

PROCEEDINGS ICOESE '90

International Conference on Optoelectronic Science and Engineering '90

Wang Da-Heng
Chair/Editor

22-25 August 1990
Beijing, China

Organized by
China International Conference Center for Science and Technology
(CICCST), China
Topical Committee on Optoelectronic Technology of COS
(TCOET), China
Tsinghua University, China

Sponsored by
China Association for Science and Technology (CAST), China
International Commission for Optics (ICO)
SPIE—The International Society for Optical Engineering, USA
Chinese Optical Society (COS), China
Finnish Academies of Science and Letters (FASL), Finland
Optical Society of America (OSA), USA
LEOS—Lasers and Electro-optics Society of the IEEE, USA
Indonesian Optics Commission (IOC), Indonesia

SPIE Volume 1230

Published by
SPIE—The International Society for Optical Engineering
P.O. Box 10, Bellingham, Washington 98227-0010 USA

SPIE (The Society of Photo-Optical Instrumentation Engineers) is a nonprofit society dedicated to advancing engineering and scientific applications of optical, electro-optical, and optoelectronic instrumentation, systems, and technology.

SPIE Volume 1230

PREFACE

I am delighted to be able to write the preface for this SPIE Proceedings and heartily thank the conference chair, Wang Da-Heng, and cochairs for affording me this opportunity. This proceedings represents the first fruits of numerous discussions between optical researchers in The People's Republic of China and SPIE—the International Society for Optical Engineering, fruits that we hope to witness the maturation of in the years to come.

The sessions are varied and include one on optoelectronics, electro-optics, acousto-optics, and magneto-optics. Other sessions focus on intelligent electro-optical sensors, optoelectronic testing, laser devices, infrared, fibers, image processing, optical disks, bistability, and pattern recognition. These topics are all of intense interest worldwide, as witnessed by the number of countries represented—Japan, Italy, the United States, and Great Britain, to name a few. A large proportion of the papers are from the host country, China, and provide a glimpse of the wide range of activity in optics there.

Several papers that caught my eye, partly because of my own interests, include "Liquid-crystal infrared optics and applications," "Temperature mapping by double grating diffractions systems," "Infrared-transmitting fluoroaluminate glasses," and "A new method of radiation calibration ... for the VHRSR." Other papers describe MRTD testing, infrared planar waveguides, and more. These topics range from the highly theoretical to the extremely practical; all promise interesting material. I look forward to even greater international cooperation among scientists, including engineers, and applaud this proceedings as a stellar example of the benefits of such cooperation.

Director of Topical Committee on Optoelectronic Technology of COS (China)

INTERNATIONAL CONFERENCE ON
OPTOELECTRONIC SCIENCE AND ENGINEERING '90

SPIE Volume 1230

INTRODUCTION

Recently, optoelectronic science and technology have made remarkably quick progress. For the sake of furthering the exchange of academic views and of promoting international camaraderie, the International Conference on Optoelectronic Science and Engineering '90 is to be held in Beijing, China, 22-25 August 1990. It is a great honor for us, the Chinese Optical Society, to cooperate with our cosponsors in hosting this grand meeting.

Thanks are due to all the authors and members of the conference committee who worked together to bring this volume into being. All the papers collected here were selected by the program committee. These papers contain significant new material in the form of ideas, implementations, and applications of optoelectronic technology. A total of 273 papers are included in this proceedings; 226 papers are written by authors from China and 47 papers are by authors from other countries or regions. These papers are grouped into the 12 topical areas listed below:

1. New Devices in the Fields of Optoelectronics, Electro-Optics, Acousto-Optics, Magneto-Optics, Specialized Modulators and Their Integrations;
2. Optoelectronic Intelligent Sensors;
3. Optoelectronic Test, Analysis, Measurement, and Control;
4. Laser Devices and Their Applications;
5. Infrared Optics, Low-Level Light Technology, and Applications;
6. Fiber Optic Devices and Applications;
7. Photovoltaic Technology and Solar Energy Systems;
8. Hybrid System for Image Processing;
9. Optical Disk Information Storage and Retrieval;
10. Optical Bistability and Optical Computing;
11. Pattern Recognition and Robot Vision;
12. Artificial Intelligence of Optical Equipment.

It is anticipated that this volume will be a valuable contribution to the development of optoelectronic science and technology. I wish to extend my thanks to all authors, members of the program committee, and secretariat of the conference for their hard work during the preparation of this conference and proceedings. We are grateful to all our cosponsors for their energetic support and sincere cooperation, especially to SPIE, who published and issued this proceedings of ICOESE '90.

I would also like to express a hearty welcome to all participants and accompanying guests coming from various regions of the world to join us and hope that all of you will have a very enjoyable stay in Beijing. Best wishes for a successful conference.

