ACKNOWLEDGMENTS

The Twelfth International Congress of the Transplantation Society is sponsored by:

The Transplantation Society
The Transplantation Society of Australia and New Zealand

The Local Organizing Committee wishes to thank the following organizations for support:

The National Heart Foundation of Australia
The Australian Cancer Society Incorporated
The Royal Australian College of Ophthalmologists
The Council of the City of Sydney

The Local Organizing Committee wishes to thank the major sponsors, Sandoz Limited, Basle; Sandoz Incorporated, USA; and Sandoz Australia Pty. Ltd. for their generous support.

The Local Organizing Committee also wishes to thank the following Corporations for sponsorship:

Ortho Pty Ltd (USA)
Cilag Pty Ltd, Australia
WL Gore & Associates (Australia) Pty Ltd
Burroughs Wellcome Co., USA
Wellcome Research Laboratories, UK
Wellcome Australia Ltd
Upjohn Pty Ltd (USA)
Upjohn Pty Ltd, Australia
Baxter Centre for Medical Research, Pty Ltd
Johnson and Johnson Pty Ltd, Australia
Tubemakers Finance Ltd, Australia
Gambro Pty Ltd, Australia
Pfizer Pty Ltd, Australia
Sterling-Winthrop Research Institute, Division of Sterling Drug Inc., USA

TWELFTH INTERNATIONAL CONGRESS OF THE TRANSPLANTATION SOCIETY

August 14-19, 1988
Sydney, Australia

PATRON: His Excellency The Right Honourable
Sir Ninian Stephen, A.K., G.C.M.G., G.V.C.O., K.B.E.
Governor-General of the Commonwealth of Australia

OFFICERS OF THE TRANSPLANTATION SOCIETY

President: Anthony P. Monaco

President-Elect: J. Richard Batchelor

Vice-Presidents: Israel Penn
Erik Thorsby

Secretaries: (Western) Mary L. Wood
(Eastern) Richard F.M. Wood

Treasurers: (Western) Felix T. Rapaport
(Eastern) Alan Ting

Councillors

Robert Corry	Robert A. Sells
Ronald Guttmann	Calvin Stiller
Mark Hardy	Rainer Storb
Erna Moller	Samuel Strober
Gerhard Opelz	Nicholas L. Tilney
Oscar Salvatierra	Frank J. Veith

Immediate Past President: Peter J. Morris

Past Presidents

Bernard Amos	Sir Michael Woodruff
Sir Peter Medawar	Rubert E. Billingham
John M. Converse	Leslie Brent
Jean Hamburger	Felix T. Rapaport
Paul S. Russell	Hans Balner
Paul I. Terasaki	

LOCAL ORGANIZING COMMITTEE

Chairman: A.G. Ross Sheil

Secretary: John F. Thompson

Members

Richard Allen	Graham Kelley
Kerry Atkinson	John Mahony
James Biggs	Graeme Stewart
Robert Burton	John Stewart
Victor Chang	Bernard E. Tuch
Jeremy Chapman	Kevin Wickham

Bruce Hall (Secretary/Treasurer until July 1987)

General Committee

Tony d'Apice	Priscilla Kincaid-Smith
Robert Atkins	Ian McKenzie
Frank Christiansen	Tom Mandel
Gordon Clunie	Vernon Marshall
Ian Hardie	Tim Mathew
Tony House	Sir Gustav Nossal

David Scott

INTERNATIONAL ABSTRACT SELECTION COMMITTEES

Category A—Immunobiology

F.H. Bach, <i>United States</i>	F. Milgrom, <i>United States</i>
J.R. Batchelor, <i>United Kingdom</i>	B.J. Roser, <i>United Kingdom</i>
L. Brent, <i>United Kingdom</i>	P.S. Russell, <i>United States</i>

WELCOME FROM THE PRESIDENT OF THE TRANSPLANTATION SOCIETY

It gives me great pleasure to welcome you on behalf of the Council of the Transplantation Society to the Twelfth International Congress of the Transplantation Society. This is the first time the Western Hemisphere Congress has been held outside the United States, and we are all especially pleased that the exciting and vital city of Sydney has been selected as the venue for this Congress.

