

Psychopharmacological Methods

*Proceedings of a Symposium on the Effects of
Psychotropic Drugs on Higher Nervous Activity
held in Prague from 30 October to 2 November 1961
under the Auspices of the
Society for the Study of Higher Nervous Activity,
Section of Czechoslovak Medical Society*

EDITED BY

ZDENĚK VOTAVA

*Professor of Pharmacology,
Charles' University Medical Faculty of Hygiene,
Prague*

MILAN HORVÁTH

*Chief, Department of Physiology
of Higher Nervous Activity,
Institute of Industrial Hygiene and
Occupational Diseases, Prague 10;
Lecturer, Charles' University
Medical Faculty of Hygiene,
Prague*

OLDŘICH VINAŘ

*Chief, Department of Psycho-
pharmacology, Psychiatric
Research Institute, Prague 8*

TABLE OF CONTENTS

List of participants	9
List of discussants and guests	11
Editor's foreword	13
Opening address (J. PLOJHAR)	15
Chairman's address (Z. VOTAVA)	17

PART I

The action of chlorpromazine, chloracizine and amphetamine on the food and avoidance conditioned reflexes (M. I. MICHELSON and E. L. SCHELKUNOV)	23
Method	24
Results	25
Discussion	29
Conclusions	29
References	30
Drug-induced changes of higher nervous activity in experimental animals (Z. VOTAVA, O. BENEŠOVÁ, J. METYŠOVÁ and M. SOUŠKOVÁ)	31
1. Classical pharmacological techniques	32
2. Electrophysiological methods	36
3. Influence of drugs on the higher nervous activity in experimental animals	37
Discussion	39
References	40
Classification of medicinal and toxic substances according to the mechanism of their influence on higher nervous activity (E. PH. GRUSHEVSKY)	41
Analysis of the action of the psychotropic drugs in a "lever pressing avoidance" conditioning (G. L. GATTI and D. BOVER)	50
Principle of the method	51
Pharmacological trials	51
Conclusions	56
References	57
Comparative investigations of some centrally acting drugs with a conditioned-reflex motoric food method and a conditioned-reflex motoric escape method (K. HECHT)	58
References	68
Some effects of morphine on adaptative and learning behaviour (J. JACOB)	70
I. Hot plate method	71
II. The forced swimming test	74
III. Maze learning	76
References	79

Comparison of imipramine and chlorpromazine effects on behavior of amphetamine-excited animals (I. P. LAPIN)	80
Method	81
Results	81
Discussion	84
References	85
On the correlation between the antiserotonin and the depressive action of some phenothiazine derivatives (J. VENULET)	87
References	91
A new class of neuroleptics: disubstituted N - N' piperazines (J. R. BOISSIER)	92
Methods	93
Results	96
Discussion	100
References	100
X-ray radiation and psychotropic action of chlorpromazine (A. DANYSZ and T. ZACZEK)	101
Methods	101
Results	102
Conclusions	105
References	105
Evaluation of central pharmacological actions in rats with septal lesions (G. TONINI, M. L. RICCONI, M. BABBINI and G. MISSERE)	106
Results	109
Discussion and conclusions	112
References	113
Problems of chemical perceptibility of the brain stem reticular formation (R. J. ILYUT-CHENOK)	115
References	122
Electrophysiological comparison of the action of psychotropic drugs on animals with implanted electrodes (O. BENEŠOVÁ, Z. BOHDANECKÝ and Z. VOTAVA)	123
I. Bioelectrical activity of cortical and subcortical areas in rabbits with implanted electrodes	124
II. Changes in the motor threshold in rabbits with permanent epidural electrodes	125
III. Self-stimulation in rats according to olds	126
Discussion	127
References	128