Wang Da-Heng

CONTENTS

Preface	xviii
Conference Committee	xix
Introduction	xx
 INTRODUCTORY PAPER	
Some recent progresses on optoelectronics in China D.-H. Wang, Chinese Optical Society (China)	3
 SESSION 1 NEW DEVICES IN THE FIELDS OF OPTOELECTRONICS, ELECTRO-OPTICS, ACOUSTO- OPTICS, MAGNETO-OPTICS, SPECIALIZED MODULATORS AND THEIR INTEGRATIONS	
Coherence control by acousto-optic multifrequency Bragg diffraction J. Turunen, E. Tervonen, A. T. Friberg, Helsinki Univ. of Technology (Finland)	8
Fabrication of acousto-optic modulators on GaAs substrates Y. K. Su, S. C. Shei, J. C. Lin, National Cheng Kung Univ. (China)	10
Development of weatherproof LED S. Usuda, IDEC IZUMI Corp. (Japan)	14
Optical properties of a liquid-crystal microlens T. Nose, S. Sato, Akita Univ. (Japan)	17
Growth of $\text{Bi}_{12}\text{GeO}_{20}$: influence of stoichiometry and doping elements on photorefractive parameters J. C. Launay, C. Laulan, M. Devalette, Univ. de Bordeaux (France)	21
Bird's eye view of semiconductor lasers in China L. Chen, Q. Wang, Institute of Semiconductors (China)	22
Wideband optical waveguide phase modulation J. Peng, B. Wu, D. Li, L. Li, Tsinghua Univ. (China)	26
Electro-optic branching waveguide mode converter with low drive voltage Y. F. Yuan, B. S. Chen, R. Y. Zhu, P. F. Zhou, Shanghai Institute of Mechanical Engineering (China) ...	29
Effect of 1-MeV electron irradiation on the AlGa/GaAs heteroface solar cell Z. Wu, R. Wu, C. Chen, S. Liu, Xiamen Univ. (China); H. Min, J. Zhong, Z. Wang, J. Wang, Shanghai Institute of Metallurgy (China)	32
Analysis of in-situ monitoring technique for fabrication of high-quality diffraction gratings used in integrated optical circuits J. Xie, H. Ming, Univ. of Science and Technology of China (China); K. Tada, Univ. of Tokyo (Japan) ..	35
Infrared acousto-optic tunable filter Y. Cui, J. Tang, Changchun Institute of Optics and Fine Mechanics (China)	38
Study of the measurement system for high extinction ratio G. Li, M. Zhao, F. Wu, Q. Hu, Qufu Normal Univ. (China)	41
Dark current of field-assisted GaAs semiconductor photocathodes J. Li, L. Guo, X. Hou, Xian Institute of Optics and Precision Mechanics (China)	43
Hard x-ray quantum detection efficiency of CsI-coated MCP S.-M. Xiang, Xian Institute of Applied Optics (China)	46

(continued)

INTERNATIONAL CONFERENCE ON OPTOELECTRONIC SCIENCE AND ENGINEERING '90

SPIE Volume 1230

High-speed photography by two-dimensional acousto-optic lattice deflection A. He, D. Yan, X. Ni, East China Institute of Technology (China)	49
Regularization analyze method of the distribution function of the heterodyne quantum efficiency of the $\text{Hg}_{0.9}\text{Cd}_{0.1}\text{Te}$ photoelectrical diode Y. Dai, M. Li, L. Qiao, Harbin Institute of Technology (China)	52
Phase conjugation in doped bismuth germanate crystals M. Li, Y. Zhao, J. Shao, Y. Xu, Harbin Institute of Technology (China); C. Wang, Institute of Technical Physics (China)	54
Study of new methods for designing electrostatic and magnetic imaging system with variable magnification G. Ni, L. Zhou, W. Jin, Beijing Institute of Technology (China); E. Fang, Xian Institute of Modern Chemistry (China)	55
Liquid-crystal infrared optics and applications Y. Shi, Luoyang Institute of Constructional Materials Industry (China)	58
Joint-transform optical correlator using LCTV T. Wang, S. Yang, Y. Li, S. Zhang, S. Fan, H. Wen, Guangzhou Institute of Electronic Technology (China)	61
New application of an acousto-optic tunable filter: fast-measuring chromaticity value G. Gao, Z. Lin, Zhejiang Univ. (China)	63
Two ion-exchanged microlens arrays Y. Gao, Y. Qing, Xian Institute of Optics and Precision Mechanics (China)	65
Optical properties and annealing behaviors of amorphous silicon phosphorus alloy films J. Zhou, D. Gu, F. Gan, Shanghai Institute of Optics and Fine Mechanics (China); Z. Ding, Zhejiang Univ. (China)	67
Theoretical analysis of two-element HBR waveguide array J.-G. Xin, G.-H. Wei, Beijing Institute of Technology (China)	69
Novel polarization-independent optical waveguide modulator on Z-propagating Ti:LiNbO_3 K. Wang, G. Yu, D. Li, Beijing Univ. of Posts and Telecommunications (China)	71
Study of the semiconductor color-sensing detector B. Chen, Z. Xin, North China Institute of Water Conservancy and Hydroelectric Power (China)	73
Enlightening viewpoint and new result on improving frequency limit of high-frequency electro-optic modulation T. Wu, South China Univ. of Technology (China)	75
Investigation on evaporating CsI x-ray photocathode into MCP B. S. Zhao, B. E. Liu, W. D. Peng, G. F. Zhu, Xian Institute of Optics and Precision Mechanics (China)	77
Design for acousto-optic deflectors of the Z-polarized shear wave in TeO_2 N. Li, Guangdong Mechanical College (China)	79
Infrared planar optical waveguide coupling system for magneto-optical waveguide characteristic research K.-Y. Wu, J. Ouyang, J. Su, H. He, Huazhong Univ. of Science and Technology (China)	81

SESSION 2 OPTOELECTRONIC INTELLIGENT SENSORS

Research and developments in the area of optoelectronics in Optical Engineering Department at Zhejiang University J. Tang, Zhejiang Univ. (China)	84
---	----

