Contents

I Plenary lecture

- Genome-wide gene expression changes in response to heavy metal exposure
Nico M. van Straalen, Dick Roelofs, Martijn J. T. N. Timmermans, Janine Mariën, Thierry K. S. Janssens,
Muriel E. de Boer, Ben Nota, Tjalf E. de Boer (3)
- The role of molecular environmental science in advancing the frontiers of trace element biogeochemistry
D. L. Sparks (5)
- An overview on aquaculture and environmental health: with emphasis on bioaccumulation of mercury
MH Wong, KC Cheung, CKC Wong, LYY Ko, CKM Leung (6)

II Special Symposium

1. Rare earth elements in the environment

Proposed by Sophie Cornu (Sophie, Cornu@orleans.inra.fr, INRA Orléans, France)

- Distribution of 28 elements in podzol profiles studied by fractional extractions and multivariate statistics
Carmen Donisa, Matthieu François, Sébastien Sauvè, Eiliv Steinnes (12)
- Heavy metals in soil solution of lowland oak forest in croatia
Vrbek Boris & Ivan Pila (14)
- Cadmium pollution in soils of China
N. C. Chen, Y. G. Zhu, J. M. Zhou (16)
- Selenium: importance and sources
Emhemmed abdullah Hebshi (18)
- Dissolution behavior of Pb-free solders due to exposure to bulk precipitation and throughfall
H. Hou, T. Takamatsu, M. Hosomi (20)
- Rare earth elements as indicators of pedogenic processes in an erosional topose-quence of old soils, Burgundy, France
C. Laveuf, S. Cornu, F. Juillot (22)
- Effect of copper contamination on fungal biomass of agricultural soils
M. Legras, C. Bailleul, C. Gangneux, J. C. Dur, C. Mougin, K. Laval (24)
- Distribution of exchangeable Al, Fe and Mn in forest soils from two contrasting watersheds in northern Alberta, Canada
Y. S. Ok, M. A. Arshad, S. X. Chang, Y. Feng (26)
- Behavior of reare earth elements (REE) in model soil systems
L. V. Perelomov, S. Yoshida (28)
- The impact of bacteria, plants and trees on accumulations and fractionations of rare earth elements at the

atmosphere-soil-water-interface	
P. Stille, <u>J. L. Crovisier</u> , M. C. Pierret, G. Aouad, F. Gauthier-Lafaye, F. Chabaux	(30)
Vertical distributions of major and trace elements in soils formed on the Yuanyang lake nature reserve area, the northeastern Taiwan	
<u>C. C. Tsai</u> , Y. F. Chang	(32)
Response of rice and soil to the application of rare earth elements	
Zubin Xie, Jianguo Zhu, Zihong Cao	(35)
The effect of heavy metals (Cd and Zn) on microbial respiration in calcareous and non-calcareous soils	
N. Yazdanpanah, <u>A. Fotovat</u> , A. Lakzian, G. H. Haghnia	(37)
Potential radioecological applications of the rare earth-actinide chemical analog concept in soil-plant systems	
Y. G. Zhu, S. Zhang, K. Tagami, S. Uchida, E. R. Landa	(39)
2. Trace element issues in intensive peri-urban farming systems-concepts, case studies and risk assessment	
Proposed by Prof. Dr. Ingrid Oborn(Ingrid. Oborn@mv.slu.se, Swedish University of Agricultural Sciences, Sweden) and Prof. Biao Huang (bhuang@issas.ac.cn, Institute of Soil Science, CAS, China)	
The role of vitamin C in reducing toxicity of cadmium metal on Nile tilapia <i>Oreochromis niloticus</i>	
<u>Abbas, H. H.</u> , Mahmoud, H. M., Miller, J.	(42)
Assessing the level of Yerevan's soils pollution with heavy metals	
M. H. Avetisyan	(44)
The content of molybdenum in oilseed rape plants after the application of nitrogen and sulphur fertilizers	
<u>J. Balík</u> , D. Pavlíková, P. Tlustoš, J. Černý, M. Kulhánek	(46)
Trace metal flows and balances in small-scale vegetable production systems in peri-urban areas of China and Vietnam	
<u>I. born</u> , Pham Quang Ha, Biao Huang, Nguyen Manh Khai, Xuezheng Shi	(48)
Fate of trace elements in the pedosphere: Venice region, northern Italy	
<u>C. Bini</u> , D. Zilioli	(51)
Role of zinc and boron on the yield, quality, Zn and B availability and uptake by hybrid maize	
<u>T. Chitdeshwari</u> , P. Subbian, P. M. Shanmugam, P. K. Selvaraj	(53)
Mobilisation of arsenic in soils affected by the application of phosphorus	
<u>D. K. Das</u> , Anitha Cherian, S. K. Naik, Pintu Sur	(55)
Fate of zinc in a sandy luvisol submitted to 100 years of massive irrigation with raw waste waters; a multi-scale approach	
<u>C. Dère</u> , I. Lamy, S. Cornu	(57)
Distribution of Cd, Pb, Zn and Cu and their fractions in soils from a peri-smelter area in northeast China	
Ping Du, <u>Nandong Xue</u> , Fasheng Li	(60)
Assessment of the distribution of heavy metals in the different fractions of irradiated sewage sludges	
<u>R. A. El-Motaium</u> , B. F. Laroussi	(62)

