CONTENTS

CHAPTER I

<i>Introduction to Diagnosis and Treatment</i>	19
General Remarks on Diagnosis and Treatment • Essential Points in History	

CHAPTER II

<i>Diseases Due to Known Infectious Agents</i>	26
<i>Due to Bacteria:</i> Impetigo Contagiosa • Furuncle • Carbuncle • Ecthyma • Granuloma Pyogenicum • Paronychia • Sycosis Vulgaris • Erysipelas • Chronic Eczema of the External Ear Canal • Infectious Eczematoid Dermatitis • Skin Tuberculosis • <i>Due to Virus Infections:</i> Herpes Simplex • Herpes Zoster • Molluscum Contagiosum • Warts.	

CHAPTER III

<i>Superficial Fungus Infections</i>	61
Dermatophytosis of the Feet and Its Complications • Tinea Corporis • Tinea Cruris • Tinea Versicolor • Tinea Capitis • Fungus Infections of the Nails • Monilia Infections of the Skin	

CHAPTER IV

<i>Acne Vulgaris and Acne Rosacea</i>	93
---	----

CHAPTER V

Contact Dermatitis 107

Industrial Dermatoses • Skin Testing • Plant Dermatitis
• Diaper Rash (Erythema Gluteale)

CHAPTER VI

The Eczema Group 134

Eczema of Infancy and Childhood • Atopic Eczema • Neu-
rodermatitis (Atopic Eczema) of the Adult • Localized Neu-
rodermatitis (Lichen Simplex Chronicus)

CHAPTER VII

The Erythemas 155

Dermatitis Medicamentosa • Urticaria • Erythema Multi-
forme • Secondary Erythema Multiforme

CHAPTER VIII

Malignant Lymphomas 179

Mycosis Fungoides • Hodgkin's Disease • The Leukemias
• Reticulum Cell Sarcoma

CHAPTER IX

Skin Manifestations of Vascular Disturbances 187

Purpuric Lesions and Vascular Diseases of the Lower Extrem-
ities • Varicose Eczema

CHAPTER X

<i>Psoriasis and Seborrheic Dermatitis</i>	203
--	-----

CHAPTER XI

<i>Diseases of the Scalp</i>	226
--	-----

Alopecia • Seborrhea Capitis • Psoriasis of the Scalp •
Folliculitis of the Scalp

CHAPTER XII

<i>Common Pigmentary Disturbances of the Skin</i>	233
---	-----

Treatment of Commonly Encountered Hyperpigmentary Dis-
turbances • Ephelides (Freckles) • Chloasma • Treat-
ment of Depigmentary Disturbances • Vitiligo

CHAPTER XIII

<i>Skin Manifestations Commonly Associated with Endocrine Disturbances and Vitamin Deficiencies</i>	241
---	-----

Vitamin Deficiencies • Skin Manifestations of Endocrine
Diseases • The Pituitary • Thyroid • Adrenals • The
Testicles • Pancreas • Hypertrichosis

CHAPTER XIV

<i>New Growths of Benign Origin</i>	253
---	-----

Benign Epidermal Neoplasms • Benign Neoplasms of Meso-
dermal Origin

CHAPTER XV

Precancerous and Cancerous Conditions of the Skin . . . 271

Precancerous Dermatoses • Malignant Neoplasms of Epidermal Origin

CHAPTER XVI

Bullous Diseases 287

Bullous Dermatoses • Pemphigus • Dermatitis Herpetiformis (Duhring's Disease)

CHAPTER XVII

The Collagen Diseases 302

Lupus Erythematosus • Dermatomyositis • Scleroderma

CHAPTER XVIII

Diseases Due to Animal Parasites 314

Scabies • Pediculosis

CHAPTER XIX

Syphilis 319

Clinical Manifestations • Revised Treatment Schedules for Syphilis

CHAPTER XX

Diagnosis and Treatment of Eruptions on Genitalia and Perianal Region 332

CHAPTER XXI

Miscellaneous 353

Lichen Planus • Pityriasis Rosea • Sarcoidosis • Erythema Nodosum • Amyloidosis Cutis

Index 371

PREFACE

The assignment given in writing this book is to set clearly and concisely before the busy practitioner a survey of dermatologic disorders as they are commonly met with in daily practice. It seems to us therefore, that the common dermatologic problems should be discussed without reference to the unusual conditions.

This will be a personal book. Our own personal belief concerning etiology and pathologic-physiology will be presented. The presentation of a clear and thorough enough discussion of each disease will not be sacrificed to brevity. The personal viewpoint in writing this book will be especially reflected in the therapy suggested. Only those measures with which the authors have had thorough and long enough experience will be recommended. In discussing the treatment it is felt that the complications of the treatment, that is the side effects, when the drug is given internally, or the sensitization or irritation potentials when used externally, should be cited. If these are clearly stated it may well save over-treatment dermatitis. Over-treatment dermatitis is a common finding in our practice when a patient is referred to us.

It is quite timely to write a book such as this because of the recent introduction of many potent and new therapeutic agents in the field of dermatology. It can well be said that
