■ PREFACE

EU law is a subject which students have traditionally found difficult. Although many students will have come across EU law at work, or will have an interest in the politics, economics or history of the EU, many others find it a particularly inaccessible subject. This book aims to, and in previous editions has succeeded in, demystifying the key areas of EU law for undergraduate and graduate students approaching the subject for the first time.

We start with the background to EU law – the history of the EU, which is fundamental to an understanding of the content and function of EU law, and the institutional structure and the sources of law which it produce. We then examine the EU's legal system, explaining and analysing the way in which EU law can be utilised in actions before the domestic courts, and the actions which may be brought against the EU for illegal conduct. The remainder of the book is devoted to the major areas of substantive law – freedom of movement, competition law and equal treatment. In all these areas we explain the basic concepts, with full cross references to the Cases and Materials on the Companion Web Site. Students are able to test and consolidate their understanding in considering the questions and undertaking the exercises that appear throughout the book. There is also the opportunity to tackle more extended sample questions in each chapter, both problems and essays, to which guide answers are provided.

We have found in the past that students consider this to be a more user-friendly text for EU law than many of its competitors, but we also ensure that its coverage is sufficient for standard EU courses.