INTERNATIONAL CONFERENCE ON OPTOELECTRONIC SCIENCE AND ENGINEERING '90

SPIE Volume 1230

Study of the fine dividing technique for unity interference fringe by using OCV M. Ren, C. Zhu, C. Wan, Xian Jiaotong Univ. (China)	87
New type of optically controlled varactor C. Zhu, J. Liu, Xian Jiaotong Univ. (China); J. Xu, Univ. of Toronto (Canada)	90
Optical 2-D associative memory with hybrid thresholding and feedback G.-G. Mu, X.-M. Wang, Y.-X. Zhang, Nankai Univ. (China)	93
New, monolithic encoding digital photodetector array X. Huang, X. Wen, X. Liu, J. Zhu, Southwest Institute of Technical Physics (China)	96
Application of CCD frame transfer sensor to the performance test of angle tracking system of radar G. Huang, Q. Han, Ordinance Engineering Institute of The Chinese People's Liberation Army (China); Y. Liu, Fifth Research Institute of the Air Force (China)	97
New type of shearing S-H wavefront sensor P. Zhao, Nanjing Astronomical Instruments Factory (China)	99
Some means to raise properties of four-terminal optical compensation network Q. Wen, J. Li, X. Zhong, Chongqing Univ. (China)	101
SESSION 3 OPTOELECTRONIC TESTS, ANALYSIS, MEASUREMENT, AND CONTROL	
Optoelectronic detection and analysis of ultraweak biophoton emission carrying new bio-information H. Inaba, Tohoku Univ. and Research and Development Corp. of Japan (Japan)	104
Compact disc inspection through measurement of low birefringence A. S. Voloshin, Lehigh Univ. (USA)	106
Image profile alignment applied to optical gauging in a bar mill E. Pickett, Univ. of Toronto (Canada)	109
Contribution of lateral waves and surface plasmons to the shift of a reflected beam G. Carbonara, A. Finizio, P. Mormile, G. Pierattini, Istituto di Cibernetica del CNR (Italy); G. Abbate, P. Maddalena, E. Santamato, Univ. di Napoli (Italy)	115
Thermal nonlinearities of an aqueous polystyrene microspheres suspension S. De Nicola, P. Mormile, G. Pierattini, Istituto di Cibernetica del CNR (Italy); G. Abbate, V. Bernini, P. Maddalena, Dipartimento di Scienze Fisiche (Italy)	120
Measurements of crystallization velocity and activation energy in the optical recording films with In-Sb-Te system T. Matsushita, A. Suzuki, H. Ohgaki, T. Aoki, T. Nakau, Osaka Sangyo Univ. (Japan); M. Okuda, Univ. of Osaka Prefecture (Japan)	124
Analysis of signal-to-noise ratio in readout system of the magneto-optic memory V. S. Sobolev, I. V. Filimonenko, Institute of Automation and Electrometry (USSR)	128
Optoelectronics for automatic inspection G. Longobardi, Istituto Nazionale di Ottica and Ctr. di Eccellenza Optronica (Italy)	132
Design for an automated optical tests and alignment system C. Cheng, Lockheed Missiles (USA)	138
Third-generation satellite laser ranging system at Shanghai Observatory F. Yang, D. Tan, C. Xiao, Y. Zhu, X. Shi, Z. Chen, W. Chen, Shanghai Observatory (China); H. He, Y. Li, Shanghai Institute of Optics and Fine Mechanics (China); Y. Wang, J. Yan, Changchun Institute of Optics and Fine Mechanics (China); Y. Han, H. Yu, Shenyang Institute of Automation (China)	144

(continued)

INTERNATIONAL CONFERENCE ON OPTOELECTRONIC SCIENCE AND ENGINEERING '90

SPIE Volume 1230

VHRSR's optical system	
Q. Zheng, X. Xu, Shanghai Institute of Technical Physics (China)	148
Research on ultrafast scanner	
R. Ma, J. Xu, Y. Lin, J. Chen, South China Univ. of Technology (China)	151
Effect of camera resolution on fringe patterns in electronic shear speckle-pattern interferometry	
F. Zhang, J. Wang, Y. Qin, Y. Zhang, Tianjin Univ. (China)	154
Electrographic camera for astronomy	
D. Fu, B. Niu, L. Li, S. Guo, Beijing Astronomical Observatory (China)	157
Compression of YAG mode-locked optical pulses and its application in microwave measurements	
Z. H. Zhu, Zhejiang Univ. (China); Z. A. Yasa, Femtochrome Research, Inc. (USA)	160
Microcomputer-based speckle-pattern imaging system	
Y. Gong, S. Wang, X. Xue, D. Xiao, Univ. of Electronic Science and Technology of China (China)	162
Direct subdivision of moire fringe with CCD	
W. Pei, D.-H. Hsu, Beijing Univ. of Posts and Telecommunications (China)	165
Scanning system for inputting the optical pattern	
M. Pei, J. Zhu, J. Huang, J. Zhou, Huazhong Univ. of Science and Technology (China)	167
New development in measuring large-gradient temperature field with optical interference	
K. Xu, China National Machine Tool Corp. (China); L. Chen, L. Shen, Tianjin Univ. (China)	170
Index and testing of extinction ratio for pulsed laser rangefinder	
J. Hu, Shuguang Instrument Factory (China)	173
High-sensitivity picosecond optoelectronic sampling system	
X. Guan, S. Yuan, F. Lu, J. Pai, Y. Li, G. Ren, Nankai Univ. (China)	176
Research on real-time measurement of size and distribution of atomized particles in high-speed centrifugal spray field	
G. Yang, Z. He, L. Xie, Z. Ye, Y. Guo, P. Jiang, F. Jiang, Chongqing Univ (China)	178
Clipped-speckle technique used in digital-speckle photography	
Q. Fang, Y. Tan, Xian Jiaotong Univ. (China)	181
High-accuracy photoelectric measurement of length	
Y. Yang, J. Qin, Shanghai Institute of Mechanical Engineering (China)	184
Phase-conjugation adaptive optics: return-wave algorithms and acquisition performance for multiple glints	
J. Ye, Y. Yu, J. Lu, Huazhong Univ. of Science and Technology (China)	187
Coarse-grating precision displacement measuring system with optoscanner	
X. Yuan, D. Zhang, Chongqing Univ. (China)	190
Computerized photoelectric refractometer	
B. Mi, W. Duan, Changchun Institute of Optics and Fine Mechanics (China); D. Su, Beijing Institute of Technology (China)	193
Temperature mapping by double-grating diffraction system with microcomputer image processing	
J. Tu, Q. Luo, M. Wu, X. Wang, X. Bao, Shanghai Jiao Tong Univ. (China)	196
Optimization techniques for combination matching of systematic accuracy of optoelectronic instruments	
E. Wang, D. Song, Xiamen Univ. (China)	199
Survey of the velocity constant in the chemical reaction in liquor by means of the speckle focus-out of laser	
C.-Y. Sun, Hengyang Teacher's College (China)	202
New method of radiation calibration in visible and near-infrared wavebands for VHRSR	
Z. Zhang, Q. Zheng, Shanghai Institute of Technical Physics (China)	204

