List of contributors

Douglas H. Ubelaker, PhD (editor) was the 2011–2012 president of the American Academy of Forensic Sciences and is a fellow in the Physical Anthropology Section. He received his PhD degree in 1973 from the University of Kansas and is currently a curator and senior scientist at the Smithsonian Institution's National Museum of Natural History in Washington, DC. He has published extensively in the general field of human skeletal biology, with an emphasis on forensic applications.

Adam Aleksander, PhD is a forensic engineer and a fellow and 23-year member in the Engineering Sciences Section of the American Academy of Forensic Sciences. He received his PhD degree in 1995 from Texas A&M University, and is the President of Aleksander & Associates P.A., Boise, Idaho, and Vice President of Precision Energy Services Inc., Hayden, Idaho. He specializes in forensic engineering issues in product liability, safety engineering, warnings and investigations of industrial and energy system issues. Dr. Aleksander practices nationally and internationally, including some 30 overseas assignments.

Susan Ballou, MS is the program manager for forensic science in the Law Enforcement Standards Office (OLES) at NIST. She has managed this program since 2000, targeting the needs of the forensic science practitioner by identifying and funding research at NIST in areas such as latent print analysis, burn patterns, computer forensics and material standards. Her forensic crime laboratory experience spans over 27 years and includes working on case samples in the areas of toxicology, illicit drugs, serology, hairs, fibers and DNA. She has Diplomate Certification with the American Board of Criminalistics (ABC) and is a fellow of the American Academy of Forensic Sciences (AAFS) and a recipient of the AAFS Criminalistics Section's Mary E. Cowan Outstanding Service Award.

David W. Baker, MFS is a fellow of the AAFS, and served as the secretary of the Digital and Multimedia Sciences Section from 2008–2010, and as chair of the section from 2010–2012. He received a Master of Forensic Science degree from the George Washington University in 1994. David is a principal information security engineer at the MITRE Corporation in McLean, Virginia, and is a member of the organizing committee of the Digital Forensics Research Workshop (DFRWS). He is a retired Special Agent of the US Army Criminal Investigation Command, and was the command's principal forensic science advisor during his last assignment. David has been working in the field of digital and network forensics for 19 years.

Robert Barsley, DDS, JD is the 2012–2013 president of the American Academy of Forensic Sciences and a fellow in the Odontology Section. He received his DDS degree in 1977 from Louisiana State University Health Science Center and his JD degree in 1987 from Loyola University School of Law in New Orleans. He is a professor at the LSUHSC School of Dentistry in New Orleans, Louisiana, where he serves as a consultant to multiple medicolegal entities. He has published and lectured in the field of forensic odontology.

Stephen B. Billick, MD is in full-time private practice of clinical child, adolescent and adult psychiatry and forensic psychiatry. Dr. Billick is clinical professor of psychiatry at New York Medical College, clinical professor of psychiatry at New York University School of Medicine and lecturer in psychiatry at Columbia University College of Physicians and Surgeons, the former associate chair for faculty development at St. Vincent's Hospital/New York Medical College, past president of the American Academy of Psychiatry and the Law (AAPL), past president of the American Society for Adolescent Psychiatry (ASAP) and past president of the New York Council on Child and Adolescent Psychiatry (NYCCAP). He is a member of the board of directors of the American Academy of Forensic Sciences (AAFS) and past chair of the Section on Psychiatry of the New York Academy of Medicine (NYAM).

C. Michael Bowers, DDS, JD received his DDS degree from the University of Southern California. He is a deputy medical examiner in Ventura, California and has written numerous peer review articles on bite mark evidence and dental identification methods. He also is a licensed lawyer (CA) and has contributed to the legal literature regarding the scientific issues related to forensic odontology's role in erroneous criminal convictions.

Samuel I. Brothers, BBA is a digital forensics analyst working for US Customs and Border Protection. He has earned over 20 different certifications in the field of computers and computer forensics. He is currently working at CBP for Laboratory and Scientific Services developing a nationwide digital forensics program. In his free time he is a magician and marathon runner.

