Contents

Symposia and Physical Sciences

Symposium on Cryomicroscopy and Biological Radiation Damage

1 Cryofixation

L. Bachmann

9 Instrumentation for Cryosectioning

H. Sitte

19 Cryoprotection on Organic Specimens

J. Dubochet, A. McDowell, R. Freeman and J. Lepault

25 Frozen-hydrated Specimens

Y. Talmon

33 Radiation Damage in Biological Materials in Perspective with other Limitations

E. Kellenberger

Symposium on Surfaces

43 Imaging of Inorganic Surfaces in the UHV-EM

K. Takayanagi

51 Imaging of Biological Membranes

H. P. Zingsheim

59 Imaging of Cell Surfaces by Photoelectrons

H. Griffith, G. F. Rempfer and K. K. Nadakavvaren

69 Photoemission Microscopy and Surface Analysis

H. Bethge, G. Gerth and D. Matern

79 Scanning Electron Microscopy of Surfaces

L. Reimer

Symposium on Image Processing and Recording

89 Image Analysis in Molecular Biology

A. C. F. Cremers, M. J. Schilstra, L. Bosch and J. E. Mellema

Numbers = Pages

- 97 3-D Reconstruction of Aperiodic Biological Objects
W. Hoppe
- 107 Averaging Techniques and Correspondence Analysis
J. Frank and M. van Heel
- 115 Noise in high Resolution Electron Microscopical Images
O. Kübler
- 123 On-line Digital Image Processing
K. C. A. Smith
- 131 Low-dose Techniques
K.-H. Herrmann

Symposium on Elemental Analysis

- 143 X-ray Mapping, Electron Energy Loss Analysis and Quantitative Electron Probe Analysis in Biology
A. P. Somlyo, H. Shuman and A. V. Somlyo
- 151 Electron Energy Loss Analysis in Biology
R. F. Egerton
- 159 Electron Energy Loss Analysis in Materials Science
C. Colliex
- 167 Recent Results in EELS
O. L. Krivanek
- 173 Elemental Analysis and Chemical Mapping
D. Krahl
- 181 Auger Electron Spectroscopy and Microscopy: Progress and Prospects
J. A. Venables and D. J. Fathers

Physical Science and Electron Optics

- 191 Introduction to the Session on Contrast and Image Formation
F. Lenz
- 199 Optimization of Phase Contrast Imaging by Hollow Cone Illumination and Simultaneous Image Translation
F. Zemlin, W. Kunath and K. Weiss

- 201 Quality of CTEM Bright-Field Images in the Presence of Strong Scatterers
R. Eusemann and H. Rose
- 203 The Investigation of Electron Microscope Images with Partial Coherence and Virtual Apertures
W. Krakow
- 205 Effects of Variation of Detector Aperture Size on High Resolution STEM Phase Contrast Images
J. H. Butler
- 207 The Role of Spherical Aberration in the Transfer Function for High Resolution Imaging of Periodic Structures
G. Lehmppuhl
- 209 Conventional Bright-Field Versus Scanning Dark-Field Imaging
A. Engel, A. Massalski and E. Kellenberger
- 211 A Comparison of Split and Quadrant Detector Systems for STEM Imaging
G. R. Morrison and J. N. Chapman
- 213 STEM Dark-Field Imaging of Biological Samples
W. Hax
- 215 Image Formation by Inelastically Scattered Electrons with Application to Microanalysis
H. Kohl and H. Rose
- 217 The Effect of Electronic State on the Direct Imaging of Atoms
Y. Fujiyoshi, T. Kobayashi, M. Tsuji and N. Uyeda
- 219 The Calculation of Kikuchi Patterns using Dynamical Theory
K. van Roost and R. Serneels
- 221 The "Edge" Effect in Parallel Moiré Patterns of Crystal Sandwiches Observed in the Electron Microscope
D. Kunstelj and K. Kranjc
- 225 Reversal Contrast and Registration of Atom Clusters in Through-Focus Series of Electron Micrographs
K. Takamiya, N. Baba, K. Adachi and K. Kanaya
- 227 Contrast Variation of Reconstructed Lattice Images due to Defocus and Illuminating Angle of the Incidence by Digitizing Electron Micrographs
M. Shino, N. Baba and K. Kanaya