INTERNATIONAL CONFERENCE ON
OPTOELECTRONIC SCIENCE AND ENGINEERING '90

SPIE Volume 1230

Design and study of preamplifier of APD photoelectrical signal H. Liu, Huazhong Univ. of Science and Technology (China)	206
Measuring system of digital-optical power spectrum H. Li, Y. Zhang, C. Xu, Tianjin Univ. (China)	209
Automatic photoelectric detection system with high accuracy for laser alignment Y. Dong, D. Li, M. Cao, J. Wang, Tsinghua Univ. (China)	212
Shearing interferometry of double frequency grating to measure temperature field H. Ming, J. Xie, S. Luo, H. Zhang, R. Heo, Univ. of Science and Technology of China (China)	215
Computerized measurement of synthetic characteristics of microchannel plates Y. Li, B. Zhang, East China Institute of Technology (China)	217
Photodiode linear array used for spectral recognition Z.-R. Wang, Southwest Petroleum Institute (China); Z.-Q. Zhu, Shichuan Univ. (China)	219
Real-time automatic calibration method of PMT drift Z. Liu, S. W. Agricultural Univ. (China); D. Zhu, Electronic and Technical Univ. (China); Z. Zhu, Sichuan Univ. (China)	221
System for spectrum parallel detection and continuous long record X. Zhu, K. Tan, Anhui Institute of Optics and Fine Mechanics (China)	223
Photoelectric centering and measuring instrument with double-pass zero position method C. Zhou, Changchun Institute of Optics and Fine Mechanics (China); Z. Liu, Shenyang Institute of Instrumentation Technology (China)	225
Measurement of the response time of ultrafast photoelectric detectors and dispersive broadening effect of connector with picosecond photoconductive sampling techniques S. Yuan, X. Guan, F. Lu, Nankai Univ. (China)	227
UV photomethod for measurement of MCP characteristic parameters J. Tian, B. Zhang, L. Fu, D. Jiang, K. Wu, Changchun College of Optics and Fine Mechanics (China) ..	228
Approach for the on-line equipment for measuring variation in a turning size using laser H. Lu, X. Qi, L. Deng, J. Song, National Univ. of Defence Technology (China)	231
New method for improving MCP operating characteristics L. Fu, J. Tian, B. Zhang, G. Wang, Y. Lu, Changchun College of Optics and Fine Mechanics (China) ...	234
Characteristics of moire signals in diffraction from superimposed dual gratings B. Du, X. Dai, Shanghai Institute of Mechanical Engineering (China)	236
Research about an optoelectronic and intelligent measurement system of organism activity in medicament test of central nervous system G.-L. Yang, Z.-J. He, W. He, Y.-H. Ye, P. Ling, Chongqing Univ. (China)	238
Single-way detection system of lightwave polarization with high SNR N. Guo, Jinan Univ. (China)	240
System with high resolution for measurement of ultrashort pulse Z. Gong, Z. Huang, Z. Xu, X. Cheng, Tianjin Institute of Technology (China); S. Qian, W. Xiang, Tianjin Univ. (China)	242
Optical heterodyne detection via four-wave mixing process in iodine and sodium molecules L. Ma, L. Ding, Z. Bi, East China Normal Univ. (China)	244
Basic operation principle of measurement system of a phase grating of non-moire fringe, single-grating and modulation of multiphase light Z. Zhang, China Institute of Metrology (China); J. Luo, Zhejiang Radio Factory (China); M. Mao, Qianjiang Beer Mill (China)	246
Accurate measurement of ST and CCI of camera lens with double light paths Y. Yang, J. Qin, Shanghai Institute of Mechanical Engineering (China)	248

(continued)

INTERNATIONAL CONFERENCE ON OPTOELECTRONIC SCIENCE AND ENGINEERING '90

SPIE Volume 1230

Intelligent video measuring system with illuminance self-adaption and pixel-to-pixel AGC function blocks	
R. Wang, Beijing Polytechnic Univ. (China); G. Jin, D. Xu, Tsinghua Univ. (China)	250
Infrared CCD application in the equipment of circuit-systems fault diagnosis	
L. Yi, S. Guo, PLA Academy of Ordnance Engineering (China)	253
Theoretical computation for measurement of Gaussian beam divergency using grating	
C. Zhou, Institute of Optics and Electronics (China)	254
Multifunction grating measurement instrument: a new production having development prospect for large machine and middle or small factory	
P.-Z. Ma, Nanjing Astronomical Instrument Factory (China)	255
Optimum output electrode structure of MCP	
J. Wang, Xian Institute of Optics and Precision Mechanics (China)	257
Study of automatic surface inspection for cold-rolled steel strip	
Z. Xu, C. Chang, Changchun Institute of Optics and Fine Mechanics (China)	259
Intellectualization in crossed-molecular-beam experiment	
B. Xue, F.-C. Song, S.-K. Zhou, Anhui Institute of Optics and Fine Mechanics (China)	261
Measuring the angular drift of laser beam with a knife-edge method	
S.-Z. Zhang, X.-Y. Liu, X.-Y. Song, D.-H. Huang, Harbin Institute of Technology (China)	263
Explanation of the gain anomaly of the stimulated Raman scattering in non-self-focusing media	
Z.-H. Zhang, H.-A. Zhang, Anhui Institute of Optics and Fine Mechanics (China)	265
Measuring red blood cell velocity in microvessels by images correlation technique	
S. Xiang, Y. Liao, Dalian Univ. of Technology (China)	267