Mary Bush, DDS is the 2011/2012 president of the American Society of Forensic Odontology and a fellow in the Odontology Section. She received her DDS degree in 1999 from the State University of New York at Buffalo and is currently an assistant professor of restorative dentistry and director of the Laboratory for Forensic Odontology Research at that university. She has published extensively in the area of forensic odontology and is currently a member of the editorial board of the *Journal of Forensic Sciences*.

Peter Bush, BS is director of the South Campus Instrument Center at the State University of New York and adjunct professor of Art Conservation at Buffalo State

College. He is a member of the General Section of the American Academy of Forensic Sciences. He has published extensively in a variety of scientific fields, focusing more recently on victim identification and bitemark analysis in forensic odontology.

John Clement, PhD is the inaugural chair of forensic odontology at Melbourne Dental School in the University of Melbourne. He is also a visiting honorary research fellow at the Forensic Institute of the Defence Academy of the UK at Cranfield University. Prof. Clement is past president of both the British and Australian Associations/Societies for Forensic Odontology (BAFO and ASFD), a founder member of the International Association for Craniofacial Identification (IACI) and Dental Ethics and Law Society (IDEALS). Prof. Clement has had practical hands-on experience of working in forensic odontology, especially mass disaster victim identification, since the 1970s.

Cecelia A. Crouse, PhD is the crime laboratory director and forensic biology manager of the Palm Beach County Sheriff's Office Crime Laboratory. She received her PhD degree in 1988 from the University of Miami Department of Microbiology and Immunology and conducted her post-doctoral thesis at the Bascom Palmer Eye Institute. She has been a member of the National Institute of Justice Technical Working Group, the FBI Scientific Working Group on DNA Analysis and Methods, and many other committees for the advancement forensic DNA testing. She has published in the field of virology and forensic DNA analysis and is currently a member of the Inter-Agency Working Group on Accreditation and Certification.

Gregory G. Davis, MD is a fellow in the Pathology/Biology Section of the American Academy of Forensic Sciences. He received his MD degree in 1987 from Vanderbilt University. He is a professor of pathology at the University of Alabama at Birmingham, where he serves full-time as an associate coroner/medical examiner in the Jefferson County Coronary/Medical Examiner Office. His publications concentrate on death associated with drug abuse and on interacting with attorneys and court.

Robert Dorion, DDS is a past President of the American Board of Forensic Odontology, the Canadian Society of Forensic Science, and is a distinguished fellow of the American Academy of Forensic Sciences, presently serving as a member of the board of directors. He received his DDS from McGill University in 1972, where he is currently director of the forensic dentistry program, and is director of forensic dentistry at the Laboratoire de Sciences Judiciaires et de Médecine Légale, Ministry of Public Security for the Province of Quebec, Montreal, Quebec, Canada. He has written for and edited the first stand-alone comprehensive forensic textbook on bitemarks, entitled *Bitemark Evidence* in 2005, with a second edition in 2011.

Janet Barber Duval, MSN is a forensic nurse and a fellow in the General Section. She received her baccalaureate degree in nursing from the University of Cincinnati in 1963 and a master's degree in Nursing Education from Indiana University in 1965. She retired from the United States Air Force Nurse Corps in 2001 with the rank of colonel. During the last decade, Barber Duval has served as a clinical nurse consultant for Hill-Rom Company and has been active in journal and textbook editing. She has developed curricula and has taught continuing education courses in forensic nursing at the University of Texas, the University of New Mexico, and the University of California, Riverside. She is currently an adjunct associate professor at the Indiana University School of Nursing in Indianapolis.

