PREFACE

My experiences as a trial lawyer and trial advocacy teacher have made me realize that the effective trial lawyers always seem to have two complementary abilities. First, they have developed a methodology that thoroughly analyzes and prepares each case for trial. Second, they have acquired the technical skills necessary to present their side of a case persuasively in court. It is the synthesis of both qualities — preparation and execution — that produces effective trial advocacy.

This text approaches trial advocacy the same way. It presents a methodology for trial preparation and reviews the thought processes a trial lawyer should utilize before and during each phase of a trial. In addition, it discusses and gives examples of the technical courtroom skills that must be developed to present evidence and arguments in a persuasive way to the trier of fact. This is done in the firm belief that effective trial advocacy is both an art and a skill, and that while a few trial lawyers may be born, most are made. Artistry becomes possible only when basic skills have become mastered.

In trial work, as in many other fields, there is no "right way" to try cases, or "authority" on trial techniques. There are just effective, time-tested methods that are as varied as lawyers are numerous. Consequently, while the text presents standard methods of examining witnesses, introducing exhibits and making arguments, there are different approaches to all of the tasks involved in trial work. Thus, the examples set forth in the text are not the only way of effectively accomplishing the particular task involved. The text makes use of these examples because inexperienced trial lawyers need concrete, specific examples of effective techniques they can learn and utilize in court. Other effective ways of doing things are necessarily a product of experience, and only through experience will you determine what works best for you.

The emphasis of this text is on jury trials, since a lawyer who can effectively try cases to a jury should also be competent during a

bench trial. The examples are principally from personal injury and criminal cases, since they involve easily isolated examples of trial techniques, and they constitute the substantial majority of cases tried to juries. If the methodology and techniques applicable to the uncomplicated, recurring situations presented here are mastered, more complex cases can be handled competently as well.

Several persons were instrumental in the development of this text. I gratefully acknowledge the help of Thomas Geraghty, Professor of Law at Northwestern University, whose extensive analysis and review have influenced almost every page of this text; the Honorable Warren D. Wolfson, Judge of the Circuit Court of Cook County, Illinois, whose initial encouragement and continuous advice were largely responsible for my beginning and completing this text; and my wife, Susan Mauet, who patiently supported this undertaking from its inception. Many sources, of course, have contributed to the development of my ideas and approaches to trial work which are expressed in this text. These include many members of the bar and bench with, against, and before whom I have tried cases, as well as several teaching institutions in which I have been active, particularly the National Institute for Trial Advocacy.

I am also indebted to Fred Lane, Attorney at Law, of Chicago, who first taught me the fundamentals of trial techniques, the Honorable Marvin E. Aspen, Judge of the United States District Court for the Northern District of Illinois, the Honorable Benjamin S. Mackoff and the Honorable Robert J. Collins, both Judges of the Circuit Court of Cook County, Illinois, all of whom contributed significantly to my understanding of trial techniques. Finally, I am indebted to Mary Vezina, who tirelessly typed and edited the numerous drafts of the manuscript.

FUNDAMENTALS OF TRIAL TECHNIQUES

CONTENTS

Preface xi

I. PREPARATION FOR TRIAL

§1.1. Introduction 1
§1.2. Organization of files 1
§1.3. Trial notebook 2
§1.4. Theory of the case 8
§1.5. Preparation of witnesses 11
§1.6. Preparation of cross-examinations 15
§1.7. Order of proof 18
§1.8. Rebuttal 20
§1.9. Attorney's conduct during trial 21

II. JURY SELECTION

§2.1. Introduction 23
§2.2. Do you want a jury? 23
§2.3. Jury examination and selection methods 25
§2.4. Purpose of jury selection 31
§2.5. Theories of jury selection 31
§2.6. Checklist for examinations 35
§2.7. Voir dire examinations 36
§2.8. Summary checklist 46

III. OPENING STATEMENTS

§3.1. Introduction 49
§3.2. Elements 50
§3.3. Structure 58

	1. Introduction	59
	2. Parties	61
	3. Scene	63
	4. Instrumentality	63
	5. Date, time, and weather	64
	6. Create issue	65
	7. How it happened	65
	8. Basis of liability/nonliability	67
	9. Anticipating and refuting defenses	68
	10. Damages (civil cases)	69
	11. Conclusion	70
§3.4.	Examples of opening statements	71