Over the past several years the growth in knowledge of transplantation immunobiology and the clinical application of organ transplantation has been exponential. This expansion in knowledge and activity makes this Congress especially important to define, identify, and clarify areas of progress, as well as problems toward which we should focus our attention. To this end, Professor A.G. Ross Sheil and his Local Organizing Committee have prepared an extraordinary program that covers the latest advances and current status of all aspects of transplantation and related immunobiology. Equal emphasis has been placed on basic science advances and the latest clinical application of organ transplantation. Material from over 1600 submitted abstracts has been used as the basis for this extraordinary program.

An additional feature of the Twelfth International Congress is that it is being held in Sydney during Australia's 200th birthday anniversary. This is a unique time to visit this special country and to enjoy the warm and gracious hospitality of the Australian government and the Australian people.

Anthony P. Monaco, M.D.
President, The Transplantation Society.

WELCOME FROM THE LOCAL ORGANIZING COMMITTEE

The Local Organizing Committee welcomes you warmly to Sydney. This is the first occasion that the Biennial Congress has been held in Australia or in the Southern Hemisphere. We are a little sad that the traditional Congress month of August is one of the Southern Hemisphere winter months. We would much have preferred you to enjoy our country in the Spring, Summer or Autumn.

Our attempt to move the Congress into the Australian Springtime in September was ill-fated. The dates originally (in 1984) chosen for the Congress were in September 1988 and it eventuated that they coincided with the 1988 Jewish High Holy Days. This became known to us in 1986 and it was necessary to revert to the August dates, as, by the time the error had been discovered and because of heavy bookings resulting from the Australian Bicentennial celebrations, the only available dates remaining in 1988 were in August.

For a time, the change of Congress dates from September seemed beneficial in an unexpected way. We learned that an exciting new Convention Center was to be built in the Darling Harbour area of Sydney. The completion date was to be in January 1988, and the Center would be opened as part of the Australian Bicentenary Celebrations. With delight we booked in here for the International Congress in August. However, this was not to be. We monitored the building process closely but it became progressively more obvious that the opening date for the new Convention Center would not be met and that the possible opening was moving closer and closer to our Congress dates. Finally, by the end of 1987, we determined that the Congress would have to be held in our backup facilities which are at the Convention Area of Centrepont and the State Theatre. Even so, Registrants at the Twelfth International Congress will experience the new Darling Harbour complex as two of the important Congress functions are to take place there. We shall do our utmost to see that registrants do not become confused between the two areas. Please note that the Twelfth International Congress is NOT sited in Darling Harbour. It is sited at the Convention Area of Centrepont and the State Theatre in Sydney City.

The prime objective of your Local Organizing Committee was to plan a Congress of the highest scientific standard. To this end, we have invited 80 leading authorities in all the disciplines related to transplantation biology and clinical practice to address the Congress in Plenary and Symposium Sessions. We have done our best to eliminate duplication or unnecessary overlap of presentations. The Plenary Sessions for the first four days review the advancing frontiers of transplantation biology. The Plenary Sessions on the closing day of the Congress present the "State of the Art" of clinical transplantation. The speakers in these Sessions have been given the difficult job of including an assessment of presentations at Congress. We are indebted to Professor Sir Gustav Nossal for agreeing to address the registrants in the closing Plenary Session. On all mornings of the Congress, the Symposium sessions highlight the topics of greatest general interest in each of the various sections.

The Committee also has cautiously taken the step of providing parallel sessions each day in the various sections within transplantation immunology and practice. We believe that by providing sessions for each of the research or clinical sections on each day, the Congress will continue to be the major forum for presentation for all the sections. That is, we have endeavored to provide daily involvement for clinicians and scientists primarily committed in the areas of immunobiology, tissue matching, immunosuppression and of the organs kidney, liver, heart, heart/lung and lung, pancreas, pancreatic islets and bone marrow. We have included areas of evolving transplantation and transplantation within the central nervous system and of peripheral nerves. We have done this in the full recognition that there will be many clashes of interests for the registrants. We can do nothing but apologize for this but remain optimistic that all registrants will be fully occupied each day with sessions of prime interest for each individual.

