. A. Nowell***

**Tissue Culture and Free-Living Cells, *R. M. Albrecht and A. P. MacKenzie***

**Stereographic Techniques, *Ian C. Clarke***

**Application of a Field Emission Source to SEM, *Leonard M. Welter***

### **Volume 4**

**Preparation and Examination of Specimens at Low Temperatures, *George R. Koch***

**Thiocarbohydrazide-Mediated Osmium Binding: A Technique for Protecting Soft Biological Specimens in the Scanning Electron Microscope, *Robert O. Kelley, Ronald A. F. Dekker, and John G. Bluemink***

**Replica Techniques, *Cornelis H. Pameijer***

**Spermatozoa, *Baccio Baccetti***

**Electron Probe X-Ray Microanalysis, *A. T. Marshall***

**Scanning Electron Spectrometric Microscopy, *Raymond K. Hart***

### **Volume 5**

**Preparation of Myocardial Tissue: Normal and Infarcted, *M. Ashraf and H. D. Sybers***

**Removal of Resins from Specimens for Scanning Electron Microscopy, *William B. Winborn***

**Sectioned Specimens, *Morten Motzfeldt Laane***

**Immunolabelled Spheres as Cell Surface Markers for Scanning Electron Microscopy, *Robert S. Molday***

**Scanning Electron Microscope Autoradiography, *Gisele M. Hodges and Marjorie D. Muir***

**Intermicroscopic (LM, SEM, TEM) Correlation, *H. D. Gelssinger***  
**Correlative Scanning and High Voltage Transmission Electron Microscopy of Single Cells, *Thomas A. Barber***

**Backscattered Electron Imaging (Application of Atomic Number Contrast), *Phillip B. DeNee and Jerrold L. Abraham***

**Scanning X-ray and Proton Microscopy, *Paul Horowitz***

**Scanning Electron Microscopic Applications to Cereal Science and Technology, *Yesajahu Pomeranz***

## PREFACE

### 1 SCANNING TRANSMISSION ENERGY ANALYZING MICROSCOPY

Jack A. Horner

<b>Introduction</b>	<i>1</i>
<b>Electron-Beam-Sample Interactions</b>	<i>2</i>
Elastic Scattering	<i>4</i>
Inelastic Scattering	<i>7</i>
Secondary Electrons	<i>8</i>
Backscattered Electrons	<i>10</i>
X-Rays	<i>10</i>
Auger Electrons	<i>17</i>
Phonon Excitation	<i>18</i>
Plasmon Production	<i>19</i>
Outer-Shell Ionizations	<i>21</i>
Summary	<i>22</i>
<b>STEAM</b>	<i>23</i>
<b>Instrumentation</b>	<i>29</i>
Analyzer	<i>30</i>
Detectors	<i>33</i>
Amplification, Recording, and Display	<i>34</i>
Overall Systems	<i>34</i>
<b>STEAM Applications</b>	<i>39</i>
<b>Specimen Preparation and Damage</b>	<i>42</i>
<b>Concluding Remarks</b>	<i>43</i>
<b>References</b>	<i>43</i>

**vi CONTENTS**

**2 INTRODUCTION TO STEREO SCANNING ELECTRON MICROSCOPY**

Eric J. Chatfield

<b>Introduction</b>	<b>47</b>
<b>Production of Stereo Images</b>	<b>51</b>
<b>Display of Stereo Micrographs</b>	<b>59</b>
<b>Quantitative Measurements from Stereo Pairs</b>	<b>64</b>
<b>Dynamic Stereoscopy</b>	<b>69</b>
<b>References</b>	<b>87</b>

**3 RECORDING OF SCANNING ELECTRON MICROGRAPHS**

William S. Bertaud, Noel E. Flower, and Brian A. Meylan

<b>Introduction</b>	<b>89</b>
<b>Requirements of an Optimum Recording System</b>	<b>90</b>
<b>Factors in the Recording System That May Affect Resolution</b>	<b>91</b>
The Cathode-Ray Tube	92
Photographic System	93
<b>Optimization of Image Recording</b>	<b>93</b>
Testing Overall Performance of the Recording System	93
CRT Focus	94
Use of X-ray Analyzer for Monitoring Performance of Image Recording System	95
Camera Optics	95
Choice of Films and Processing	96
Setting the Number of Lines	96
Setting Brightness and Contrast	97
Printing and Preservation of Photographic Records	98
<b>Concluding Remarks</b>	<b>99</b>
<b>References</b>	<b>99</b>