Mary P. Fitzgerald, MS is a fellow in the Criminalist Section of the American Academy of Forensic Sciences and a member of the Midwestern Association of Forensic Scientists. She received her BS and MS from the University of Illinois, Chicago in 1977 and 1983 respectively. Mary is currently employed by the IRS National Forensic Laboratory as a physical scientist in the Questioned Document Section. She has published papers in the field of drug chemistry and ink analysis.

ARW Forrest, LLM received degrees in pharmacology and medicine at Edinburgh University and a law degree from University College of Wales. He received postgraduate education in clinical and analytical chemistry. He combines his legal and medical educations with his scientific background, having held positions as professor of forensic chemistry at the University of Sheffield, professor in the Faculty of Health & Welfare at Sheffield Hallam University and assistant deputy coroner in the jurisdictions of South Yorkshire (West) and the North Riding of Yorkshire & Kingston upon Hull. A fellow in the Royal College of Physicians, Royal College of Pathologists, Faculty of Legal & Forensic Medicine of the Royal College of Physicians and the Royal Society of Chemistry, he is also a fellow in the Jurisprudence Section of the AAFS. Dr. Forrest is a past president of the Forensic Science Society (UK).

Adam Freeman, DDS is a fellow of the American Academy of Forensic Sciences in the Odontology Section. He received his DDS degree in 1992 from Columbia University's College of Dental Medicine, where he now serves as an assistant clinical professor. Dr. Freeman is currently on the board of directors of the American Board of Forensic Odontology and is a past president of the American Society of Forensic Odontology.

Robert Gaffney, MFS is on the 2011–2012 American Academy of Forensic Science board of directors from the General Section. He has a master's in forensic science from George Washington University and is certified as a senior crime scene analyst. He is a special agent with the US Army's CID and the operations officer for the Forensic Technology and Training Division, USACIL in Forest Park,

Georgia. He has published in the *Journal of Forensic Science* and is co-editor of the *CID Crime Scene Handbook*.

Zeno J. Geradts, PhD is a fellow in the Digital and Multimedia Sciences Section and was elected in 2010 for the three-year position as director at the board of directors of the American Academy of Forensic Sciences. He received his PhD degree in 2011 from the University of Utrecht and is currently senior forensic scientist at the Netherlands Forensic Institute in the field of image analysis and biometrics, and R&D coordinator for the Digital Technology and Biometrics Section. He is also chairman of the European ENFSI Forensic IT Working group and published in the field of pattern recognition and image analysis, as well as forensic implications of identity management systems.

James R. Gill, MD is the deputy chief medical examiner for Bronx County of the New York City Office of Chief Medical Examiner, and a clinical associate professor in the Department of Forensic Medicine at New York University School of Medicine.

Scott Grainger, PE is a licensed fire protection engineer and licensed civil engineer in numerous states, and a licensed land surveyor in Arizona. He is a fellow member of the Society of Fire Protection Engineers and senior member of the National Academy of Forensic Engineers.

Judith A. Gustafson, BS, is a member of the American Academy of Forensic Sciences Questioned Documents Section and the Midwestern Association of Forensic Scientists. She received a BS degree in 1982 from Western Illinois University and a BFA degree in 1998 from The School of the Art Institute of Chicago. She began her career with the Illinois State Police, Bureau of Forensic Sciences in 1985, and is currently employed by the US Treasury Department, National Forensic Laboratory, Questioned Documents Unit in Chicago, Illinois.

Sarah Hainsworth, PhD is a professor of materials engineering at the University of Leicester, UK. She received her PhD degree in 1993 from the University of Newcastle upon Tyne, UK and is a chartered engineer, chartered scientist and fellow of the Institute of Materials, Minerals and Mining. She has worked in the area of forensic engineering relating to materials failure investigations, and in forensic science related to stabbing and dismemberment. She has published in the areas of failure analysis of materials, forces required for stabbing with a variety of weapons and analysis of toolmarks.