Potential transfer of heavy metals from wastewater, biosolids and soil to forage and sheep tissues in the north of Mexico <u>J. P. Flores-Mágez</u> , E. Jaramillo-Lopez, N. W. Assadian, G. Di Giovanni	(64)
Environmental quality of small-scale vegetable farming systems in peri-urban areas of Shanghai, China <u>Xue-Feng Hu</u> , Wei Jiang, Ji Wei, Liang-Feng Xu	(66)
Using cokriging method for improving estimates of spatial distribution of soil heavy metal in suburban of Beijing <u>K. L. Hu</u> , B. G. Li, H. Li, F. R. Zhang	(67)
Balances of heavy metals in small-scale vegetable farming system in a peri-urban agricultural area, China <u>Huang B</u> , Xu Y. X., Wang H. J., Shi X. Z., Yu D. S., Öborn I	(69)
Potentially toxic element concentrations, distribution and mobility in wastewater receiving river sediments in Hanoi, Vietnam S. T. Ingvertsen, H. Marcussen, A. Dalsgaard, <u>P. E. Holm</u>	(71)
Heavy metal contamination of soils and vegetables grown in Chapai- Nawabganj of Bangladesh <u>M. R. Islam</u> , M. E. Hoque, M. Jahiruddin, S. Islam	(73)
Effects of soil amendment with compost on cadmium uptake in rice seedlings <u>Kai-Wei Juang</u> , Wen-Jing Wu	(75)
Amylase activity in sewage sludge treated with different sources of cadmium E. F. F. Junior, W. J. Melo, E. R. Mouta, A. C. T. P. Guedes, G. M. P. Melo, V. P. Melo	(77)
Trace elements content in sewage water and industrial effluents used soils of northern India Kuldeep Singh	(79)
Effect of long-term fertilization on the bioavailability of cadmium in soil N. Latha, M. Maheswari, S. Avudainayagam	(81)
Assessment of priority metal pollutants in animal manure used for land application LI Yanxia, XIONG Xiong, LI Wei, SU Qihong, XU Lichao	(83)
Heavy metals in soils and vegetables in peri-urban of Nanjing <u>B Liu</u> , X Y Yuan, Y Chen, Z Y Shen	(85)
Trace element content and food safety of water spinach (<i>Ipomoea aquatica</i> Forssk.) cultivated with wastewater in Hanoi, Vietnam <u>H. Marcussen</u> , P. E. Holm, K. Joergensen, A. Dalsgaard	(87)
Trace element content of water spinach (<i>Ipomoea aquatica</i>), fish and sediment from the wastewater exposed wetland Boeng Cheung Ek, Phnom Penh, Cambodia <u>H. Marcussen</u> , A. Dalsgaard, P. E. Holm	(89)
Calculating and mapping soil heavy metal levels using CLS methodology <u>Romic Marija</u> , Hengl Tomislav, Romic Davor	(91)
Fate of metals in a biosolids-amended forest soil following conversion of the land for agricultural usage <u>R. G McLaren</u> , L. M. Clucas	(93)
Dehydrogenase activity in sewage sludge treated with different sources of cadmium <u>W. J. Melo</u> , E. F. F. Junior, E. R. Mouta, A. C. T. P. Guedes, L. R. Oliveira, G. M. P. Melo, V. P. Melo	(95)

