

# PRINCIPLES OF RAILROAD TRANSPORTATION

BY

EMORY R. JOHNSON, PH.D., Sc.D.

DEAN OF THE WHARTON SCHOOL OF FINANCE AND COMMERCE AND PROFESSOR OF  
TRANSPORTATION AND COMMERCE IN THE UNIVERSITY OF PENNSYLVANIA.

AUTHOR OF "OCEAN AND INLAND WATER TRANSPORTATION,"  
"ELEMENTS OF TRANSPORTATION," ETC.

AND

THURMAN W. VAN METRE, A.M., PH.D.

ASSOCIATE PROFESSOR OF TRANSPORTATION IN THE SCHOOL OF BUSINESS  
OF COLUMBIA UNIVERSITY. AUTHOR OF "ECONOMIC HISTORY  
OF THE UNITED STATES"

ILLUSTRATED WITH HALF-TONES, MAPS  
AND DIAGRAMS

# TRANSPORTATION

---

## RAILROAD FREIGHT TRANSPORTATION

By L. F. LOREE

Every phase of the problem of freight movement—personnel, organization, right of way, mechanical equipment, administration—discussed from long and intimate experience by a practical railroad man.

## ELEMENTS OF TRANSPORTATION

By EMORY R. JOHNSON

A complete outline of rail and water transportation divided into four parts, covering steam and electric railroads, ocean, and inland water (lake, river, canal) transportation. With maps and illustrations.

## PRINCIPLES OF RAILROAD TRANSPORTATION

By EMORY R. JOHNSON and T. W. VAN METRE

A complete work on railroading, interestingly written and embodying all the recent changes in organization and control.

## OCEAN AND INLAND WATER TRANSPORTATION

By EMORY R. JOHNSON

Complete discussion of all forms of water transportation. The problems of organization, equipment, traffic management and general administration are fully covered. Illustrated.

## OCEAN STEAMSHIP TRAFFIC MANAGEMENT

By GROVER G. HUEBNER

A detailed work on facts and principles, forms and practices involved in the management of ocean shipping. Part I deals with organization, Part II with documents and details, Part III with rates and regulations.

## ECONOMICS OF MOTOR TRANSPORTATION

By GEORGE H. GRUPP

Comprehensive and practical discussion of a matter of timely importance. Essential principles are fully covered, and their application studied in practical detail.

# CONTENTS

CHAPTER	PAGE
I.—INTRODUCTION—DEFINITION AND SCOPE OF TRANSPORTATION . . . . .	1-9
Transportation defined, 2. The technics of transportation, 2. The service, 2. The economics of transportation, 3. Transportation economics and the science of political economy, 3. Transportation and the production of wealth, 4. Transportation and the use or consumption of wealth, 4. Relation of transportation to the exchange of wealth or commerce, 4. Relation of transportation to the distribution of wealth, 5. Transportation and political science, 7. The scope of this volume, 9.	

## PART I

### THE AMERICAN RAILROAD SYSTEM

II.—ORIGIN OF THE AMERICAN RAILROAD . . . . .	13-24
Antecedents of the railroad, 14. Country roads and turnpikes, 14. Canals and improved rivers, 16. Early history of the railroad in America, 20. References, 24.	
III.—GROWTH OF THE AMERICAN RAILROAD NET . . . . .	25-37
Growth in mileage by decades, 26. Importance of the decade from 1850-1860, 26. Railroad consolidations, 28. The decade 1860-1870, 30. The first transcontinental lines, 30. The panic of 1873, 31. Construction from 1880-1890, 31. Construction since 1890, 32. Comparison of American and European railroad mileage, 33. Magnitude of the railroad system in the United States, 33. References, 37.	

IV.—THE MECHANISM OF THE RAILROAD—DEVELOPMENT  
OF TRACK AND LOCOMOTIVE . . . . . 38-60

Early track construction, 39. Development of the railroad rail, 39. Ties and ballast, 44. Early locomotives, 45. Later types of locomotives, 51. Classification of locomotives, 57. Recent improvements in locomotives, 58.