H. Theodore Harcke, MD received his doctorate of medicine in 1971 from the Pennsylvania State University and has 40 years experience in academic radiology. He is a colonel in the United States Army and currently serves as the forensic radiologist for Armed Forces Medical Examiner System. An American Academy of

Forensic Sciences member in the Pathology/Biology Section, he is co-author of a recently published textbook on forensic imaging.

Max Houck, PhD is an internationally-recognized forensic scientist who specializes in anthropology, trace evidence and education. A former FBI scientist, Dr. Houck has worked for Oxford Instruments, the Tarrant County (Texas) Chief Medical Examiner and West Virginia University, where he directed the Forensic Science Initiative, a multi-million dollar resource to the nation's forensic laboratories. He is currently Director of the District of Columbia Consolidated Forensic Laboratory.

Julie Howe, MBA is a fellow in the American Academy of Forensic Sciences General Section. She is a medicolegal death investigator for Franklin, Jefferson and Saint Charles Counties in Missouri. She also serves as the executive director for the ABMDI, secretary/treasurer for SOMDI, and is a member of the Scientific Working Group for Medicolegal Death Investigation, chairing the Accreditation, Certification, Education and Training committee. Ms. Howe has been involved with national training of medicolegal death investigators for 15 years. She has a master's in business administration from Saint Louis University and is a registered diplomate with the ABMDI.

RT Kennedy, JD is former chair of the AAFS Jurisprudence Section, in which he is a fellow. He was awarded the JB Firth Medal from the Forensic Science Society (UK) in 2003. Judge Kennedy has been an adjunct professor at the University of New Mexico School of Law teaching forensic evidence, and has received an award from the New Mexico State Bar for his continuing education series 'Skeptically Determining the Limits of Scientific Evidence.' He is a judge on the New Mexico Court of Appeals, and has participated in all levels of New Mexico courts and on the bench of the Jicarilla Apache Nation in his 23-year judicial career. He received his JD degree in 1980 from the University of Toledo College of Law.

Douglas S. Lacey, BSEE is a fellow in the Digital and Multimedia Sciences Section of the American Academy of Forensic Sciences. He is the section secretary for 2011–2012 and is the chair-elect for 2012–2014. He earned his BS degree in electrical engineering in 1996, from the audio engineering program at the University of Miami, and currently is a forensic audio/video examiner in the private sector, after having worked as an examiner at the FBI's forensic audio/video laboratory from 1996 through 2003. He has published over a dozen peer-reviewed papers in the fields of forensic audio and video analyses.

John J. Lentini, BA of Scientific Fire Analysis, LLC presents fire scene investigation and laboratory analysis of fire debris; he is one of a handful of people certified to conduct both fire scene investigations and fire debris analysis. He has personally conducted more than 2,000 fire scene inspections and has appeared as an

expert witness on more than 200 occasions. He is an active proponent of standards for fire and other forensic investigations.

Jim Lewis, DMD is the chair of the American Board of Forensic Odontology, Dental Age Estimation Committee and the 2012–2013 president of the American Society of Forensic Odontology. He received his dental degree from the University of Alabama School of Dentistry, is a fellow of the Odontology Section, currently serves as an odontology consultant to the Alabama Department of Forensic Sciences and is an adjunct faculty member of the Fellowship in Forensic Odontology at the Center for Education and Research in Forensics and the Southwest Symposium on Forensic Dentistry.

Jane A. Lewis, MFS is a fellow in the Questioned Document Section of the American Academy of Forensic Sciences. She received her Master of Forensic Science degree from the George Washington University in 1985. She is currently a unit leader in the forensic document unit at the Wisconsin State Crime Lab-Milwaukee. She also has a private practice. She has made numerous presentations at forensic science meetings and has published several articles on forensic document examination.

