Shackelford, Richard T.

Surgery of the alimentary tract.

Vols. by R. T. Shackelford and G. D. Zuidema.

Previous 1955 ed. by R. T. Shackelford, based on Bickham's Operative surgery, is entered under Bickham, Warren Stone.

Includes bibliographies and index.

Contents: v. 1. Esophagus.—v. 2. Stomach and duodenum, incisions, sutures.—v. 3. Colon, anorectal tract.—[etc.]

1. Alimentary canal—Surgery. I. Bickham, Warren Stone, 1861—. Surgery of the alimentary tract. II. Zuidema, George D. III. Title. [DNLM: 1. Digestive system—Surgery. W1900 S524s]

PREFACE

The first edition of *Surgery of the Alimentary Tract* was published in 1955, and this three volume set proved to be invaluable to thousands of practicing general surgeons and residents in training over the following years. Through the stimulus of Robert B. Rowan, who at the time was the Medical Editor of the W. B. Saunders Company, Dr. Richard T. Shackelford agreed to work on a second edition. Because of the rapid growth and development of surgical technic and new approaches to the treatment of disease, it soon became obvious that the second edition would have to be expanded substantially. At that time, Dr. Shackelford agreed to complete the work on the first volume, dealing with surgery of the esophagus, and to participate actively in preparation of the text on surgery of the stomach and duodenum as well. At this point, Dr. George D. Zuidema was invited to join the enterprise, and he enlisted the help of several individuals, most of whom either were or had been members of the faculty at Johns Hopkins Medical School. In a few instances, we had to go farther afield to obtain the services of individuals with special expertise in other areas, particularly those dealing with pediatric surgery.

At the time of this writing, we have completed work on Volume II, which deals with the stomach and duodenum, incisions useful in approaching the alimentary tract, and the choice of suture material as well as the use of stapling devices. Volume III deals with the colon and the anorectal tract, and includes material on inflammatory disease, malignancies, and trauma. Although we have incorporated new authors and new ideas, we have tried to maintain the approach that was so successful in the first edition—namely, dealing with the embryology, physiology, and anatomy, as well as with surgical diseases and technical considerations. We would like to express our appreciation to the many individuals who have contributed chapters or sections of these volumes, for their dedication and commitment to what has truly become a departmental effort. It is difficult to adequately express the gratitude which we feel for them and for the quality of their participation.

We would also like to thank Robert B. Rowan for his contributions to the enterprise while he was associated with the Saunders Company; Elizabeth Taylor, who was responsible for the entire make-up of the book; Susan Hunter, who worked with us during the early phases; and Lisette Bralow, who has taken over more recently. We would also like to thank a number of other individuals for their help: Kitty Shackelford, Loraine Loss, and Diane Benson for their help, and Lisa Witlin for her many long hours in working on the manuscript as well. We can simply state that this has been a project which all of us have enjoyed, but it is also a project that would not be possible without the cheerful cooperation and goodwill of everyone involved.

RICHARD T. SHACKELFORD, M.D.
GEORGE D. ZUIDEMA, M.D.

CONTENTS

PART TWO THE STOMACH AND DUODENUM

Chapter 1

ANATOMY AND PHYSIOLOGY OF THE STOMACH.....	3
Embryology.....	3
Congenital Malformations of the Stomach.....	4
Surgical Anatomy of the Stomach.....	6
Physiology of the Stomach	13
Gastric Secretion.....	13
Gastric Mucosa	13
Gastric Juice	15
Gastric Mucosal Barrier.....	18
Regulation of Gastric Secretion	18
Measurement of Gastric Acidity	27
Digestive Function of the Stomach	32

Chapter 2

SURGICAL ANATOMY AND PHYSIOLOGY OF THE DUODENUM	38
Surgical Anatomy of the Duodenum	38
Divisions.....	38
Fixation	40
Circulation	42
Physiology of the Duodenum	45