V.—THE MECHANISM OF THE RAILROAD (*Concluded*)—  
THE CAR, TERMINAL AND OPERATION . . . . . 61-83

Early passenger cars, 62. Sleeping cars, 63. Steel passenger cars, 63. The air brake, 65. Freight cars, 66. Terminal facilities, 68. The passenger terminal, 69. The freight terminal, 72. Electric telegraph, 76. Railroad signaling, 77. Electrification of steam railroads, 78. References, 82.

VI.—THE PRESENT RAILROAD SYSTEM OF THE UNITED  
STATES . . . . . 84-96

Railroad mileage and number of corporations in 1914, 84. The three large territorial groups of railroads, 85. Territorial grouping into seven sections, 85. Grouping by ownership and control, 88. Supply of railroad facilities in the United States and foreign countries, 94. References, 96.

VII.—THE RAILROAD CORPORATION AND ITS CHARTER . 97-107

The corporation defined, 97. The corporation and partnership distinguished, 98. The railroad company is a quasi-public private corporation, 99. The power of government to regulate railroads, 100. Railroad charters, 102. Size of railway corporations, 104. Insolvent corporations, 106. References, 107.

VIII.—RAILROAD CAPITAL . . . . . 108-130

Stocks and bonds, 108. Classes of bonds, 109. Classes of stocks, 110. Railroad capitalization in the United States, 110. Stock watering, 113. Motives for stock

# CONTENTS

vii

CHAPTER

PAGE

watering, 113. The promoter and the underwriter, 116. Methods of stock watering, 117. Effect of stock watering, 120. Bases of railway capitalization, 121. Public regulation of railroad capitalization, 124. State laws, 125. The Hadley Commission, 127. Federal regulation, 128. References, 130.

## IX.—EARNINGS, EXPENSES AND DIVIDENDS . . . 131-143

Sources of revenue, 131. Operating revenues, 131. Non-operating income, 133. Operating expenses, 134. Fixed charges, and other expenditures, 135. Net income and dividends, 135. The operating ratio, 138. Relation of earnings and dividends to business conditions, 141. References, 143.

## PART II

### THE RAILROAD SERVICE

## X.—THE FREIGHT SERVICE—CLASSIFICATION OF FREIGHT 147-159

The freight business the most important railroad service, 147. Volume of freight traffic in the United States, 148. Classification of freight, 149. The three great classifications, 150. Commodity tariffs, 155. Uniform classification, 156. How an agent ascertains rates on class and commodity freight, 158. Through and local freight, 159.

## XI.—THE FREIGHT SERVICE (*Concluded*)—BUSINESS ORGANIZATION . . . 160-180

Freight shipping papers: (1) bills of lading, (2) the waybill, 160. Unit billing, 168. Organization of freight service, 168. Demurrage, 170. Reciprocal demurrage, 171. Fast freight lines, 171. Coöperative freight lines, 173. Car interchange and the per diem system, 175. Records of car movements, 175. The railroad clearing house, 176. Private cars and private car lines, 177. References, 179.

## XII.—THE PASSENGER SERVICE . . . . 181-200

General characteristics of the passenger service, 181. Comparison of the trend of passenger fares and freight rates in the United States, 182. Volume of passenger traffic in the United States, 185. Comparison of railroad travel in the United States and foreign countries, 186. Classification of passenger travel in Europe, 187. Varieties of passenger service in the United States, 188. Relation between the Pullman Company and the railroad corporation, 193. Passenger tickets and baggage checks, 195. Methods employed to increase traffic, 196. Opportunities for developing passenger traffic, 197. Electricity and the passenger service, 199. References, 200.

## XIII.—THE EXPRESS SERVICE OF THE RAILROADS . 201-217

General character of the express service, 201. The origin of the express service and its subsequent development, 203. The organization of the American Railway Express Company, 206. Express shipping papers, 207. The contractual relations between the American Railway Express Company and the railroads, 207. Express rates, 209. Volume of express business, 213. The parcel post and the express service, 214. Should the present express service be discontinued? 215. References, 216.