IV. DIRECT EXAMINATION

§4.1.	Introduction	85
§4.2.	Elements	86
§4.3.	Occurrence witnesses	98
§4.4.	Conversations	122
§4.5.	Telephone conversations	124
§4.6.	**Foundation**—refreshing present recollection	129
§4.7.	Records witnesses	131
§4.8.	Preparation of expert witnesses	135
§4.9.	Qualifications checklists for expert witnesses	139
§4.10.	Examples of expert direct examinations	141
§4.11.	Lay witness opinions	160
§4.12.	Hypothetical questions	161
§4.13.	Reputation witnesses	164
§4.14.	Adverse witnesses	169
§4.15.	Hostile witnesses	170
§4.16.	Using deposition transcripts	171
§4.17.	Redirect examinations	172

V. EXHIBITS

§5.1.	Introduction	177
§5.2.	How to get exhibits in evidence	178
§5.3.	Foundations for exhibits	184
	1. Tangible objects	185

	2.	Tangible objects — chain of custody	186
	3.	Photographs and motion pictures	191
	4.	Diagrams and models	193
	5.	Summary charts	195
	6.	Drawings by witnesses	197
	7.	Demonstrations by witnesses	198
	8.	X-ray films	200
	9.	Sound and video recordings	203
	10.	Checks	207
	11.	Signed documents	209
	12.	Letters	212
	13.	Business records	216
	14.	Computer printouts	220
	15.	Copies	222
	16.	Certified records	224
	17.	Stipulations	224
	18.	Pleadings and discovery	225
	19.	Past recollection recorded	226
§5.4.		How and when to use exhibits	228

VI. CROSS-EXAMINATION

§6.1.	Introduction	237
§6.2.	Should you cross-examine?	238
§6.3.	Purposes and order of cross-examinations	240
§6.4.	Elements of cross-examinations	241
§6.5.	Eliciting favorable testimony	252
§6.6.	Discrediting cross-examinations	254
§6.7.	Impeachment	268
§6.8.	Special problems	284
§6.9.	Special witnesses	288
§6.10.	Summary checklist	294

VII. CLOSING ARGUMENTS

§7.1.		Introduction	295
§7.2.		Elements	296
§7.3.		Structure	305
	1.	Introduction	306

	2.	Parties	308
	3.	Scene	308
	4.	Instrumentalities	309
	5.	Weather and lighting	309
	6.	Damages (defendant)	310
	7.	Issue	311
	8.	What happened	312
	9.	Basis of liability/nonliability or guilt/innocence	313
	10.	Corroboration	314
	11.	Other side and refutation	316
	12.	Instructions	317
	13.	Damages (plaintiff)	318
	14.	Conclusion	321
§7.4.	Rebuttal		322
§7.5.	Examples of closing arguments		323

VIII. OBJECTIONS

§8.1.	Introduction		362
§8.2.	When to make objections		362
§8.3.	How to make objections		364
§8.4.	Offers of proof		366
§8.5.	Evidentiary objections		368
	1.	Relevance	370
	2.	Materiality	371
	3.	Privileged communication	372
	4.	Best evidence rule	373
	5.	Parol evidence rule	375
	6.	No foundation	375
	7.	No authentication	376
	8.	Hearsay	377
	9.	Leading	378

PREPARATION FOR TRIAL

§1.1. Introduction 1
§1.2. Organization of files 1
§1.3. Trial notebook 2
§1.4. Theory of the case 8
§1.5. Preparation of witnesses 11
§1.6. Preparation of cross-examinations 15
§1.7. Order of proof 17
§1.8. Rebuttal 20
§1.9. Attorney's conduct during trial 21

§1.1. *Introduction*

You have just been called into the office of a partner of the litigation firm that recently hired you. The partner tells you that he has a case which will be going to trial soon that seems "just right" for you. Witnesses have been interviewed. Discovery has been completed. Pretrial motions have been filed and ruled on. Settlement negotiations have just collapsed. The case now needs to be tried, and you're the person who will try it. With a smile, the partner hands you the file. Apprehensively, you walk out of his office, thinking: "My God. What do I do now?"

What you do, how you do it, and why you do it is what this book is all about, from beginning to end. This chapter will discuss the all-important first steps: how to organize files, prepare a trial notebook, develop a theory of the case, prepare witnesses for direct examinations, structure the order of proof, and prepare cross-examinations of your opponent's witnesses.