SESSION 4 LASER DEVICES AND THEIR APPLICATIONS

Passive countermeasure for laser range finder	
E.-S. A. El Badaway, Univ. of Alexandria (Egypt); M. I. Shadeed, Armament Authority (Egypt); T. M. Fawzy, Air Force (Egypt)	270
Spectroscopic characteristics of praseodymium-doped YAG crystals	
W. Wolinski, M. Malinowski, P. Szczepanski, R. Wolski, Institute of Microelectronics and Optoelectronics P.W. (Poland)	274
Computer holograms as HOEs and optical interconnects	
E. Byckling, J. Fagerholm, A. T. Friberg, J. Turunen, A. Vasara, J. Westerholm, Helsinki Univ. of Technology (Finland)	279
Optical gain in GaAs/GaAlAs graded-index separate confinement single-quantum-well heterostructures	
G. A. B. Feak, Univ. of Michigan (USA); L. D. Zhu, B. Z. Zheng, Z. Y. Xu, J. Z. Xu, Institute of Semiconductors (China)	284
Output characteristics of a stable resonator for a transverse-flow cw CO ₂ laser	
G. Rabczuk, Institute of Fluid-Flow Machines (Poland)	289
Holographic interferometry in predicting cathodic deposition of metals in aqueous solution	
K. Habib, Kuwait Institute for Scientific Research (Kuwait)	293
Laser radar for the measurement of liquid-level heights	
J. Kostamovaara, K. Määttä, Univ. of Oulu (Finland); R. Myllylä, Technical Research Ctr. of Finland (Finland)	297
Weak optical feedback and self-coupling effects in single-mode InGaAsP lasers	
F. Brivio, G. Chiaretti, ITALTEL SIT (Italy); M. Milani, Univ. di Milano (Italy)	301

INTERNATIONAL CONFERENCE ON
OPTOELECTRONIC SCIENCE AND ENGINEERING '90

SPIE Volume 1230

Dye/polymer systems for holographic recordings	
R. A. Lessard, Univ. Laval (Canada)	305
Recent progress in France on aerothermodynamic limitations in high-average-power excimer laser	
P. Canarelli, M. Bessafi, M. L. Sentis, P. Ch. Delaporte, B. L. Fontaine, B. M. Forestier, Institut de Mécanique des Fluides de Marseille (France)	310
Room-temperature carbon dioxide lasers	
K. H. Tsui, Y. K. Huang, C. A. Massone, Univ. Federal Fluminense (Brazil)	317
Interferometry with wavelength change	
J. Tsujiuchi, Chiba Univ. (Japan)	325
Laser welding of SUS 316 stainless steel	
J. Wang, H. Zhang, Tianjin Institute of Textile Science and Engineering (China); F. He, C. Kang, Tianjin Univ. (China)	330
38-fs pulse generation from a simple linear-cavity synchronously pumped dyelaser	
Y. Liu, Shanghai Institute of Optics and Fine Mechanics (China); S. De Silvestri, V. Magni, P. Laporta, O. Svelto, Istituto di Fisica del Politecnico di Milano (Italy)	333
New method to laser-CCD scanning system applied to seamtracking	
S. Xu, J. Wang, HIT (China)	336
Metal-ceramic-sealed mini-TEA CO₂ laser	
Q. Qu, T. Hou, D. Jiang, H. Feng, X. Wang, J. Liu, S. Yang, (China)	338
Fabrication and characteristics of 1.3-μm InGaAsP-InP large optical cavity lasers	
J. Zhong, B. Zhu, R. Li, Research Institute of Modern Optical Technology (China)	341
Picosecond optical pulse generation from actively mode-locked semiconductor lasers in an external cavity	
F. Guo, C. Yu, Zhejiang Univ. (China); T. Sueta, Osaka Univ. (Japan)	344
Display fingerprints by exciting fluorescence with laser	
S. Wu, Z. S. Yang, P. Xie, Xinjiang Univ. (China)	347
Laser medicine in China	
G. Xu, Sun Yatsen Univ. of Medicine Sciences (China)	348
High-speed optoelectronic sampling system with laser-diode sources	
Y. Zhan, B. Xu, C. Xu, S. Gao, Xidian Univ. (China)	351
All homemade avalanche transistor driver single-pulse selector for ND:YAG mode-locking lasers	
L. Huang, X.-Y. Li, M. Chai, X.-D. Bai, Beijing Polytechnic Univ. (China)	354
Deposition of superconducting thin films with excimer laser ablation of sintered oxide ceramics	
C. An, Y. Fan, F. Zhou, D. Lu, Z. Li, Huazhong Univ. of Science and Technology (China)	357
Design of a repetition-rate laser rangefinder	
C. Den, Y. Den, Southwest Institute of Technical Physics (China)	360
Line broadening and red-shift satellite line phenomena in 1000-GW Nd³⁺: phosphate-glass laser system	
D. Zhuang, W. Yu, G. Yu, Shanghai Institute of Optics and Fine Mechanics (China)	362
Sensing of minerals and rocks from a distance using a laser fluorosensor	
X. Sun, Y. Xun, W. Wu, Anhui Institute of Optics and Fine Mechanics (China); D. Zhou, Univ. of Science and Technology of China (China); N. Liu, X. Zhu, Anhui Institute of Optics and Fine Mechanics (China)	365
Study of a tunable-mode 2-kW CW CO₂ laser	
Z. Cheng, F. Li, Huazhong Univ. of Science and Technology (China)	368