Chapter 3

INTUBATION.....	46
Peroral Gastric Intubation.....	48
Nasal Gastric, Gastroduodenal, and Lower Gastrointestinal Intubation	48
Levin Tube.....	49
Bilumen Gastrojejunostomy Tube	51
Bilumen Gastroduodenal Tube.....	52
Miller-Abbott Tube.....	53
Harris and Cantor Single-Lumen Mercury-Weighted Tubes	54
Complications Attending Use of Indwelling Gastrointestinal Tubes	54
Postoperative Gastric Decompression	59
Routine Postoperative Nasogastric Intubation	63
Omission of Routine Postoperative Gastric Intubation	64

Chapter 4

GASTROSCOPY AND PERITONEOSCOPY	66
Peroral Gastroscopy	66
Esophagogastroduodenoscopy (EGD)	68
Indications and Contraindications	68
Preparation and Procedure	68
Duodenoscopy	70
Endoscopic Retrograde Cholangiopancreatography (ERCP)	72
Other Reported Experiences with Upper GI Endoscopy	75
Fiberoptic Endoscopic Therapeutic Procedures in Upper GI Tract.....	80
Fiberendoscopic Complications.....	88
Anterior Gastroscopy and Duodenoscopy Through a Gastrotomy or Gastrostomy Stoma	89
Peritoneoscopy or Laparoscopy	90
Advantages and Limitations.....	91
Indications and Contraindications for Diagnostic Peritoneoscopy	92
Technic	94
Special Examinations	101
Operative Procedures.....	102
Regional Examination from the Usual Site of Puncture.....	102
Wound Closure	107
Examination in Children	107
Precautions	108
Postoperative Care.....	108
Complications.....	108
Results.....	109
Conclusions.....	110

Chapter 5

OBSTRUCTIVE DISORDERS	111
Acute Dilatation of the Stomach.....	111
Gastrolysis and Duodenolysis (Freeing of Adhesions).....	113
Atresia and Stenosis of the Stomach (Neonatal Gastric Outlet Obstruction).....	114
Combined Congenital Gastric and Duodenal Obstruction	120
Congenital Antral Membrane in Older Children and Adults	123
Antral Mucosal Diaphragm Associated with Esophageal Hiatal Hernia	126
Congenital Duodenal Atresia.....	128
Biliary Tract Abnormalities Associated with Duodenal Atresia	136
Congenital Duodenal Stenosis.....	141
Congenital Intrinsic Duodenal Stenosis Presenting After Infancy.....	144
Megaduodenum	147
Congenital Aganglionic Megaduodenum.....	147
Megaduodenum Due to Congenital Absence of Duodenal Musculature.....	150
Hereditary Megaduodenum without Anatomic Explanation.....	150

Congenital Extrinsic Obstruction of Duodenojejunal Junction	152
Superior Mesenteric Artery (SMA) Syndrome	155
SMA Syndrome without Associated Peptic Ulcer Disease	162
SMA Syndrome with Associated Severe Peptic Ulcer Disease.....	163
Congenital Duodenal Diaphragm Plus SMA Syndrome	165
Pediatric Patients	167
Burned Children	168
Bedridden Combat Casualties.....	169
Cast Syndrome.....	170
Association with Scoliosis.....	171
Volvulus of the Stomach	171
Secondary Volvulus.....	180
Idiopathic or Primary Volvulus	181
Gastric Volvulus in Pediatric Patients	183

Chapter 6

OBSTRUCTION-LIKE DISORDERS	184
Gastropexy	184
Gastric Plication.....	185
Technics	185
Bilobular Stomach or Hourglass Contraction of Stomach.....	188
Etiology	188
Pathology	189
Symptoms	189
Diagnosis	189
Treatment	190
Cascade Stomach	195

Chapter 7

INJURIES OF THE STOMACH.....	197
Gastric Injuries by Blunt Trauma.....	197
Diagnosis	198
Laceration of the Gastric Mucosa.....	204
Transmural Perforation	204
Intramural Hematomas of the Stomach.....	205
Gastric Injuries by Penetrating Trauma.....	206
Missile Wounds of the Stomach	206
Diagnosis	207
Management of Missile Wounds of Stomach	208
Operation.....	210
Gastric Injuries by Stab Wounds.....	212