- 229 Use of Defocus Electron Micrographs for Investigations of Phase Objects
S. K. Maksimov, S. N. Bezryadin, M. G. Bezryadina, N. I. Borgardt and
V. D. Verner
- 231 Imaging and Crystallographic Contrast with a 60 keV Ga⁺ Scanning Ion Micro-
scope
R. Levi-Setti, K. Lam and T. R. Fox
- 233 True Surface Topography: The Need for Signal Mixing
B. Volbert
- 235 Measurement of the Scattering Factor Phase and Aberration Coefficient of Partial
Coherence Angle from Optical Diffractograms of Electron Micrographs
F. Ishigaki, H. Kihara, K. Takamiya, M. Shino and K. Kanaya
- 237 Digital Enhancement and Localization of Atom Clusters Divided by a Band Pass
Filter in Diffractograms of Electron Microscopy
K. Kanaya, K. Takamiya and C. Shinohara
- 239 Digital Processing of Scanning Electron Micrographs by Using the Scanning-
Densitometer System
K. Kanaya, M. Kai, E. Oho and C. Shinohara
- 241 Low Noise Boron Support Films Obtained by Means of Ion Beam Sputter
Deposition to High Resolution Electron Microscope
K. Hojou, K. Adachi, K. Ota and K. Kanaya

Electron-Matter Interaction

- 243 On Some Aspects of Fast Electron Interactions with Matter
B. Jouffrey
- 253 Spatial Distribution of Secondaries Released by Backscattered Electrons in
Silicon and Gold for 20–70 keV Primary Energy
F. Hasselbach and U. Rieke
- 255 Angular Distributions of Scattered Electrons from Solid Films in Reflection and
Transmission
H. J. Kohl, H. Niedrig and G. Langer
- 257 Electron Beam Interaction with Thin Films – Results of a Model Calculation
H. J. Dudek
- 259 Electron Beam Interaction with Solids – Quantitative Evaluation of a Model
Calculation
H. J. Dudek

- 261 Energy Distribution of Backscattered Kilovolt Electrons
Z. Czyzewski and H. Szymański
- 263 Imaginary Atomic Scatterin Amplitudes for Electron Diffraction
S. Hamid Rahman
- 265 Energy Distribution of Backscattered Electrons for Different Scattering Angles by Solving Transport Equation
K. E. Hoffmann and H. Schmoranzner
- 267 Prediction of Mean Depth of Electron Penetration in a Tilted Specimen Using Monte-Carlo Technique
I. Chaari and C. Landron
- 269 Dynamical Effects in Short Range Order Diffuse Scattering
D. Haentjens and R. Serneels
- 271 Electron Channelling Radiation at Low Energies
J. C. H. Spence and C. J. Humphreys
- 273 Electron Beam Induced Changes in the Cathodoluminescence from MgO in the SEM
C. Ballesteros, J. Llopis and J. Piqueras
- 275 Application of Fano Plot to Electron Energy Loss Spectroscopy in STEM
D.-R. Liu

Electron Optics

- 277 Magnetic Electron Images
T. Mulvey
- 285 Some Design Considerations in Electrostatic Electron Optics
G. F. Rempfer
- 287 Correction of the Spherical Aberration in Electron Microscopy by Means of the Foil Lens
M. Hibino, T. Hanai, M. Kuzuya and S. Maruse
- 289 Magnetic-Field-Free Objective Lens System Around a Specimen for Observing Fine Structure of Ferromagnetic Materials
K. Tsuno and T. Taoka

