Contents

1 Introduction

| | |
|--|---|
| H.F. LINSKENS and J. HESLOP-HARRISON | 1 |
|--|---|

2 Cellular Interaction: a Brief Conspectus

| | |
|--------------------------------------|--|
| J. HESLOP-HARRISON and H.F. LINSKENS | |
|--------------------------------------|--|

| | |
|---|----|
| 2.1 Introduction | 2 |
| 2.2 The Cell Surface | 3 |
| 2.3 The Plant Cell Wall | 4 |
| 2.4 Cell-Cell Communication: Plant and Animal Situations Compared | 6 |
| 2.5 Specific Interactions: Models and Theories | 7 |
| 2.6 Self and Non-Self | 11 |
| 2.7 Secondary Responses | 12 |
| 2.8 Types of Cellular Interaction in Plants | 13 |
| References | 16 |

3 Evolutionary Aspects of the Eukaryotic Cell and Its Organelles

| | |
|---|--|
| J.M. WHATLEY and F.R. WHATLEY (With 11 Figures) | |
|---|--|

| | |
|--|----|
| 3.1 Introduction | 18 |
| 3.1.1 The Origin of the Eukaryotic Cell | 18 |
| 3.1.2 The Acquisition of Eukaryotic Features | 19 |
| 3.1.3 The Origin of Eukaryotic Organelles | 20 |
| 3.2 Group 1: Endomembrane Organelles | 21 |
| 3.2.1 The Endomembrane System | 21 |
| 3.2.2 Dictyosomes | 24 |
| 3.2.3 Microbodies | 26 |
| 3.2.4 Vacuoles and Lysosomes | 27 |
| 3.2.5 Ejecile Organelles | 28 |
| 3.3 Group 2: Mitochondria and Chloroplasts | 31 |
| 3.3.1 The Endosymbiotic Hypothesis | 31 |
| 3.3.2 Mitochondria – Their Possible Ancestry | 33 |
| 3.3.3 Modification Within the Protoplasteukaryotic Host | 35 |
| 3.3.4 Chloroplasts | 36 |
| 3.4 Other Organelles | 40 |
| 3.4.1 The Nucleus | 40 |
| 3.4.2 Hypotheses on the Origin of the Nucleus | 42 |
| 3.4.3 Microtubules | 43 |
| 3.4.4 Speculations and Sequences of Origin | 46 |
| 3.5 Metabolic Interactions | 48 |
| 3.5.1 Fermentations and Oxygen | 48 |
| 3.5.2 Aerobic Organisms, Endosymbiosis and the Integration of Metabolism | 49 |
| 3.5.3 Protein Synthesis and Nuclear Control | 50 |
| 3.5.4 Chloroplast Metabolism | 51 |
| 3.5.5 Photorespiration: Three Cooperating Organelles | 51 |

| | | |
|----------|--|-----|
| 3.6 | Concluding Remarks | 52 |
| | References | 55 |
| 4 | Autotrophic Eukaryotic Freshwater Symbionts | |
| | W. REISSEER and W. WIESSNER (With 4 Figures) | |
| 4.1 | Introduction | 59 |
| 4.2 | The Taxonomic Position of Symbiotic Partners | 59 |
| 4.3 | The Location of Autotrophic Partners | 61 |
| 4.4 | Physiological Features of Symbiotic Partners and Their Association | 64 |
| 4.5 | Self-Regulation and Partner-Coordination in Endosymbiotic Systems | 66 |
| 4.6 | Specificity of Cell Recognition and Symbiotic Partnership | 68 |
| 4.7 | Ecology of Endosymbiotic Systems | 70 |
| | References | 71 |
| 5 | Autotrophic Eukaryotic Marine Symbionts | |
| | D.L. TAYLOR | |
| 5.1 | Introduction | 75 |
| 5.2 | Symbiont Genera and Species | 76 |
| 5.2.1 | Range | 76 |
| 5.2.2 | Systematics | 78 |
| 5.3 | Cellular Relationships of Symbionts and Hosts | 79 |
| 5.3.1 | Recognition and Selection | 80 |
| 5.3.2 | Placement | 81 |
| 5.3.3 | Regulation | 81 |
| 5.4 | Primary Production | 82 |
| 5.4.1 | Photosynthesis | 82 |
| 5.4.2 | Endosymbiotic Exchange of Carbon and Nitrogen | 84 |
| 5.5 | Ecology | 85 |
| 5.6 | Conclusions | 86 |
| 5.7 | Addendum – Prochloron (by R.A. LEWIN) | 86 |
| | References | 87 |
| 6 | Endosymbiotic Cyanobacteria and Cyanellae | |
| | W. REISSEER (With 6 Figures) | |
| 6.1 | Introduction | 91 |
| 6.2 | Taxonomy and Localization | 91 |
| 6.2.1 | Multicellular Hosts | 91 |
| 6.2.1.1 | Bryophytes | 92 |
| 6.2.1.2 | Pteridophytes | 94 |
| 6.2.1.3 | Gymnosperms | 94 |
| 6.2.1.4 | Angiosperms | 95 |
| 6.2.1.5 | Sponges | 95 |
| 6.2.1.6 | Tunicates | 95 |
| 6.2.1.7 | Others | 96 |
| 6.2.2 | Unicellular Hosts | 96 |
| 6.2.2.1 | <i>Geosiphon pyriforme</i> | 96 |
| 6.2.2.2 | Amoebae and Apoplastidal Algae | 96 |
| 6.2.2.3 | Diatoms | 98 |
| 6.2.2.4 | <i>Cyanidium caldarium</i> | 100 |
| 6.3 | Physiology | 100 |
| 6.3.1 | Nitrogen Metabolism | 100 |
| 6.3.2 | Carbon Metabolism | 101 |

