1800 South Novell Place
Provo, UT 84606-2399

Disclaimer

Novell, Inc. makes no representations or warranties with respect to the contents or use of this manual, and specifically disclaims any express or implied warranties of merchantability or fitness for any particular purpose.

Further, Novell, Inc. reserves the right to revise this publication and to make changes in its content at any time, without obligation to notify any person or entity of such revisions or changes.

Further, Novell, Inc. makes no representations or warranties with respect to any NetWare software, and specifically disclaims any express or implied warranties of merchantability or fitness for any particular purpose.

Further, Novell, Inc. reserves the right to make changes to any and all parts of NetWare software at any time, without obligation to notify any person or entity of such changes.

This Novell Training Manual is published solely to instruct students in the use of Novell networking software. Although third-party application software packages are used in Novell training courses, this is for demonstration purposes only and shall not constitute an endorsement of any of these software applications.

Further, Novell, Inc. does not represent itself as having any particular expertise in these application software packages and any use by students of the same shall be done at the students' own risk.

Software Piracy

Throughout the world, unauthorized duplication of software is subject to both criminal and civil penalties.

If you know of illegal copying of software, contact your local Software Antipiracy Hotline.

For the Hotline number for your area, access Novell's World Wide Web page at <http://www.novell.com> and look for the piracy page under "Programs."

Or, contact Novell's anti-piracy headquarters in the U.S. at 800-PIRATES (747-2837) or 801-861-7101.

Trademarks

Novell, Inc. has attempted to supply trademark information about company names, products, and services mentioned in this manual. The following list of trademarks was derived from various sources.

Novell, Inc. Trademarks

NetWare, the N-Design, and Novell are registered trademarks of Novell, Inc. in the United States and other countries. CNA, CDE, CNI, NAEC, and Novell Authorized Education Center are service marks and CNE is a registered service mark of Novell, Inc. in the United States and other countries. ConsoleOne, DirXML, and eDirectory are trademarks of Novell, Inc. GroupWise is a registered trademark of Novell, Inc. Hot Fix, and IPX is a trademark of Novell, Inc. NDS, Novell Directory Services, and NDPS are registered trademarks of Novell, Inc. NetWare is a registered service mark of Novell, Inc. in the United States and other countries. NLM and Novell Certificate Server are trademarks of Novell, Inc. Novell Client, Novell Cluster Services, and Novell Distributed Print Services are trademarks of Novell, Inc. ZENworks is a registered trademark of Novell, Inc.

Other Trademarks

Adaptec is a registered trademark of Adaptec, Inc. AMD is a trademark of Advanced Micro Devices. AppleShare and AppleTalk are registered trademarks of Apple Computer, Inc. ARCServ is a registered trademark of Cheyenne Software, Inc. Btrieve is a registered trademark of Pervasive Software, Inc. EtherTalk is a registered trademark of Apple Computer, Inc. Java is a trademark or registered trademark of Sun Microsystems, Inc. in the United States and other countries. Linux is a registered trademark of Linus Torvalds. LocalTalk is a registered trademark of Apple Computer, Inc. Lotus Notes is a registered trademark of Lotus Development Corporation. Macintosh is a registered trademark of Apple Computer, Inc. Netscape Communicator is a trademark of Netscape Communications Corporation. Netscape Navigator is a registered trademark of Netscape Communications Corporation. Pentium is a registered trademark of Intel Corporation. Solaris is a registered trademark of Sun Microsystems, Inc. The Norton AntiVirus is a trademark of Symantec Corporation. TokenTalk is a registered trademark of Apple Computer, Inc. Tru64 is a trademark of Digital Equipment Corp. UNIX is a registered trademark of the Open Group. WebSphere is a trademark of International Business Machines Corporation. Windows and Windows NT are registered trademarks of Microsoft Corporation. All other third-party trademarks are the property of their respective owners.