- 291 Pinhole Objective Lens for Analytical TEM
K. Yada and C. Kimura
- 293 A Low Aberration Probe Forming Lens with Large Free Space Around the Specimen
L. Y. Huang and S. C. Cheng
- 295 The Magnetic Electron Lens of Minimum Spherical Aberration and its Application for SEM
S. Suzuki, A. Ishikawa, H. Kawamoto and S. Yamazaki
- 297 A New Correction Lens
S. Okayama, H. Kawakatsu and K. Kanaya
- 299 Correction of the Spiral Distortion in the Electron Microscope
A. A. Alshwaikh
- 301 Image Distortion Free Conditions in a Transmission Electron Microscope with a Triple Polepiece Projector Lens
K. Tsuno and Y. Harada
- 303 The Use of the Diffraction Mini-Lens in the Optical System of a Transmission Electron Microscope
J. Podbrský
- 305 Multipurpose Objective Lens and Specimen Stages for a High Voltage TEM
T. G. Sparrow, T. Tang and U. Valdré
- 307 Magnetic Field Distribution and Optical Properties of Objective Lens with 1.3 Å Resolution in High Voltage Electron Microscope
T. Honda, K. Tsuno and H. Watanabe
- 309 Paraxial Rays and Aberrations in Field Emission Diode
K. Ura and A. Takaoka
- 311 On the Linear Transformations of Gaussian Trajectory Parameters and their Influence Upon Aberrations
J. Ximen
- 313 Microcomputer-Aided Design in Electron Optics
H. A. I. Nasr
- 315 A Generalized Coefficient Formula of the Third Order Magnetic Deflection Aberration and its Relations with the Raster Pattern
Sho-quian Ding

- 317 Infinite Elements for the Computation of Open Lens Structures
B. Lencová and M. Lenc
- 319 Proposal for an Electron Beam Blanking System with Monochromator Effect
E. Plies
- 321 Energy Analyzing Detector for Large Scan Field Electron Beam Testing
W. H. Bruenger, F. J. Hohn, D. P. Kern, P. J. Coane and T. H. P. Chang
- 323 Design Parameters for Combined Plane Cylindrical Mirror Energy Analyzer
J. Yao and L. Wang
- 325 A Magnetic Spectrograph with Increased Dispersion for Electron Microscopy
V. P. Afanas'ev, L. A. Baranova, L. P. Ovsyannikova and S. Y. Yavor
- 327 Single Field Condenser Objective Used as an Energy Loss Spectrometer
X. Liu
- 329 Computer Controlled Measurement and Compensation of Axial Aberrations of an
Electron Microscope
G. Koboldt, H. Koops, A. Nauber, K. Weindel and B. Westerwald
- 331 A Simple Microprocessor-Based Lens Control System
A. M. MacLeod, L. M. Mackenzie, J. N. Chapman and A. J. Craven
- 333 Simultaneous TEM and S (T) EM Imaging
P. Hagemann
- 335 Development of a 1 MV STEM Attachment
A. Ishikawa, C. Morita, M. Hibino and S. Maruse
- 337 A Charge Simulation Method for the Calculation of the Single Pole-Piece Lens
Field Distribution
L. Kordas
- 339 On the Design of the Magnetic Deflection System in SEM and Electron Beam
Exposure Equipments
Shou-quian Ding

Instrumentation

Electron Sources

- 343 A Field Emission Cathode in Electron-Optical Instruments
A. Delong

- 351 Electron Optical Properties of Low Energy Field Emission Gun in the Energy Range from 100 to 2000 eV
T. Ichinokawa, M. Sekine, Z. S. Gur and A. Ishikawa
- 353 Comparison of Low-Voltage High-Current Electron Microprobes Using Different Types of Cathodes
M. Büchsel, H. Rose and R. Spehr
- 355 Low Energy, High Current Field Emission Electron Gun
R. Speidel and P. Brauchle
- 357 Field Emission System for High Beam Currents
R. Speidel and G. Benner
- 359 A Magnetic-Field-Superposed Electron Gun with a Point Cathode
H. Shimoyama, K. Nimura, M. Suzuki and S. Maruse
- 361 Theoretical and Experimental Analyses of Electron Gun Characteristics
T. Ohye and Y. Uchikawa
- 363 Improved High Brightness Electron Source Using LaB_6 Single Crystal Material
F. J. Hohn
- 365 The Electron Optical Properties of a Special Cathode Deposited with LaB_6 Films Made by Ion Beam Sputter Deposition for the High Resolution Scanning Electron Microscopy
T. Tsukamoto, T. Gunji, K. Hojou and K. Kanaya
- 367 A New Preparation Method of Carbide Emitters and their Characteristics
K. Yada
- 369 Investigation of Cs-Coated MIM-Thin-Film-Cathodes Using a Simple UHV-Emission-Microscope
E. Weiss, W. Nisch and C. Jönsson
- 371 1.5 MV Electron Accelerator for the 1.5 MeV HV Electron Microscope at LBL
G. Szaloky and K. Trümpy

