

PHARMACOLOGY AND THERAPEUTICS

*A Textbook for Students and Practitioners of
Medicine and its Allied Professions*

BY

ARTHUR GROLLMAN, Ph.D., M.D., F.A.C.P.

*Lecturer in Pharmacology and Toxicology, The Medical Branch, and Professor and
Chairman of the Department of Experimental Medicine, The Southwestern Medical
School, The University of Texas; Attending Physician, Parkland Memorial
Hospital; Consultant in Internal Medicine, Baylor University Hospital;
Consultant, Veterans Administration Hospital, Dallas, Texas;
Civilian Consultant, The Surgeon General, U.S. Air Force.*

Contents

PART I.

INTRODUCTORY CONSIDERATIONS

CHAPTER	PAGE
I. Introduction	21
Definitions	21
History	22
Relation to Other Medical Sciences	24
Mode of Action of Drugs	24
Stimulation, Depression, Irritation	24
Distribution and Concentration	26
Elective Affinity of Drugs	26
Protoplasmic Poisons	27
Local, General and Remote Actions	27
Pharmacologic Syndromes	28
General Theories of Pharmacologic Action	28
Biological Antagonisms	30
Chelating Agents	31
Chemical Constitution and Pharmacologic Action	31
Conditions Modifying the Effects of Drugs	33
Drug Idiosyncrasy	38
The Dose-Effect Relationship of Drugs	39
Fate of Drugs in the Body	41
Methods of Administration	41
Chemical Character of Drugs	46
The Pharmacopeias and other Official Publications	49
Official Preparations	50
Biological Assay	52
Toxicology	54

PART II.

DRUGS ACTING PRIMARILY ON THE CENTRAL NERVOUS SYSTEM

2. General Anesthetics	57
History	57
Stages of Anesthesia	58
Action	62
On Nervous System	62
On Respiration	63
On Circulation	65
On Heart	66
On Blood Vessels	68
Other Actions	68
Mechanism of Action	69
Absorption and Excretion	70
Complications of Anesthesia	71
Ether	72
Chloroform	73
Nitrous Oxide	73
Ethylene	76
Cyclopropane	77

CHAPTER	PAGE
Vinyl Ether	78
Tribromoethanol	79
Trichlorethylene	80
Ethyl Chloride	80
Acetylene	80
Intravenous Anesthesia	81
Combined Anesthesia	83
Therapeutic Use	84
3. The Aliphatic Alcohols	89
Ethyl Alcohol	89
Action	89
Absorption and Excretion	95
Metabolism	96
Ethyl Alcohol as a Food	97
Other Effects	98
Alcoholism	99
Disulfiram	101
Therapeutic Uses	102
Methyl Alcohol	103
Other Aliphatic Alcohols	105
Glycols and Glycerol	105
4. The Opium Alkaloids and Other Addicting Narcotic Drugs	108
Analgesics	108
The Opium Alkaloids	111
Chemistry	112
Morphine	114
Action	114
Absorption and Excretion	121
Drug Addiction	121
Codeine	124
Papaverine	125
Therapeutic Uses	126
Synthetic Derivatives of the Opium Alkaloids	128
Heroin	128
Dihydrocodeinone	129
Dihydromorphinone	129
Metopon Hydrochloride	130
Methorphan	130
Levorphanol Tartrate	130
Ethylmorphine	130
Apomorphine	131
Nalorphine	132
Non-Opiate Addicting Analgesics	132
Meperidine	133
Methadone	134
Alphaprodine Hydrochloride	135
Antitussive Drugs	136
5. Antipyretic and Antirheumatic Analgesics	141
History	141
Antipyretic Analgesics	141
Acetanilid and its Derivatives	141
The Antipyrine Series	142
Symptoms	143
Action	144
Therapeutic Uses	148
Phenylbutazone	149