## XIV.—THE MAIL SERVICE OF THE RAILROADS . . 218-234

The mail service increases with the progress of civilization, 218. Classification of mail matter, 219. The parcel post rate system, 220. General statistics of mail traffic, 223. Mail transportation, 223. The railway post office, 225. The services performed by railroad companies in transporting the mails, 226. Railway mail pay, 227. The postal deficit and its cause, 232. References, 234.

# CONTENTS

ix

CHAPTER

PAGE

XV.—THE ORGANIZATION OF THE SERVICE . . . 235-249

The corporate organization of a railroad company, 235. The secretary's department and law department, 236. The treasurer's department, 237. The accounting department, 237. The operating department and its subdivisions, 238. The traffic department, 241. Other departments, 241. Organization of the Pennsylvania Railroad Company and the Illinois Central Railroad Company, 242. References, 249.

XVI.—THE ACCOUNTS AND STATISTICS OF THE RAILROAD SERVICE . . . . . 250-269

The usefulness of railroad accounts, 250. The materials of railroad accounts and statistics, 251. The comptroller's reports, 252. Annual report of the president, 252. The income statement, 253. The profit and loss account, 256. The general balance sheet, 257. The need for accuracy and uniformity in railroad accounts, 258. Government regulation of railroad accounting, 259. Five leading sources of railroad statistics, 262. Suggested extensions of the scope of transportation statistics, 265. References, 268.

## PART III

### THE RAILROADS AND THE PUBLIC

XVII.—INTERRAILWAY RELATIONS—RAILROAD COMPETITION AND AGREEMENTS TO MAINTAIN RATES 273-287

The public nature and the unity of the transportation service, 273. Railroad companies are coöperators and competitors, 274. Early interrailway relations, 275. Early arrangements for through traffic, 276. Interrailway rivalry; its beginnings, 277. The struggle for the Chicago-Atlantic traffic, 278. The rivalry of the Atlantic ports, 279. Early competition in the West and

South, 280. Nature of railroad competition, 281. The railroad business one of "increasing returns," 283. The restraint of interrailway competition a necessity, 284. Coöperation or consolidation is the alternative, 284. Agreements to maintain rates, 284. The Saratoga Conference, 286.

XVIII.—INTERRAILWAY RELATIONS (*Continued*)—POOLS AND TRAFFIC ASSOCIATIONS . . . 288-303

Definition of pooling, 288. Description of traffic and money pools, 288. The beginning of railroad pooling, 290. Pooling in the West, 291. The traffic association and the pool distinguished, 292. Pools in the South, 292. Early agreements in trunk line territory, 294. The trunk line pool and the Joint Executive Committee, 296. The situation as regards railroad pooling in 1887, 298. Pooling prohibited by the Interstate Commerce Act, 299. Pooling contracts were illegal at common law, 300. Reorganization of pooling contracts to eliminate the pooling feature, 301.

XIX.—INTERRAILWAY RELATIONS (*Concluded*)—THE PRESENT SITUATION . . . 304-320

Efforts of trunk lines to regulate competition after the prohibition of pooling, 304. Traffic associations decided to be a violation of antitrust law of 1890, 306. Effect of the decision in the traffic association cases, 307. Progress of railroad consolidation, 307. Methods of consolidation, 308. "Community of interest," 309. Traffic associations and informal agreements, 311. Pools legalized, 314. Classes of traffic associations, 315. Shippers' organizations, 318. References, 319.