Electron Microscopes

- 373 Construction of a 300 kV High Resolution Electron Microscope
H. Hashimoto, H. Endoh, T. Honda, Y. Harada, S. Sakurai and T. Etoh

- 375 A New Ultra-High-Vacuum High Resolution 1 MV Microscope
K. Yagi, K. Takayanagi, S. Nagakura, K. Kobayashi, G. Honjo, M. Kubozoe,
K. Shii, I. Matsui, S. Katagiri and T. Yanaka
- 377 A Development of a Micro-Computer Controlled 200 kV Electron Microscope
S. Kamimura, S. Isakozawa, T. Ohashi, Sadao Terakado and H. Kobayashi
- 379 A Field Emission SEM Controlled by Microprocessor
S. Saito, Y. Nakaizumi, H. Mori and T. Nagatani
- 381 EM 410: An Instrument Dedicated to Biological Applications
W. Hax
- 383 A Low Voltage SEM Optimized for High Resolution Topographical Imaging
J. Pawley and J. Wall
- 385 In-Series DP-DP Vacuum Pumping System for SEM
S. Norioka, N. Yoshimura, S. Nakagawa and O. Manabe
- 387 Simply Constructed Specimen Holder for Philips Eucentric Goniometer Stage
Allowing Unlimited Tilt at High Resolution
J. P. Chalcroft
- 389 High Performance Analytical Scanning Electron Microscope Provided with C-F
Mini Lens and Zoom Condenser Lens System
S. Nakagawa, Y. Shibuki, K. Sahara and S. Norioka

Cryomicroscopy and Low-Dose Techniques

- 391 Construction Principles for Stable Superconducting Lens Systems as Required for
Obtaining High Resolution Images
G. Lefranc, E. Knapek and I. Dietrich
- 393 Further Enhancement of Cryoprotection of Organic Crystals at 4 K by Embedding
E. Knapek, H. Formanek, G. Lefranc and I. Dietrich
- 395 Development and Performance of Low-Temperature Imaging at the Bould
HVEM (Preliminary Results)
M. Fotino and T. H. Giddings, jr.
- 397 STEM Darkfield Imaging of Frozen-Hydrated Cryo-Sections
P. M. Frederik, W. M. Busing and W. M. A. Hax
- 399 Cryo-Transfer from Light Microscope to Electron Microscope
S. Grund

- 401 TEM Stage for In-Situ Ion Bombardment of Thin Foils at Liquid Helium Temperatures
E. M. Hörl
- 403 Modification and Performance of a Cryokit with Automatic, Separate Temperature Regulation of Chamber Atmosphere, Specimen and Knife
T. Barnard
- 405 Atomic Resolution Images of Radiation Sensitive TCNQ-Metal Complexes
T. Kobayashi, Y. Fujiyoshi and N. Uyeda
- 407 Minimization of the Specimen Load in Low-Dose Microscopy
M. Menzel
- 409 A Study on Photographic Registration of Low-Dose Micrographs
H. Tietz

Electron Holography, Interferometry and Lithography

- 411 Electron Holography
H. Lichte
- 419 Magnetic Domain Observation of Thin Ferromagnetic Films by Electron Holography
A. Tonomura, T. Matsuda, H. Tanabe, N. Osakabe and H. Fujiwara
- 421 Observation of Micro-Magnetic Field by Electron Holography
A. Tonomura, T. Matsuda, J. Endo, R. Suzuki, N. Osakabe, H. Umezaki, Y. Sug and H. Fujiwara
- 423 Phase Contrast Improvement and Residual Noise Problems in Electron Microscopical Holography
K.-J. Hanßen
- 425 Limitation of Resolution in Electron Microscopical Fourier Transform Holography
G. Ade
- 427 Electron Microscopy and Holography Employing Coherent Quasi-Cylindrical Illumination Waves
R. Lauer
- 429 A New Holographic Method Using a High Resolution Electron Microscope
G. Matteucci, G. F. Missiroli and G. Pozzi