Table of Contents

SECTION 1 Understand the Linux Story.....	1
Objective 1 The History of Linux.....	1
The Historical Development of UNIX.....	1
The Development of Linux.....	1
The Software Differences Between SUSE LINUX and SUSE LINUX Enterprise Server.....	2
Objective 2 Identify the Components of SLES 9.....	2
Updated Core System with Latest Versions/Features of All Packages.....	2
New and Improved YaST Modules.....	3
Next Generation Linux Kernel 2.6.5.....	3
Improved High Availability Support.....	3
Full Enablement and Support of UTF-8.....	3
New Type of Installation Source: SLP.....	3
POSIX-Compliant, High-Performance Threads Support (NPTL).....	3
Objective 3 Understand the Multiuser Environment.....	4
Objective 4 Perform a Simple Installation of SLES 9.....	4
Pre-Installation Considerations.....	4
Installation Options.....	5
Basic Installation.....	6
Manual Software Selection.....	6
Configuration.....	7
SECTION 2 Use the Linux Desktop.....	10
Objective 1 Overview of the Linux Desktop.....	10
Objective 2 Use the KDE Desktop Environment.....	11
How to Log In.....	11
How to Log Out.....	11
How to Shut Down and Reboot the Linux System.....	12
How to Identify KDE Desktop Components.....	12
How to Manage Icons in the KDE Environment.....	13
How to Use the Konqueror File Manager.....	13
Objective 3 Use the Gnome Desktop Environment.....	15
How to Start GNOME.....	15
How to Navigate in GNOME.....	15
How to Manage Icons in GNOME.....	16
Objective 4 Access the Command Line Interface From the Desktop.....	16
SECTION 3 Locate and Use Help Resources in the Linux System.....	18
Objective 1 Access and Use man Pages.....	18
Objective 2 Use info Pages.....	20
Objective 3 Access Release Notes and White Papers	21
Release Notes.....	21
Howtos.....	21
Help for Installed Packages.....	21
Objective 4 Use GUI-Based Help in the Linux System.....	21
Display the SUSE HelpCenter.....	21
Use Help Commands With Konqueror.....	22

Objective 5 Find Help on the Web.....	22
SECTION 4 Administer Linux with the YaST Management Utility.....	23
Objective 1 Get to Know YaST.....	23
Objective 2 Manage User Accounts With YaST.....	24
Basics About Users and Groups.....	24
User and Group Administration With YaST.....	24
Objective 3 Install a Printer in the Linux System.....	25
When to Configure a Printer.....	25
How to Change a Printer Configuration.....	25
Objective 4 Understand the YaST Software Management Feature.....	27
How to Select Software Packages to Install.....	27
How to Manage Installation Sources.....	27
Objective 5 Obtain Hardware Configuration Information from YaST.....	28
SECTION 5 Manage Directories and Files in the Linux System.....	29
Objective 1 Understand the File System Hierarchy Standard (FHS).....	29
The Hierarchical Structure of the File System.....	29
FHS (Filesystem Hierarchy Standard).....	30
Root Directory /.....	30
Essential Binaries for Use by All Users (/bin/).....	30
Boot Directory (/boot/).....	31
Device Files (/dev/).....	31
Configuration Files (/etc/).....	32
User Directories (/home/).....	32
Libraries (/lib/).....	33
Mountpoints for Removable Media (/media/*).....	33
Application Directory (/opt/).....	33
Home Directory of the Administrator (/root/).....	33
System Binaries (/sbin/).....	33
Data Directories for Services (/srv/).....	33
Temporary Area (/tmp/).....	33
The Hierarchy Below /usr/.....	33
Variable Files (/var/).....	34
Process Files (/proc/).....	34
System Information Directory (/sys/).....	35
Mountpoint for Temporarily Mounted File Systems (/mnt/).....	35
Directories for Mounting Other File Systems.....	36
Objective 2 Identify File Types in the Linux System.....	36
Normal Files.....	36
Directories.....	36
Device Files.....	36
Links.....	37
Sockets.....	37
FIFOs.....	37
Objective 3 Change Directories and List Directory Contents.....	37
ls.....	37
cd.....	38
pwd.....	38

