(图1)一幅绿凤蝶 (*Pathysa antiphates*) 的水彩画, 这种蝴蝶来自婆罗洲 (Borneo), 也称作“虎纹剑尾凤蝶”。

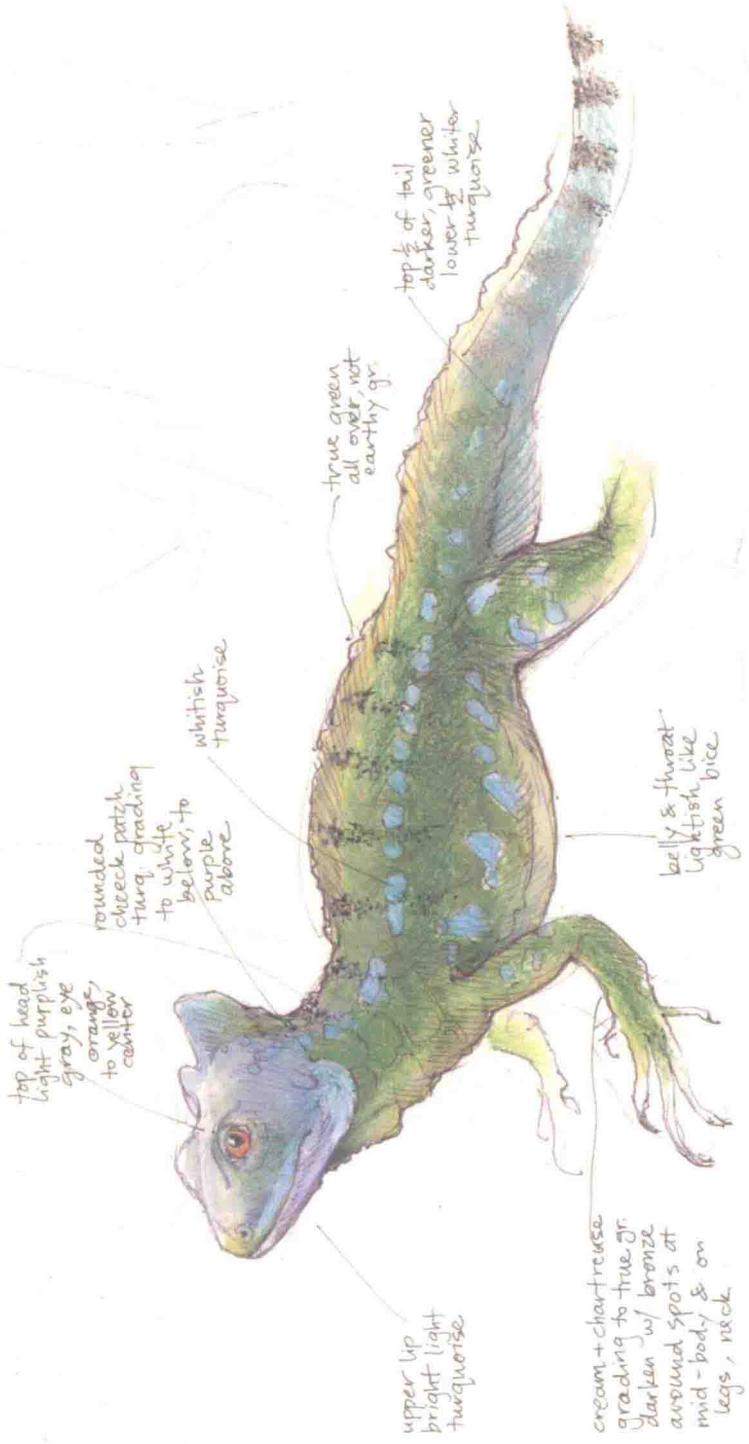

RK

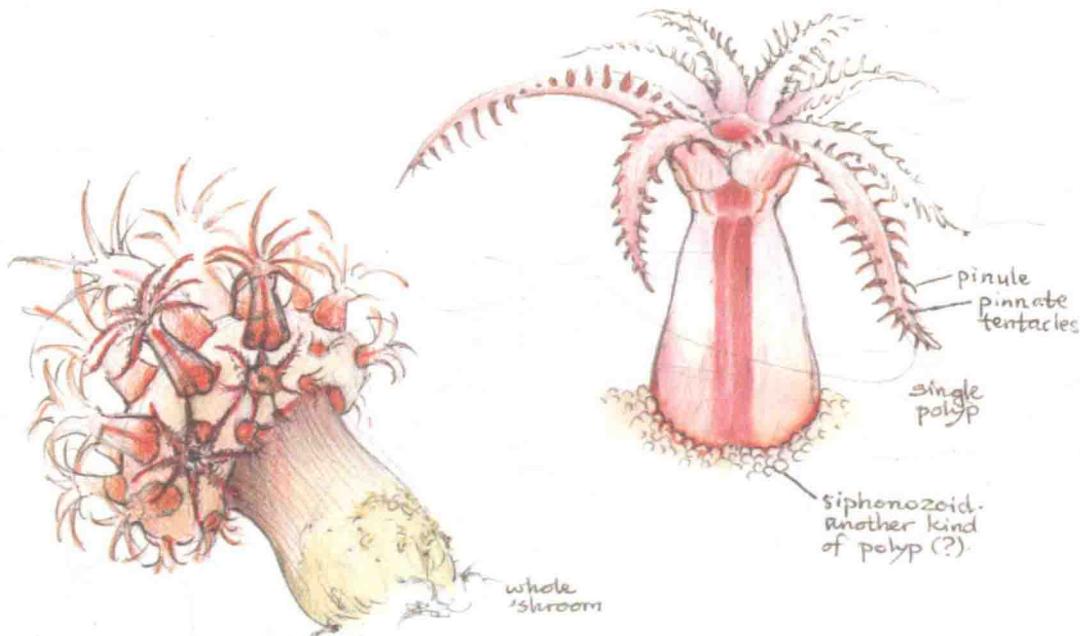

(图2)一只蓝带翠鸟的笔记和图画。

Male  
Blue-banded Kingfisher  
Widow victim 19/6/03

(图3)高品质的彩铅笔能创造出很大的色彩饱和度范围,这幅蛇怪蜥蜴画即说明了这一点。该蜥蜴画来自加州科学院(California Academy of Sciences)捕捉的标本。

Mushroom Coral  
*Anthomastus ritteri*

Lots of color variations: mushroom cap / polyps

cream	coral pink	reddish
	coral pink	white
		reddish

(图4) 蘑菇珊瑚和水螅体的特写。这种动物的颜色渐变是用红色、粉红和米黄三种彩色铅笔叠加而成的。

Spotted Jelly!

Mastigias  
papua

(图5)巴布亚箱水母 (*Mastigias papua*) 的水彩画。我经常用水彩润色在野外画的快速素描，因为小型颜料和水彩画笔比铅笔更便携，用起来更快。

deogrammus) 插图的适合颜色。它是加州海岸的常见鱼种。

### Kelp Greenling

Predominant - yellow color...

grading in deepest shades  
to this orange, in crevices.

Mark says eye-ring of  
no. A slight  
gold around  
edge only.

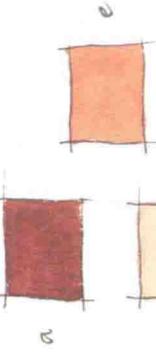

fine blue splotches  
on female.

use "robin's egg"  
but make it  
slightly greyer.  
blue splotches on  
male (though  
lighting in tank  
may have made it  
look more greenish,  
may actually match  
blue of female).

dark borders around  
blue spots, etc.

Slight purple cast to  
dark areas in some light.

### MONTEREY BAY AQUARIUM Jellies Exhibit color swatches

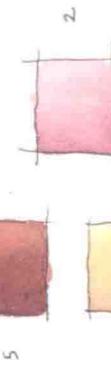

jelly bodies  
(a, b, e)

LIVE A. AURITA

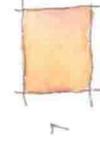

general  
color - cast  
(1 & 2).

jelly  
tentacles  
(c, d)

general  
color - cast  
(1 & 2).

internal  
organs -  
(6), edged w/  
(5) dark  
sometimes  
(4).  
or clear  
(most).

## Red Sea Fan *Swiftia*

DEEP SEA LAB  
June 2

Alternating arrangement of polyps on most branches.