Laura L. Liptai, PhD received a PhD and MS in biomedical engineering as well as a second master's specializing in robotics from the University of Southern California. Dr. Liptai holds a bachelor's of science in mechanical engineering. Specializing in kinetics and kinematics of trauma/injury to the human body, she specializes in the analysis of the mechanics, quantity of forces/accelerations and human factors in traumatic incidents. This specialty of biomedical engineering uses the signature of evidence within human tissues in the context of the incident environment to derive causal factors. Dr. Liptai has received the Andrew Payne award and Founder's award for her exemplary contributions to the forensic engineering sciences. She compiled and edited the AAFS Reference Series that is the largest collection of research and case study proceedings worldwide. She serves four boards: the University of California at Davis, BioMedical Engineering external advisory board; the American Academy of Forensic Sciences; the Society of Forensic Engineers and Scientists (also serves as vice-president) and the International Board of Forensic Engineering Sciences.

Barry K. Logan, PhD is the 2011–2012 treasurer of the American Academy of Forensic Sciences, and a fellow of the Toxicology Section. He is board certified by the American Board of Forensic Toxicology. He received his PhD degree from the University of Glasgow in Scotland, and is currently national director of Forensic Services with NMS Labs in Willow Grove, Pennsylvania, and executive director of the Center for Forensic Science Research and Education at the Fredric Rieders Family Renaissance Foundation. He has faculty appointments at Indiana University, Bloomington, Indiana and Arcadia University, Glenside, Pennsylvania. He has over 80 publications in the field of forensic toxicology.

Ryan Loomba, BS is a diversified biomedical engineer that specializes in complex system design, electrical circuit design, microfluidics and mechanical engineering applications. Ryan currently is an associate engineer at Nanomix in Emeryville, California where he is helping to design a point-of-care biomedical device utilizing carbon nanotube technology. Ryan received a BS in biomedical engineering with a specialization in electrical engineering from the University of Southern California.

Daniel A. Martell, PhD is a fellow in the Psychiatry and Behavioral Sciences Section of the AAFS. He is also a fellow of the American Board of Forensic Psychology and the National Academy of Neuropsychology. He obtained his PhD from the University of Virginia and is currently on the clinical faculty at the Semel Institute for Neuroscience and Human Behavior of the David Geffen School of Medicine at UCLA. Dr. Martell's research interests include brain damage, mental disorder, and violent criminal behavior.

Edward L. Mazuchowski, MD, PhD is a reviewer for the *Journal of Forensic Sciences* and a diplomate of the American Board of Pathology in Anatomic, Clinical and Forensic Pathology. He received his doctorate of medicine from the Uniformed Services University of the Health Sciences in Bethesda, Maryland and his doctorate of philosophy in bioengineering from the University of Pennsylvania in Philadelphia, Pennsylvania. Currently he is a lieutenant colonel in the United States Air Force and a deputy medical examiner with the Armed Forces Medical Examiner System, which has the responsibility of providing comprehensive medicolegal death investigation services to the Department of Defense and other federal agencies.

Kara L. Nance, PhD is professor and chair of the Computer Science Department at the University of Alaska Fairbanks and runs a computer security consulting firm. Her research interests include digital forensics, data systems, network dynamics, visualization and computer security. She is the founder and director of the Advanced Systems Security Education, Research and Training (ASSERT) Center, which is a multi-disciplinary center to address computer security issues and provides an isolated networked computer environment suitable for computer security education, research and training that is used by institutions around the world. She serves on a senior-executive advisory board for the Office of the Director of National Intelligence and is a frequent author and speaker on cyber security as it relates to national security.

Skip Palenik, BS has had a lifelong fascination with the microscope that started when he received his first instrument at the age of eight. Since then he has devoted himself to increasing his knowledge of analytical microscopy and microchemistry and applying it to the solution of real-world problems, especially those of forensic interest. He was fortunate in having worked closely with his mentor, Dr. Walter McCrone, for over 30 years and to have studied forensic microscopy with Dr. Max

