# Table of Contents

<b>Pathogenesis and Treatment of Renal Lithiasis—Newer Concepts.</b> <i>By</i> ARTHUR J. BUTT, <i>Butt Medical Foundation, Baptist Hospital, Pensacola, Fla.</i> . . . . .	11
Mechanism of Renal Calculus Formation . . . . .	13
Effect of Testicular Hyaluronidase on Urine . . . . .	14
Effect of Urinary Tract Infection on Urinary Colloids . . . . .	19
Ground Substance Disturbance and Calculus Formation . . . . .	20
Hyaluronidase Therapy . . . . .	23
Clinical Experience . . . . .	26
Summary . . . . .	30
References . . . . .	30
<b>Hepatic Coma.</b> <i>By</i> CHARLES S. DAVIDSON, <i>Thorndike Memorial Laboratory, Boston City Hospital, Boston</i> . . . . .	33
Clinical Manifestations . . . . .	34
Pathogenesis . . . . .	37
Treatment . . . . .	52
Precipitating Factors . . . . .	52
Specific Therapy . . . . .	59
References . . . . .	61
<b>The Pathophysiology of the Pancreas.</b> <i>By</i> DAVID A. DREILING and HENRY D. JANOWITZ, <i>Departments of Surgery and Medicine, The Mount Sinai Hospital, New York</i> . . . . .	65
Pancreatic Physiology . . . . .	65
External Pancreatic Secretion . . . . .	65
Pancreatic Outflow Tract . . . . .	68
Metabolic Considerations . . . . .	68

Pancreatic Stimulation and Disturbances of Pancreatic Outflow . . . . .	69
Pathogenesis of Pancreatitis . . . . .	70
Etiology . . . . .	72
Mechanism of Disease Manifestations . . . . .	74
Diagnostic and Pancreatic Function Tests . . . . .	75
Roentgenographic Features . . . . .	75
Laboratory Findings . . . . .	76
Quantitative Tests of Pancreatic Function . . . . .	77
Treatment . . . . .	86
Acute Pancreatitis . . . . .	86
Chronic Pancreatitis . . . . .	89
References . . . . .	92
<b>Clinical Significance of Serum Mucoproteins.</b> <i>By</i> EZRA M. GREENSPAN, <i>Department of Medicine, The Mount Sinai Hospital, New York</i> . . . . .	101
Determination of Serum Mucoprotein Concentration . . . . .	103
Normal Mucoprotein Levels . . . . .	104
Pathophysiologic Aspects . . . . .	105
Mucoprotein Equilibrium . . . . .	110
Hepatobiliary Diseases . . . . .	112
Rheumatic, Collagen, and Cardiovascular Diseases . . . . .	116
Infectious Diseases . . . . .	117
Neoplastic Disease . . . . .	118
Renal Diseases . . . . .	118
Endocrine and Metabolic Diseases . . . . .	119
Summary and Conclusions . . . . .	120
References . . . . .	120
<b>Advances in Physiology of Clinical Disorders of the Adrenal Cortex.</b> <i>By</i> JOSEPH W. JAILER, <i>College of Physicians and Surgeons, Columbia University, and Presbyterian Hospital, New York</i> . . . . .	125
Clinical Aspects . . . . .	134
Hypoadrenalism . . . . .	134

Hyperadrenalism . . . . .	138
Adrenal Virilism . . . . .	143
References . . . . .	152
<b>Diseases of the Pericardium.</b> <i>By</i> VICTOR A. MCKUSICK <i>and</i> A. MCGEEHEE HARVEY, <i>The Johns Hopkins Hospital and Johns</i> <i>Hopkins University School of Medicine, Baltimore</i> . . . . .	
Diagnosis . . . . .	157
Critical Evaluation of Signs and Symptoms . . . . .	157
Ancillary Diagnostic Measures . . . . .	167
Pericarditis . . . . .	169
Acute Nonspecific (Benign Idiopathic) Pericarditis . . . . .	169
Purulent (Pyogenic) Pericarditis . . . . .	170
Acute and Subacute Tuberculous Pericarditis . . . . .	172
Pericarditis of Systemic Lupus Erythematosus . . . . .	173
Chronic Constrictive Pericarditis . . . . .	174
Metabolic Pericarditis . . . . .	185
Pericarditis Secondary to Other Cardiovascular Diseases, Especially Postinfectional (Epistenocardic) Pericarditis . . . . .	187
Pericarditis Due to Physical Agents . . . . .	188
Pericardial Cysts and Diverticula . . . . .	189
Less Common Disorders of the Pericardium . . . . .	191
References . . . . .	193
<b>The Nephrotic Syndrome.</b> <i>By</i> JOHN B. SQUIRE, <i>Division of Path-</i> <i>ological Studies, University of Birmingham, Birmingham,</i> <i>England</i> . . . . .	
Clinical Features . . . . .	202
Paper Electrophoresis for Study of Urinary and Serum Proteins . . . . .	203
Source of Urinary Protein . . . . .	205
Urinary Loss of Albumin as Main Cause of Hypoalbuminaemia . . . . .	206
Urinary Loss of Protein Other Than Albumin and Related Serum Changes . . . . .	211
Increased Plasma Constituents in Nephrotic Syndrome . . . . .	212
Differential Protein Clearances as Diagnostic Aid . . . . .	213
Sievelike Behaviour of Glomerulus . . . . .	214