CHAPTER	PAGE
Antirheumatic Analgesics	150
Salicylates	150
Colchicine	156
Probenecid	159
Treatment of Gout	161
6. Hypnotics and Sedatives	165
Barbituric Acid Derivatives	166
Chemistry	166
General Action	167
Habituation, Addiction and Poisoning	170
Therapeutic Uses	172
Chloral Hydrate	173
Other Chloral Derivatives	175
Paraldehyde	176
Other Non-Barbiturate Hypnotics	177
7. Anticonvulsants or Antiepileptics	182
The Bromides	184
Distribution and Excretion	185
Chronic Intoxication	185
Therapeutic Use	186
Other Bromine Containing Sedatives	187
Hydantoin Derivatives	188
Diphenylhydantoin	188
Phethenylate	190
Methantoin	190
Oxazolidine Derivatives	190
Phenobarbital and Related Drugs	191
Mephobarbital	191
Primidone	192
Miscellaneous Anticonvulsants	192
8. Stimulants of the Central Nervous System: Convelsants	195
Strychnine	196
Pentylene-tetrazole (Leptazol)	200
Nikethamide	201
Picrotoxin	202
Caffeine, Theobromine and Theophylline	203
Action	204
Absorption and Excretion	208
Therapeutic Uses	209
Coffee and Tea	209
Other Central Nervous Stimulants	210
Pipradol Hydrochloride	210
Methyl Phenidylacetate	210
9. Psychomimetic and Tranquilizing Drugs	215
Serotonin	215
Metabolism	216
Function	216
Pharmacology	216
Assay	217
Antiserotonins	217
Hallucinogens and Model Psychoses	218
Lysergic Acid Diethylamide	218
Other Hallucinogens	220
Cannabis	220
Mescaline	222
Bulbocapnine	222

CHAPTER	PAGE
Tranquilizing Drugs	223
The Rauwolfia Alkaloids	224
Chemistry	224
Pharmacology	226
Mechanism of Action	226
Therapeutic Use	227
Chlorpromazine and its Congeners	228
Pharmacology	229
Therapeutic Use	229
Meprobamate	230
Action	230
Therapeutic Use	231
Other Ataraxics	231
Therapeutic Use	232
Antimetic Drugs	233
Motion Sickness	233

PART III.

DRUGS STIMULATING OR ACTING ON THE PERIPHERAL NERVOUS SYSTEM

10. Drugs Acting on Autonomic Effector Cells	237
Neurohormonal Mechanism Underlying Autonomic Nervous System Activity	237
Chemical Mediators of Autonomic Activity	240
Mediators of Adrenergic Action	241
Classification of Autonomic Drugs	242
Autonomic Functions	243
Sensitization by Denervation	248
Carotid Body and Sinus	249
Therapeutic Uses	249
11. Drugs Stimulating Structures Innervated by Adrenergic Nerves	251
Epinephrine	251
Biogenesis	251
Metabolism	252
General Actions	253
Mechanism of Action	261
Therapeutic Uses	262
Norepinephrine	263
Comparison of Norepinephrine and Epinephrine	264
Ephedrine	266
Relation of Chemical Structure to Pharmacologic Activity	268
Amphetamine	269
Isoproterenol	271
Other Aromatic Sympathomimetic Amines	272
Aliphatic Amines	276
12. Drugs Inhibiting Structures Innervated by Adrenergic Nerves	281
Adrenolytic Drugs	281
Ergot and Its Alkaloids	281
Toxicology	284
Action	285
Ergonovine	288
Assay	289
Therapeutic Uses	289
Dihydrogenated Ergot Alkaloids	290
Dioxane Derivatives	291