Frei-Sulzer of Zurich, a disciple of Dr. Edmond Locard of Lyon. Skip has been teaching analytical microscopy to forensic scientists for more than 30 years and has published numerous scientific articles and book chapters on the applications of chemical and forensic microscopy. He established Microtrace in 1992 to provide a resource for organizations and individuals in need of scientific services involving the analysis of microscopic trace evidence. His special research interests are the identification of single small particles, small amounts of complete unknowns and tracing dust and soil back to their origins. He is the 2009 recipient of the Paul L. Kirk Award, the highest award given by the Criminalistics Section of the American Academy of Forensic Sciences, and the 2003 Distinguished Scientist Award from the Midwestern Association of Forensic Sciences. He is listed in American Men and Women of Science. In 2010 he was awarded the Chamot Medal in chemical microscopy by the State Microscopical Society of Illinois.

Iain A. Pretty, DDS, PhD is a full-time academic at the School of Dentistry, University of Manchester, England. He has published extensively on odontological matters, concentrating on establishing metrics of reliability and validity for forensic techniques. His work continues to develop the theme of application of robust scientific methods to forensic dentistry and he has a particular interest in wrongful convictions and what can be learned from them.

William M. Riordan, BA is a director on the American Academy of Forensic Sciences board of directors and a fellow in the Questioned Document Section. He is also a diplomate of the American Board of Forensic Documents Examiner, Inc. and is currently a director on that board. He received a bachelor of arts degree from Roosevelt University, Chicago in 1975 and was trained in forensic document examination in the Chicago Police Department Crime Laboratory under Maureen Casey Owens. In 1986, after 13 years with the Chicago Police Department Crime Laboratory, he was employed as a forensic document analyst by the Department of the Treasury in the Internal Revenue Service National Forensic Laboratory, Questioned Document Unit, where he is currently employed.

Jeri D. Roper-Miller, PhD holds a 2011–2014 position on the American Academy of Forensic Sciences board of directors and is a fellow in the Toxicology Section. She received her PhD degree in 1998 from the University of Florida and currently is a principal investigator and senior research forensic scientist at RTI International in Research Triangle Park, North Carolina. She has published in the fields of forensic toxicology and clinical chemistry with an emphasis on drugs of abuse in post-mortem testing, drugs of abuse in alternative matrices such as hair, and laboratory technological evaluations and advancements.

Daniel J. Ryan, JD is a professor at the Information Resources Management College of the National Defense University where he teaches cyberlaw, intelligence, information security and computer forensics. His research is in the areas of risk

management, digital forensics and admissibility of scientific, technical or specialized evidence. He received a *Juris Doctor* degree from the University of Maryland and has published one book and numerous journal articles on law, business, and technology.

John E. Sammons, MS is an assistant professor at Marshall University, where he teaches digital forensics, electronic discovery, and information security. He received his Master of Science degree in 2008 from Mountain State University. He is the founder and director of the Appalachian Institute of Digital Evidence. He is an investigator with the Cabell County Prosecuting Attorney's Office and former Huntington police officer. He is a member of the West Virginia FBI Cyber Crime Task Force. He is an associate member of AAFS.

David Senn, DDS is a fellow in the Odontology Section and a past President of the American Board of Forensic Odontology. He received his DDS degree in 1969 from the University of Texas Dental Branch at Houston. He is currently the director of both the Center for Education and Research in Forensics and the Fellowship in Forensic Odontology at the University of Texas Health Science Center at San Antonio (Dental School). He has published in the field of forensic odontology.

Claire Shepard, MS is a professor and the program coordinator for the forensic science program at Southern Crescent Technical College in Griffin, Georgia. She received her master's degree in forensic science from the University of New Haven and earned a bachelor of science degree from Millsaps College. Within the American Academy of Forensic Sciences, she served as program chair for the General Section, was the 2003–2004 president of the Young Forensic Science Forum, and has served on numerous committees. She is also a certified senior crime scene analyst (CSCSA) by the International Association for Identification and a member of DMORT.