PART II

Experimental studies of higher nervous functions in pharmacology and toxicology (M. HORVÁTH, E. FRANTÍK and J. FORMÁNEK)	131
References	149
Differential psychopharmacological patterns of action in rats (K. BÄTTIG)	151
Method	152
Results and discussion	153
References	161
Some technical problems in evaluating the behavioral effects of drugs (M. SIDMAN)	162
References	169
Interpreting drug-behavior effects with a functional analysis of behavior (C. B. FERSTER and J. B. APPEL)	170
References	181

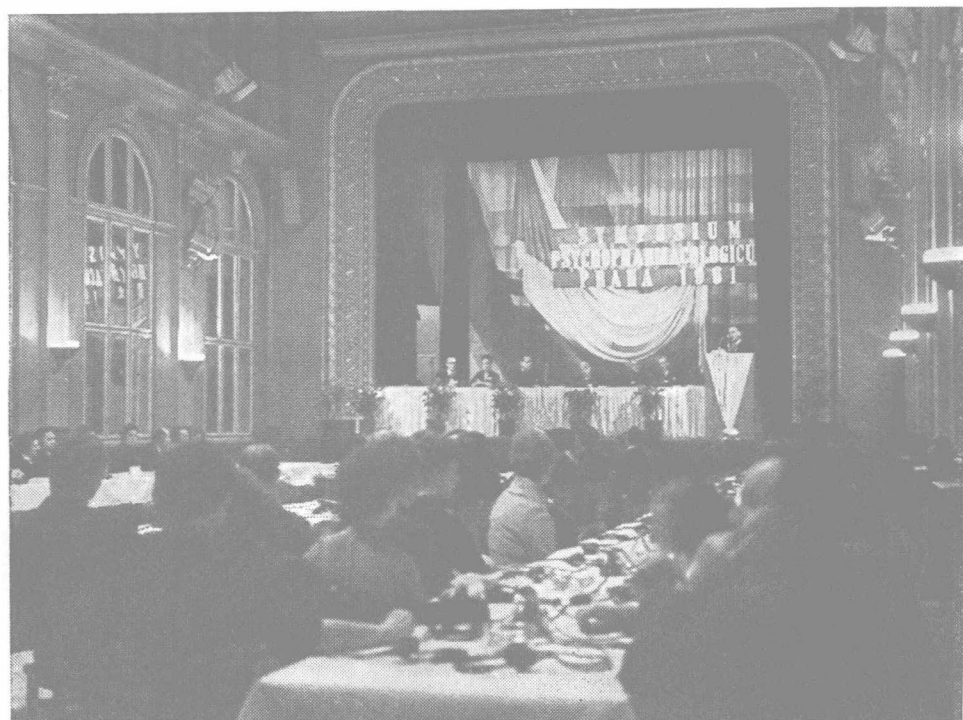

Complex systems of conditioned reflexes in the analysis of drug effects (L. G. VORONIN and A. V. NAPALKOV)	182
References	185
The effect of psychopharmaca on higher nervous activity as revealed by autonomic reactions in dogs towards environmental stimuli (K. FROŇKOVÁ and V. EHRLICH)	186
References	190
The use of spreading depression in neuropharmacology (Z. BOHDANECKÝ, J. BUREŠ, O. BUREŠOVÁ, J. NEČINA and T. WEISS)	191
References	196
Some aspects of the central effect of adrenalin (V. HAVLÍČEK)	197
References	207
Research on the psychopharmacology of norepinephrine (R. FLORU, M. STERESCU-VOLANSCHI and V. NESTIANU)	209
Introduction	209
Material and method	210
Results	211
Discussion	215
References	217
The importance of individual excitability of the central nervous system in the investigation of centrally acting drugs (K. HECHT)	219
References	230
The effect of insulin on higher nervous activity (A. KREINDLER and J. UNGHER)	231
Method	232
Results	232
Discussion	235
References	237
High dietary tryptophan intake: methods used to investigate possible behaviour changes in the monkey (G. EITTLINGER)	238
References	243
The influence of meprobamate on conditioned and unconditioned visceral and motor defense responses (S. A. CORSON, E. O'LEARY CORSON and S. J. M. ENGLAND)	244
Methods	245
Results	246
References	254

