## PREFACE

I. *Wenzhou Statistical Yearbook 2005* is an annual statistics publication, which covers very comprehensive data in 2004 and some selected data series in historically important years and the most recent years at municipal level, and major data at county (city, district) level, and therefore, reflects various aspects of Wenzhou's social and economic development. It also includes main statistics of whole nation, Zhejiang Province and its municipalities in the part of appendix.

II. The book contains the following ten parts: 1. Divisions of Administrative Areas Resources and Population; 2. General Survey; 3. Society; 4. Agriculture; 5. Industry, Construction, Transportation, Post and Telecommunication; 6. Investment in Fixed Assets; 7. Domestic Trade and Foreign Economic Relations; 8. Banking and Government Finance; 9. Employment and Wages; 10. Market Prices and People's Lives. In addition, Explanatory Notes on Main Statistical Indicators are provided at the end of each part.

III. The data in this book are in accordance with Territorial Principle. Data of urban districts are totaled by districts of Lucheng, Longwan and Ouhai, and departments directly under the administration of municipality. Data of Longwan include that of Wenzhou Economic and Technological Development Zone. Data of Cangnan are included in that of Pingyang before 1980, the year when Cangnan was established as a county. Historical data of Cangnan, Lucheng, Longwan and Ouhai are collected since the year when they were established as a county or district. The whole municipal historical data in series from the founding of PRC to nowadays are collected within today's administrative area, but that of counties (cities, districts), within their original area.

IV. The data of this book are obtained from annual statistical reports by statistical department and other departments of government. The data of market prices and urban residents' lives are from urban residents' sample surveys, running by the Urban Socio-economic Survey Organization of Wenzhou, and the data of rural residents' income and expenditure, from rural residents' sample surveys, which are running by rural survey organizations of various counties. The data of industry, construction, trade, real estate development are compiled from preliminary data of the 1st National Economic Census, while the GDP is still computed by the same approach as past.

V. The data of various years are in conformity to the statistical standards prescribed by

national statistical system of the time. The meaning, scope and calculating method of indicators may have some difference in different periods, and readers should pay attention to this. The main changes in recent years are shown as following:

1. a new national economy classification standard has been carried out since 2003;
2. a new National Standard Industrial Classification (GB/T4754-2002) has been implemented since 2002 whilst a new enterprise size division standard has been implemented since 2003;
3. in industry statistics, enterprises "above designated size" refer to all state-owned enterprises and non-state-owned enterprises with an annual sales income of over 5 million yuan;
4. in trade industry statistics, criteria for "above designated size" are: to wholesale enterprises, with an annual sales income of over 20 million yuan; to retail enterprises, 5 million yuan; to catering services enterprises, 2 million yuan;
5. in investment statistics, projects "above designated size" refer to those with planning investment above 5 million yuan;
6. output value of rural households' side industry, which was included in output value of farming before, has been merged into gross output value of industry since 2002.

VI. The new fiscal policy of Export Tariff Drawback, Interest Taxation and taxation on electricity power enterprises came into force in 2004. For convenience of comparison, the indicators of total general budgetary fiscal revenue and local general budgetary fiscal revenue are computed by new scope and old scope respectively. The new scope excludes Export Tariff Drawback, Interest Taxation and taxation on electricity power enterprises, while the old scope includes them, as same as the year 2003 and before.

VII. In this book, data in value terms such as GDP and gross output value of industry are at current prices, except those with special comments. But in terms of growth rates, they are calculated at comparable prices, except the growth rate of gross output value of industry since 2002, from when it is calculated at current prices.

VIII. If there are several data different from former yearbook, those in this book should be regarded as authentic. Notations used in this yearbook are: "#", indicates the items of the total; "(blank)", indicates the data be zero or not available.