Objective 4 Create and View Files.....	38
Create a New File with touch.....	38
View a File with cat.....	38
View a File with less.....	39
View a File with head and tail.....	39
Objective 5 Manage Files and Directories.....	39
Copy and Move Files and Directories.....	39
Create Directories.....	40
Delete Files and Directories.....	40
Link Files.....	41
Objective 6 Find Files on Linux.....	42
KFind.....	42
find.....	42
locate.....	43
whereis.....	44
which.....	44
type.....	44
Objective 7 Search File Content.....	44
How to Use the Command grep.....	44
How to Use Regular Expressions.....	45
Objective 8 Archive, Compress, and Uncompress Files.....	46
Archive Files With ark.....	46
Archive Files With tar.....	46
Compress With gzip.....	47
Uncompress Files with gunzip.....	48
Compress Files With bzip2.....	48
Uncompress Files With bunzip2.....	48
View Compressed Files With zcat.....	48
Objective 9 Manage File Permissions and Ownership.....	48
Change the File Permissions With chmod.....	48
Change the File Ownership With chown and chgrp.....	49
SECTION 6 Work with the Linux Shell and Command Line.....	51
Objective 1 Get to Know the Command Shells.....	51
Types of Shells.....	51
Bash Configuration Files.....	51
File Name Restrictions.....	52
Completion of Commands and File Names.....	52
Objective 2 Execute Commands at the Command Line.....	52
History Function.....	52
Switch to User root.....	52
Objective 3 Get to Know Common Command Line Tasks.....	53
Variables.....	53
Aliases.....	53
Objective 4 Understand Command Syntax and Special Characters.....	54
Name Expansion Using Search Patterns.....	54
Prevent the Shell from Interpreting Special Characters.....	55
Objective 5 Use Piping and Redirection.....	55
Objective 6 Manage User Accounts.....	56

useradd.....	57
passwd.....	58
usermod.....	59
userdel.....	59
Objective 7 Execute RPM Package-Related Operations.....	59
Objective 8 Use the Basic Linux mail Command.....	60
Read Status Mail.....	61
Use the Simple Mail Client.....	61
SECTION 7 Use Linux Text Editors.....	63
Objective 1 Get to Know Linux Text Editors.....	63
Objective 2 Use Command Line Editors to Edit Files in the Linux System.....	63
Start vi.....	63
Use the Editor vi.....	64
Get to Know the Working Modes.....	64
Objective 3 Use Desktop Editors to Edit Files in the Linux System.....	65
SECTION 8 Understand and View Processes in the Linux System.....	66
Objective 1 View Processes from the GUI and the Command Line Interface.....	66
View Processes from the GUI.....	66
View Processes from the Command Line Interface.....	66
Objective 2 Understand the Runlevel Concept.....	69
The init Program.....	69
The Runlevels.....	70
Objective 3 Multitask in the Linux System.....	71
System Jobs.....	71
Jobs of Individual Users.....	71
SECTION 9 Manage the Network Configuration.....	73
Objective 1 Manage the Network Configuration Information from YaST.....	73
Objective 2 Get to Know Network-Related Command Line Commands.....	74
Determine Connectivity Between Hosts Using ping.....	75
List Currently Active Network Connections With netstat.....	76
Display the Route Between Hosts With traceroute.....	77
Update Network Interfaces Configuration Using ifup and ifdown.....	77
Display the Routing Table Using route.....	78
SECTION 10 Introduction to Managing the SUSE LINUX Enterprise Server.....	80
Objective 1 Describe SLES 9.....	80
What's New in SLES 9.....	80
Hardware Support and System Requirements.....	83
Service and Support.....	84
Objective 2 Access and Use YaST.....	86
YaST Basics.....	86
The Role of SuSEconfig.....	86
Objective 3 Monitor Your SLES 9 System.....	87
Boot Log Information (/var/log/boot.msg).....	87
Hardware Information (/proc/).....	88
Hardware Information (Command Line Utilities).....	89
System and Process Information (Command Line Utilities).....	89
GUI Desktop Utilities.....	91