PART III

The possibilities of the use of conditioned reflex methods in clinical psychiatry (O. VINAŘ)	259
References	266
The experimental method in the study of human behaviour central problems (D. E. CAMERON)	268
Problems of evaluation and classification in psychopharmacology (H. E. LEHMANN)	276
Multidimensional approach to the psychopharmacological experiment (E. KUHN, K. RYŠÁNEK, V. VÍTEK, M. VOJTĚCHOVSKÝ and S. GROF)	281
References	300
Behavioral and physiological studies in impaired attention (A. F. MIRSKY and H. E. ROSVOLD)	302
References	314

Experimental studies of psychotropic drugs in schizophrenics (C. ASTRUP and A. G. ASLANOV)	316
Conclusions	319
References	319
The measurement of autonomic activity in depressive patients during sodium amytal sedation (I. MARTIN)	321
Introduction	321
Results	322
References	325
A clinical testing procedure for the evaluation of the after-effect of Reserpine and amine oxydase inhibitors (I. RUTTKAY-NEDECKÝ and E. KELLEROVÁ)	326
Material and methods	326
Results	327
Discussion	328
Conclusions	329
References	329
Studies in perseveration (D. E. CAMERON and L. SOLYOM)	330
Procedure	333
Conclusions	337
References	337
A contribution of clinical electroencephalography for the estimation of results of psychopharmacology (J. ROUBÍČEK)	338
References	345
Salivation as an index of higher nervous activity in diseases with prominent psychopathology (L. BUSFIELD, JR. and H. WECHSLER)	346
Method	349
Results	350
Discussion	355
References	355
Contribution of a clinician (V. VONDRÁČEK)	357
Contribution of microscopical anatomy (V. HAŠKOVEC)	359

LIST OF PARTICIPANTS

1. BÄTTIG, K., Dept. of Industrial Hygiene and Work Physiology, Federal Institute of Technology, Zurich, Switzerland
2. BENEŠOVÁ, O., Dept. of Pharmacology Charles' University Medical Faculty of Hygiene, Prague 2, Ke Karlovu 4, Czechoslovakia
3. BOHDANECKÝ, Z., Research Institute for Pharmacy and Biochemistry, Prague 3, Kouřimská 17, Czechoslovakia
4. BOISSIER, J. R., Institute of Pharmacology, Faculty of Medicine, Paris, France
5. BUREŠ, J., Institute of Physiology, Czechoslovak Academy of Sciences, Prague 6, Na Cvičišti, Czechoslovakia
6. BUREŠOVÁ, O., Institute of Physiology, Czechoslovak Academy of Sciences, Prague 6, Na Cvičišti, Czechoslovakia
7. BUSFIELD, B. L., Massachusetts Mental Health Center, 74 Fenwood Road, Boston, 15, Mass. U.S.A.
8. CAMERON, D. E., Dept. of Psychiatry, McGill University, Montreal 2, Canada
9. CORSON, S. A., Research Division, Columbus Psychiatric Institute Ohio State University Health Center Columbus, Ohio, U.S.A.
10. DANYSZ, A., Dept. of Pharmacology, School of Medicine Medical Academy, Białystok, Poland
11. EHRlich, V., Institute for Diseases of Blood Circulation, Prague 4-Krč, Czechoslovakia
12. ETTlinger, E. G., Institute of Neurology, The National Hospital, Queen Square, London W. C. 1, England
13. FERSTER, C. B., Indiana University, Medical Center, 1100 West Michigan Street, Indianapolis 7, Indiana, U.S.A.
14. FLORU, R., Institute of Normal and Pathological Physiology "Prof. D. Danielopolu", Rumanian Academy of Sciences, Bucarest, Rumania
15. FORMÁNEK, J., Research Institute of Post and Telecommunications, Prague 5, Czechoslovakia
16. FRANTÍK, E., Institute of Industrial Hygiene and Occupational Diseases, Prague 10, Šrobárova 48, Czechoslovakia
17. FROŇKOVÁ, K., Institute for Diseases of Blood Circulation, Prague 4-Krč, Czechoslovakia
18. GATTI, G. L., Instituto Superiore di Sanità, Roma, Italy
19. GROF, S., Psychiatric Research Institute, Prague 8-Bohnice, Czechoslovakia
20. GRUSHEVSKI, J. F., Dept. of Pharmacology of Dagestan Medical Institute, Makhach - Kala, Daghest. S.S.R.