Jay A. Siegel, PhD is currently chair of the Department of Chemistry and Chemical Biology at Indiana University Purdue University, Indianapolis, and a professor of forensic science and analytical chemistry. He is a distinguished member of the American Academy of Forensic Sciences. He holds a PhD in analytical chemistry from the George Washington University and received the Distinguished Alumni Scholar Award from there in 2009. He has published many articles in research in forensic chemistry and is co-author of two textbooks in forensic science and co-editor-in-chief of the *Journal of Forensic Science Policy and Management*.

Dawnie Wolfe Steadman, PhD, D-ABFA is the director of the Forensic Anthropology Center at the University of Tennessee, Knoxville. She is a diplomate of the American Board of Forensic Anthropology and a fellow of the American Academy of Forensic Sciences. She received her PhD from the University of Chicago in 1997.

Her areas of teaching and research include forensic anthropology, bioarchaeology and forensic human rights investigations.

Peter Stephenson, PhD is a cyber criminologist, digital investigator and digital forensic scientist at Norwich University (Vermont). He is a writer, researcher and lecturer on information assurance, digital investigation, and forensics. He has lectured throughout the world on digital investigation and security and has written, edited or contributed to 17 books and several hundred articles. He teaches network attack and defense, digital forensics and cyber investigation at Norwich University, where he also is the chief information security officer, and is director of the Norwich University Center for Advanced Computing and Digital Forensics. Dr. Stephenson obtained his PhD at Oxford Brookes University, Oxford, UK, and he holds a Master of Arts degree (cum laude) in diplomacy with a concentration in terrorism from Norwich University.

Yingying Tang, MD, PhD is director of the Molecular Genetic Laboratory at the NYC OCME. Dr. Tang received her MD from China Medical University, Shenyang, China, her PhD from Columbia University, and completed her post-doctoral fellowship in clinical molecular genetics and biochemical genetics in the Department of Human Genetics, Mount Sinai School of Medicine. She is certified by the American Board of Medical Genetics in clinical molecular genetics and clinical biochemical genetics, and by New York State Department of Health as laboratory director in genetic testing. She has published on mitochondrial genetics and its role in human disease, and on genetic testing in sudden death. Dr. Tang has been an investigator or co-investigator on four National Institute of Justice research grants.

Morris Tidball-Binz, MD is the forensic coordinator of the Assistance Division of the *International Committee of the Red Cross* (ICRC), based in Geneva, Switzerland. He received his medical degree from the National University of La Plata, Argentina (1989). He did his postgraduate training in forensic anthropology and in forensic medicine, including an honorary research fellowship at the Department of Forensic Medicine at Guy's Hospital, London, UK, between 1993 and 1996. He specialized in the application of forensic sciences to human rights and humanitarian investigations, has carried out forensic casework in over 30 countries and been actively involved in training and dissemination of applied forensic sciences in all regions (Americas, Africa, Asia, Europe, Middle-East and Pacific). Dr. Tidball-Binz co-founded and was the first director of the Argentine Forensic Anthropology Team (NGO), Buenos Aires, Argentina (1984–1990); assisted the Grand-Mothers of Plaza de Mayo (NGO) in the establishment of a national genetic databank for the identification of missing children in Argentina (1984–1989); was researcher for Chile, Mexico, Venezuela and Central America at the Americas Department of Amnesty International's International Secretariat in London, UK (1990–1995) and then head of that department (1996–1997).

He directed the Regional Programme for the Prevention of Torture of the Inter-American Institute for Human Rights in Costa Rica (1998–1999), founded and was first director of the Latin-America Regional Office of Penal Reform International (NGO), also in Costa Rica (2000–2001), directed the Human Rights Defenders Office of the International Service for Human Rights (NGO), Geneva, Switzerland (2001–2003) and also directed that organization during 2003, before joining the ICRC in 2004.