SECTION 11 Manage User Access and Security.....	93
Objective 1 Describe Basic Linux User Security Features.....	93
File System Security Components.....	93
Users and Groups.....	93
Ownership and Access Permissions.....	96
Objective 2 Manage Linux Users and Groups.....	97
Create and Edit User Accounts With YaST.....	97
Create and Edit Groups With YaST.....	97
Edit User Account Properties.....	98
Configure Account Password Settings.....	98
Manage User Accounts From the Command Line.....	99
Manage Groups From the Command Line.....	100
Create Text Login Messages.....	100
Objective 3 Manage and Secure the Linux User Environment.....	100
Perform Administrative Tasks as root.....	100
Delegate Administrative Tasks With sudo.....	101
Set Defaults for New User Accounts.....	102
Configure Security Settings.....	102
Objective 4 Secure Files and Directories With Permissions.....	104
Permissions and Permission Values.....	105
How to Set Permissions From the Command Line.....	105
How to Set Permissions From a GUI Interface.....	106
How to Modify Default Access Permissions.....	107
How to Configure Special File Permissions.....	107
How to Configure Additional File Attributes for ext2.....	108
Objective 5 Configure User Authentication With PAM.....	108
Location and Purpose of PAM Configuration Files.....	109
PAM Configuration File Examples.....	109
PAM Documentation Resources.....	110
Objective 6 Implement and Monitor Enterprise Security Policies.....	110
Guidelines for Implementing Security Policies.....	110
Security Rules and Tips.....	111
SuSE Security Information Resources.....	112
How to Monitor Login Activity.....	112
SECTION 12 Manage the Linux File System.....	115
Objective 1 Select a Linux File System.....	115
Linux File Systems.....	115
Traditional File Systems.....	115
Journaling File Systems.....	116
Virtual Filesystem Switch.....	116
Linux File System Formats.....	116
Linux File System Characteristics.....	118
File System Journaling.....	120
Additional File System Documentation.....	120
Objective 2 Configure Linux File System Partitions.....	121
Partition Types.....	121
Linux Device and Partition Names.....	121
Design Guidelines for Implementing Partitions.....	122

Design Guidelines for Optimizing Partitions.....	122
How to Manage Partitions With YaST.....	123
Objective 3 Configure a File System With Logical Volume Management (LVM).....	125
LVM Components.....	126
LVM Features.....	126
How to Configure Logical Volumes With YaST.....	126
Objective 4 Configure and Manage a Linux File System.....	127
Create a File System From YaST.....	128
Create a File System From the Command Line.....	128
Mount a File System.....	129
Monitor and Check a File System.....	131
Create a Boot, Rescue, or Module Disk.....	133
Objective 5 Set Up and Configure Disk Quotas.....	134
Prepare the File System.....	134
Initialize the Quota System.....	134
Configure and Manage User and Group Quotas.....	134
Start and Activate the Quota Service.....	135
Objective 6 Back Up and Restore the File System.....	135
Data Backup Strategies.....	136
Back Up System Data With YaST.....	136
Restore System Data With YaST.....	137
Data Backup Command Line Tools.....	138
SECTION 13 Manage Software for SUSE LINUX Enterprise Server.....	140
Objective 1 Manage RPM Software Packages.....	140
RPM Features.....	140
RPM Basics.....	140
How to Manage Software Packages With rpm.....	141
How to Manage Software Packages With YaST.....	145
Objective 2 Verify and Update Software Library Access.....	146
Software Library Basics.....	147
How to View Shared Library Dependencies (ldd).....	147
How to Modify the Software Library Configuration File (/etc/ld.so.conf).....	147
How to Update the Library Cache (/etc/ld.so.cache).....	148
Objective 3 Manage Software Updates With YaST Online Update Server (YOU).....	148
YOU Basics.....	148
How to Configure a Local YOU Server.....	149
How to Configure and Use a YOU Client.....	149
SECTION 14 Manage System Initialization.....	152
Objective 1 Describe the Linux Load Procedure.....	152
BIOS and Boot Manager.....	152
Kernel.....	152
initrd and linuxrc.....	152
init.....	153
Objective 2 Manage Runlevels.....	153
Runlevel Basics.....	153
How to Change the Runlevel at Boot.....	156
How to Manage Runlevels From the Command Line.....	157

How to Shut Down or Halt the System.....	157
How to Set Runlevels With YaST.....	157
Objective 3 Manage the Kernel.....	158
Kernel Module Basics.....	158
How to Find Hardware Driver Information.....	158
How to Manage Modules From the Command Line.....	159
modprobe Configuration File (/etc/modprobe.conf).....	159
Kernel Module Loader (kmod).....	160
Objective 4 Manage the GRUB Boot Loader.....	160
What a Boot Manager Is.....	160
Boot Managers in SUSE LINUX.....	160
How to Start the GRUB Shell.....	161
How to Modify the GRUB Configuration File.....	162
How to Configure GRUB With YaST.....	162
Objective 5 Modify System Settings.....	163
View and Change System Settings (/proc/sys/).....	163
Modify Kernel and Hardware Parameters With Powertweak.....	164
Configure /etc/sysconfig/ Files With YaST.....	165
SECTION 15 Manage Linux Processes and Services.....	167
Objective 1 Manage Processes.....	167
Process Definitions.....	167
Jobs and Processes.....	168
How to Manage Foreground and Background Processes.....	168
How to Prioritize Processes.....	169
How to End a Process.....	171
Processes and Services (Daemons).....	172
How to Manage a Daemon Process.....	173
Objective 2 Describe Startup Shell Scripts and Services.....	173
Startup Scripts.....	174
Startup Script Directory Structure.....	174
Startup Script Structure.....	174
Objective 3 Schedule Jobs.....	177
Schedule a Job (cron).....	178
Run a Job One Time Only (at).....	179
Objective 4 Use System Logging Services.....	180
The syslog Daemon.....	180
Important Log Files.....	182
How to View Log Files With YaST.....	182
How to Archive Log Files (logrotate).....	183
How to Monitor Hard Drive Space.....	184
SECTION 16 Connect the SUSE LINUX Enterprise Server to the Network.....	186
Objective 1 Configure Your Network Connection.....	186
TCP/IP Fundamentals.....	186
Network Interfaces in Linux.....	189
Network Interface Requirements.....	189
How to Configure a Network Card With YaST.....	189
How to Modify a Network Card Manually.....	190
Objective 2 Configure and Manage Routes.....	194