XX.—MONOPOLY AND COMPETITION IN THE RAILROAD SERVICE . . . 321-333

Railroad corporations must be large and must coöperate, 321. Scope of railroad monopoly must be under-

# CONTENTS

xi

CHAPTER

PAGE

stood in considering charges and government regulation, 323. What is meant by monopoly, 323. The oil business an example of monopoly, 324. The railroad business has not been a complete monopoly, 325. Railroad coöperation is of two kinds; the attitude of the law toward each kind, 326. Railroad competition is of two kinds, 327. Railroad competition is not confined to junction points, 328. The competition of markets, 328. Influence of competition upon local rates, 330. The monopoly of the railroad is only partial, 332. Government regulation of a partial monopoly may be necessary, 332. The term natural monopoly not strictly accurate, 333. References, 333.

## XXI.—THEORY OF RATES AND FACTS . . . 334-348

Need of a theoretical basis of rates and fares, 334. Meanings of the term "cost," 335. The impossibility of determining exactly the cost of a particular service, 336. Cost an undesirable as well as an impracticable basis of railway charges, 337. The value of the service theory of charges, 340. The value of commodity theory, or the taxation principle, of charges, 342. Charging "what the traffic will bear," 343. What constitutes a theoretically just rate? 344. Discriminations may be just or unjust, 346. The socialization of rates and fares, 347. References, 348.

## XXII.—RATE MAKING IN PRACTICE . . . 349-364

The problem of rate making different for private and state railroads, 349. Classification the first step in making freight rates, 350. The machinery for making freight rates, 352. Considerations which influence the decisions of traffic officials, 354. Railroad coöperation in rate making, 355. Rate systems in the United States, 356. The trunk line rate system, 356. The southern rate system, 357. The western rate system, 358.

Transcontinental rates, 359. Import and export rates, 360. The machinery for making passenger fares, 360. The problem of fixing passenger fares as compared with the freight rate problem, 361. The general tariff policy of American and foreign railroads, 363. References, 364.

## PART IV

### THE RAILROADS AND THE STATE

#### XXIII.—RAILROADS AND THE STATE. REGULATION IN THE UNITED KINGDOM AND GERMANY . 367-406

The twofold relation of the government to the railroads, 367. The form which the state's relation to railroads may assume, 370. Railroads of the United Kingdom received no state aid, 371. Early competition and consolidation in Great Britain, 372. Railroad coöperation, 373. British regulation of railroad consolidation, 374. Early regulation of railroad rates in Great Britain, 375. The Act of 1854, 378. The Act of 1873, 379. The Railway and Canal Traffic Act of 1888, 381. Maximum rate laws, 383. The Act of 1894, 384. British railroads and the war, 385. The Ministry of Transport Act of 1919, 387. The Railways Act of 1921, 389. Early railway policy in Germany, 390. The nationalization of Prussian railways, 394. The Prussian railway organization, 395. The results of railway nationalization in Prussia, 398. German railways and the war, 400. The present railway policy of Germany, 400. Railway policies of other countries, 402. Conditions which determine the railway policy of a state, 404. References, 405.

# CONTENTS

xiii

## CHAPTER

PAGE

### XXIV.—PUBLIC AID TO RAILROAD CONSTRUCTION IN .. THE UNITED STATES . . . . . 407-421

Aid given by the States to railroads, 408. Forms of aid given by the States, 409. Amount of aid given by the States, 409. The results of state aid were unsatisfactory, 410. National aid to railway construction, 411. Terms of the land grants, 412. The grants to the Pacific roads, 412. Repeal of the land grants, 415. The loan of public funds to aid railroads, 415. Concerning the policy of loans and land grants, 417. County, municipal, and individual aid to railroad building, 418. Local individual aid, 419. References, 420.

### XXV.—REGULATION OF RAILROADS BY THE AMERICAN STATE GOVERNMENTS—THE STATE COMMISSIONS . . . . . 422-447

Powers of the Federal and State governments over railroads, 422. Little regulation before 1870, 423. Charter limitations on rates and profits, 424. Early railroad commissions and their functions, 426. The demand for rate regulation, 427. The two types of railroad commissions, 427. The Massachusetts commission of 1869, 427. Railroad regulation in the West and South, 429. The granger laws and the Illinois commission, 430. Granger laws upheld by the Supreme Court, 432. The Wabash decision of 1886, 433. Modification of the early granger laws, 434. Recent methods of state regulation; the utilities commission, 435. The powers of present state commissions; the law of Illinois, 436. Railroad commissions and corporation commissions, 439. Objections to state regulation, 440. Changes effected by the Transportation Act of 1920, 443. References, 445.