| | | |
|-------|---|-----|
| 6.4 | Symbiosis-Specific Features | 102 |
| 6.4.1 | Morphology | 103 |
| 6.4.2 | Physiology, Behavioural and Ecological Features | 104 |
| 6.4.3 | Regulation and Host-Symbiont Specificity | 104 |
| 6.5 | Conclusions | 105 |
| | References | 107 |

7 Epiphytism at the Cellular Level with Special Reference to Algal Epiphytes

S.C. DUCKER and R.B. KNOX (With 4 Figures)

| | | |
|---------|---|-----|
| 7.1 | Introduction | 113 |
| 7.2 | Dispersal and Contact of Algal Epiphytes | 114 |
| 7.2.1 | Vegetative Propagules | 114 |
| 7.2.2 | Thallus Fragmentation as Dispersal Mechanisms | 114 |
| 7.2.3 | Spores | 115 |
| 7.3 | Specificity of Epiphytic Relationship | 117 |
| 7.3.1 | Specificity of Brown Algal Epiphytes and Basiphytes | 117 |
| 7.3.2 | Specificity of Red Algal Epiphytes on Brown Algal Basiphytes | 119 |
| 7.3.3 | Specificity of Red Algae as Epiphytes and Basiphytes | 120 |
| 7.3.4 | Seagrasses and Algal Epiphytes | 121 |
| 7.3.4.1 | Non-Specific Epiphytes | 121 |
| 7.3.4.2 | Specific Epiphytes | 122 |
| 7.4 | Ion Exchange and Nutrient Transfer Between Basiphyte and Epiphyte | 123 |
| 7.4.1 | Experimental Translocation of Radioactive Compounds | 123 |
| 7.4.1.1 | Algae as Epiphytes and Basiphytes | 123 |
| 7.4.1.2 | The Special Case of <i>Ascophyllum nodosum</i> and <i>Polysiphonia lanosa</i> | 124 |
| 7.4.1.3 | Algae Epiphytic on Seagrasses | 125 |
| 7.4.1.4 | Effect of Epiphytes on Eelgrass Photosynthesis | 125 |
| 7.4.2 | Implications of Seasonality of Epiphytes | 126 |
| 7.5 | Defence of Basiphytes Against Epiphytes | 126 |
| 7.5.1 | Self-Cleaning Process of Actively Growing Basiphytes | 127 |
| 7.5.2 | Production of Antibiotics by Basiphytes | 127 |
| 7.6 | Conclusions | 128 |
| | References | 130 |