INTERNATIONAL CONFERENCE ON
OPTOELECTRONIC SCIENCE AND ENGINEERING '90

SPIE Volume 1230

Experimental research on the statistical distribution of the short-term spread of the laser beam propagating in the random medium	
G.-L. Tan, A. Yong, H. Xing, Q.-P. Tan, Wuhan Univ. (China)	371
Discussion about the stress distribution in a high-average-power laser	
S. Zhou, Y. Li, North China Research Institute of Electro-Optics (China)	373
Phased-array laser made of GaAs/GaAlAs graded barrier single-quantum-well structure	
L. Zhu, Institute of Semiconductors (China); G. A. B. Feak, J. M. Ballantyne, Cornell Univ. (USA); D. K. Wagner, P. L. Tihanyi, McDonnell Douglas Astronautical Co. (USA)	376
Measurement of absorption uniformity on thin film by scanning laser photothermal deflection spectroscopy	
X. Huang, W. Chen, J. Chen, Zhejiang Univ. (China)	379
Automatic recording laser interferometer for verifying standard scales to 3 m	
H. Diao, K. Feng, S. Ye, Tianjin Univ. (China)	382
Multipulse modulated short-pulse Nd:YAG laser	
J. B. Liu, North China Research Institute of Electro-Optics (China)	384
Multifrequency CO ₂ laser heterodyne detection	
D.-S. Sun, M.-J. Pi, Harbin Institute of Technology (China)	387
High-power sum frequency generation of 230.8-223.2 nm in BBO crystal	
S.-P. Lu, Y.-Q. Yuan, L.-S. Yang, C.-K. Wu, Anhui Institute of Optics and Fine Mechanics (China) ...	389
Laser devices made of magnesium-doped lithium niobate	
C.-Q. Xu, H.-X. Zhang, D.-F. Xiao, Y.-H. Xu, Harbin Institute of Technology (China)	392
Tunable UV generation in BBO short to 200nm	
C. You, Q. Fan, Z. Lu, Zhejiang Univ. (China)	394
Phase conjugation using Nd:YAG laser	
J. Chen, Zhejiang Univ. (China); H. J. Eichler, Technische Univ. Berlin (FRG)	397
New development in frequency stabilization of a longitudinal Zeeman laser	
X. Shao, C. Yin, Tsinghua Univ. (China)	400
Displacement measurement using optical heterodyne detection	
B. Wang, P. Sun, Tsinghua Univ. (China)	403
Laser-induced direct deposition of thin films: film transfer	
B. Zhang, Z. Guo, Zhengzhou Univ. (China)	406
Photochemical effect and application on free-electron laser	
J. L. Han, Beijing Normal Univ. (China)	408
Optical parametric oscillators of BBO and KTP	
Q. Fan, F. Xie, Q. Chen, Zhejiang Univ. (China)	409
Reshaping and compression of picosecond optical pulses from a semiconductor diode laser by the method of spectral windowing	
N. Zhang, Shanghai Normal Univ. (China)	411
Study of temperature field in the pulsed Nd-glass laser beam welding	
X. Chen, J. Ding, Zhejiang Univ. (China)	413
GaAs/GaAlAs traveling-wave type laser amplifier with tilted facets	
F.-L. Xu, Y.-Z. Piao, Y.-Q. Zhang, S.-L. Wu, D.-Y. Li, S.-Q. Du, Changchun Institute of Physics (China)	414
Surface temperature on the back surface of substrate in the pyrolytic LCVD	
J. Zhang, X. Lu, M. Qiu, Shanghai Institute of Laser Technology (China); C. Zhang, N. Lin, Northwest Normal Univ. (China)	417

INTERNATIONAL CONFERENCE ON
OPTOELECTRONIC SCIENCE AND ENGINEERING '90

SPIE Volume 1230

New type of high-precision laser thickness gauge	
W.-M. Chen, Q.-H. Fan, Y.-N. Li, Zhong Yuan Research Institute of Electron Technology (China)	419
Output of squeezed-state light from lasers via phase-conjugation effects in resonators	
S. Liu, Y. Xia, Anhui Institute of Optics and Fine Mechanics (China)	421
Stereo reconstruction of contour map using holography and computer	
H. Wang, X. Yao, T. Cai, Zhejiang Normal Univ. (China)	423
Thermal coupling of pulsed 0.53- μm laser radiation to aluminums in air	
M. Li, X. Cai, K. Lin, M. He, X. Deng, Shanghai Institute of Optics and Fine Mechanics (China)	425
Laser noncontacting displacement measurement	
H. Tan, Y. Geng, Changchun Institute of Optics and Fine Mechanics (China)	427
Development of a laser sphere-surface interferometer	
Y. Guo, Precision Measuring Technology Institute (China)	429
Some analyses for slow velocity measurement of the diffuser by using dynamic laser speckle	
Y. Liu, X. Peng, S. N. Ma, Tianjin Univ. (China)	430
New method of laser twice diffraction and interference for precisely measuring straightness of large-size objects	
Y. Li, S. Li, Q. Li, L. Wu, X. Gao, Taiyuan Univ. of Technology (China); S. Li, Value Factory of Ticanjin (China)	433
Laser-ICP spectrum source	
Y. Fu, North China Institute of Astronautic Engineering (China)	436
Study of atomization process due to absorption of laser radiation	
M. Jiang, Q. Hu, H. Shu, Shanghai Institute of Optics and Fine Mechanics (China)	438
Mode locking by coupled cavity injection	
G. Zhao, H. Li, H. Cui, G. Wei, Beijing Institute of Technology (China)	439
Characteristic of stabilized frequency of single-tube double-frequency CO_2 laser	
J. Nan, L. Jia, M. Pi, Harbin Institute of Technology (China)	441
Monitoring the thickness of ZnO films on isoaxis magnetron sputtering using laser	
K. Xie, Sichuan Institute of Piezoelectric and Acousto-optic Technology(China)	443
Practical power supply for fast-axial-flow CO_2 laser	
Y. Zang, H. Yang, S. Zhang, H. Sun, H. Den, Nanjing Electron Tube Works (China)	445
Study of optogalvanic effect of CO_2 waveguide laser with compound cavity	
Y. Chen, Y. Ma, L. Huang, Zhejiang Univ. (China)	447
Experimental observation and study of the abnormal effect on photoelectric characteristics of a PMT photon-counting system	
J. Yin, S. Zhu, Suzhou Univ. (China)	449