Tubular Reabsorption of Protein . . . . .	216
Other Forms of Tubular Dysfunction . . . . .	221
Blood Volume Changes . . . . .	222
Mechanism of Oedema Formation . . . . .	226
Effect of Varying Protein Intake on Nitrogen Balance . . . . .	231
Nephrotic Syndrome and Incomplete Diagnosis . . . . .	236
References . . . . .	238
<b>Applied Pulmonary Physiology.</b> <i>By DANIEL J. STONE, Chest Section and Cardiopulmonary Laboratory, The Bronx Veterans Hospital, New York</i> . . . . .	243
History and Technical Development . . . . .	243
Clinical Studies in Pulmonary Physiology . . . . .	256
Pulmonary Emphysema . . . . .	256
Bullous Emphysema . . . . .	265
Restrictive Ventilatory Insufficiency . . . . .	267
Ventilatory Insufficiency Due to Respiratory Center Disturbances . . . . .	270
Pulmonary Fibroses with Diffusion Barrier . . . . .	273
Functional Pulmonary Defects Due to Other Conditions . . . . .	279
Clinical Usefulness of Pulmonary Function Tests . . . . .	280
References . . . . .	281
<b>Author Index</b> . . . . .	287
<b>Subject Index</b> . . . . .	297

ADVANCES IN INTERNAL MEDICINE

VOLUME VII

# ADVANCES IN INTERNAL MEDICINE

VOLUMES I and II (out of print)

## VOLUME III

USE OF ANTI-LEWISITE (BAL) IN TREATMENT OF POISONING BY ARSENIC, MERCURY AND OTHER METALS, *by Warfield T. Longcope and John A. Luetscher, Jr.*

CURRENT CONCEPTS OF HEMOLYTIC ANEMIAS, *by Solomon Estren*

HOST, DRUG AND PARASITE FACTORS THAT MODIFY THE THERAPEUTIC ACTIVITY OF PENICILLIN, *by Harry Eagle*

STREPTOMYCIN: DEVELOPMENT AND STATUS OF ITS USE IN THE TREATMENT OF TUBERCULOSIS, *by H. Corwin Hinshaw and William H. Feldman*

HISTOPLASMOSIS, *by Henry Pinkerton*

TREATMENT OF HYPERTHYROIDISM WITH ANTITHYROID COMPOUNDS, *by E. B. Astwood*

DIAGNOSIS OF DISEASE BY ENZYMIC METHODS, *by Charles Huggins and Paul Talalay*

PLASMA FRACTIONATION, *by Charles A. Janeway*

THE MECHANISM OF ACCLIMATIZATION TO HEAT, *by Jerome W. Conn*

MODERN THERAPEUTIC AGENTS IN NEUROLOGIC CONDITIONS, *by H. Houston Merritt*

## VOLUME IV

NITROGEN MUSTARDS IN THE TREATMENT OF NEOPLASTIC DISEASE, *by David A. Karnofsky*

USE OF RADIOACTIVE ISOTOPES IN MEDICINE, *by Louis Robert Wasserman and Robert Loevinger*

BRUCellosis, *by Abraham I. Braude and Wesley W. Spink*

ADVANCES IN NEUROMUSCULAR DISORDERS, *by Donald McEachern and Reuben Rabinovitch*

USE OF SODIUM DEPLETION IN THERAPY, *by William Dock*

CLINICAL USE OF ANTICOAGULANTS, *by J. Earle Estes and Edgar V. Allen*

HEPATITIS AND CIRRHOSIS OF THE LIVER, *by Arthur J. Patek, Jr.*

HEPATIC TESTS, *by Hans Popper and Fenton Schaffner*

THE VASCULAR PHYSIOLOGY OF HYPERTENSION, *by G. W. Pickering*

## VOLUME V

- DISEASES OF THE PREGNANT WOMAN AFFECTING THE OFFSPRING, *by Murray H. Bass*
- CATHETERIZATION OF THE HEART, *by Richard J. Bing*
- PORTAL HYPERTENSION AND ITS TREATMENT, *by Arthur H. Blakemore*
- THE ANEMIA OF INFECTION: XVII. A REVIEW, *by G. E. Cartwright and M. M. Wintrobe*
- GOUT, A DERANGEMENT OF PURINE METABOLISM, *by Alexander B. Gutman and T. F. Yü*
- CLINICAL ASPECTS OF GANGLIONIC AND ADRENERGIC BLOCKING AGENTS, *by Richard H. Lyons and V. Logan Love*
- ASPECTS OF THE INFLUENZA PROBLEM, *by J. Mulder*
- EXPERIENCES WITH ADRENOCORTICOTROPIC HORMONE (ACTH) AND CORTISONE, *by Charles Ragan*
- ABNORMAL PROTEINS IN MYELOMA, *by J. Waldenström*

## VOLUME VI

- UROPEPSIN, *by Donald C. Balfour, Jr.*
- GLUCAGON, THE HYPERGLYCEMIC-GLYCOGENOLYTIC HORMONE OF THE PANCREAS, *by Piero P. Foà*
- DIAGNOSIS OF CANCER OF INTERNAL ORGANS BY PAPANICOLAOU TECHNIC, *by Ruth M. Graham*
- SPATIAL VECTORCARDIOGRAPHY, *by Arthur Grishman*
- THE L.E. CELL PHENOMENON, *by Malcolm M. Hargraves*
- BIOPSY STUDIES OF THE LIVER AND KIDNEY, *by Poul Iversen, M. Bjørneboe, and N. B. Krarup*
- THROMBOTIC THROMBOCYTOPENIC PURPURA, *by Karl Singer*
- PORPHYRIA, *by C. J. Watson*
- DIAPHRAGMATIC HERNIA, *by Sidney Weintraub*
- THE DETERMINATION OF INSULIN IN BLOOD, *by A. F. Willebrands and J. Groen*