Zinc and lead transformations in a polluted chernozem after applying various ameliorants <u>T. M. Minkina</u> , G. V. Motuzova, A. P. Samokhin	(97)
Concentration of selected heavy metals in soils of north central Iran Movahedirad, Z. , H. Khademi, A. H. Khoshgoftarmanesh, R. Schulin, R. Chaney	(99)
Enhanced phytoextraction of contaminated agricultural soil using different EDTA application regimes and <i>Zea mays</i> : From batch to field R. Neugschwandtner, <u>P. Tlustos</u> , M. Komarek, J. Balik, J. Szakova	(101)
Simulated effects of metal load, soil organic matter and pH on the solubility of Cd, Cu and Zn in Fluvisols and Acrisols in SE Asia <u>Nguyen Manh Khai</u> , Ingrid Öborn, Jon Petter Gustafsson	(103)
Trace element accumulation in medicinal and aromatic plants collected and cultivated in periurban area risk or remedy M. N. V. Prasad	(105)
Spatio-temporal variability and its affecting factors of soil available copper and zinc in zhangjigang city, China <u>Y. B. Qi</u> , L. X. Yan, B. Huang	(107)
Transmittance of trace elements in to the animal system through soil-water-plant continuum under peri urban environment in hyderabad city of India <u>P. Raghava Reddy</u> , G. Bhupal Raj	(109)
Distribution of total and AB-DTPA-extractable vanadium in soil profiles from Egypt and Greece S. M. Shaheen, <u>C. D. Tsadilas</u> , V. Samaras, J. Sgouras	(111)
The effect of sublethal doses of cadmium on the disposition of some trace elements and liver function in common carp (<i>Cyprinus carpio</i> L.) Shalaby, A. M. , <u>Abbass</u> , H. H. Khattab, Y. A.	(113)
Local knowledge about heavy metal contamination in periurban vegetable production systems in southeast Asia <u>Sinclair</u> , F. L. , Pagella, T. , Zhang, Q. , Zhao, Y. , Hung D. V. , Tuan, V. D. , Huang, B. Shi, X. Z. ...	(116)
Micronutrient foliar fertilization on the growth, yield and nutrient uptake of cotton and rice <u>R. Singaravel</u> , K. Radhika, D. P. Verma	(118)
Aquatic sources of heavy metal pollution and its effect on vegetation <u>M. Singh</u> , L. Singh, C. Ghosh	(120)
Spatial distribution and variability of Cd, Pb, Zn in Soils in Shenyang Zhangshi Irrigation Area (SZIA), China Lina Sun, Yaohua Zhang, Richard Collins, Tiehang Sun, Jing Guan, T. David Waite, Xinxin Li	(122)
Changes in cadmium and zinc concentrations of paddy soils and rice plant tissues (leaves, stem and grain) with distances from the road <u>S. Supaphol</u> , N. Churthong, R. Kasetsuwan, A. H. Khoshgoftar	(124)
Distribution and speciation of vanadium in the topsoil in Panzhuhua mining area <u>Y. G. Teng</u> , <u>X. D. Jiao</u> , J. Yang, R. Zuo, J. S. Wang	(126)
Antimony uptake by four crop plant species from nutrient solutions <u>M. Tschan</u> , B. Robinson, R. Schulin	(128)
Field scale spatial variability of rice grain and DTPA-micronutrients L. Wang, Y. X. Liu, H. Q. Huang, <u>J. Wu</u>	(130)

Correlation of X-ray fluorescence (XRF) spectrometry and inductively coupled plasma atomic emission spectroscopy (ICP-AES) for elemental determination in compost <u>D. C. Weindorf</u> , A. Wooten, A. McWhirt, B. Haggard, R. Sarkar, M. Dia, Q. Chang, H. Wang, L. Darilek	(132)
Differences in the solubility and food chain accumulation of cadmium applied to a range of field soils as either biosolids or as inorganic salts M. S. Whatmuff, <u>M. J. McLaughlin</u> , M. Warne, D. Heemsbergen, G. Barry, M. Bell, D. Nash, D. Pritchard	(134)
Distribution of aluminum and fluoride in subtropical hilly red soils of tea plantation and Its Influential factors W. H. Wu, Z. M. Xie, J. M. Xu	(136)
Soil heavy metal pollution in the urban-rural transitional area; a case study of Hangzhou city, China <u>Xu JM</u> , Chen T, Liu XM, Shi JC, Wu JJ	(138)
The changes of heavy metal contents in wetland soil as an effect of cultivation <u>J. S. Yang</u> , J. S. Liu, L. N. Sun	(140)
Heavy metals in soils and crops in Vietnam Bernie Zarcinas, Pham Quang Ha, <u>Mike McLaughlin</u> , Gill Cozens	(142)
Trace elements in a periurban vegetable production area near Kunming (Yunnan, PR China): soil contents and risk assessment Y. Q. ZU, G. COLINET , Y. LI, L. BOCK, C. SCHVARTZ	(145)
3. Plant-based technologies to remediate contaminated soils and sediments: processes, bioavailability, sustainability, consequences for ecosystems and human health	
Proposed by Prof. Dr. Nicholas Lepp (N. W. Lepp@livjm.ac.uk, Liverpool, UK), Dr. Michel Mench (mensch@bordeaux.inra.fr, France) and Prof. Jaco Vangronsveld (jaco.vangronsveld@uhas-selt.be, Belgium)	
Phytoremediation strategies for sustainable end-use of arsenic rich mine tailings in the Victorian goldfields, Australia Alan J M Baker, Augustine Doronila	(148)
Efficiency of some plant species on heavy metals accumulation on Meh'd Aldhahab gold mine, Saudi Arabia a. s. AL-Farraj, m. i. <u>Al-Wabel</u>	(150)
Plant communities at a wood preservative treatment site, and Cu tolerance patterns of plant species <u>M. Aulen</u> , C. Bes, M. Mench, H. Gasté, J. Taberly, J. Laporte-Cru, B. Touzard	(152)
Is Phytostabilisation a sustainable technology for metal contaminated sediment deposit <u>V. Bert</u> , L. Caron, Ch. Lors, A. Biaz, J. F. Ponge , M Dazy, J. F. Masfaraud	(155)
Rhizosphere microbial community of the nickel hyperaccumulator, <i>Alyssum serpyllifolium</i> subsp. <i>lusitanicum</i> . C. Becerra Castro, C. Monterroso, M. Garcia Lest n, A. Prieto-Fern ndez, M. J. Acea, <u>P. S. Kidd</u>	(157)
Critical concentration of cadmium in soil and toxicity symptoms in corn plants (<i>Zea mays L.</i>) K. P. V. Cunha, C. W. A. <u>Nascimento</u> , R. M. M. Pimentel, A. M. A. Accioly, A. J. Silva	(160)
Phytoremediation for heavy metal contaminated soils and combined bio-energy production W. Dejonghe, M. Geurds, R. Guisson, L. Van Ginneken, L. Diels, <u>E. Meers</u> , N. Witters, T. Thewys, J. Vangronsveld, J. Kegels, B. Defoort, E. Beeckman, J. Smis, S. De Schepper, H. Fastenaekels	(162)