There were a record 1597 abstracts submitted for consideration. These were judged by the International Abstract Selection Committee. In all, 1427 (89%) abstracts were selected, 467 for oral presentation and 970 for Poster presentation. However, it must be realized that the abstracts selected for oral presentation were not always selected according to the overall rating of the International Abstract Selection Committee; some of the abstracts selected for presentation in less commonly grafted organs rated less well than did many abstracts submitted in the areas of commonly transplanted organs. Even so, the Committee decided that selection to fill out all the sessions was preferable to the provision of multiple concurrent sessions involving the most common organs and resulting in impossible clashes. That is, we felt that registrants could only physically be in one place at one time.

The net result is that the Posters are the major form of communication at this Congress. We have provided generous times for poster viewing. Each poster will be mounted for at least two full days of the Congress.

There was another important aspect to our planning. From the inception, we aimed to ensure a large registration and to meet what we believe is one of the prime functions of the Biennial International Congresses, to promote social interaction between the registrants. We recognized that the International Congresses provide rare opportunities for many Society members, particularly younger members and those from developing countries, to meet with each other and with the other Society

members including leaders in the various fields. We also knew that the cost of the social functions has sometimes meant that many registrants have not attended these events. For these reasons we pursued an active publicity campaign, kept the Congress registration fees as low as possible, and included as many social events as could be managed within the registration fees.

Other decisions of the Local Organizing Committee relate to the Pre-Congress Educational Course and the Post-Congress Workshop on Organ Preservation and Immunosuppression. The bringing together of world authorities in all the different areas seemed too good a chance to miss for an educational course. The Pre-Congress Educational Course on all aspects of tissue and organ transplantation is exciting and has been well subscribed. The presentations will be published. The Local Organizing Committee thanks the world leaders presenting at this Course, all of whom are doing this in an honorary capacity. We also planned the Post-Congress Workshops to be in North Queensland so that those registrants involved in the disciplines of immunosuppression and organ preservation (that is, the great majority of registrants) would, at the same time as consolidating and advancing knowledge in these areas, have the opportunity to visit and see the wonders of the Australian Great Barrier Reef and of our tropical rainforests.

So now the work is done. The Local and General Organizing Committees thank wholeheartedly the members of the International Abstract Selection Committee for their prompt assessment of the abstracts; also, Mr Charles Page of the Computer Department at St Mary's Hospital in London for analysis of the marks. We are grateful to the Societies, Foundations and Corporations for their support of the International Congress and in particular the Sandoz Company in Switzerland, the United States of America and Australia who were our major sponsors. We also pay tribute to the help and interest afforded by the President of the Society, A.P. Monaco, the Secretaries M.L. Wood and R.F.M. Wood, the Treasurers F.T. Rapaport and A. Ting and, through them, the Councillors.

As far as we can judge the scientific aspects of the Congress will be of the highest standard. Just as this will be determined by the registrants, so will the enjoyment of the social functions. We have set the scene and now hand over to you, the registrants, to ensure that the Twelfth International Congress is memorable.

AGR Shell

On behalf of The Local and General Organizing Committees.

Immunopathology

In Vivo Microscopy of Recirculation and Allograft Rejection in the Rabbit Ear-Chamber	<i>Jonas Wadström and Bengt Gerdin</i>	67
---	--	----