SESSION 5 INFRARED OPTICS, LOW-LEVEL LIGHT TECHNOLOGY, AND APPLICATIONS

Optimization of the imaging properties of image tubes	
V. Jares, TESLA-Vacuum Engineering (Czechoslovakia)	452
Experimental study on photon-noise-limited wavefront sensor	
G. Cao, X. Yu, R. Gu, R. Zhou, D. Zhao, Beijing Institute of Technology (China)	457
Direct calculation method of IR remote sensing systems' detectability for forest fire	
X. Zhang, North China Research Institute of Electro-Optics (China)	461
Testing MRTD and MUTD for complete thermal imaging systems	
D. Wang, Kunming Institute of Physics (China)	463

(continued)

INTERNATIONAL CONFERENCE ON
OPTOELECTRONIC SCIENCE AND ENGINEERING '90

SPIE Volume 1230

Infrared-transmitting fluoroaluminate glasses F. Lin, H. Hu, Y. Yuan, Shanghai Institute of Optics and Fine Mechanics (China)	465
Timing properties of microchannel plate photomultiplier tubes W. D. Pang, B. S. Zhao, T. M. Li, B. R. Ma, K. Z. Ding, F. X. Liu, Z. D. Shi, Y. L. Rei, Xian Institute of Optics and Precision Mechanics (China)	467
SESSION 6 FIBER OPTIC DEVICES AND APPLICATIONS	
Focus on lightwave local area networks H.-C. Liu, California State Polytechnic Univ. (USA)	470
Polymer optical fibers: preparation of the step-index and gradient-index polymer preforms and fibers A. B. Wójcik, J. Wójcik, A. Waksmundzki, M. Curie-Skłodowska Univ. (Poland)	475
Calculation and measurement of birefringent properties of special optical fibers V. Sochor, Czech Technical Univ. (Czechoslovakia)	481
Optical fiber optoelectronics oscillator V. N. Konstantinov, V. Sochor, Czech Technical Univ. (Czechoslovakia)	487
Fiber optic vibration sensor for high-power electric plants M. Brenci, A. Mencaglia, A. G. Mignani, A. M. Scheggi, IROE-CNR (Italy)	490
Photoluminescence in fluoride glass optical fibers G. Ghosh, Rani Durgavati Univ. (India); K. Nakamura, Furukawa Electric Co. Ltd. (Japan)	495
Dispersion of thermo-optic coefficients of some optical fiber materials G. Ghosh, Rani Durgavati Univ. (India)	499
Analysis of PIN-FET receiver sensitivity for OEIC design considerations M.-S. Park, Y.-T. Lee, E.-H. Lee, Electronics and Telecommunications Research Institute (Korea)	503
Development of the deep He-Ne laser acupuncture stimulator and the clinical practice F. Li, X. Li, H. Bu, H. Mao, Henan Univ. (China)	507
Parallel transmission and restoration of images through single optical fibers Y. H. Chen, B. K. Qin, Beijing Institute of Technology (China)	510
Linearity analysis of fiber-optic gyroscope C. Shang, Shanghai Institute of Electron Physics (China); Z. Fang, Shanghai Univ. of Science and Technology (China)	513
Effects of light feedback on CO₂ laser instabilities L.-G. Zhang, N.-P. Chen, E.-X. Ba, Nankai Univ. (China)	516
Analysis of heat radiation characteristics of the probe of a dichromatic high-temperature optical fiber sensor Z. Chi, Y. Zhang, F. Mo, A. Zhou, W. Chen, East China Institute of Technology (China)	519
Study of dispersion characteristics of single-mode optical fibers X.-H. Wu, K.-J. Mei, Univ. of Electronic Science and Technology of China (China)	522
Wideband tunable UV laser sources by BBO crystal Y. Yuan, S. Lu, L. Yang, N. Wang, C. Wu, Anhui Institute of Optics and Fine Mechanics (China)	525
Novel inline tunable Fabry-Perot filter for WDM fiber systems Z. Zhang, H. Long, J. Qian, Zhejiang Univ. (China)	528
Line code nBCH for optical fiber digital transmission T. Wang, S. Wang, Tianjin Optical and Electrical Communication Corp. (China)	531
Continuum band jointly generated by SFPM and SRS in a multimode fiber S. Shen, B. Yuan, J. Zhang, Zhengzhou Univ. (China)	533
New construction of optical fiber probe	