- Remediation of Pb-, Zn- and Cd-contaminated soils in Austria; necessity of pot and field experiments for evaluation
W. Friesl-Hanl, J. Friedl, K. Platzer, O. Horak, M. H. Gerzabek (164)
- Intercropping of *Salix* sp. and *Thlaspi* sp. to enhance the phytoextraction on Cd and Zn contaminated soils
 Fuksová Z., Száková J., Tlustoš P., Pavlíková D. (166)
- Phytoremediation of contaminated sites in urban environment ; preliminary results of a study focussed on Lubumbashi
COLINET Gilles, SAAD Layla, CUBAKA Alfred, NGONGO Michel, MAHY G., VERBRUGGEN N., BOCK L., MEERTS P. (168)
- Rehabilitation of abandoned copper mine tailings through phytostabilization in mediterranean climate type areas of Chile
R. Ginocchio, P. León-Lobos, J. Cuevas, I. Jiménez, L. M. de la Fuente, E. Bustamante, Y. Silva, C. Verdugo, C. Santibáñez (170)
- Chelator-enhanced phytoextraction coupling with soil washing to remediate multiple-metals-contaminated soils
 Zumei GUO, Zebin WEI, Xinxian LONG, Qi-Tang Wu (172)
- Capacity of hybrid aspen (*Populus tremula x tremuloides*) to accumulate metals from contaminated soil
 V. H. Hassinen, V-M. Vallinkoski, S. K renlampi, K. Servomaa (174)
- Comparison of the effects of phosphate materials on immobilizing cadmium in soil
C. O. Hong, P. J. Kim (176)
- Feasibility of phosphate fertilizer to immobilize cadmium in a field conditions
C. O. Hong, P. J. Kim (178)
- Is the hyperaccumulating plant *Arabidopsis halleri* a good candidate for phytoextraction
S. Huguet, G. Sarret, A. Laboudigue, V. Barthès, V. Bert (180)
- Fate and bioavailability of heavy metals in biosolids during phytoextraction using the short rotation coppice trees *Salix reichardtii* and *Populus balsamifera*
T. T. Huynh, W. S. Laidlaw, B. Singh, D. Gregory, A. J. M Baker (182)
- High antioxidative capacity of *Verbascum thapsus* L. originated from metal contaminated area is induced upon treatment with Zn
Lj. Jovanovic, F. Morina, B. Kukavica, S. Veljovic-Jovanovic (184)
- Speciation and transition characteristics of cadmium released from closed mine tailings in paddy condition
W. I. Kim, G. B. Jung, J. S. Lee, J. H. Kim, J. T. Lee, J. E. Yang (186)
- A large area phytoremediation experiment to study the uptake of metals by twelve plant species growing in the contaminated site of central taiwan
 H. Y. Lai, D. Y. Lee, R. S. Chung, Z. S. Chen (188)
- Phytoextraction of trace elements from an aged biosolid stockpile by willow (*Salix*) species after one year
W. S. Laidlaw, D. Gregory, T. T. Huynh, M. Godino, A. J. M. Baker (190)
- Changes in metal fractionation in the rhizosphere of the Ni hyperaccumulator *Alyssum serpyllifolium* subsp. *lusitanicum*
 M. Garcia Lestón, P. S. Kidd, C. Becerra Castro, C. Monterroso (192)
- A newly-discovered cadmium hyperaccumulator-red leaf beet (*Beta vulgaris* L. var. *cicla* L.)
Y. S. Li, L. N. Sun (194)