8 Genetics of Recognition Systems in Host-Parasite Interactions

P.R. DAY

| | | |
|---------|---|-----|
| 8.1 | Introduction | 134 |
| 8.2 | Gene-for-Gene Hypothesis | 135 |
| 8.3 | Genetic Fine Structure | 136 |
| 8.3.1 | Rust Resistance in Flax | 136 |
| 8.3.2 | The Rust <i>Melampsora lini</i> | 137 |
| 8.3.2.1 | Sexuality | 137 |
| 8.3.2.2 | Genetics of Virulence | 138 |
| 8.4 | Mutation Studies | 139 |
| 8.4.1 | Host Plants | 139 |
| 8.4.2 | Mutation in Pathogens | 140 |
| 8.5 | The Recognition Mechanism | 140 |
| 8.5.1 | Models Involving Phytoalexin Synthesis | 141 |
| 8.5.2 | Models and Their Implications | 142 |
| 8.5.3 | Some Simpler Bacterial Systems | 143 |
| 8.5.4 | Application of Molecular Genetics to Fungal Systems | 145 |
| 8.6 | Non-Host Resistance | 145 |
| | References | 146 |

9 The Mycorrhizal Associations

J.L. HARLEY (With 6 Figures)

| | | |
|-----|--|-----|
| 9.1 | Introduction | 148 |
| 9.2 | Initiation of Infection | 153 |
| 9.3 | Structure and Development of Myorrhizal Roots | 156 |
| 9.4 | Fine Structural Relationship Between the Symbionts | 162 |
| 9.5 | Specificity in Mycorrhizal Symbiosis | 166 |
| 9.6 | Effectiveness of Mycorrhizal Infection | 170 |
| 9.7 | Compatibility and Effectiveness | 171 |
| 9.8 | Recognition | 173 |
| 9.9 | Ecological Aspects of Mycorrhizal Infection | 177 |
| | References | 180 |

10 Plant-Bacterial Interactions

L. SEQUEIRA

| | | |
|----------|--|-----|
| 10.1 | Introduction | 187 |
| 10.2 | Incompatible Interactions | 189 |
| 10.2.1 | Characteristics of the Hypersensitive Reaction | 189 |
| 10.2.2 | Factors that Affect Expression of the Hypersensitive Response | 190 |
| 10.2.3 | Attachment of Bacteria to Plant Cell Walls: A Requirement for Induction of the HR? | 192 |
| 10.2.4 | Cell-Wall Components Involved in Attachment | 194 |
| 10.3 | Compatible Interactions | 197 |
| 10.3.1 | The <i>Agrobacterium tumefaciens</i> -Plant Interaction | 197 |
| 10.3.2 | The <i>Rhizobium</i> -Legume Interaction | 200 |
| 10.3.2.1 | Attachment of Rhizobia to Plant Cell Walls | 200 |
| 10.3.2.2 | The Role of Extracellular Polysaccharides in Specificity of Rhizobia | 201 |
| 10.3.2.3 | The Role of Lipopolysaccharides in Specificity of Rhizobia | 202 |
| 10.3.2.4 | The Lectin Receptor Hypothesis | 204 |
| 10.4 | Concluding Remarks - The Potential for Manipulating Plant-Bacterial Interactions | 205 |
| | References | 207 |

11 Cellular and Molecular Recognition Between Higher Plants and Fungal Pathogens

J.A. CALLOW (With 4 Figures)

| | | |
|----------|--|-----|
| 11.1 | Introduction | 212 |
| 11.2 | Recognition of the Host by the Parasite | 212 |
| 11.2.1 | Spore Germination | 212 |
| 11.2.2 | Chemotaxis and Recognition | 214 |
| 11.2.3 | Zoospore Binding to Root Surfaces | 215 |
| 11.2.4 | Recognition and Tropisms | 216 |
| 11.3 | Recognition of the Pathogen by the Host: Resistance Triggering | 217 |
| 11.3.1 | The Genetic Argument | 218 |
| 11.3.2 | Evolution of Resistance and Its Implications for Recognition | 219 |
| 11.3.3 | Pathogen Cognons as Modulators of Host Defence | 220 |
| 11.3.3.1 | Polysaccharide Elicitors | 221 |
| 11.3.3.2 | Protein and Glycoprotein Elicitors | 223 |
| 11.3.3.3 | Other Elicitors | 225 |
| 11.3.3.4 | Specificity Factors | 225 |

| | |
|--|-----|
| 11.3.4 Recognition of Pathogen Cognons and Their Modes of Action | 226 |
| 11.3.5 Conclusions: Models for Specific Recognition | 229 |
| References | 232 |