Route Types.....	194
How to Modify Route Configuration Files.....	196
How to Activate Routing.....	196
How to Manage the Network Interface and Routes With ip.....	196
Objective 3 Test the Network Interface.....	198
Check a Network Connection Between Hosts (ping).....	198
Check the Routing (traceroute).....	200
Analyze Network Traffic (tcpdump and ethereal).....	200
Determine the Status of All Network Connections (netstat).....	203
Check for Service Availability (netcat).....	204
SECTION 17 Enable Infrastructure Services.....	206
Objective 1 Configure and Manage Network Printing Services.....	206
Printers and Linux Support.....	206
CUPS and SUSE LINUX Enterprise Server.....	206
How to Configure a SUSE LINUX Enterprise Server Network Printer.....	207
How to Modify a SUSE LINUX Enterprise Server Network Printer.....	209
How to Manage Printing From the Command Line.....	211
How to Access the CUPS Web Administration Tools.....	212
How to Troubleshoot the CUPS Print System.....	213
Objective 2 Configure Network File Systems.....	214
Network File System (NFS).....	214
Samba (CIFS).....	218
How to Monitor and Test Samba.....	222
Objective 3 Manage Resources on the Network.....	223
Network Information Service (NIS).....	223
LDAP.....	229
SECTION 18 Enable Internet Services.....	233
Objective 1 Configure SUSE LINUX Enterprise Server Time.....	233
SUSE LINUX Enterprise Server Time Overview.....	233
How to Synchronize Time With netdate and hwclock.....	234
What Network Time Protocol (NTP) Is.....	235
Objective 2 Enable a Web Server (Apache).....	238
How a Web Server Works.....	238
Apache and SUSE LINUX Enterprise Server.....	239
How to Configure an Apache HTTP Server With YaST.....	241
Objective 3 Enable the Extended Internet Daemon (xinetd).....	241
What inetd Is.....	241
How to Configure xinetd With YaST.....	242
How to Manage xinetd Manually.....	242
How to Configure the TCP Wrapper.....	245
Objective 4 Enable an FTP Server.....	248
The Role of an FTP Server.....	248
How FTP Works.....	248
Advantages of PureFTPd Server.....	248
How to Install and Run PureFTPd Server.....	249
How to Configure PureFTPd Server.....	249
How to Manage PureFTPd Logs.....	251