Revegetation and energy crop production on heavy metal polluted sites in China; case studies M. Li, <u>J. Song</u> , D. S. Zhang, Y. M. Luo, L. Boten, J. Japenga, J. Janse	(196)
The effectiveness and characteristic of hydroxylapatite and compost amendment to Pb contaminated soils <u>C. J. Liao</u> , T. L. Chung, Y. C. Lee	(198)
Effect of phosphorus fertilizer and long-term tillage treatments on cadmium uptake, arbuscular mycorrhizal colonization and growth of sunflower <u>Aiguo Liu</u> , Shabtai Bittman, Tom Forge	(200)
Hot NTA application enhanced metal phytoextraction from contaminated soil Chunling Luo, Zhenguo Shen, <u>Xiangdong Li</u>	(202)
Identification of potential indigenous plant species for the phytoremediation of arsenic contaminated sites of Bangladesh <u>Mahmud, R.</u> , N. Inoue, R. Shaheen	(204)
Influence of rhizosphere on nickel phytoextraction by <i>Ricinus communis</i> L. (Castor) <u>M. Malarkodi</u> , R. Krishnasamy, T. Chitdeshwari	(207)
Phytoremediation of contaminated soils at a wood treatment site M. Mench, C. Bes, M. Aulen, H. Gast, J. Taberly	(209)
French bread wheat cultivars differ in grain Cd concentrations M. Mench, <u>B. Winkel</u> , D. Baize, J. M. Bodet	(211)
Impact of bioSolid compost on sequestration and bioavailability of chromium in soils <u>R. Natesan</u> , N. S. Bolan	(213)
Remediation of Cu-Ni contaminated forest soil using organic mulch and native woody plants <u>Nieminen, T. M.</u> , Derome, J. ,Kiikkilä, O. ,Salemaa, M. Uhlig, C. ,Ukonmaanaho, L. ,Helmisaari, H. S.	(215)
Pb-phytoextraction by jack beans in a Pb-EDTA-treated oxisol B. F. F. Pereira, <u>C. A. Abreu</u> , A. Paz-gonz lez	(217)
Preliminary test to evaluate metal accumulation in silene vulgaris grown in polluted soils treated previously with electrokinetic technologies <u>A. Pérez-Sanz</u> , J. Alonso, R. Alarcón, P. García Gonzalo, M. C. Lobo	(219)
Phytoremediation proposal for lead and cadmium-contaminated soils Murcia, SE Spain C. Pérez-Sirvent, M. J. Martínez-Sánchez, M. L. García-Lorenzo, J. Bech, I. García, I. Agudo, A. Banegas	(221)
Heavy metal stabilization using construction and demolition residues (CDRs): a preliminary laboratory approach C. Pérez-Sirvent, M. J. Martínez-Sánchez, M. J. Martínez- Pujante, J. López, M. L. García-Lorenzo, W. Mantilla, T. Bernal, M. L. Tudela, J. Molina.	(223)
Effect of cadmium on nutrient uptake in Brassicaceae species <u>K. M. Popa</u> , A. J. M. Baker	(225)
Effect of bacterial exudates on the mobilisation of Zn and Cd from a contaminated soil <u>M. Puschenreiter</u> , A. Sessitsch, M. Kuffner, G. Wieshammer, M. Gorfer, Strauss J, W. W. Wenzel	(227)
Inoculation of <i>Salix caprea</i> with rhizosphere bacteria enhances the phytoextraction capacity for Zn and Cd <u>M. Puschenreiter</u> , A. Sessitsch, M. Kuffner, P. Sommer, E. Netherer, M. Gorfer, J. Strauss, W. W. Wenzel	(229)