CHAPTER	PAGE
Dibenzylchlorethylene	292
Other Adrenergic Blocking Agents	294
13. Drugs Stimulating Structures Innervated by Cholinergic Nerves	297
Acetylcholine	298
Role of Acetylcholine in Transmission of Nervous Impulses	298
Cholinesterases	299
Pharmacologic Action	300
Acetyl-Beta-Methacholine	301
Therapeutic Uses	302
Carbachol	303
Bethanechol Chloride	303
Furtrethonium Iodide	304
Edrophonium Chloride	305
Muscarine	305
Mushroom Poisoning	308
Pilocarpine	309
Therapeutic Uses	312
Arecoline	312
Physostigmine	312
Symptoms	313
Therapeutic Uses	315
Neostigmine	316
Therapeutic Uses	316
Amibenonium Chloride	317
Benzopyrinium Bromide	318
Alkyl Phosphate Esters	318
Isofluorophate	318
Effect of Drugs on Intraocular Pressure	320
14. Cholinergic Blocking Agents	324
The Atropine Series	324
Occurrence	325
Chemistry	326
Action	327
Hyoscyamine	337
Scopolamine	338
Preparations	339
Therapeutic Uses	339
Synthetic Congeners of the Belladonna Alkaloids	341
Synthetic Anticholinergic Drugs Used in Ophthalmology	341
Synthetic Anticholinergic Drugs Used in Gastrointestinal Disorders	342
Drugs Used in the Treatment of Parkinsonism	346
15. Drugs Inhibiting Autonomic Ganglia	351
Ganglionic Blockade	351
General Pharmacologic Effects	352
Nicotine	353
Tobacco	359
Tetraethylammonium Salts	361
Methonium Compounds	362
Hexamethonium	364
Pentamethonium	365
16. Drugs Inhibiting Skeletal Muscles	367
Neuromuscular Block	367
Curare	368
Chemistry	368
Action	368

CHAPTER	PAGE
Antagonists	370
Therapeutic Use	371
Other Curareform Agents	372
Curarizing Drugs Acting as Competitive Blocking Agents	372
Tubocurarine Chloride	372
Gallamine Triethiodide	374
Muscle Relaxants Acting by Depolarizing Block	375
Decamethonium	375
Succinylcholine Chloride	375
Benzoquinonium Chloride	375
Other Muscle Relaxants	376
Mephesisin	376
Zoxazolamine	376
17. Histamine and Antihistamine Compounds	379
Histamine	379
Physiological Role	379
Pharmacology	381
Metabolism	383
Therapeutic Use	384
Role in Allergy and Anaphylaxis	385
Histamine-Antagonizing Agents	386
Chemistry	386
Therapeutic Uses	391
18. Local and Regional Anesthetics	396
Local Anesthesia	396
Cocaine	400
Chemistry	400
Action	400
Toxicology	400
Cocaine Habit	405
Therapeutic Use	405
Synthetic Local Anesthetics	406
Mechanism of Action	408
Procaine	408
Metabolism	409
Other Local Anesthetics	410
Slightly Soluble Local Anesthetics	412

PART IV.

DRUGS ACTING PRIMARILY ON THE CARDIOVASCULAR, RENAL, DIGESTIVE,
AND HEMATOPOIETIC SYSTEMS

19. Drugs Acting Primarily on the Heart	417
The Digitalis Series	417
Chemistry	418
Action	422
Therapeutic Uses	433
Preparations, Dosage and Methods of Administration	437
Digitalis Intoxication	441
Drugs Modifying Cardiac Rhythm	443
Quinidine	443
Procainamide Hydrochloride	446
20. Drugs Acting Primarily on the Vascular System	450
Action of Drugs on Vascular Smooth Muscle	450
Nitrites, Nitrates and Nitrous Esters	451
Amyl Nitrite	451