12 Mating Systems in Unicellular Algae

L. WIESE

| | |
|--|-----|
| 12.1 Introduction | 238 |
| 12.2 Cellular Interactions Effecting Gametic Differentiation. Erogens. Contact-Induced Gametogenesis | 238 |
| 12.2.1 Erogens | 239 |
| 12.2.2 Contact-Induced Gametogenesis | 241 |
| 12.3 Chemotaxis. Erotactins (Sirenilins). Chemotropism. Chemotropins | 242 |
| 12.4 Sex Cell Contact | 243 |
| 12.4.1 The Mating Type Reaction and Its Molecular Basis | 244 |
| 12.4.1.1 The Isoagglutinins (IA's) | 245 |
| 12.4.1.2 The Mating Type Substances | 246 |
| 12.5 Inactivation of Agglutinins During Gamete Contact | 249 |
| 12.6 Correlations Between Mating Type Reaction and Pairing | 250 |
| 12.7 Termination of the Mating Type Reaction by Pairing | 254 |
| 12.8 Sexual Incompatibility Between Species Resulting from Taxon-Specific or Defective Intercellular Communication and Contact Systems | 255 |
| References | 256 |

13 Colony Formation in Algae

R.C. STARR (With 67 Figures)

| | |
|--|-----|
| 13.1 Introduction | 261 |
| 13.2 Non-Coenobic Colonies | 261 |
| 13.3 Coenobic Colonies | 265 |
| 13.3.1 Motile Coenobic Colonies | 265 |
| 13.3.1.1 Family Volvocaceae | 265 |
| 13.3.1.2 Family Astrephomenaceae | 279 |
| 13.3.1.3 Family Spondylomoraceae | 279 |
| 13.3.1.4 Family Haematococcaceae | 279 |
| 13.3.2 Non-Motile Coenobic Colonies | 281 |
| 13.3.2.1 Reproduction by Non-Motile Spores | 281 |
| 13.3.2.2 Reproduction by Motile Spores | 283 |
| 13.4 Summary | 286 |
| References | 286 |

14 Cellular Interaction in Plasmodial Slime Moulds

J.A.M. SCHRAUWEN (With 5 Figures)

| | |
|---|-----|
| 14.1 Introduction | 291 |
| 14.2 Fusion Between Amoebae | 292 |
| 14.2.1 <i>Physarum polycephalum</i> | 293 |
| 14.2.2 <i>Didymium iridis</i> | 297 |
| 14.2.3 Conclusions Concerning Interactions Between Amoebae of Myxomycetes | 298 |
| 14.3 Somatic Incompatibility Between Plasmodia | 299 |
| 14.3.1 <i>Physarum polycephalum</i> | 299 |
| 14.3.2 <i>Didymium iridis</i> | 303 |
| 14.3.3 Conclusions Concerning Somatic Incompatibility | 304 |
| References | 305 |

15 Cell Interactions in the Cellular Slime Moulds

T.M. KONIJN and P.J.M. VAN HAASTERT (With 10 Figures)

| | | |
|-------|-----------------------------|-----|
| 15.1 | Introduction | 309 |
| 15.2 | Spore Germination | 310 |
| 15.3 | Growth Phase | 310 |
| 15.4 | Social Phase | 312 |
| 15.5 | Pattern Formation | 316 |
| 15.6 | Culmination | 319 |
| 15.7 | Acrasins | 319 |
| 15.8 | Signal-Receptor Interaction | 321 |
| 15.9 | Cyclic GMP as Mediator | 323 |
| 15.10 | Conclusions | 324 |
| | References | 325 |

16 Sexual Interactions in the Lower Filamentous Fungi

H. VAN DEN ENDE (With 8 Figures)

| | | |
|------|--------------------|-----|
| 16.1 | Introduction | 333 |
| 16.2 | Chytridiomycetes | 333 |
| 16.3 | Oomycetes | 335 |
| 16.4 | Zygomycetes | 339 |
| 16.5 | Concluding Remarks | 345 |
| | References | 345 |