Screening of <i>Salix caprea</i> isolates for their capacity to accumulate Zn and Cd in leaves <u>M. Puschenreiter</u> , P. Sommer, G. Wieshammer, M.-T. Hauser, M. Trnka, J. Strauss, W. W. Wenzel	(231)
Effect of iron(III) reduction on Cr(VI) reduction in paddy soil D. Qu, B-L Wang, H. Mao	(233)
Enhanced lead accumulation in <i>Sesbania drummondii</i> by plant hormones <u>Shivendra V. Sahi</u> , Mohd. Israr, Kenneth S. Sajwan	(235)
Uptake of cadmium, cobalt, copper, nickel, lead and zinc by hydroponically cultivated garlic (<i>Allium sativum</i> L.), onion (<i>Allium cepa</i> L.) and leek (<i>Allium porrum</i> L.) plants Petr Soudek, Šárka Petrová, Lenka Lenikusová, Jan Kotyza, Avi Golan-Goldhirsh, Tomáš Vaněk	(237)
Bioavailability of mercury in soil and possible phytoremediation strategy <u>Y. Su</u> , F. X. Han, S. Shiyab, J. Chen, D. L. Monts, C. A. Waggoner	(239)
Application of endophytic bacteria to improve the performances of plants for phytoremediation and biomass production <u>Safiyh Taghavi</u> , Tanja Barac, Jaco Vangronsveld, <u>Daniel van der Lelie</u>	(241)
Cd and Co accumulation by barley plants and modifying effects of biologically active substances <u>L. N. Ulyanenko</u> , S. V. Kruglov, A. S. Filipas, S. P. Arysheva	(243)
Phytoremediation of metals using non-food crop plants T. Vaněk, J. Song, <u>P. Soudek</u> , Y. Luo	(245)
Phytoextraction of metal-contaminated soils: lessons from field experiments and research needs <u>Jaco Vangronsveld</u> , <u>Ann Ruttens</u> , Chiara Mastretta, Jan Colpaert, Theo Thewys, Erik Meers, <u>M. Mench</u> , <u>D. van der Lelie</u>	(246)
Hexavalent chromium removal from contaminated soil by phytoremediation with <i>Phyllanthus reticulatus</i> in Thailand <u>Sutinee Wadesirisak</u> , Pantawat Sampanpanish	(248)
Possibilities of reducing heavy metals toxicity by using organic residues A. A. Yassen,	(251)
4. Development and uses of biofortified agricultural products	
Proposed by Gary Banuelos(gbanuelos@fresno.ars.usda.gov, USDA-ARS), Emmanuel Frossard(emmanuel.frossard@ipw.agrl.ethz.ch, Swiss Federal Institute of Technology) and Zhi-Qing Lin(zhlin@siue.edu, Southern Illinois University at Edwards, USA)	
Identification of genes for biofortification: genetic and molecular analysis of mineral accumulation in <i>Arabidopsis thaliana</i> <u>M. G. M. Aarts</u> , A. Ghandilyan, J. E. van de Mortel, Sangita Talukdar, J. Wu, J. Du, H. Schat, <u>H. Q. Ling</u> , M. Koornneef	(254)
Production of unique bio-based products from vegetation management of selenium G. S. Banuelos	(256)
The impact of trace elements from plants on human nutrition: a case for biofortification <u>R Hurrell</u>	(258)

Genetical and agronomical biofortification of cereals with Zn for better nutrition I. Cakmak	(260)
Mineral concentrations of 12 Chinese medicinal herbs used as diuretic treatments for Taiwanese children C. Y. Chen, Ding-Bang Lin, Jye-Bin Lin	(262)
Phytomanagement of metal-contaminated agricultural land using crop species E. Fässler, B. Robinson, R. Schulin, S. K. Gupta	(264)
How does aerobic rice mobilize Zn from soil Xiaopeng Gao, Thomas W. Kuyper, Fusuo Zhang, Ellis Hoffland	(266)
Improving micronutrient value of rice through breeding G. B. Gregorio, T. Htut	(268)
Effect of long-term cattle manure application on triticale and corn feed quality X. Hao, C. Chang	(270)
Plant genotype and Zn fertilization effects on nutritional quality of wheat grain; Implications for human health A. H. Khoshgofarmanesh, M. H. Mirzapour, H. R. Sharifi, M. R. Schulin	(273)
Bioavailability of trace elements in plants in relation to chemical speciation; a case study with pickleweed (<i>Salicornia bigelovii</i>) Z. -Q. Lin, A. Bradley Duthie	(275)
Trace elements in dominant plant species of cut grassland following long-term applications of liquid pig and cow manures W. J. Liu, Y. G. Zhu, P. Christie, A. S. Laidlaw	(277)
Biofortification in the food chain, and use of selenium and phyto-compounds in prevention and treatment of chronic diseases G Lyons, J Stangoulis, Y Genc, F Liu, R Graham	(279)
Decreasing mineral concentrations in wheat grain over the last 160 years Steve P. McGrathFang-Jie Zhao, Ming-Sheng Fan	(281)
Production of a nanocomposite Fe fertilizer and its application in soil Ahmadi Mogaddam E. , Shafaie Sh. , Fotovat A. , Goharshadi E.	(283)
Expression of pea seed ferritin cDNA in indian mustard; nutritional value and oxidative stress tolerance of the transformants N. Nirupa, M. N. V. Prasad, P. B. Kirti	(285)
Micronutrients uptake by wheat as affected by different N-sources and irrigation regimes in a sandy soil Abdel Khalek M. Selim	(287)
QTL analysis of iron and zinc content in wheat grain Rongli Shi, Yiping Tong, Fusuo Zhang, Chunqin Zou	(289)
Trace elements uptake by soybean under rate and source phosphorous fertilizers in typic quartzipsamment soil F. N. da Silva, A. E. Furtini Neto, A. C. Chang	(291)
Biofortification in a food chain approach for rice in China MA Slingerland, Zhang FS, TJ Stomph, Gao XP, JF Liang, Wen Jiang	(293)

The effect of soil zinc application on lipid peroxidation of cell membrane, phenolic compounds and flavonoids in Pistachio (*pistacia vera* L.) under salinity stress
M. Talebi, V. Mozaffari, A. Tajabadipour, Sh. Enteshari (295)

Effects of long-term (47 years) consistent fertilization and crop rotation on feed and diet productivity and quality
T. Q. Zhang, C. F. Drury, C. S. Tan, W. D. Reynolds (297)