SECTION 19 Manage Remote Access.....	252
Objective 1 Provide Secure Remote Access With OpenSSH.....	252
Cryptography Basics.....	252
SSH Features and Architecture.....	253
How to Configure the SSH Client.....	256
SSH Client Commands.....	256
How to Configure the SSH Server.....	257
SSH Server Commands.....	257
Public Key Authentication Management.....	258
Objective 2 Enable Remote Administration With YaST.....	259
VNC and YaST Remote Administration.....	259
How to Configure Your Server for Remote Administration.....	259
How to Access Your Server for Remote Administration.....	260
Objective 3 Configure a Network Installation.....	260
Preinstallation Considerations.....	260
SUSE LINUX Installation Basics.....	261
How to Configure an Installation Server.....	262
How to Start a Remote Installation.....	264
SECTION 20 Configure the Network Manually.....	265
Objective 1 Understand Linux Network Terms.....	265
Objective 2 Set Up Network Devices With the ip Tool.....	265
Display the Current Network Configuration.....	265
Change the Current Network Configuration.....	267
Objective 3 Save Device Settings to a Configuration File.....	268
Configure a Device Staticly.....	268
Configure a Device Dynamically With DHCP.....	269
Start and Stop Configured Devices.....	269
Objective 4 Set Up Routing With the ip Tool.....	269
View the Routing Table.....	269
Add Routes to the Routing Table.....	269
Objective 5 Save Routing Settings to a Configuration File.....	270
Objective 6 Configure Host Name and Name Resolution.....	270
Set the Host and Domain Name.....	270
Configure Name Resolution.....	270
Objective 7 Test the Network Connection With Command Line Tools.....	271
Use ping to Test Network Connections.....	271
Use traceroute to Trace Network Packets.....	271
SECTION 21 Configure Network Services.....	273
Objective 1 Configure a DNS Server Using BIND.....	273
Understand the Domain Name System.....	273
Install and Configure the BIND Server Software.....	274
Configure a Caching-Only DNS server.....	275
Configure a Master Server for Your Domain.....	276
Configure One or More Slave Servers.....	279
Configure the Client Computers to Use the DNS Server.....	280
Use Command Line Tools to Query DNS Servers.....	281
Find More Information About DNS.....	282
Objective 2 Deploy OpenLDAP on a SLES 9 Server.....	282

The Concept of a Directory Service.....	282
The Basics of LDAP.....	283
How to Install and Set Up an OpenLDAP Server.....	284
How to Add Entries to the LDAP Server.....	284
How to Query Information from the LDAP Server.....	286
How to Delete and Modify Entries of the LDAP Server.....	286
How to Use Graphical LDAP Applications.....	287
Objective 3 Configure an Apache Web Server.....	287
The Basic Functionality of a Web Server.....	287
How to Install and Set Up a Basic Apache Web Server.....	288
The Structure and the Basic Elements of the Apache Configuration Files.....	288
The Basic Apache Configuration.....	289
How to Configure Virtual Hosts.....	289
How to Limit Access to the Web Server.....	290
How to Configure OpenSSL for Connection Encryption.....	291
Objective 4 Configure a Samba Server as a File Server.....	294
The Purpose and the Possibilities of Samba.....	294
How to Install and Set Up a Basic Samba Server.....	294
The Structure and Elements of the Samba Configuration File.....	295
How to Use the Samba Tools to Access SMB Shares from a Linux Computer.....	296
How to Configure a File Server with User Authentication.....	297
Additional Possibilities with Samba.....	298
SECTION 22 Secure a SLES 9 Server.....	300
Objective 1 Create a Security Concept.....	300
Understand the Basics of a Security Concept.....	300
Perform a Communication Analysis.....	300
Analyze the Protection Requirements.....	301
Analyze the Current Situation and Necessary Enhancements.....	301
Objective 2 Limit Physical Access to Server Systems.....	304
Place the Server in a Separate, Locked Room.....	304
Secure the BIOS with a Password.....	304
Secure the GRUB Boot Loader with a Password.....	305
Objective 3 Limit the Installed Software Packages.....	305
Objective 4 Understand the Linux User Authentication.....	305
How PAM Works.....	305
PAM Configuration.....	306
The Requirements for a Secure Password.....	307
Objective 5 Ensure File System Security.....	307
The Basic Rule for User Write Access.....	308
The Basic Rule for User Read Access.....	308
How Special File Permissions Affect the Security of the System.....	308
Objective 6 Use ACLs for Advanced Access Control.....	309
The Basics of ACLs.....	309
Important ACL Terms.....	309
ACL Types.....	309
How ACLs and Permission Bits Map to Each Other.....	310
How to Use the ACL Command Line Tools.....	310
How to Configure a Directory With an Access ACL.....	311

