# CYBERPSYCHOLOGY AND NEW MEDIA

Cyberpsychology is the study of human interactions with the Internet, mobile computing and telephony, games consoles, virtual reality, artificial intelligence and other contemporary electronic technologies. The field has grown substantially over the past few years, and this book surveys how researchers are tackling the impact of new technology on human behaviour and how people interact with this technology.

Examining topics as diverse as online dating, social networking, online communications, artificial intelligence, health-information seeking behaviour, education online, online therapies and cybercrime, *Cyberpsychology and New Media* provides an in-depth overview of this burgeoning field and allows those with little previous knowledge to gain an appreciation of the diversity of the research being undertaken in the area.

Arranged thematically and structured for accessibility, *Cyberpsychology and New Media* will be essential reading for researchers and students in social psychology and cyberpsychology, and in communication and media studies.

**Andrew Power** is Head of the Faculty of Film, Art, and Creative Technologies, at the Institute of Art, Design, and Technology in Dun Laoghaire, Ireland. Prior to this Andrew spent many years in the ICT industry working for a number of multinational corporations. Originally trained as an engineer, Andrew holds an MA from the University of Dublin, an MBA from the University of Strathclyde and a doctorate in Governance from Queens University Belfast. Andrew's research interests include social networking, governance and the psychology of online crime.

**Gráinne Kirwan** is a lecturer in psychology in IADT, teaching on both the BSc (Hons) in Applied Psychology and the MSc in Cyberpsychology. She lectures on topics such as forensic psychology, cyberpsychology, computer-mediated communication and the psychology of virtual reality and artificial intelligence. She holds a PhD in Criminology as well as an MSc in Applied Forensic Psychology, a Postgraduate Certificate in Third Level Learning and Teaching, and an MLitt in Psychology.

Dedicated to the past and present students and staff of  
the Faculty of Film, Art and Creative Technologies in IADT  
for their inspiration, enthusiasm and innovation.

# FIGURES

3.1	Conscientiousness scores by number of friends	34
4.1	The procedure followed by participants	43
4.2	Mobile phone separation anxiety over time	44

18.5	Learning styles and Facebook variables	224
18.6	Learning styles and LinkedIn variables	225

# CONTRIBUTORS

**Hannah Barton** holds an MA in Psychology from University College Cork and is currently the coordinator of the MSc in Cyberpsychology. She has been lecturing in personality and social psychology in Applied Psychology and Cyberpsychology in IADT for the past twelve years. Her research has included altruism and positive psychology, mobile learning (podcasting), and group dynamics in both online and offline settings.

**Ellen Brady** has a BA and an MLitt in Psychology from University College Dublin, and is completing a Medical Research Council funded PhD at the University of Manchester. Her current work is examining the online social networks of chronically ill patients, and she has done previous research on mothers' and fathers' use of parenting websites. Her research interests include online social support, Internet forums and the ethics of online research.

**Irene Connolly** holds an MLitt and a PhD in Educational Psychology from Trinity College Dublin, specialising in the area of bullying. Other research has focused on learning, the use of technology in the classroom and learning difficulties. She lectures in developmental and educational psychology on the BSc (Hons) in Applied Psychology at IADT. Irene is a member of the Psychological Society of Ireland (PSI) and a former panel psychologist for the National Educational Psychological Service (NEPS).

**Cliona Flood** holds a BSc in Psychology from the Open University and an MSc in Work and Organizational Psychology from Dublin City University. She is a lecturer in IADT, teaching perception and ergonomics, organizational psychology and abnormal psychology on the BSc (Hons) in Applied Psychology. She has also been involved on the MSc in Cyberpsychology, supervising theses and lecturing.

Cliona is the Peer Assisted Learning coordinator at IADT. Her research interests include counselling in the online environment, podcasting as a teaching tool and the first year experience.

**John Greaney** is a Lecturer in Psychology at IADT. He holds a BSc (Hons) in Mathematics and Psychology and PhD in Psychology (both from the University of Birmingham). Prior to joining IADT, John worked for the Royal National Institute for the Blind in the UK and held lecturing positions at the universities of Birmingham and Manchester. These were followed by spells in industry working for Hewlett Packard and Frontend.

**Olivia Hurley** holds an MSc and PhD from University College Dublin in her specialty research and teaching area of sport psychology. She is a lecturer on the BSc (Hons) in Applied Psychology in IADT. Olivia is a member of the panel of sport psychologists for the Irish Institute of Sport and is also a member of PSI and BASES. She has acted as a reviewer for the *Irish Journal of Psychology* and the *International Review of Sport and Exercise Psychology* and has published research on the psychology of sports injuries.