5. Synchrotron applications in trace element analysis

Proposed by Enzo Lombi (enzo.lombi@csiro.au, CSIRO, Australia), Kirk Scheckel (Scheckel.Kirk@epamail.epa.gov, US EPA) and Andrew Gault (andrew.gault@manchester.ac.uk, UK)

Synchrotron radiation based X-ray-fluorescence (SR-XRF) reveals tissue-specific element distribution in *Daphnia magna*
K. A. C. De Schampelaere, B. De Samber, R. Evens, G. Silversmit, T. Schoonjans, F. Vanhaecke, I. Szaloki, G. Falkenberg, D. Adriaens, L. Vincze, C. R. Janssen (302)

Identification of nickel chelators in three hyperaccumulating plants. an X-ray spectroscopic study
Vanessa Chardot, Emmanuelle Montargès-Pelletier, Guillaume Echevarria, Robert Bilsborrow, Shusaku Hayama (304)

A first approach to mercury speciation in almaden mining district by XANES techniques
J. M. Esbri, A. Bernaus, X. Gaona, C. J. Sánchez, P. Higueras, M. Valiente (309)

Spectroscopic investigations of mobility and speciation of fertilizer-derived copper, manganese, and zinc in calcareous soils
Ganga M. Hettiarachchi, Mike J. McLaughlin, Kirk G. Scheckel, David J. Chittleborough, Enzo Lombi, Mathew Newville (311)

Cadmium speciation and release kinetics in a thai paddy Soil; an *in situ* molecular-scale investigation using X-ray absorption spectroscopy
Saengdao Khaokaew, R. Tappero, Y. Jin, B. Ravel, R. L. Chaney, D. L. Sparks (313)

Natural attenuation of copper toxicity in soils and soil constituents: a synchrotron and isotopic investigation
E. Lombi, G. Hettiarachchi, K. G. Scheckel, R. E. Hamon (315)

Zn, Cr and Fe speciation in river materials
E. Montargès-Pelletier, Laurent J. Michot, Delphine Vantelon, Stéphanie Belin, Gerald Falkenberg (317)

6. New physical techniques to study trace elements in the environment

Proposed by Géraldine Sarret (gsarret@ujf-grenoble.fr, University of Grenoble and CNRS, France), Prof. Rainer Schulin (schulini@env.ethz.ch, Institute of Terrestrial Ecology, ETHZ, Switzerland), and Sascha Oswald (sascha.oswald@ufz.de, Center for Environmental Research, Leipzig, Germany)

Imaging techniques to elucidate nickel-root interactions of the hyperaccumulator plant *Berkheya coddii*
Ahmad Moradi, Hector M. Conesa, Sascha Oswald, Eberhard Lehmann, Walter Wenzel, Thomas Prohaska, Anders Kaestner, Brett Robinson, Rainer Schulin (322)

Analytical approaches to lead and cadmium speciation in plants
Danuta Baralkiewicz, M. Kozka, A. Piechalak, B. Tomaszewska (324)

Monitoring the distribution of copper, chromium and arsenic in CCA-treated timber using PIXE analysis
N. S. Bolan, S. Mahimairaja, J. Kennedy, W. J. Trompeter, A. Markwitz, B. Robinson, I. Vogeler, B. E. (326)

Distributed lead in tissues of pea roots (<i>Pisum sativum</i>) determined by LA ICP-MS A. Han, <u>Danuta Baralkiewicz</u> , B. Wagner, E. Bulska, A. Piechalak, B. Tomaszewska, Jun Yao	(328)
Cd localization and speciation in a contaminated sediment and in the Zn and Cd hyperaccumulating plant <i>Arabidopsis halleri</i> S. Huguet, V. Bert , A. Laboudigue, M. P. Isaure, G. Sarret	(330)
Accumulation of metals by particulate organic matter in soils: abiotic versus biotic processes I. Lamy, J. Sebastia, J. Labanowski, F van Oort	(332)
Zn and Cd retention by a calcareous fluvio-glacial deposit in the presence of Pb: experiments, modelling and microanalysis <u>Laurent Lassabatere</u> , Laureline Février, Lorenzo Spadini, Cécile Delolme, Caroline Raepsaet	(334)
Use of <i>in-situ</i> ATR-FTIR spectroscopy to determine rapid reaction kinetics at the mineral/water interface S. J. Parikh, B. J. Lafferty, Z. Shi, D. L. Sparks	(336)
PIXE microanalysis of biological materials in frozen-hydrated state <u>W. J. Przybyłowicz</u> , G. Tylko, J. Mesjasz-Przybyłowicz, A. Barnabas	(338)
Neutron radiography to reveal the interactions of trace elements with plant roots <u>Brett Robinson</u> , Ahmad Moradi, Héctor M. Conesa, Eberhard Lehmann, Anders Kaestner, Rainer Schulin	(340)
Tobacco excretes zinc and cadmium in metal-substituted CaCO ₃ crystals through leaf trichomes G. Sarret, M. P. Isaure, E. Harada , Y. E. Choi , N. Gcoffroy, S. Pairis , S. Fakra , M. A. Marcus , M. Birschwilks , J. Susini , S. Clemens , A. Manceau	(342)
7. Coal and coal combustion byproducts	
Proposed by K. S. Sajwan (sajwank@savstate.edu, Savannah State University, USA), Irena Twardowska (Polish Academy of Sciences, Poland) and Ashok K. Alva (USDA-ARS, USA)	
Role of fly ash and organic soil amendments on potato tuber yield and mineral contents <u>A. K. Alva</u> , K. Sajwan, S. Paramasivam	(346)
Using coal ash and other soil amendments to improve tomato growth and soil fertility N. Amann, H. Werner, J. Chen, <u>YC. Li</u>	(348)
Presence and leachability of antimony in several incinerator ashes <u>Mattias Bäckström</u>	(350)
Utilization of coal combustion products (CCPs) for environmental remediation <u>Nanthi Bolan</u> , Ravi Naidu, Hailong Wang	(352)
Mercury and other trace elements in coal in the lower mackenzie basin, Canada <u>J. Carrie</u> , A. Sweet, D. Armstrong, G. Stern, F. Wang	(354)
Trace element uptake in agricultural and wild plants grown on alkaline coal ash disposal sites in Tuzla (Bosnia and Herzegovina) <u>A. Dellantonio</u> , W. J. Fitz, H. Custovic, H. Grünewald, F. Repmann, B. U. Schneider, D. Edwards, Z. Zgorelec, M. Markovic, W. W. Wenzel	(356)
Heavy metal removal from aqueous solution using zeolite developed from MSW and coal co-combustion ash <u>Y. Fan</u> , F. S. Zhang	(358)