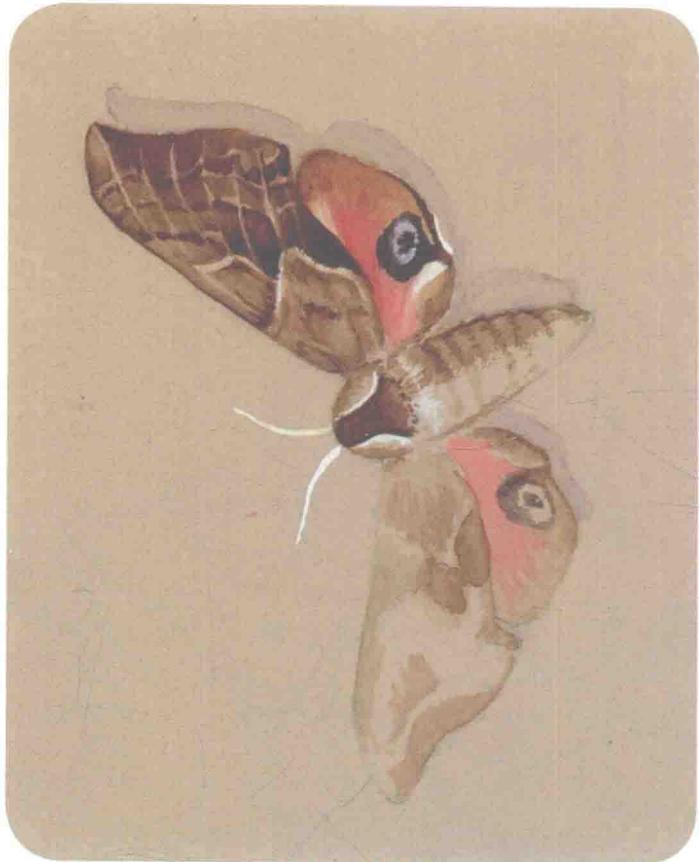

Branching pattern, like leaves on a tree maximizing surface exposure to the environment; neatly filling in all available space (in a two-dimensional plane, in this case), yet maintaining consistent averages of distance between the polyps (2-5 mm).

Your basic deep-sea vermillion, with white tendril's on the polyps.

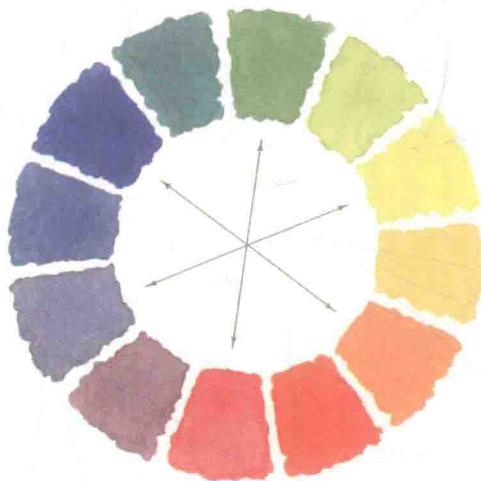

(图 8) 这幅用墨水和水彩画的红海扇珊瑚展现了如何用选择的细节来描绘复杂的生物。

Individual polyps remain a consistent size regardless of thickness of branch or position on it.  
8 tentacles per polyp.