CHAPTER	PAGE
Sodium Nitrite	455
Nitroglycerin	455
Pentaerythritol Tetranitrate	556
Ethyl Nitrite	456
Therapeutic Uses	456
Drugs Used in Hypertension	458
Drug Therapy	459
Mechanism of Action	459
Rauwolfia Alkaloids	461
Ganglionic Blocking Agents	462
Hydralazine	464
Veratrum Alkaloids	466
Minor Drugs	468
21. Drugs Acting Primarily on the Gastrointestinal Tract	471
Simple Bitters	471
Demulcents	472
Digestants	473
Carminatives	477
Absorbents	477
Antacids	478
Cathartics	481
Aperients	485
Anthracene Purgatives	487
Phenolphthalein	489
Drastic Vegetable Purgatives	491
Saline Cathartics	492
22. Drugs Acting Primarily on the Kidney: Diuretics	500
Water	502
Osmotic Diuretics	502
Urea	502
Saline Diuretics	504
Acidifying Agents	504
Xanthine Drugs	505
Mercurial Diuretics	508
Other Diuretic Agents	512
Therapeutic Use of the Diuretics	514
23. Drugs Acting on the Blood and Hematopoietic System	518
Blood and Its Fractions	518
Antianemic Agents	520
Iron	523
Liver and Liver Preparations	526
Stomach Preparations	529
Vitamin B ₁₂	530
Folic Acid	531
Folinic Acid	534
Coagulants	535
Local Coagulants	536
Vitamin K	536
Other Systemic Coagulants	539
Anticoagulants	540
Heparin	540
Bishydroxycoumarin	541
Other Inandione Derivatives	544
Ethyl Biscoumacetate	544
Cyclocumarol	544
Phenindione	544
Diphenadione	544

CHAPTER	PAGE
Warfarin Sodium	544
Anisindione	544

PART V.

CHEMOTHERAPEUTIC AGENTS

24. Chemotherapy	547
History	547
Experimental Chemotherapy	548
Chemotherapeutic Activity	549
Pharmacology	550
Drug Resistance	550
Mechanism of Action	551
Chemotherapeutic Agents	552
Trypanosomiasis	553
The Diamidines	554
Anti-Tuberculosis Drugs	556
Aminosalicylic Acid Derivatives	556
Isonicotinic Acid Derivatives	557
Treatment	559
Therapeutic Uses	559
Undesirable Side-Effects	561
25. The Sulfonamides and Related Compounds	564
History	564
Chemistry	565
Pharmacology	566
Toxicology	567
Principal Sulfonamide Derivatives	569
Sulfone Compounds	572
Treatment of Leprosy	573
Action	574
Therapeutic Uses	575
26. Antibiotics	582
Penicillin	582
History	582
Chemistry	583
Absorption and Excretion	587
Mode of Action	588
Side-Effects	588
Preparations	589
Therapeutic Use	591
Dosage and Mode of Administration	594
Streptomycin and Dihydrostreptomycin	596
Absorption and Excretion	598
Therapeutic Use	599
Dosage and Methods of Administration	600
The Tetracycline Derivatives	601
Tetracycline	602
Chlortetracycline	602
Oxytetracycline	604
Erythromycin	605
Carbomycin	606
Chloramphenicol	606
Novobiocin Sodium	608
Cycloserine	609
Neomycin	609

CHAPTER	PAGE
Oleandomycin	610
Viomycin	611
Antibiotics Derived from Bacteria	611
Bacitracin	611
Polymyxin	612
Antibiotics with Antifungal Activity	613
Nystatin	613
Fumagillin	614
Amphotericin B.	614
Other Antibiotics	615
Antibiotic Therapy	616
27. Quinine and Other Antimalarials	623
Malaria	623
Drug Therapy of Malaria	624
Quinine	626
Chemistry	626
Action	627
Toxicology	629
Excretion	630
Therapeutic Uses	630
Quinacrine (Mepacrine)	632
Quinoline Derivatives	634
Chloroquine Phosphate	634
Amodiaquin Hydrochloride	636
Primaquine Phosphate	636
Chlorphenyl Derivatives	637
Chloroguanide	637
Pyrimethamine	638
28. Emetine and Other Amebocidal Drugs	642
Emetine	643
Toxicology	645
Therapeutic Use	645
Arsenical Amebocides	646
Carbarsone	646
Glycobiarsol	647
Arsthinol	648
Hydroxyquinoline Derivatives	648
Antimalarial Drugs	650
Antibiotics	650
29. Anthelmintics	653
Helminthiasis	653
Diethylcarbamazine	655
Miracil D	656
Intestinal Helminthiasis	656
Aspidium	658
Pelletierine	660
Chenopodium	660
Santonin	661
Carbon Tetrachloride	661
Tetrachlorethylene	662
Hexylresorcinol	663
Gentian Violet	663
Leche de Higueron	664
Piperazine	664
Drugs Used in Treatment of Enterobiasis	664