- 431 Electron Interferometric Measurement of the Enhancement of the Phase Modulation in Low Voltage Electron Holography
H. Lichte and R. Hornstein
- 433 Measurement of the Phase Shift Between Electron Waves Due to a Magnetic Flux Enclosed in a Metallic Cylinder
G. Möllenstedt, H. Schmidt and H. Lichte
- 435 Probe Forming Systems
H. C. Pfeiffer

Electronic Recording

- 443 A Digital Storage Unit Combined with an Electron Microscope for Recording Comparable ECPs Obtained with Different Signals
M. Brunner, D. Burchard, W. Hylla, H.-J. Kohl, H. Niedrig and D. Wendtland
- 445 A Parallel Detection System for Energy Loss Spectrometry
S. Csillag, K. L. Monson, D. E. Johnson and E. A. Stern
- 447 A Two-Dimensional Spatially Resolving Electron Detection System
L. J. Balk and J. B. Elsbrock
- 449 A Microcomputer-Based Scanning Electron Diffraction System
B. E. Storey and A. G. Fitzgerald
- 451 A Single Crystal of $Y_3Al_5O_{12}: Ce^{3+}$ as a Scintillator in SEM and a Transparent Screen in Electron Optical Devices
R. Autrata, P. Schauer, Jo. Kvapil and Ji. Kvapil
- 453 High Definition Colour Imaging in SEM
A. Antonovsky

Lithography

- 455 Electron Beam Lithography System with a Field Emission Source and Variable Spot Shaping
A. Delong, V. Kolářík and B. Lencová
- 457 A One Part Per Million SEM Metrology Tool
I. A. Crutwell and B. A. Wallman
- 459 Development of a Vector Scan Interface for Electron Beam Pattern Generation
N. K. L. Raja and A. Singh

- 461 The Use of Transmission Electron Microscope as a Viewing Tool for High Resolution Soft X-Ray Contact Microscopy
P. C. Cheng, H. B. Peng, R. Feder and J. W. McGowan
- 463 New Electron-Lithographic Process of Submicron Resolution "Contact" Electron Lithography
K. A. Valiev, L. V. Velikov, S. S. Markianov, R. H. Mahmutov, A. V. Rakov, N. Y. Ustinov and M. N. Filippov

Information and Reconstruction

Image Statistics, Filtering, Phase Information

- 467 Future Directions in Electron Image Processing
P. W. Hawkes
- 475 Automatic Particle Analysing System for Freeze-Fracture Electron Microscopy
B. Wolf and V. Speth
- 477 Quantitative Analysis of Intramembrane Particle (IMP) Distribution on Biomembranes by a Computer-Based Technique
Q. Niedermeyer and H. Wilke
- 479 A Technique for Applying the Radial Distribution Function to Quantitatively Describe Freeze-Fracture Faces
D. J. Goodchild and J. T. Duniec
- 481 A Statistical Method to Identify and Quantify Structural Anisotropy
V. F. Ferrario, L. Vizotto, M. P. Molinari Tosatti, A. Miani
- 483 Influence of Exposure on Resolution of Photographic Film
A. Ono
- 485 Textural Analysis to Assess the Reproduction Fidelity of Metal Evaporation Layers
N. Lins and O. Kübler
- 487 Optical Reconstruction of Crystal Lattice Images by Fourier Averaging
J. R. Parsons and C. W. Hoelke
- 489 Fast Averaging of Images of Particles Using Analogue Techniques
R. Guckenberger
- 491 New Aspects in Processing of Digitally Stored Series of Low-Fose Images
W. Kunath, H. Sack-Kongehl, K. Weiss and M. Kessel