INTERNATIONAL CONFERENCE ON
OPTOELECTRONIC SCIENCE AND ENGINEERING '90

SPIE Volume 1230

S. Dong, Y. Li, Xian Jiaotong Univ. (China)	536
Analysis of an all multimode fiber electric current sensor with fiber Fabry-Perot interferometer	
Y. Zhan, M. Lu, Nankai Univ. (China)	539
Applications of FTIR emission spectroscopy for superconductor $\text{YBa}_2\text{Cu}_3\text{O}_x$ and rare-earth sesquioxides	
J. Yang, D. Tang, Jilin Univ. (China)	541
Optic-fiber polarimeter for process control	
H.-G. Wan, Qingdao Electronic Research Institute (China)	543
Optical fiber system for the multiparameter observation of underground water precursors	
L. Ge, Institute of Seismology (China)	545
Optical fiber magnetic field sensor system for measuring low-frequency fields	
Y. Liu, Huazhong Univ. of Science and Technology (China); J. Zhang, Wuhan Univ. of Technology (China)	547
Optical fiber remote monitoring system for boiler levels	
A. Li, Nanjing 841 Research Institute (China)	549
Fiber optic microphone	
Z. Hong, J. Chen, Q. Qiou, Nanjing 841 Institute (China)	551
Frequency-division multiplexing optical fiber transmission system applied in power system	
J. Kuang, C. Wang, K. Tan, D. Zhu, Y. Wang, Tsinghua Univ. (China)	553
Experimental research on chaos operation in a CO_2 laser caused by the transverse effect of the light fields	
N. Chen, L. Zhang, K. Lu, R. Fu, E. Ba, Nankai Univ. (China)	555
Smart fiber optics flowmeter	
D.-X. Wen, Tianjin Zhonghuan Automation Instrumentation Co. (China)	557
On-line concentration measurement system with optical fibers	
J. Li, Q. Wen, X. Zhong, Chongqing Univ. (China)	559
Efficient coupling of optical fiber and channel waveguides	
P. Qian, H. Zhang, Q. Zhong, Beijing Univ. of Posts and Telecommunications (China)	562
Investigation of the main crystals in a $\text{MeF}_2\text{-YF}_3\text{-AlF}_3$ ($\text{Me}=\text{Mg}+\text{Ca}+\text{Sr}+\text{Ba}$) glass	
R. Li, P. Deng, H. Wang, Shanghai Institute of Optics and Fine Mechanics (China)	565
Grazing incidence grating spectrometer in the low-energy x-ray region	
X. Zhong, S. He, S. Chen, Y. Chen, X. Zhou, C. He, Chongqing Univ. (China)	567
Properties and structure of the IR-transmitting glasses in the CdCl_2-based systems	
H. Jiang, Shanghai Institute of Optics and Fine Mechanics (China); B. Yuan, Zhejiang Univ. (China); H. Sun, F. Gan, Shanghai Institute of Optics and Fine Mechanics (China)	570
Linear output principle of fiber optic temperature sensor	
X. Tian, Xingjiang Institute of Technology (China); P.-D. Lou, Univ. of Electronic Science and Technology of China (China)	573
Optical fiber probes design and its application	
S. Dai, Q. Zhang, Shanghai Institute of Mechanical Engineering (China)	574
SESSION 7 PHOTOVOLTAIC TECHNOLOGY AND SOLAR ENERGY SYSTEMS	
Study on photovoltaic effect of P-N junction	
Z. Liu, Harbin Normal Univ. (China)	578

(continued)

INTERNATIONAL CONFERENCE ON
OPTOELECTRONIC SCIENCE AND ENGINEERING '90

SPIE Volume 1230

SESSION 8 HYBRID SYSTEM FOR IMAGE PROCESSING

Simulation of a LiNbO₃ signal processor	
M. N. Armenise, F. Impagnatiello, V. M. N. Passaro, Dipartimento di Elettrotecnica ed Elettronica (Italy)	582
NMR radon Haar transforms	
J. Ben Uri, Technion—Israel Institute of Technology (Israel)	586
Implementation of Kern SPACE vision software through a transputer network	
G. Zhou, GPZ Technology Co. (USA)	590
Applications of photorefractive crystals to optical information processing at SIOFM	
J. Ma, L. Liu, Z. Wang, Shanghai Institute of Optics and Fine Mechanics (China)	600
Automated microscope system for cell image processing	
Y. Zhang, H. Li, Z. Huang, Tianjin Univ. (China)	604
Study of a modal multidither image-sharpening adaptive optics system for solar applications	
W. Jiang, Y. Liu, Z. Yi, F. Shi, G. Tang, Institute of Optics and Electronics (China)	608
Modulated beams holography and signal processing	
Y. Cai, Nanjing Aeronautical Institute (China)	612
Analysis of temperature distribution of heat flash	
Y. Wang, X. Wang, J. Luo, M. Zhang, Y. Tan, C. H. Ku, Xian Jiaotong Univ. (China)	615
Discrete arrays image-transfer theory and evaluation technique	
B. Zhang, J. Zhou, East China Institute of Technology (China)	618
Phase conjugate feedback	
Q. Shang, M. Yu, Beijing Institute of Technology (China)	621
Design of photoelectric analog-digital computer	
S.-C. Ling, Institute of Modern Physics (China)	623
Optical-electrical image research on metamerism	
J. Shi, Shangdong Univ. (China)	626
Pointwise automatic analysis of speckle photographs	
J. Zhang, P. Sun, Q. Liu, Y. Sun, J. Chen, B. Ding, Tsinghua Univ. (China)	629
Comprehensive computer-vision system for measuring the surface of large 3-D objects	
S. Zhao, S. Huang, Chongqing Univ. (China)	632
Applied study of photorefractive crystals to optical image processing	
Y. Li, M. Zhao, M. Xue, Xian Institute of Optics and Precision Mechanics (China)	635
Talbot projection moire topography and its automatic fringe process using phase shift methods	
R. Gu, R. Zhou, Beijing Institute of Technology (China)	638
Application of improved Fourier transform profilometry	
J. Li, X. Su, Sichuan Univ. (China)	641
Phase-comparison test by means of filling up pulses on dynamic measuring circular grating and its data process	
Z. Gong, X. Dai, L. Chen, P. Zhou, Shanghai Institute of Mechanical Engineering (China)	643
Real-time pseudo-color encoding using a liquid-crystal light valve	
Z. He, Z.-P. Cheng, Y. Zhou, Sichuan Univ. (China)	646
Fiber optic displacement measuring device by microcomputer	
Z. Chen, Jilin Province Institute of Metrological Technology (China)	648
Feature extraction and processing of the signal in optoelectronic image measurement	
W. Ji, Shenyang Polytechnic Univ. (China)	650
Determination of image edge position in image measurement with CCD optoelectronic system	
Q. Zhu, Institute of Optics and Electronics (China)	652