How to Configure a Directory With a Default ACL.....	312
The ACL Check Algorithm.....	314
How Applications Handle ACLs.....	314
Objective 7 Configure Security Settings With YaST.....	314
Objective 8 Stay Informed About Security Issues.....	316
Objective 9 Apply Security Updates.....	317
Register Your Product.....	317
Use the YaST Online Update.....	317
SECTION 23 Manage Backup and Recovery.....	319
Objective 1 Develop a Backup Strategy.....	319
Choose a Backup Method.....	319
Choose the Right Backup Media.....	320
Objective 2 Create Backup Files With tar.....	320
Create tar Archives.....	320
Unpack tar Archives.....	320
Exclude Files from Backup.....	320
Perform Incremental and Differential Backups.....	321
Use tar Command Line Options.....	321
Objective 3 Work With Magnetic Tapes.....	321
Objective 4 Copy Data With the dd Command.....	322
Objective 5 Mirror Directories With the rsync Command.....	323
Perform Local Copying With rsync.....	323
Perform Remote Copying with rsync.....	323
Objective 6 Automate Data Backups With the cron Service.....	324
Objective 7 Troubleshoot the Boot Process of a SLES 9 System.....	324
System Boot Process Issues.....	324
How to Boot a Corrupted System Directly into a Shell.....	324
How to Boot a Corrupted System With the Installation Media.....	325
How to Start and Use the SLES 9 Rescue System.....	325
Objective 8 Configure and Install the GRUB Boot Loader.....	325
The Basic Functionality of a Boot Loader.....	325
The Basics of GRUB.....	325
How to Configure the GRUB Boot Loader.....	326
SECTION 24 Create Shell Scripts.....	328
Objective 1 Use Basic Script Elements.....	328
Flow Charts for Scripts.....	328
The Basic Rules of Shell Scripting.....	328
How to Develop Scripts That Read User Input.....	329
How to Perform Basic Script Operations with Variables.....	330
How to Use Command Substitution.....	330
How to Use Arithmetic Operations.....	331
Objective 2 Use Variable Substitution Operators.....	331
Objective 3 Use Control Structures.....	332
Create Basic Branches With the if Command.....	332
Build Multiple Branches With a case Statement.....	335
Create Loops Using the while and until Commands.....	336
Process Lists with the for Loop.....	336
Interrupt Loop Processing.....	336

Objective 4 Use Advanced Scripting Techniques.....	337
Use Shell Functions.....	337
Read Options with getopt.....	338
Objective 5 Learn About Useful Commands in Shell Scripts.....	338
Use the cat Command.....	338
Use the cut Command.....	338
Use the date Command.....	339
Use the echo Command.....	339
Use the grep and egrep Commands.....	339
Use the test Command.....	341
Use the tr Command.....	342
SECTION 25 Compile Software from Source.....	343
Objective 1 Understand the Basics of C Programming.....	343
The Difference Between Source Code and an Executable.....	343
The Structure of a Simple C Program.....	343
How to Compile a Simple C Program.....	344
Objective 2 Understand the GNU Build Tool Chain.....	344
Use configure to Prepare the Build Process.....	345
Use make to Compile the Source Code.....	345
Use make install to Install the Compiled Program.....	345
Install the Required Packages for a Build Environment.....	345
Objective 3 Understand the Concept of Shared Libraries.....	345
Objective 4 Perform a Standard Build Process.....	346
SECTION 26 Perform a Health Check and Performance Tuning.....	349
Objective 1 Find Performance Bottlenecks.....	349
Analyze Processes and Processor Utilization.....	349
Analyze Memory Utilization and Performance.....	350
Analyze Storage Performance.....	351
Analyze Network Utilization and Performance.....	353
Objective 2 Reduce System and Memory Load	354
Analyze CPU Intensive Applications.....	354
Run Only Required Software.....	354
Keep Your Software Up to Date.....	354
Optimize Swap Partitions.....	355
Change Hardware Components.....	355
Objective 3 Optimize the Storage System.....	355
Configure IDE Drives With hdparm.....	355
Tune Kernel Parameters.....	356
Tune File System Access.....	357
Change Hardware Components.....	358
Objective 4 Tune the Network Performance.....	358
Change Kernel Network Parameters.....	358
Change Your Network Environment.....	358
SECTION 27 Manage Hardware and Component Changes.....	360
Objective 1 Describe the Differences Between Devices and Interfaces.....	360
Objective 2 Describe How Device Drivers Work.....	360
Objective 3 Describe How Device Drivers Are Loaded.....	360

Objective 4 Describe the sysfs File System.....	361
Objective 5 Describe How the SLES 9 Hotplug System Works.....	361
Objective 6 Use the hwup Command.....	362
Objective 7 Add New Hardware to a SLES 9 System.....	363
Add a New Drive to the System.....	363
Replace a Graphics Card.....	364
Add a New Network Adapter.....	364