**Gráinne Kirwan** is a lecturer in psychology in IADT, teaching on both the BSc (Hons) in Applied Psychology and the MSc in Cyberpsychology. She lectures on topics including forensic psychology, cyberpsychology, computer-mediated communication and the psychology of virtual reality and artificial intelligence. She holds a PhD in Criminology as well as an MSc in Applied Forensic Psychology, a Postgraduate Certificate in Third Level Learning and Teaching, and an MLitt in Psychology by Research.

**Marion Palmer** is Head of the Department of Technology and Psychology at IADT and chair of the Institute's Teaching and Learning Committee. Marion has worked on the MSc in Cyberpsychology since its inception with a particular focus on educational cyberpsychology. She holds a doctorate in education from Queen's University Belfast. Marion was a national NAIRTL Award of Teaching Excellence winner in 2011.

**Andrew Power** is Head of the Faculty of Film, Art, and Creative Technologies, at the Institute of Art, Design, and Technology in Dun Laoghaire, Ireland. Prior to this Andrew spent many years in the ICT industry working for a number of multinational corporations. Originally trained as an engineer, Andrew holds an MA from the University of Dublin, an MBA from the University of Strathclyde and a doctorate in Governance from Queens University Belfast. Andrew's research interests include social networking, governance and the psychology of online crime.

**Brendan Rooney** holds a PhD from University College Dublin and lectures on the MSc in Cyberpsychology as well as the undergraduate BSc (Hons) in Applied

Psychology in IADT. He is also currently Chair of the Psychological Society of Ireland's Special Interest Group for Media, Art and Cyberpsychology. Brendan's research interests include the psychological processes of cognitive and emotional engagement with virtual or fictional worlds.

The following contributors are all graduates of the MSc in Cyberpsychology at IADT and co-authored chapters along with the academic writing team. Each chapter was based on their original research work. These graduates are: Mary Aiken, Sinéad Cochrane, Eily Coghlan, Genevieve Dalton, Nicola Fox Hamilton, Graham Gilbert, Kostas Mavropalias, Phelim May, Donna McCabe, Dean McDonnell, Mary O'Brien, Richard O'Connell, Andy Osborn, Kelly Price, Karen Reilly, Mark Siggins and Rory Tierney.

# PREFACE

*Andrew Power and Gráinne Kirwan*

This book sets out to describe a wide range of research projects in the psychology of new media. It takes as its starting point – and its source for much of the research – the MSc in Cyberpsychology taught in the Institute of Art, Design and Technology (IADT) in Dublin, Ireland. IADT is a vibrant third-level institution, thriving on new ideas and originality. Specialising in creativity and innovation, programmes embrace the opportunities and challenges of the digital age.

In 2005 staff at IADT began the development of an MSc in Cyberpsychology. The programme grew out of the existing undergraduate BSc (Hons) in Applied Psychology, which for many years had explored human computer interaction and the development of an information society. Cyberpsychology is about human–computer interaction, how technology impacts on our behaviour and our psychological state. Cyberpsychology looks at issues of design and usage and seeks to make complex systems more intuitive and easy to use. In addition to looking at how the Internet affects humans, there is a considerable body of research that examines how other technologies can influence us, for example the application of virtual reality (VR) and artificial intelligence (AI) to psychological settings, such as therapy and education.

In 2005 cyberpsychology was still a relatively new field within applied psychology. However, its emphasis on the study of human interactions with the Internet, mobile computing, mobile phones, games consoles, virtual reality and artificial intelligence was a good fit with IADT's existing research and teaching in applied psychology.

The MSc in Cyberpsychology is a ground-breaking taught programme, unique in both Ireland and the world at the time of launch although in the intervening period a number of universities have offered similar programmes. The programme provides graduates with an in-depth understanding of how humans interact with technology and in online environments. The course is wide-ranging, encompassing a variety of perspectives and sub-disciplines within cyberpsychology.

After a number of years teaching this programme it occurred to the editors that there was a body of work that had been developed by successive graduating students of the MSc in Cyberpsychology that was current, relevant and pioneering. It was decided to bring together the academic team who had supervised these theses and, with the cooperation of the graduates themselves, produce an edited volume of the best of this work from the last five years.

## **Structure of the book**

Following a general introduction in Chapter 1 (which defines the discipline of cyberpsychology), the research studies described in the book are divided into four main themes. These are 'Communication', 'Personality and Internet Use', 'Internet Interventions and Therapies' and 'Internet and Education'. Finally, Chapter 19 explores the contribution of the research in this volume to the field of cyberpsychology and considers how cyberpsychology might respond to future technological advances.