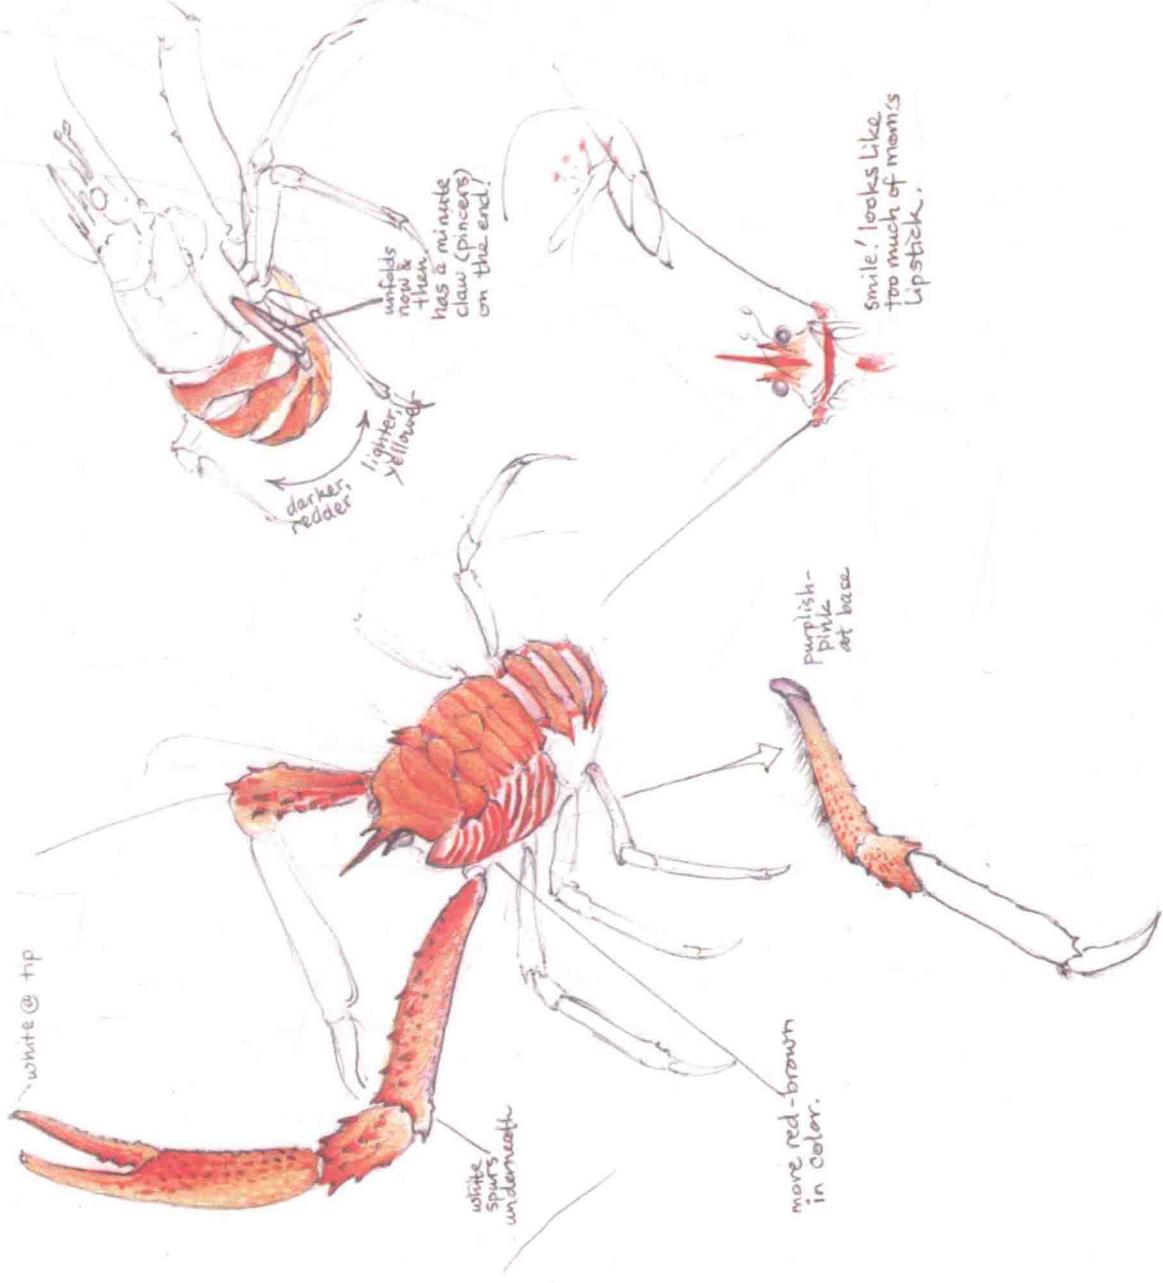

no polyps from about here down - normal?  
Reed-orange color turns a coppery green.

(图 10) 因为这只天蛾是两侧对称的，所以就不需要两边都画完。这么做可节省大量的野外时间。

(图 9) 基本色轮。箭头表明互补色对，它们可用于画阴影和微妙、自然的色调。

(图 1.1) 这幅东  
方扁虾 (squat  
lobster) 的视  
觉笔记 (水彩)  
显示出：绘画  
往往不必画完，  
包含能说明有  
用信息的部分  
即可。

## Hawthorne Thicket

- leaves saddle of first bands

Flag Rockfish  
Questions

(图 13) 旗石斑鱼 (*Sebastodes rubrivinctus*) 的笔记。这条鱼的基本素描是到野外之前临摹照片而成的。这些素描随后被用作工作“地图”，在上面记录对活鱼的观察（蓝色笔迹）。

(图 14) 克莱尔·埃默里对一棵树上熊的痕迹的观察(左侧),以及有关灰山鹑(Perdix perdix)的观察和疑问(右面)。  
承蒙克莱尔·埃默里许可而使用。

Here near the Rattlesnake Farm,  
a ditchside tree bears the scars of  
many years of bear marking —  
I wish I could see them here,  
rounded bodies scraping + clinging,  
arms swatting, backs stretching

October 26, 2004  
~11<sup>30</sup> am  
clear sky, hazy blue  
~45° F, crisp air  
N. Hills walk off  
Dickinson St.

Note the  
rusty tail

grunt-chortle-squeak!  
This flock of wide-winged,  
short-tailed birds surprised us &  
popped up out of the grasses on the  
E side of the N. hills.

Their bodies were mostly dark,  
with lighter areas in the primaries on the wing.  
dark After seeing them once, we flushed them  
light again by walking towards them.  
With the same  
chortle-grunt-squeak, they flew up the  
hill out of sight.

Perdix perdix

The Grey Partridge

Later, it seems  
we saw a flock  
of Grey Partridge  
They are common  
on the N. hills  
& Mt. Tabor  
Introduced from  
Europe - no info  
on eggs yet -

Questions remain:

What kind of birds?

Habitat needs?

Coloration?

Nesting behavior?

Egg coloration?

Meanwhile, magpies chatter in the trees below,  
wheels spin & turn by, flocks of black birds  
turn white in the light as they turn. At last,  
to sit in silence, to be without motion, and  
hear the world offer up its  
stories...