Jan Unarski, PhD graduated in car mechanical engineering at the Technology University of Cracow in 1977, earning a PhD engineering degree in 2002. Employed by the Institute of Forensic Research in Cracow (Ministry of Justice) for 33 years, accident reconstruction became a specialty in 1985. Head of the Accident Reconstruction Department, Dr. Unarski became the chairman of the Road Accident Analysis Working Group (RAA WG) of ENFSI (European Network of Forensic Science Institutes) in 1998, serving until 2001. Dr. Unarski is a member of the Presidential Board of EVU (European Association for Accident Research and Analysis).

D. N. Vieira, PhD, MD is the current president of the International Academy of Legal Medicine and of the European Council of Legal Medicine, and a fellow in the Pathology and Biology Section. He is past president of the International Association of Forensic Sciences, of the World Police Medical Officers, of the Mediterranean Academy of Legal Medicine and of the Latin-American Association of Medical Law. He is full professor of forensic medicine and forensic sciences and of ethics and medical law at the University of Coimbra, and invited professor in several European and South-America universities. He is also the director of the National Institute of Forensic Medicine of Portugal and a member of the Portuguese National Council of Ethics for Life Sciences. He has published extensively and he has been awarded 11 scientific prizes and 12 honorary fellowships from scientific associations from European, Asian and Central and South American countries. He has participated in many international missions as forensic consultant, especially in the field of human rights.

Frank Wright, DMD is fellow in the Odontology Section of the American Academy of Forensic Sciences, serving as a past Odontology Section program chair, secretary and section chairman. He is the immediate past president of the American Board of Forensic Odontology, a 1984 graduate of the University of Kentucky College of Dentistry and he currently serves as the forensic dental consultant for the Hamilton County Coroner's Office in Cincinnati, Ohio. He has lectured and published extensively in all areas of forensic dentistry, with an emphasis on visible and non-visible light photography.

Acknowledgements

Since this volume represents a team effort, many acknowledgements are due. Rachael Ballard of Wiley-Blackwell extended the original invitation to consider this book effort and offered continuous encouragement and support during production. Our 2011–2012 AAFS board of directors unanimously approved the volume concept and was instrumental in selecting chapter authors, with some members serving as authors themselves. Of the AAFS staff, Anne Warren contributed considerable support, especially regarding contract negotiation. Kimberly Wrasse maintained communication with authors regarding manuscript production deadlines and format issues.

During the manuscript editing phase, Smithsonian Institution colleague Kristin Montaperto worked closely with me in the evaluation and formatting of each contribution. An additional Smithsonian colleague, Keitlyn Alcantara, assisted with various editing issues, along with my son Max Ubelaker and daughter Lisa Ubelaker. Lauryn Guttenplan of the Smithsonian Institution was instrumental in the formulation of contract language.

Wiley-Blackwell editor Fiona Seymour offered prompt advice on format issues during our initial work and then took charge of production once the volume manuscript was formally submitted. Finally, I thank all of our authors who gave so generously of their time and expertise in writing the chapters. Our authors met the somewhat formidable challenge of the rapid production schedule, as well as the goal of squeezing so much information about our beloved forensic sciences into this volume.

Contents

List of contributors	vii
Acknowledgements	xix
1 Introduction <i>Douglas H. Ubelaker</i>	1
2 General forensics – no one else starts until we finish <i>Julie Howe, Janet Barber Duval, Claire Shepard and Robert Gaffney</i>	6
3 Criminalistics: the bedrock of forensic science <i>Susan Ballou, Max Houck, Jay A. Siegel, Cecelia A. Crouse, John J. Lentini and Skip Palenik</i>	29
4 Forensic pathology – the roles of molecular diagnostics and radiology at autopsy <i>James R. Gill, Yingying Tang, Gregory G. Davis, H. Theodore Harcke and Edward L. Mazuchowski</i>	102
5 The places we will go: paths forward in forensic anthropology <i>Dawnie Wolfe Steadman</i>	131
6 Forensic toxicology: scope, challenges, future directions and needs <i>Barry K. Logan and Jeri D. Roper-Miller</i>	160