CHAPTER	PAGE
30. Local Antiinfectives	668
Antiseptics and Disinfectants	668
Surgical Antiseptics and Disinfectants	673
Soaps and Other Detergents	673
Alcohols	674
Phenol	675
Substituted Phenols	677
Mercuric Chloride and Other Inorganic Mercury Compounds	678
Organic Mercurials	680
Silver and its Salts	682
Other Metal Compounds	683
Peroxides and Other Oxidizing Disinfectants	684
Boric Acid and Borax	686
Iodine Compounds	686
Chlorine Preparations	687
The Antiseptic Dyes	689
Furane Derivatives	690
Antiseptics Used Chiefly in Skin Diseases	691
Antifungal Agents	691
Tar	693
Sulfur and Sulfur Containing Compounds	694
Balsams	695
Genito-Urinary Antiseptics	695
Methenamine	696
Mandelic Acid	696
Nitrofurantoin	698
Disinfectants for Rooms, Furniture, <i>etc.</i>	699
Insecticides and Rodenticides	702
Emollients and Protectives	704
Astringents	705
Volatile Oil Series	706
Skin Irritants and Counter-Irritation	707
Toxic Skin Irritants	710
31. Chemotherapy of Cancer and Other Neoplastic Disorders	712
Hormones	714
Radioactive Compounds	715
Radioiodine	715
Radiogold	715
Radioactive Phosphorus	715
Antimetabolites	715
Aminopterin Sodium	716
Mercaptopurine	716
The Treatment of Leukemia	717
Alkylating Agents	717
Mechlorethamine Hydrochloride	717
Triethylene Melamine	718
Triethylene Thiophosphoramidate (Thiotepa)	719
Bisulfan	720
Chlorambucil	720
Miscellaneous Agents	721
Urethane	722

PART VI.

THE HORMONES AND DRUGS AFFECTING ENDOCRINE FUNCTION

32. The Pituitary Gland	725
The Adenohypophysis	725
Chemistry	726

Contents

17

CHAPTER	PAGE
Therapeutic Use	728
Corticotropin	728
The Neurohypophysis	730
Chemistry	730
Physiology	731
Therapeutic Uses	737
The Melanocyte-Stimulating Hormone	738
33. The Thyroid	741
Hormones of the Thyroid	741
Chemistry	741
Biogenesis	742
Factors Affecting Thyroid Function	743
Pharmacological Action	744
Therapeutic Uses	746
Antithyroidal Drugs	749
Iodine	749
Thiouracil Derivatives	750
Methimazole	752
Carbimazole	753
Radioiodide	753
34. The Parathyroid Glands	756
The Parathyroid Hormone	756
Action	758
Therapeutic Uses	760
35. The Adrenals	763
Physiology	763
Salt and Water Metabolism	763
Carbohydrate Metabolism	765
Other Functional Effects	765
Chemistry	766
Biosynthesis and Metabolism	768
Regulation of Adrenal Cortical Activity	768
Available Adrenal Cortical Hormones	769
Desoxycorticosterone	769
Cortisone and Hydrocortisone	769
Fluorocortisone Acetate	773
Aldosterone	773
Prednisone and Prednisolone	773
Therapeutic Uses	774
36. The Pancreas	778
Insulin	778
Chemistry	778
Action	779
Therapeutic Uses	782
Preparations	783
Dosage	783
Diabetic Acidosis	785
Insulin Resistance	785
Insulin Substitutes	785
Glucagon	786
Alloxan	786
Phlorhizin	787
37. The Sex Hormones	789
The Gonadotrophins	789
The Estrogens	792