Coal ash in crop production system; effect on heavy metal distribution, plant accumulation, microbial activity and crop response <u>B. C. Ghosh</u> , D. Choudhuri, D. K. Swain, S. Tripathi	(360)
The ability of coal combustion products (fly ash and bottom ash) to increase vegetative yields; independent source of nutrients and/or as Carriers of P after Loading <u>B. R. Hart</u> , M. A. Powell, J. Shen, D. B. Hayden	(362)
Heavy metal distribution and mass balance at the field scale in an acid lateritic soil amended with coal ash and sewage sludge <u>U. M. Khodke</u> , S. Tripathy , R. K. Panda	(364)
Utilization of coal fly ash as a component of horticultural substrates <u>Q. Li</u> , <u>J. Chen</u> , Y. Li	(366)
Fly Ash, soil and lime mixtures as potential soil liner materials <u>S. V. Mattigod</u>	(368)
Observations on sequential leaching and predicting of the effects of placing CCBs in contact with mine spoil Paul F. Ziemkiewicz, Raymond J. Lovett	(370)
Coalbed natural gas (CBNG) produced water: geochemical processes and beneficial uses in semi-arid environments Richard E. Jackson, <u>K. J. Reddy</u>	(372)
Turfgrass growth and water use in ultisols treated by flue gas desulfurization (FGD) gypsum or traditional calcium amendments <u>M. J. Schlossberg</u> , J. Kruse, W. P. Miller	(374)
Radio ecological research of the West Macedonia Lignite Center (Greece) <u>L. I. Tsikritzis</u> , M. N. Fotakis, N. S. Tzimkas, R. L. Tsikritzi, K. X. Koios	(376)
Mode of occurrence and mobility of trace elements in fly ash and sewage sludge in view of environmentally safe reuse potential <u>I. Twardowska</u> , K. Janta-Koszuta, S. Stefaniak	(378)
Environmental risks related to groundwater contamination from coal mining waste disposal and reuse <u>I. Twardowska</u> , S. Stefaniak, K. Janta-Koszuta, J. Szczepańska	(380)
Plasmid DNA oxidative damage assay of civil coal and its combustion products in Xuanwei, China M. Y. Wu, L. Y. Shao, Y. G. Tang, X. L. Shi, S. Q. Wang, S. B. Wang, Z. H. Wang	(382)

8. Fate and transport of radionuclides in the environment

Proposed by Prof George Shaw (george.shaw@nottingham.ac.uk, University of Nottingham, UK), Dr Max Hu (hu7@llnl.gov, Lawrence Livermore National Laboratory, USA), Prof T H Chon (chon@snu.ac.kr, Seoul National University, South Korea) and Dr Vandenhove Hildegard (hvan-denh@sckcen.be, Belgium)

Isotherms and kinetics of cesium and strontium sorption by selected subtropical and tropical soils around nuclear facilities P. N. Chiang, <u>M. K. Wang</u> , P. M. Huang J. J. Wang	(386)
Prototype of a GIS-based decision support system for the former semipalatinsk test site Baranov S. A. , <u>Mukusheva M. K.</u> , Spiridonov S. I. , Zhotabaev Zh. R. , Berezin S. A. , Sadvakasov M. O	(388)
