PREFACE

The impetus to add to Bowker's in-print series a bibliography of medical books was provided by the obvious need for a complete bibliography in the medical field which now results in the publication of over 2,000 titles a year.

Our goal was to make *Bowker's Medical Books in Print 1977* as inclusive as possible of titles in medicine and allied fields available in the United States. The 1972 edition of *Bowker's Medical Books in Print* represented the first time a publisher had attempted to produce a complete list of in-print medical books.

Preparing an initial bibliography encompassing a subject with the scope and technical complexity of medicine was not without its inherent problems. The extent of subjects as well as specific titles to be included was in many instances a most difficult evaluation to make.

We are grateful to Dr. Vera Ortynsky, Head, Medical Cataloging Section, Columbia University Medical Library, for her help in resolving many of

these problems in the first edition and in helping us to distinguish between peripheral subject areas which fall within the province of medicine and those which more appropriately remain outside this field.

Our general policy was to include books in medicine, dentistry, veterinary medicine, nursing, psychiatry, psychology, and sociological aspects of health as well as scientific and technical books directly related to these fields. Some titles are included which are not scientific or technical but which might still be of interest to the professional in health sciences.

The main authority used to establish the subject headings in *Bowker's Medical Books in Print 1977* was the cards and catalogs of the Library of Congress. Among the supplementary authorities used to help define the scope of this book were the National Library of Medicine Catalogs and Subject Headings, the New York Academy of Medicine Catalog, and the Catalog of the Columbia University Medical Library.

Note the sequence of the above cited headings and subheadings. The editors of this book took as a guideline the *ALA Rules for Filing Catalog Cards* as prepared by the ALA Editorial Committee's Subcommittee on the ALA Rules for Filing Catalog Cards.

Other typical examples of the sequence used are:

AIR — POLLUTION
AIR, IONIZED
AIR MYELOGRAPHY

CHILDREN
CHILDREN — ASYLUMS
CHILDREN — DISEASES
CHILDREN — DISEASES — DIAGNOSIS
CHILDREN, APHASIC
CHILDREN, DEAF
CHILDREN, DEAF — EDUCATION
CHILDREN AND DEATH

Although a constant effort is made to maintain consistency and to avoid splitting entries on a given subject among several headings, a certain amount is inevitable. The Library of Congress updates its subject headings constantly but cannot make such updating retroactive to cards and catalogs previously issued. For example, LC is now subdividing the heading *EVOLUTION* according to the subject matter of the material processed, e.g., *HUMAN EVOLUTION*; *PLANTS — EVOLUTION*. If previously published titles which belong in more precise subdivisions did not indicate by their titles where they should have been listed, a few were left under the main heading.

ALPHABETICAL ARRANGEMENT OF ENTRIES

Each entry is filed alphabetically by word, with the following exceptions:

M', *Mc*, and *Mac* are filed as if they were spelled *Mac* and are interfiled with other names beginning with *Mac*: for example, *Macan*, *McAnally*, *Macardle*, *McAree*, *McArthur*, *Macarthur*, *Macartney*, *M'Aulay*, *Macaulay*. Within a specific name group *Mc* and *Mac* are interfiled according to the given name of the author: for example, *Macdonald*, *Agnes*; *McDonald*, *Alexander*; *MacDonald*, *Annie L.*; *McDonald*, *Austin F.*; *MacDonald*, *Betty*. Compound names are listed under the first part of the name and cross-references appear under the last part of the name.

Entries beginning with initial letters (whether authors' given names or titles) are filed first: *Smith*, *H. C.*, comes before *Smith*, *Harold A.*; *B. F. Skinner*; *The Man and His Ideas* comes before *Baal*.

Numerals, including year dates, are written out in most cases and are filed alphabetically:

Seven Years in Tibet
Seventeen
Seventeen Famous Operas
Seventeen-Fifteen to the Present
Seventeen Party Book
Seventeen Reader
Seventeenth Century

INFORMATION INCLUDED IN ENTRIES

Entries regularly include the following bibliographic information: author, co-author, editor, co-editor, translator, title, price, imprint, and year of publication. The following additional information is also included in the entry if warranted: publisher's order number in parentheses following price, edition, number of volumes, Library of Congress Number, series information, whether or not illustrated, and type of binding if the publisher indicates that the binding is other than cloth over boards. International Standard Book Numbers are also included. (Information on the International Standard Book Numbering System in the United States and other English-speaking countries is available from R. R. Bowker Co.)