CHAPTER	PAGE
Chemistry	792
Preparations	793
Physiology	794
Therapeutic Uses	795
Progestational Hormones	798
Therapeutic Use	798
Uterine Relaxants	799
The Androgens	800
Preparations	802
Therapeutic Uses	802

PART VII

THE VITAMINS

38. The Fat-Soluble Vitamins	805
Vitamin A	807
Chemistry	808
Absorption and Excretion	810
Assay	810
Mechanism of Action	810
Therapeutic Uses	811
Vitamin D	812
Chemistry	812
Toxicology	814
Therapeutic Uses	814
Vitamin E	815
Occurrence	816
Chemistry	816
Therapeutic Use	817
Essential Fatty Acids	817
39. The Water-Soluble Vitamins	819
The Vitamin B Complex	819
Thiamine (Vitamin B ₁)	820
Riboflavin	823
Nicotinic Acid and Nicotinamide	824
Pyridoxine	827
Pantothenic Acid	828
Biotin	830
Para-aminobenzoic Acid	830
Choline, Inositol and other Lipotropic Agents	830
Ascorbic Acid	832
Chemistry	832
Pathology	834
Therapeutic Uses	834
The Bioflavonoids	835

PART VIII

WATER AND OTHER INORGANIC COMPOUNDS

40. Water and Other Non-Metallic Compounds	837
Electrolyte and Water Metabolism	837
Water	839
Therapeutic Uses	841
Heavy Water	842
Tritium Oxide	842
Sodium Chloride	843
Action	844
Correction of Abnormalities in the Body Fluids	845

CHAPTER	PAGE
Potassium Salts	848
Therapeutic Uses	850
Lithium, Cesium and Rubidium Salts	852
Ammonium Salts	852
Caustic Alkalis	854
Ion Exchange Resins	858
Salts of Alkaline Earths	858
Calcium	858
Magnesium Salts	862
Barium Salts	864
Strontium Salts	865
Balanced Salt Solutions	865
Acids	866
Anions	869
Phosphorus and Phosphates	869
Acetates, Lactates and Citrates	870
Oxalates	872
Fluorides	873
Sulfides	874
Iodine and Iodides	875
Gases	881
Oxygen	881
Carbon Dioxide	883
Carbon Monoxide	885
Nitrogen Dioxide	886
Helium	886
Xenon	886
41. The Metalloids: Arsenic, Antimony and Bismuth	889
Inorganic Preparations of Arsenic	889
Chronic Arsenic Poisoning	890
Action	892
Therapeutic Uses	893
Treatment of Arsenic Poisoning	893
Organic Arsenic Preparations	893
Mechanism of Action	896
Therapeutic Use	896
Antimony Compounds	897
Toxicology	897
Trivalent Antimony Compounds	898
Pentavalent Antimony Compounds	900
Therapeutic Uses	900
Bismuth Compounds	901
Toxicology	901
Organic Bismuth Preparations	903
Therapeutic Uses	903
42. The Heavy Metals	905
Iron	908
Metabolism	909
Absorption and Excretion	910
Therapeutic Use	911
Copper	911
Zinc	911
Aluminum	914
Lead	915
Chronic Lead Poisoning	916
Treatment of Lead Poisoning	920
Silver	921

CHAPTER	PAGE
Mercury	922
Symptoms	923
Chronic Poisoning	924
Treatment of Mercury Poisoning	926
Therapeutic Uses	927
Gold	927
Minor Metals	929
Radioactive Elements and Isotopes	933

PART IX

MISCELLANEOUS DRUGS

43. Immunologic Agents	937
Vaccines, Toxins and Toxoids	937
Antitoxic Sera, Immune Sera and Antitoxins	940
44. Diagnostic and Other Agents of Clinical Importance	943
Diagnostic Agents	943
Enzymes	945
Protein Hydrolysates	945
Drugs Used to Modify the Diet	946
Agents Used in Roentgenography	947
Appendix A—Prescription Writing	951
Appendix B—Classification of Drugs According to Their Therapeutic Uses	959
Index	967