§1.2. *Organization of files*

Ours is an age of records, and the field of law is no exception. Everything is routinely recorded and routinely duplicated. Even a

simple case can, and invariably will, by the time it approaches trial, generate an extensive collection of paperwork. Consequently, all files must be organized, divided, and indexed to provide immediate and accurate access to the contents at any time during trial. The lawyer who is organized will appear prepared, confident, and professional to both the court and jury.

Files should usually include the following indexed folder categories:

1. *Court papers:*

These should normally be bound in the order filed or entered:

a. pleadings
b. discovery (interrogatories, depositions, etc.)
c. motions and responses
d. orders
e. subpoenas
f. jury instructions

2. *Evidence:*

Records should be placed in clear plastic document protectors and have evidence labels attached. While records will depend on the specific case, the following are commonly involved:

a. bills, statements, and receipts
b. correspondence between parties
c. photographs, maps, diagrams
d. business records

3. *Attorney's records:*

a. running case history (log of attorney's activities in the case)
b. retainer contract, bills, costs
c. correspondence
d. legal research
e. miscellaneous

There is no magic in organizing files. Most offices have developed their own systems for the types of cases they routinely handle. The important point to remember is that your system must be logical, clearly indexed, and bound whenever possible, so that records can be retrieved quickly and accurately.

§1.3. *Trial notebook*

Trial material should be organized in a way that is most efficiently useful at trial. This is different from organizing case files, discussed above. Each part of a trial — jury selection, opening statements, direct and cross-examinations, and closing arguments — requires separate organization and preparation. Accordingly, paperwork

necessarily generated during the preparation of each phase of the trial should be organized in a logical, easily retrievable way.

Two methods, the divider method and trial notebook method, are most commonly used. While ordinarily either of the two methods is used, they can also effectively be used in conjunction, especially in large cases. In such instances the notebook can be used as a working trial notebook which keys into a larger divider system. This is frequently done, particularly in large commercial litigation cases.

1. Divider method

Under this method each part of the trial (jury, openings, plaintiff witnesses, defense witnesses, closings, etc.) receives a separate, labeled file divider, which has in it all papers pertinent to that phase of the trial. By merely pulling out the appropriate section, the lawyer has immediately at his disposal all necessary materials.

The advantage of the divider method is that it is usually better suited to a long, complex case when the paperwork is so voluminous it cannot physically be organized and contained in a trial notebook.

The disadvantages are primarily logistical. A divider method is only as reliable as the lawyer maintaining it. If a file is misfiled or its contents misplaced, it cannot be readily located and its utility is eliminated. If more than one lawyer represents a party and shares the files, the possibilities of disruption are much greater. (The organization of the divider method is essentially identical to the trial notebook method, discussed below.)

2. Trial notebook

Under this method all necessary materials for each part of the trial are placed in a 3-ring notebook in appropriately tabbed sections. The advantages are that once placed in the notebook, the materials cannot be lost or misplaced, and are immediately located simply by turning to the appropriate section.

While it should be organized to meet individual lawyers' needs, the notebook system works best when it contains enough tabbed sections to make the contents easily located. The following sections are commonly incorporated in trial notebooks:

a. Facts

This section should contain all reports, witness statements, diagrams, charts, and other factual materials. It should also contain a

summary sheet which recites the parties, attorneys (address and telephone), the counts of the complaint or indictment, and the essential facts and chronology of events involved.

b. Pleadings

This section should contain the complaint or indictment, answer, and reply of each party to the suit. The pleadings should be in chronological order. It should include a pleading abstract when the pleadings are sufficiently complex. Where the charge or complaint is based on a specific statute, a copy of the statute should also be included. Keeping the elements instructions (see jury instructions below) in this section is also useful.

c. Discovery

Included should be the following discovery documents:

1. interrogatories and answers to interrogatories
2. deposition abstracts, cross-indexed to tabbed and marked depositions
3. other discovery (notices to admit and produce, etc.)

d. Motions

This section should contain all pretrial motions, responses, and orders which have already been made, as well as any that will be presented prior to or during the trial.

e. Jury selection

This section should contain:

1. *Jury chart.* A jury chart is necessary to record the basic background information about each juror obtained during the voir dire examination, so that you can review it before deciding which jurors you will peremptorily challenge. Most lawyers use a jury box diagram to record the jurors' names and backgrounds. When a challenge is exercised, simply put a large "P" (plaintiff), "D" (defendant) or "C" (cause) through the appropriate box to record which party exercised the peremptory challenge or if it was for cause.