- 493 A 13th Subunit Revealed in Lumbricus Terrestris Hemoglobin in STEM Low Dose Images
M. Ohtsuki and A. V. Crewe
- 495 Digital Processing Method for Structure Analysis of Regular Objects in Biological Specimen
N. Baba, M. Osumi, M. Sakamoto, M. Mukai, R. W. Horne and K. Kanaya
- 497 Digital Processing of Lattice Images from a Pair of Diffraction Spots Selected by Aperture Functions in Diffratogram of Electron Micrographs
K. Kanaya, N. Baba, M. Shino and T. Ichijo
- 499 Compound of Different Focus Images in High Resolution Electron Microscopy
N. Baba, K. Takamiya and K. Kanaya
- 501 Three-Dimensional Representation Method of Electron Microscopic Image with Shading Techniques by Computer Processing
N. Baba, A. Hijikata and K. Kanaya
- 503 Image Compound of Through Focus Micrographs for Structure Analysis of Thin Crystal Specimen
M. Shino, N. Baba and K. Kanaya
- 505 Structure Analysis of Thin Films made by Sputter Deposition by the Digital, Processing of Electron Micrographs
T. Nakatani, K. Takamiya, K. Hojou, T. Imura and K. Kanaya
- 507 Structure Analysis of LaB_6 Film Made by Ion-Beam Sputter Deposition by the Digital Processing of Electron Micrographs
Y. Ishikawa, T. Nakatani, K. Takamiya, K. Hojou and K. Kanaya
- 509 Filtering of Multi-Detector STEM Images in Karhunen-Loeve Expansion Space – Separation of Carbon Foil
M. H. Savoji and R. E. Burge
- 513 On the Statistical Analysis of Low-Dose CTEM Micrographs of Weak Biological Objects
C. H. Slump and H. A. Ferwerda
- 511 Statistical Analysis of Object Wave Reconstruction in the Low-Dose Regime
C. H. Slump and H. A. Ferwerda
- 515 Computational Trials for Phase Retrieval in Electron Microscopy from Image and Diffraction Patterns
J. Ximen and J. Yan
- 517 Electron Diffraction Patterns from Thermitase Crystals
M. B. Sherman, E. V. Orlova, R. Kleine, N. A. Kiselev and B. K. Vainstein

On-Line Processing

- 519 A Digital On-Line Diffractometer and Image Processor for HREM
J. C. H. Spence, M. Disko, H. Higgs, J. Wheatley and H. Hashimoto
- 521 Elimination of Artefact in FFT Pattern of Atom Resolution Electron Micrographs Caused by the Limited Areas
M. Tomita, H. Hashimoto, T. Ikuta, Y. Yokota and H. Endoh
- 523 On-Line Digital Image Processing for HREM
B. J. Muggridge, E. D. Boyes, M. J. Goringe and G. Carlow
- 525 Automatic Correction of Image Drift in the HREM
P. Atkin, S. J. Erasmus and K. C. A. Smith
- 527 Beam Alignment by On-Line Image Variance Measurements
W. O. Saxton, D. J. Smith, S. J. Erasmus and K. C. A. Smith
- 529 Assessment of a Method for Auto-Focusing and Astigmatism Correction in High Resolution Electron Microscopy
S. J. Erasmus, K. C. A. Smith and D. J. Smith
- 531 A Digital Processor for Use with STEM Images
A. V. Crewe and M. Ohtsuki
- 533 High Speed and High Quality Histogram Equalization Processor for the Electron Microscope
J. Matsuda, K. Nakadai, T. Kiyohara, T. Masuda and N. Morito
- 535 Fast Video Processing of Electron Micrographs: Object Recognition by Local Transforms Using VAP - 80
Hj. Keller, A. Favre, A. Comazzi and E. R. Weibel
- 537 Quantitative Analysis of Microparticle form through Fourier and Walsh Spectra by means of SEM-Microcomputer System
A. Yu. Sasov, V. I. Osipov and V. N. Sokolov
- 539 Acquisition and Analysing System for SEM-Images
G. Egle, M. Mast, M. Köhl and G. Wagner
- 541 Operating Scanning Electron Microscopes Directly Linked to a Quantimet 900 Image Analyser
A. C. Terrell and J. C. Barker
- 543 Recording of Topography by Secondary Electrons with a Two-Detector System
L. Reimer and C. Tollkamp