# ACKNOWLEDGEMENTS

The editors would like to acknowledge and express their gratitude to the many people who made this publication possible.

In the first instance we would like to thank Mr Jim Devine and Dr Annie Doona, past and current presidents of the Institute of Art, Design and Technology (IADT) in Dun Laoghaire, Ireland. Without their support and vision, the innovative programmes in new fields that this work draws on would not have developed. We would also like to acknowledge the role of Dr Marion Palmer, Head of Department of Technology and Psychology at IADT, for her advice and mentoring during the development of the MSc in Cyberpsychology.

We would like to thank our many colleagues who contributed chapters to this book and who worked with graduates of the programme to develop their research. They gave their advice generously, and we are honoured to work with such talented and knowledgeable individuals.

We would like to thank the editorial team in Psychology Press. In particular, we would like to thank Michael Fenton, Michael Strang and Sharla Plant for their assistance in bringing this work into print. Their patience and advice has been greatly appreciated. We would also like to thank Vodafone Ireland for their permission to use the screenshots in Figures 7.1, 7.2 and 7.3.

As always, we would like to thank our families and friends for their good-humoured understanding of our absences at social occasions due to our incessant tapping away at keyboards. We'd love to promise that we'll stop writing, but we can't!

Finally, we would like to thank the students past, present and future who contribute to the development of this subject through their curiosity, hard work and talent. It is a privilege to teach them, and to watch them push the boundaries of the field in both academia and industry.

# CONTENTS

<i>List of figures</i>	<i>xi</i>
<i>List of tables</i>	<i>xii</i>
<i>Notes on contributors</i>	<i>xiv</i>
<i>Preface</i>	<i>xvii</i>
<i>Acknowledgements</i>	<i>xix</i>

<b>PART I</b>	
<b>Introduction</b>	<b>1</b>

1 What is cyberpsychology?	3
<i>Gráinne Kirwan and Andrew Power</i>	

<b>PART II</b>	
<b>Communication</b>	<b>15</b>

2 Blogs: A study into current uses and perceptions in society	17
<i>Sinéad Cochrane and Hannah Barton</i>	
3 The motivations and personality traits that influence Facebook usage	26
<i>Graham Gilbert and Hannah Barton</i>	
4 Mobile phone separation and anxiety	38
<i>Mark Siggins and Cliona Flood</i>	

- 5 A cross-cultural comparison of deception in online dating profiles using language analysis 49  
*Nicola Fox Hamilton and Gráinne Kirwan*
- 6 The influence of gendered web design on female science career motivation 60  
*Donna McCabe, Olivia Hurley and Cliona Flood*

### **PART III**

## **Personality and Internet use 73**

- 7 Virtual assistants: Trust and adoption in telecommunication customer support 75  
*Phelim May and Gráinne Kirwan*
- 8 Gender-bending in virtual worlds: Investigating 'Need for Achievement' between goal-orientated and non-goal-orientated environments 91  
*Eily Coghlan and Gráinne Kirwan*
- 9 Exploring psychological factors for contributing to online recommendation sites 101  
*Mary O'Brien, John Greaney and Hannah Barton*
- 10 Online identity theft: An investigation of the differences between victims and non-victims with regard to anxiety, precautions and uses of the Internet 112  
*Karen Reilly and Gráinne Kirwan*
- 11 Personality caught in the social net: Facebook phishing 126  
*Kelly Price and Gráinne Kirwan*

### **PART IV**

## **Internet interventions and therapies 137**

- 12 Protection Motivation Theory and online activities 139  
*Richard O'Connell and Gráinne Kirwan*
- 13 Establishing an online counselling service for substance use: An exploratory study 149  
*Andy Osborn and Cliona Flood*

14	The psychology of cyberchondria and 'Cyberchondria by Proxy'	158
	<i>Mary Aiken and Gráinne Kirwan</i>	
15	Attitudes to computerised psychotherapy: A survey of psychotherapists	170
	<i>Dean McDonnell, Brendan Rooney and Cliona Flood</i>	
<b>PART V</b>		
	<b>Internet and education</b>	<b>183</b>
16	Capturing lectures: Using multimedia lecture captures to promote learning	185
	<i>Genevieve Dalton, Irene Connolly and Marion Palmer</i>	
17	Participation, interaction and learner satisfaction in a professional practice wiki for teachers	195
	<i>Rory Tierney and Marion Palmer</i>	
18	Social bits: Personality and learning style profiling via the social web	215
	<i>Kostas Mavropalias and Ellen Brady</i>	
<b>Conclusion</b>		<b>229</b>
19	The future of cyberpsychology	231