XXVI.—RAILROAD REGULATION BY THE FEDERAL GOVERNMENT—THE ACT OF 1887 . . . 448-466

Origin of the demand for Federal regulation, 448. The Windom report of 1874, 449. The Cullom report of 1886, 450. Early attempts at Federal regulation, 450. The enactment of the Interstate Commerce Act of 1887, 451. Chief provisions of the law, 451. The operation of the law; the commission's orders not binding, 456. Power of the commission to secure testimony, 458. The power of the commission to regulate rates, 459. The long and short haul clause, 460. Import rates, 463. Results accomplished by the law of 1887, 464. Needed changes, 464. References, 466.

XXVII.—FEDERAL LEGISLATION FROM 1903 TO 1914 467-488

The Elkins Act of 1903, 467. The Expediting Act of 1903, 468. Enactment of the Hepburn amendment of 1906, 469. Main provisions of the Hepburn amendment, 469. The question of judicial review, 474. The grounds upon which the courts set aside orders of the commission, 475. The Mann-Elkins Act of 1910, 477. Other amendments to the Interstate Commerce Act, 1910-1915, 480. The Federal Antitrust law applicable to railroads, 483. Federal regulation of railroad operation, 484. General character of the system of Federal regulation as it existed in 1910, 486. The need for modification, 487. References, 487.

XXVIII.—NEW RAILROAD PROBLEMS; GOVERNMENT OPERATION . . . 489-511

Decline of earnings, 489. Railroad bankruptcies, 492. The Adamson Act, 494. Effects of the war, 496.

# CONTENTS

XV

## CHAPTER

PAGE

Government control, 504. The Railroad Administration, 505. Operating results, 509. Financial results, 510. References, 511.

## XXIX.—THE TRANSPORTATION ACT OF 1920 . 512-533

Reconstruction plans, 512. The Cummins and the Esch bills, 514. The Transportation Act, 515. Labor disturbances, 523. Rate increases, 524. The business depression, 525. Operation of the law, 528. References, 533.

## XXX.—THE COURTS AND RAILROAD REGULATION . 534-562

Laws are partly court made, 534. Function of the judiciary in railroad regulation, 536. Development of judicial review, 536. State rate regulation, 537. The relation of the courts to unreasonable rates made by railroad companies, 541. Injunctions to prevent rate advances, 543. Injunctions to prevent rate wars, 544. Injunctions against secret rebates, 547. Injunctions and labor disputes, 548. The general law regarding strikes, 548. Injunctions to protect property and personal rights, 549. Injunctions compelling railroad employees to work, 550. Use of the injunction in the Debs strike of 1894, 551. Regulation of the use of the injunction by the Clayton Antitrust Act, 553. Railroad receiverships, 554. Railroad insolvency in the United States, 556. Causes of railroad insolvency, 557. Objections to the present system of railroad receiverships, 559. Suggested changes, 560. References, 561.

## XXXI.—THE PROBLEM OF GOVERNMENT OWNERSHIP AND GOVERNMENT REGULATION IN THE UNITED STATES . . . . . 563-577

The twofold nature of the problem of government regulation, 563. The two methods of government control, 564. Government ownership a question of expediency, 565. The experience of one country not necessarily a safe guide of action in another, 566. Should the

United States adopt a policy of government ownership? 567. Probable effect of such a policy upon the railroad service, 567. Probable effect upon rates, 569. Socialization of rates and fares possible under government ownership, 571. Effect of government ownership on politics and government, 572. The success of government regulation in the United States, 573. Need for a constructive policy, 575. References, 577.

APPENDIX—QUESTIONS AND TOPICS . . . 579-609

INDEX . . . . . 611