GENERAL EDITORIAL POLICIES

In order to insure that the essential information in these listings is uniform, complete, and easy to find, the following editorial policies have been maintained:

If more than two authors are responsible for a certain publication, only the name of the first is given followed by *et al.*

Every effort is made by most contributing publishers to prepare their material with consideration for its accuracy throughout the life of the edition of *Bowker's Medical Books in Print*. Most publishers anticipate price changes when they revise their material, list forthcoming books even if publication dates and prices are not set, and for the most part try not to list books that may shortly become unavailable. In spite of these efforts, a number of changes in price will occur and a number of titles in this edition will become unavailable before the new edition is published. All prices are subject to change without notice.

Most prices are list prices. Lack of uniformity in the individual catalogs prohibits indicating trade discounts. A lower case "t" indicates a tentative price; "x" indicates a short discount, 20 percent or less.

Publishers' names, in most instances, are abbreviated. A key to these abbreviations with the addresses of the publishing firms whose titles are listed will be found in the list of Publishers' Abbreviations at the end of the book.

Here is an example of an entry in the list of publishers' abbreviations:

P-H

Prentice-Hall, Inc.

Englewood Cliffs, NJ 07632

(0-13)

▲ THIS IS THE PUBLISHER'S INTERNATIONAL
STANDARD BOOK NUMBER PREFIX.

Above the full name of any publisher represented in this book the name or abbreviation for that publisher is given as it is used in *Bowker's Medical Books in Print* entries.

Where a book is published by one firm and distributed by another, an effort has been made to show both firms within the bibliographic entry itself. For example, an entry for a book published by Melbourne University Press but distributed by International Scholarly Book Services, Inc., will convey this information in the form "Pub. by Melbourne U Pr" after the price with "Intl Schol Bk Serv" at the end of the entry.

The R. R. Bowker Company has used its best efforts in collecting and preparing material for inclusion in *Bowker's Medical Books in Print 1977* but does not assume, and hereby disclaims any liability to any party for any loss or damage caused by errors or omissions in *Bowker's Medical Books in Print 1977* whether such errors or omissions result from negligence, accident, or any other cause.

How to Use BOWKER'S MEDICAL BOOKS IN PRINT 1977

Bowker's Medical Books in Print 1977 was produced from records stored on magnetic tape, edited by computer programs, and set in type by computer-controlled photocomposition. This edition, which includes subject, author, and title indexes, lists over 34,400 titles available from some 1,420 publishers.

The subject index follows the headings assigned by the Library of Congress. Each title was searched in the catalogs and cards of the Library of Congress to determine the headings to be assigned. To some books LC assigned a single heading and to others it assigned two or more headings; some books therefore appear two or more times. Actually, some 34,400 titles appear about 43,000 times under 5,000 headings with 6,000 cross-references.

Headings and cross-references were updated to conform with the latest supplement to the Eighth Edition of *Library of Congress Subject Headings*.

Whenever official LC classification was unavailable, provisional headings were assigned. Among these fall all the titles now in preparation or to be published sometime in 1977. As LC headings for such books become available, the provisional headings will be verified or changed in future editions of *Bowker's Medical Books in Print*.

ALPHABETICAL ARRANGEMENT OF SUBJECT HEADINGS

Subject headings are arranged alphabetically:

ABDOMEN
ABORTION

ACIDOSIS
ACRIDINE
ADIPOSE TISSUES

Many of the main headings are broken down still further:

CANCER
CANCER — BIBLIOGRAPHY
CANCER — CHEMOTHERAPY
CANCER — DIAGNOSIS

There are also many cross-references:

ABBREVIATIONS, MEDICAL
see Medicine — Abbreviations
ABDOMEN
see also Groin; Intestines; Kidneys;
Liver; Stomach

Headings, patterned after those used in the card catalog in the Library of Congress, are explicit rather than general. Thus books on pediatric gynecology are under PEDIATRIC GYNECOLOGY, not under GYNECOLOGY.

In looking for books on psychiatry, search past the main entry to the various subheadings:

PSYCHIATRY
PSYCHIATRY — BIBLIOGRAPHY
PSYCHIATRY — COLLECTED WORKS
PSYCHIATRY — DICTIONARIES
PSYCHIATRY — HISTORY
PSYCHIATRY — RESEARCH
PSYCHIATRY, CHILD
PSYCHIATRY, FORENSIC
PSYCHIATRY, MILITARY
PSYCHIATRY, SOCIAL
PSYCHIATRY AND ART