21. HAVLÍČEK, V., Laboratory of Higher Nervous Activity, Palacký's University, Faculty of Medicine, Olomouc, Czechoslovakia
22. HECHT, K., Institute of Cortico-Visceral Pathology and Therapy, Berlin-Buch, G.D.R.
23. HORVÁTH, M., Institute of Industrial Hygiene and Occupational Diseases, Prague 10, Šrobárova 48, Czechoslovakia
24. ILYUTCHENOK, R. J., Institute of Experimental Biology and Medicine of the Siberian Branch of the Academy of Sciences of the U.S.S.R., Novosibirsk
25. JACOB, J., Institut Pasteur, Rue du docteur Roux, Paris XV, France
26. KUHN, E., Research Institute for Human Nutrition, Prague 4-Krč, Czechoslovakia
27. LAPIN, J. P., Psikhonevrologicheskiy institut im. Bekhtereva, Leningrad, U.S.S.R.
28. LEHMANN, H. E., Verdun Protestant Hospital, Verdun, Que., Canada
29. LEVINE, S., Dept. of Neuroendocrinology, Institute of Psychiatry, Maudsley Hospital, Denmark Hill, London S.E. 5, England
30. MARTIN, I., Institute of Psychiatry, Maudsley Hospital, Denamark Hill, London S.E. 5, England
31. METYŠOVÁ, J., Research Institute for Pharmacy and Biochemistry, Prague 3, Kouřimská 17, Czechoslovakia
32. MICHELSON, M. Y., I. M. Sechenov Institute of Evolutionary Physiology, Ac. Sci. U.S.S.R., Leningrad, U.S.S.R.
33. RAJOTTE, P., Manhattan State Hospital, 600 East 125th Street New York 35, U.S.A.
34. ROSVOLD, H. E., Laboratory of Psychology, National Institute of Mental Health, Bethesda, Maryland, U.S.A.
35. ROUBÍČEK, J., Psychiatric Research Institute, Prague 8-Bohnice, Czechoslovakia
36. RUTTKAY-NEDÉCKÝ, I., Institute of Experimental Medicine, Slovak Academy of Sciences, Bratislava, Czechoslovakia
37. SIDMAN, M., Walter Reed Army Institute of Research, Washington 12, D.C., now Dept. of Neurology, Massachusetts General Hospital, Boston, Massachusetts, U.S.A.
38. SOUŠKOVÁ, M., Research Institute of Pharmacology and Biochemistry, Prague 3, Kouřimská 17, Czechoslovakia
39. TONINI, G., Institute of Cortico-Visceral Path. and Ther., Berlin-Buch, G.D.R.
40. UNGHER, J., The I. P. Pavlov Neurological Institute, Rumanian Academy of Sciences, Bucarest, Rumania
41. VENULET, J., Institut lekow, Warsaw 36, Poland
42. VINAŘ, O., Psychiatric Research Institute, Prague 8-Bohnice, Czechoslovakia
43. VOJTĚCHOVSKÝ, M., Research Institute for Human Nutrition, Prague 4-Krč, Czechoslovakia
44. VORONIN, L. G., Chair of the Higher Nervous Activity of the Lomonosov State University, Moscow, U.S.S.R.
45. VOTAVA, Z., Dep. of Pharmacology, Charles' University Medical Faculty of Hygiene, Prague 2, Ke Karlovu 4, Czechoslovakia
