设计15年, KFS设计在中国

从2001年至今, KFS走过了漫漫15年的路。

城市与建筑是人类共同拥有的。从2005年1月1日起KFS设计以其特有的社会责任感,首次在上海教育电视台投资创办了一档周播的建筑普及及专业访谈节目——每周六晚9点40分的《KFS对话建筑》。节目和观众相约建筑,共同参与建筑与城市的发展。

《KFS对话建筑》受到了社会各界的广泛关注和赞誉。KFS也赢得了社会的良好赞誉。KFS踏踏实实地走过了15年,坚持建筑师的社会责任心,力求对社会、对城市有所贡献,使城市和建筑不留下遗憾和瑕疵。

KFS努力将先进的设计理念与中国的区域文化结合起来,将建筑师的责任与社会的需求结合起来,创造了如"上海滩花园洋房"等一系列令人称道的好作品。同时也在努力涉足城市建筑房地产领域,例如,"90花园别墅"。

"设计15年——设计创造价值"是KFS—直秉承的宗旨。强调建筑的独创性,通过独特的规划建筑构思,为城市和社会带来更多的价值。

整整15年过去了,回首看KFS的15年的步伐,仍是那样稳健和从容,KFS力求继续走在行业的前列,要求自己不断地洞察行业形势、引领多元发展。尽管很辛苦,但也很快乐。

未来的KFS希望带给城市与建筑的理念是:社会、城市、建筑走向多元和复合,充满人性,充满活力。

傅国华 博士 总裁

2015.9

Design in 15 years, KFS Design in China

Since 2001, KFS has went through a 15-year architectural journey.

The city and architecture belongs to the people. Quality design significance was brought to the public via the K.F.Stone television series entitled "KFS. Architecture Forum", 9:40 p.m. every Saturday on the Shanghai Education Channel since 1st January 2005. International design ideologies and views of government officials in art and architecture were presented with interviews and features of design awards in architecture.

"KFS Architecture Forum" received positive feedback and interest from different sectors of society since its inception as did KFS design work. KFS has made a 15-year-long journey with the fundamental responsibility of architects to society, with contributions to both the city and it's people without compromise.

KFS has strived to unite modern design ideas with Chinese local culture, harmonizing an architect's design values with public needs, resulting in projects such as Shanghai Bund Villas and other architectural works. KFS is also working in real estate projects such as the 90 Square-Meter Villas.

"KFS Design in 15 years - Design Creates Value" is and has always been the pre-eminent principle of KFS. KFS creates uniqueness for the architecture through authentic concepts of urban planning, providing increased value for the city and society.

15 years has gone by, and through all these time, KFS maintains its design quality and its position in the architectural field, and is still expanding and upgrading itself. It demands devotion, but results in joy.

In the future, KFS has the hopes to provide diversity for the society and the city to fulfil the needs of the urban citizen.

URBAN DESIGN

城市设计

2010年上海世界博览会申博方案之一 Shanghai World Expo 2010 Bid Proposal Submission

中国,上海 Shanghai, China 业主:上海市城市规划管理局

Client: Shanghai Urban Planning Administration Bureau

设计时间 Design: 2001

KFS非常有幸成为上海市政府所邀请的七个申博征集方案之一的设计单位——唯一的一个来自北美的设计单位。

2010年上海世博会的申博方案设计灵感来源于现存的地理环境特征:依现有黄浦江支流的走势,加部分人工河道,将展会的主体内容沿着这条圆形的轴线来布置。轴线的中央是大型绿地和休闲设施。整个规划区域由于被黄浦江分隔,因此如何将人流运输到对岸也成为本次设计主要考虑的问题之一。

世博会园区由永久住宅、综合建筑、多国综合展馆、独立国家展馆、主题公园及绿地等组成。设计的概念是:设计绿色岛屿,以减少基地被黄浦江明显分隔的形态而使之成为一个整体,同时强调一个主题——围绕水体来创造一个更美的城市。

北部扇形区有其他永久性的展馆用地和一个巨大的开放区域。在人工湖半径之外,黄浦江南侧是留给主要国家作展馆的用地。圆是整个概念的主题,八个塔式建筑将分布于圆周围,成为限定圆形空间的"主柱",它们像一面虚设的墙围合了在世博会后将建造的21世纪城市中心的一个美丽的花园。作为2010年世博会主题的一部分,设计提倡对可二次利用和可循环使用的材料的开发利用。

世博会共开展180天,总参观人次预计达7000万人。为适应高峰时平均每天约70万人次的交通量,该地区的建筑容积率可达4.5左右。设计面临的挑战是:需寻找一个能在世博会结束后同样对该地区有长期积极作用的规划。世博会的后续使用中,作为整个平面耀眼之处的圆形岛,在世博会结束之后将成为一座公园被保留下来,其包括了完整的主题公园、山丘、小道和人工河。发射状的林荫大道也将被保留下来,将来建造商业、娱乐、餐馆、购物中心等设施。一部分结构将成为户外开放空间。圆形人工河之外的塔式建筑将会留作酒店或变成居住建筑。以上都体现了"城市,让生活更美好"这一世博主题。

总用地面积:

约500 ha.

The Government of Shanghai invited seven architecture firms in 2001 to participate in this limited design competition for the planning and design for the World Exposition 2010 site. KFS, as the only participant from North America was honored, and privileged to have received this prestigious invitation.

The inspiration of the planning concept was derived from the current geographic characteristics. Additional channels to the existing Huangpu River were provided. The main content of the exposition was placed in circular radiating lines. At the centre of this ring was a large public park open space. The Huangpu River divided the site into two parts. The main area of concern was the communication and integration of these two parts.

The exposition site contains permanent residential units, multifunctional buildings, national and multi-national pavilions, theme parks and green spaces. The KFS concept was the creation of a green island that reduced the division of the site by the river. This island simultaneously emphasized, the theme of a better city using water.

KFS located several permanent pavilions and a large public space at the northern part of the site. The southern part was reserved for national pavilions. Circulation was a theme applied to the site – eight "towers" are placed around the circular perimeter of the site. They formed a grid of pillars that defined the circular space of a future garden in the city of Shanghai. As part of the theme of this exposition, KFS advocated the development of re-used and re-cycled materials.

During the 180 days of exposition the projected estimate of the total visitor number would exceed 70 million bringing approximately 0.7 million visitors to the site every day. The F.A.R of the site was at least 4.5 and resulted in the many design challenges. A design solution with a permanent impact on the local development was mandatory. The site would be transformed into a major park at the conclusion of the 2010 Exposition. This included the theme park, the hills, the paths, and creeks. A radial network of boulevards was also preserved and to become the growing space for future commercial and leisure facilities. The tower buildings around the circular artificial river would be transformed into hotels or residential units. The ground level floors of the towers would continue as commercial uses. The design exemplifies the expo theme of "better city better life".

Site area:

500 ha.