Lymphokines

Assessment of Production of Tumor Necrosis Factor α Under the Influence of Immunosuppressive Drugs <i>E. Dupont, L. Schandene, C. Denys, A. Crusiaux, and J. Wybran</i>		70
Lymphokine Transcription in Vascularized Mouse Heart Grafts: Effects of "Tolerance" Induction	<i>R.P. Lowry, K. Wang, B. Vernooij, and D. Harcus</i>	72
Recombinant Interleukin-4 and Partially Purified Low-Molecular-Weight B-Cell Growth Factor Stimulate Normal Resting Human T-Lymphocytes	<i>O. Martinez, R. Gibbons, M. Marra, and M.R. Garovoy</i>	74
Differential Cytokine Production by Natural Killer Cells and T-Cells of the $\alpha\beta$ and the $\gamma\delta$ T-Cell Receptor Classes <i>H.S. Warren, A. Bezos, V. McPhun, R.G. Pembrey, W.E. Pullman, S. Elsbury, L. Preston, and A.J. Hapel</i>		77
Time-Dependent Regulation of MHC Class II Antigens on Capillary Endothelium by TNF	<i>J.F.M. Leeuwenberg, G.M.A.A. Jeunhomme, C.J. Van der Linden, and W.A. Buurman</i>	78
Interleukin-2 Reconstitutes Natural Killer Activity in Transplant Recipients	<i>F. Citterio, R. Cauda, U. Pozzetto, M. Tumbarello, F. Serino, L. Ortona, and M. Castagneto</i>	80
Immune Signals Involved in Cyclosporine and Methylprednisolone Inhibition of A23187 Ionophore Induced Proliferation	<i>L. Schandene, C. Denys, J. Wybran, and E. Dupont</i>	82
Fc-Receptors Regulate Secretion of Tumor Necrosis Factor by Human Monocytes	<i>I.M.H. Debets, C.J. Van der Linden, I.E.M. Dieteren, J.F.M. Leeuwenberg, and W.A. Buurman</i>	84
Vincristine Selectively Inhibits Expression of Interleukin-2 Messenger RNA in Mitogen Activated Mononuclear Blood Cells	<i>B. Zanker, G. Walz, K.J. Wieder, M. Moscovitch-Lopatin, B.R. Smith, and T.B. Strom</i>	85
Role of Recombinant Interleukin-2 (rIL-2) and Large Granular Lymphocytes (LGLs) in Acute Rat Graft-Versus-Host Disease (GVHD)	<i>John Clancy, Jr., Joanna Goral, Elizabeth J. Kovacs, and Thomas Ellis</i>	88
Incubation of T-Cell or Monocytic Cell Lines with 1, 25-Dihydroxyvitamin D ₃ Before Mitogen Potentiates IL-2 and IL-1 Beta mRNA Levels	<i>J.L. Prehn and S.C. Jordan</i>	90
Human Neutrophil Function and Immunoregulatory Serum Factors	<i>E.E. Etheredge, G.D. Frentz, B. Bedi, S. Hebbard, K.K. Koontz, K. Sullivan, and D. Thake</i>	92
A Human-Mouse T-Cell Hybridoma-Derived Lymphokine Inhibits Thymidine Uptake of T-Lymphocytes <i>R. Laus and W. Muller-Ruchholtz</i>		96
Differential Effects of Azathioprine (AZA), Cyclosporine A (CSA), and Dexamethasone (DEXA) on Lymphokine Mediated Inflammation (LMI) in Rejecting Allografts	<i>J. Mellert, U.T. Hopt, F. Erath, and H. Holzer</i>	98
Receptor-Mediated Endocytosis of IL-2 by PHA Stimulated Lymphocytes	<i>Tee-Ping Lee and Basab K. Mookerjee</i>	100

Cell-Surface Molecules

Association of CD7 and CD3 Molecules on the T Cell Surface	<i>Mauro S. Sandrin, Hilary A. Vaughan, and Ian F.C. McKenzie</i>	103
A Common Trigger Molecule (TrgS) for Secretion of Lytic Factor is Expressed on Cells that Participate in non-MHC Restricted Cellular Cytotoxicity	<i>Joan Stein-Streilein and Judy Guffee</i>	105
Cross-Reactive Idiotypes in Human Alloreactive Antibodies?	<i>H. Hebart, B. Greger, U.T. Hopt, and W. Lauchart</i>	108
Epithelial Cell Cultures and Determination of Surface Antigens (Class II Antigens in Mice)	<i>J. Fischer, G. Kirste, and H. Wilms</i>	110

(Continued on following page)

CONTENTS

(continued)