**4 ION ETCHING IN SCANNING ELECTRON MICROSCOPY**

B. Frisch and S. M. Lewis

<b>Introduction</b>	<i>100</i>
<b>Ion-Etching</b>	<i>103</i>
<b>Principles of Ion-Etching</b>	<i>104</i>
Ion-Beam Etching	<i>105</i>
Radio-Frequency Sputtering	<i>105</i>
Mechanism of Etching	<i>105</i>
<b>Methods</b>	<i>106</i>
Specimen Preparation	<i>106</i>
Cellular Identification	<i>108</i>
Pretreatment of Cells	<i>108</i>
Araldite Sections	<i>110</i>
Methods of Etching	<i>111</i>
Postetching Preparation	<i>111</i>
<b>Interpretation of Etching</b>	<i>112</i>
Ion Impact	<i>112</i>
<b>Demonstration of Effects of Etching of Cells</b>	<i>114</i>
Ion-Beam Etching	<i>114</i>
Radio-Frequency Sputtering	<i>116</i>
<b>Other Experimental Procedures</b>	<i>124</i>
Etch Effects of Altered Red Cell Membranes	<i>124</i>
<b>Future Applications of Ion Etching</b>	<i>131</i>
<b>References</b>	<i>131</i>

**5 CRITICAL-POINT DRYING OF CRYOFRACTURED SPECIMENS**

Walter J. Humphreys, Ben O. Spurlock, and Janet S. Johnson

<b>Introduction</b>	<i>136</i>
<b>Method</b>	<i>138</i>
Stepwise Procedure for Ethanol-Cryofractography	<i>138</i>

## **viii CONTENTS**

Fixation	141
Freeze-Fracturing the Tissue	143
Critical Point Drying	145
Mounting and Coating	146
Observation in the SEM	146
<b>Applications</b>	148
Microvascular Systems	148
Intracellular and Internal Tissue Structure	151
Single Cells and Small Organisms	153
Microprobe Analysis	153
<b>Evaluation of the Methods by Transmission Electron Microscopy</b>	155
Possible Improvements	157
<b>References</b>	157

## **6 METHYL METHACRYLATE INJECTION REPLICA METHOD**

Takuro Murakami

Introduction	159
Injection Medium	159
Resin Injection	160
Maceration of Tissue	160
Trimming of Cast	160
Osmium Impregnation of Cast	160
Scanning Electron Microscopy	160
Comments on Technique	163
Human Glomerular Vessels	167
References	168

**7 VASCULAR CASTING**

B. J. Gannon

<b>Introduction</b>	<i>170</i>
<b>Preliminary Light Microscopy</b>	<i>171</i>
<b>Corrosion Casting Compounds</b>	<i>171</i>
Polyester Plastics	<i>172</i>
Latex Mixtures	<i>173</i>
<b>Preparation of Controlled Viscosity Methyl Methacrylate Casting Mixture (Murakami's Plastic)</b>	<i>175</i>
<b>Coloring of Injection Mixtures</b>	<i>178</i>
<b>Viscosity Measurements of Infusion Mixtures</b>	<i>179</i>
<b>Preparation of Animal/Organ Cast</b>	<i>180</i>
<b>Tissue Removal and Cleaning of Cast</b>	<i>183</i>
<b>Drying of Casts and Preparation for SEM</b>	<i>188</i>
<b>Microscopy and Photography</b>	<i>189</i>
<b>Concluding Remarks</b>	<i>189</i>
<b>Addresses of Suppliers</b>	<i>190</i>
<b>References</b>	<i>191</i>

**8 PREPARATION OF PLAQUE FOR SCANNING ELECTRON MICROSCOPY**

John R. Ebert

<b>Introduction</b>	<i>194</i>
<b>Preparation from Tooth Surfaces</b>	<i>195</i>

**x CONTENTS**

<b>Preparation from Laboratory Cultures</b>	<b>197</b>
<b>Other Material Surfaces</b>	<b>198</b>
<b>Conclusions</b>	<b>200</b>
<b>References</b>	<b>202</b>

**9 SCANNING ELECTRON MICROSCOPY OF HEPATIC TISSUE**

Katzumi Miyai

<b>Introduction</b>	<b>204</b>
<b>Tissue Preparation</b>	<b>205</b>
Fixation	205
Preparation of Tissue Surface	207
Tissue Drying	216
Mounting and Coating	218
Special Procedures	220
<b>Electron Microscopy</b>	<b>221</b>
Secondary Electron Image	221
Backscattered Electron Image	222
Scanning Transmission Electron Microscopy	223
X-Ray Microanalysis	225
<b>Concluding Remarks</b>	<b>225</b>
<b>Additional Notes</b>	<b>226</b>
<b>References</b>	<b>227</b>

**10 SCANNING ELECTRON MICROSCOPY OF THE NORMAL AND  
PATHOLOGICAL MAMMALIAN KIDNEY**

Peter M. Andrews

<b>Introduction</b>	<b>236</b>
<b>Preparation of Kidneys for Scanning Electron Microscopy</b>	<b>237</b>
Preparation of Intact Kidneys	237