17 Barrage Formation in Fungi

K. ESSER and F. MEINHARDT (With 1 Figure)

| | | |
|----------|--|-----|
| 17.1 | Introduction | 350 |
| 17.2 | Intraspecific Barrages | 352 |
| 17.2.1 | Barrages Associated with Homogenic Incompatibility | 352 |
| 17.2.2 | Barrages Associated with Heterogenic Incompatibility | 353 |
| 17.2.2.1 | <i>Podospora anserina</i> | 353 |
| 17.2.2.2 | Wood-Destroying Basidiomycetes | 355 |
| 17.2.2.3 | Comparable Phenomena in Other Fungi | 356 |
| 17.3 | Interspecific Barrages | 357 |
| 17.4 | Intergeneric Barrages | 358 |
| 17.5 | Biological Significance of Barrage Formation | 359 |
| | References | 359 |

18 Physiological Interactions Between the Partners of the Lichen Symbiosis

M. GALUN and P. BUBRICK (With 11 Figures)

| | | |
|----------|--|-----|
| 18.1 | Introduction | 362 |
| 18.1.1 | The Lichen Components | 362 |
| 18.1.1.1 | The Algal Partner | 363 |
| 18.1.1.2 | The Fungal Partner | 364 |
| 18.1.2 | The Lichen Thallus | 365 |
| 18.1.2.1 | Fungus-Alga Relation | 366 |
| 18.2 | Alga-Fungus Interactions | 368 |
| 18.2.1 | Carbohydrate Metabolism | 368 |
| 18.2.1.1 | Carbohydrate Efflux | 368 |
| 18.2.1.2 | Transfer of Carbohydrates | 370 |
| 18.2.1.3 | Uptake and Conversion of Transferred Carbohydrate by the Mycobiont | 372 |

| | | |
|----------|---|-----|
| 18.2.2 | Nitrogen Metabolism | 373 |
| 18.2.2.1 | Nitrogen and Amino Acid Analysis of Whole Thalli | 373 |
| 18.2.2.2 | Nitrogen Fixation | 374 |
| 18.3 | Other Effects of Symbiosis | 378 |
| 18.3.1 | Effects of Symbiosis on the Algal Partner | 378 |
| 18.3.1.1 | Cyanobacterial Phycobionts | 378 |
| 18.3.1.2 | Eukaryotic Phycobionts | 379 |
| 18.3.1.3 | Cell-Wall Modifications | 380 |
| 18.3.2 | Effect of Symbiosis on the Fungal Partner | 383 |
| 18.3.2.1 | Concentric Bodies | 383 |
| 18.3.2.2 | Secondary Metabolic Products "Lichen Substances" | 384 |
| 18.3.2.3 | The Cell Wall of the Mycobionts | 387 |

1 Introduction

H.F. LINSKENS and J. HESLOP-HARRISON

The chapters of this volume deal with intercellular interaction phenomena in plants. Collectively they provide a broad conspectus of a highly active, if greatly fragmented, research field.

Certain limitations have been imposed on the subject matter, the most important being the exclusion of long-range interactions within the plant body. It is true that pervasive hormonal control systems cannot readily be demarcated from controls mediated by pheromones or information-carrying molecules with more limited spheres of action, but consideration is given in this volume to the main classes of plant hormones and their functions only incidentally, since these are treated adequately in other volumes of this Encyclopedia series (Volume 9–11) and in numerous other texts and reviews. Similarly, certain other effects, such as those associated with nutrients and ions, are not considered in any detail. Furthermore, we have excluded intracellular interactions, and also consideration of transport phenomena, which are treated in detail in Volume 3 of this Series. Other aspects of inter-cellular interaction, such as cell surface phenomena and implications of lectin-carbohydrate interactions, and plant-virus inter-relationships, are treated in other sections of this Encyclopedia (Volumes 13B and 14B, respectively). In the volume on physiological plant pathology (Volume 4 of this series) special attention has been given to host-pathogen interaction. These aspects of our subject will therefore be excluded in the present treatise.

On the other hand, the volume includes in its scope various genetic aspects of cellular interaction in plants, and also topics such as algal colony formation and short-range interaction during cell differentiation, which are particularly significant because of the opportunities they so clearly offer for further research.

In the introductory chapter we consider briefly aspects of recent animal cell biological work which have some pertinence for cellular interaction in plants, and offer an outline classification for the various phenomena as a background to the detailed treatments in the main body of the text.

We acknowledge with thanks the help of many people who have advised us – above all, we wish to thank Professor André Pirson, one of the series editors, who initiated the topic and made many valuable suggestions during the preparation of the volume.
