POLITICS
AMONG NATIONS

TO

the memory of my father

FOREWORD

This book developed from lectures in international politics which I have given at the University of Chicago since 1943. Though it covers the traditional subject matter of courses in international relations, special emphasis is placed on basic problems of international law, international organization, and diplomatic history.

I owe a great debt of gratitude to my students. Their lively class discussions contributed to the clarification of my own thinking on the problems discussed in this book. Among my students who rendered special services to make this book possible I must mention a few. Miss Mary Jane Beneditz made a stenographic transcript of the lectures given in the Winter Quarter of 1946 as well as of the class discussions. Her intelligent and painstaking labor made available the only written record of those lectures; without that record the book could not have been completed in little more than a year. Mr. Alfred Hotz assisted me ably in the research in the initial stages of the work. The main burden of assistance, however, fell upon Mr. Kenneth W. Thompson, who brought to his task an extraordinary measure of ability and devotion. The original versions of the maps were drafted by Mr. Charles R. Jones and those of the diagrams were drawn by Mr. John Horton.

I am deeply grateful to Professor Leonard D. White who, as administrative head of the Political Science Department of the University of Chicago, gave me every possible assistance; his understanding greatly facilitated my work. Professors Waldemar Gurian of the University of Notre Dame and Edward A. Shils of the University of Chicago and the London School of Economics and Political Science read the manuscript and gave me the benefit of their advice and criticism. Many of my colleagues advised me on special points. For whatever merit there is in the title of this book, Professor Charles M. Hardin must take all the credit since I chose it upon his suggestion. The Social Science Research Committee of the University of Chicago contributed generous financial support to the work and a long succession of members of the clerical staff of the Social Science Research Committee rendered competent assistance. I acknowledge the services of all with gratitude.

The following publishers and publications have been kind enough to grant permission to incorporate in the book material published previously: *American Journal of International Law*, *Columbia Law Review*, *Ethics*, *Review of Politics*, University of Chicago Press, and the *Yale Law Journal*.
