#### 注 意

医学是一门不断发展的科学。由于新的研究及临床实践在不断丰富人们的知识，因此在药物使用及治疗方面也在谋求各种变化。本书编者及出版者核对了各种信息来源，并确信本书内容完全符合出版时的标准。然而，鉴于不可避免的人为错误和医学学科的发展，不管是编者、出版者还是其他参与本书出版的工作者均不能保证此书中的内容百分之百正确。因此，他们不能对由此类错误引起的后果负责。

我们提倡读者将本书内容与其他资料进行确证。例如，我们希望读者对他们将要使用的每一种药品的说明书仔细阅读，以确证本书的有关信息是正确的，且推荐的药品用量及禁忌证等没有变化。该建议对新药或非常用药尤为重要。

# Preface to the first edition

This new international textbook in obstetrics will, we believe, be of major value to all practising clinicians, be they trainees or established in practice.

It aims to assist with the questions: How do I manage this patient? or How do I perform this procedure?

It presents a wide range of reputable management options. Unlike many traditional texts, based on a single individual's experience and view, all the contributors to each section were asked to give their preferred management in all areas of their section. Each resulting chapter reflects that wide range of acceptable practice. This means you will have a *choice* about which option or combination of options suits you and your patient.

This book is designated to be practical. It addresses those difficult questions which arise in practice, which often stem not only from the medical facts, but from the constraints of time, facilities, finance, and patient acceptability. Moreover, we have standardized the presentation of each topic as far as possible (while still allowing the personality of the original authors to shine through!) to enable the reader to become familiar with the format.

We have deliberately chosen a panel of contributors who are both leaders in their field and who can represent practice in the USA, Europe and Australasia and this we feel gives the text a unique universality.

Finally it is our intention that the book is comprehensive. We hope that we will have something to say on all the important problems you come across. If you find any exceptions, please let us know, with your comments, in time for the next edition.

# Preface

The huge success of the first edition of *High Risk Pregnancy – Management Options* has been a source of great pleasure for us. We have appreciated the many comments, and have made a great effort to substantially improve this new edition without disrupting the winning formula. The main new features are:

- an improved and clearer presentation of the text while keeping to the original layout style of 'Introduction', 'Risks (Maternal and Fetal)', 'Management Option (Prepregnancy, Prenatal, Labor/Delivery, Postnatal)' and 'Summary of management options' Box
- the incorporation of six new chapters (Fetal endocrinology (30), Fetal tumors (31), Fetal infection (32), Other hematological conditions (43), Spine and joint disorders (49) and Trauma in pregnancy (54))
- sixteen chapters have been rewritten by new authors
- the remaining 52 chapters have all been extensively updated
- an even greater emphasis on the evidence base for management options presented
- some of the illustrations have been improved by the addition of color, especially the fetal cardiology chapters (24 and 25) and the chapter on maternal skin disease (51)

We have also introduced a number of minor additions and changes suggested by our readers and reviewers.

We hope you find the second edition a significant improvement on the first and welcome readers' comments so that the third edition will be even better!