Phenotypic Analysis of CD3+ α/β TCR-Cells in Allograft Recipients and in Normal Lymphoid Tissue <i>R. Schwinzer, H.J. Schlitt, K. Wonigeit, and R. Pichlmayr</i>	111
Induction of Ia Antigen Expression on Endothelium of Rat Vein Allografts: Studies by Immunogold Labeling <i>Michael L. Marin, Mark A. Hardy, Ronald E. Gordon, Keith Reemtsma, and Alan I. Benvenisty</i>	113
Monoclonal Antibodies Recognizing Shared Molecules on Endothelial Cells and Leukocytes <i>P.J. O'Connell and A.J.F. d'Apice</i>	115
Anti-Leu2a (Anti-CD8) Monoclonal Antibody Therapy: Antibody-mediated Cell Clearance in Vivo Requires Fc-FcRII Interaction <i>S-L. Wee, J.M. Phelan, F.I. Pfeffer, R.B. Colvin, and A.B. Cosimi</i>	117
Human Monoclonal Antibodies to B Lymphocyte Cell Surface Antigens: A Study of the Primary Alloantibody Response <i>D.A. Power and A.J.F. d'Apice</i>	119
Expression of Immune Cell Surface Markers in Vivo and Immune Competence in Mice by Dietary Nucleotides <i>A. Kulkarni, W. Fanslow, H. Higley, R. Pizzini, F. Rudolph, and C. Van Buren</i>	121
The Effect of Steroids on the Production of Non-IFN- γ MHC Class II Inducing Mediators <i>T.J.M. Ruers, E.E.M. Spronken, and W.A. Buurman</i>	125
Mechanisms of Immunobiological Reactions	
Generation of Effector T-Cells Expressing Chimeric T-Cell Receptor with Antibody Type-Specificity <i>G. Gross, G. Gorochov, T. Waks, and Z. Eshhar</i>	127
Antigen Specific Effector Mechanisms in Skin Allograft Rejection <i>Amy Rosenberg, Brian Weatherly, Pamela Rose, and Alfred Singer</i>	131
Cross-Linking of Lyt-2 (CD8) to the T-Cell Antigen Receptor Optimally Activates T Lymphocytes <i>Neil W. Boyce and Klaus Eichmann</i>	133
Survival of Cytotoxic T-Cell Clones (Tc) In Vivo and Their Ability to Effect Skin Allograft Rejection in T-Cell Depleted Mice <i>Eric S. Berens, Mark W. Shelton, Linda A. Walp, Joseph T. Basler, and Douglas W. Hanto</i>	138
Studies of the Human and Rat Macrophage Receptor for Interleukin-2 (IL-2R): Induction and Demonstration that IL-2 Boosts Interleukin-1 Production by IL-2R+ Macrophages <i>M.E. Pleau and W.W. Hancock</i>	140
Endogenous Peptides Contribute to the Ligand Recognized by Anti-DR1 Human Alloreactive T-Cells <i>G. Lombardi, S. Sidhu, J.R. Lamb, J.R. Batchelor, and R.I. Lechler</i>	142
Gamma-Interferon Induced Endothelial Cell Effects are Regulated by Eicosanoids <i>Dariusz Leszczynski and Pekka Häyry</i>	145
Different Modes of T-Cell Activation by Monoclonal Antibodies to the α/β T-Cell Receptor and the CD3 Complex <i>H.J. Schlitt, R. Schwinzer, and K. Wonigeit</i>	147
The Relative Importance of Local Versus Systemic Immune Response in Allograft Rejection <i>T.J.M. Ruers, W.A. Buurman, and C.J. Van der Linden</i>	149
Indirect Presentation of Alloantigen In Vivo <i>A. Mirisklavos, R.M. Sutherland, and W. Boyle</i>	151
IgG-Anti-Immunoglobulin Induced by Immunization with Antibody-Coated Blood Cells: Mechanism for B-Cell Suppression? <i>P. Terness, C. Süsal, and G. Opelz</i>	153
Effector Mechanism of H-Y and Non-H-2 Incompatible Skin Graft Rejection in Mice <i>T. Ichikawa, M. Kawai, A. Uenaka, H. Yamamoto, M. Gotoh, M. Mondon, T. Mori, H. Shiku, and E. Nakayama</i>	156
Effect of HLA Class II Antigen on in Vitro and in Vivo Cellular Responses <i>N. Matsuno, N. Sano, T. Nakatsuji, A. Ando, H. Inoko, and K. Tsuji</i>	158
Differential Modulation of Macrophage Function by Allosensitized Helper and Cytotoxic T-Lymphocyte Clones <i>M.L. Jordan, A. Carlson, R. Hoffman, D. Vidgen, and R.L. Simmons</i>	160
