PALGRAVE MACMILLAN

Palgrave Macmillan in the UK is an imprint of Macmillan Publishers limited, registered in England, company number 785998, of Houndmills, Basingstoke, Hampshire RG21 6XS.

Palgrave Macmillan in the US is a division of St Martin's Press LLC, 175 Fifth Avenue, New York, NY 10010.

Palgrave Macmillan is the global academic imprint of the above companies and has companies and representatives throughout the world.

Palgrave® and Macmillan® are registered trademarks in the United States, the United Kingdom, Europe and other countries

ISBN: 978–1–137–34130–3 (hardback)

This book is printed on paper suitable for recycling and made from fully managed and sustained forest sources. Logging, pulping and manufacturing processes are expected to conform to the environmental regulations of the country of origin.

A catalogue record for this book is available from the British Library.

A catalog record for this book is available from the Library of Congress.

# Acknowledgments

This book would have not been possible without the help, support and inspiration of many colleagues and friends. First and foremost, I am deeply grateful to my *Doktorvater* Jan W. van Deth, for his encouragement, advice, guidance and care during my PhD and beyond. He has been an excellent supervisor who has selflessly supported and helped me since our first meeting in Mannheim in 2006. Throughout these years, he has provided me with all the resources and encouragement necessary to carry out my work. He has constantly provided feedback on my research and has taught me how to be a competent and professional scholar. I will always be grateful for his invaluable support, for inspiring and impressing me with his insightful comments in every one of our numerous meetings, for his open-door policy and his endless good advice, for his generosity and respect, for his patience, and for making me believe in my qualities as a researcher. Personally and professionally, he has set an outstanding role model.

I would like to thank the other members of my dissertation committee, who have been wonderful readers and discussants. My co-supervisor, José Ramón Montero, has supported my academic career in recent years and has always been my example of high-quality research in the Spanish academy. I am particularly grateful because his encouragement and help has made two important academic – and vital – transitions (from Madrid to Mannheim, and then back) very easy. My gratitude also goes to Thomas Gschwend, who has provided indispensable advice on methodological questions and who I consider, to a large extent, to be responsible for the intellectually stimulating atmosphere I enjoyed at the grad school. I am also grateful to Irene Martín, who is responsible for my first visit to Mannheim, and with whom I started working and discussing young people's political participation. Our work together constitutes the starting point of this book; thus I have greatly benefited from her input. I am also grateful to Marta Fraile for her constant support and help. Both Marta and Irene generously provided me with academic advice when the path I should follow was not clear. Since then, they have continued to be great friends and colleagues. I am also indebted to Ángel Rivero for inspiring me to start an academic career. He believed in my ability to pursue a doctoral dissertation, helped me get

my first postgraduate scholarship and generously supported me when I decided to follow a new research agenda.

When writing this book, I had the privilege of benefiting from the excellent and stimulating research environment at the University of Mannheim. The exchanges with colleagues from the Chair of Political Science and International Comparative Social Research, the Graduate School of Economic and Social Sciences, the Mannheim Center of European Social Research and the School of Social Sciences provided me with important insights and inspiration for my work. This book would not have been the same without the excellent feedback and encouragement from my friends and colleagues, who repeatedly commented on my work and who made my time in Mannheim an intellectually stimulating and enjoyable experience. In particular, I would like to thank Christian Schnaudt, Benjamin von dem Berge, Lisa Dellmuth, Lisa Wessa, Patrick Krenz, Katarzyna Lasinska, Markus Tausendpfund, Meike Vollmar, Ellen Quintelier and Benjaming Engst for their valuable comments in our team meetings. I would also like to thank Tanja Dannwolf, Heike Klüver, Oshrat Hochman, Christian Arnold, Thomas Meyer, Sebastian Köhler, Volker Ludwig, Michael Ortiz and Bettina Trüb for their feedback in the CDSS Colloquium. The last-minute comments, proofreading, motivation, friendship and unconditional love of Simone Abendschön, Hanna Bäck, Tanja Dannwolf, Oshrat Hochman and Sascha Huber were indispensable to my finishing and submitting for examination the first version of this manuscript. I was very lucky to share an office with friends like Heike Klüver and Patrick Krenz, who make everyday life and academic work interesting and fun. For crucial help with many administrative and other issues, and, above all, for their kindness, I want to thank Gertraud Kufner-Müller, Marion Lehnert and my 'mum' in Mannheim, Josiane Hess. All of the above, together with the many friends and colleagues whose company I had the opportunity to enjoy during the last few years (Frederik, Hagai, Böni, Gesine, Stefan, Thomas, Doreen, Nathalie, Susi, Simona, little Emi, Ellen, Michael, Thorsten, Julia, Marcus, Markus, Bartosz, Henning, Iris, Matthias, Berthold, Sonja, Mariona, Mona, Lars, Felix, Anne, Dirk, Choni, Steven, Lara and last, but very important, the delivery guy) made Mannheim an incredibly sunny and fun place to work and live in. Despite the distance, my colleagues and friends Mariam, Mikel, Laia, Santiago, Mónica, Bernat, Sonja and Belén were also present and offered great motivation and help.

In addition, I have benefited enormously from the Graduate School of Economic and Social Sciences and the Excellence Initiative of the

German Science Foundation, which provided an exceptional academic environment, generous financial support and an excellent infrastructure for the completion of my thesis. I also want to thank Bernhard Ebbinghaus and Thomas Bräuninger for their fantastic work as CDSS Academic Directors. Part of this manuscript was written while working as a lecturer at the Chair of Political Science and International Comparative Social Research, where Jan van Deth made sure I had the necessary time and resources available to finish this project. I am also grateful for earlier financial support provided by the Ministry of Science and Education in Spain in the form of a PhD scholarship. I have reviewed this manuscript as a Juan de la Cierva Postdoctoral Fellow funded by the Spanish Ministry of Economy and Competitiveness at the Department of Political Science and International Relations of the University Autónoma of Madrid. My colleagues at the department and a research visit at the Juan March Institute have greatly facilitated the completion of this book. There are two institutions I want to especially acknowledge here: the Lorenz-von-Stein-Gesellschaft (at the University of Mannheim) and the Center for Constitutional and Political Studies (from the Spanish Ministry of Presidency) who awarded this research with the Lorenz von Stein and Juan Linz prizes, respectively. I am grateful to the members of both committees for their recognition, and also for the extra motivation these awards gave me while I was preparing this book for publication.

This book has also benefited from the audiences in several workshops, conferences and academic meetings. I would particularly like to thank the anonymous reviewers for their insightful comments and the editorial team at Palgrave Macmillan for their help and patience throughout the publication process.

Finally, I am eternally grateful for the loving support of my family. My siblings (and closest friends) Marta and Pablo are always – and have always been – there for me, regardless of the geographical distance between us. The same is true for David, who has, more than anyone, suffered the consequences of my academic decisions and yet proven to be my constant and greatest support. *Nunca habría escrito este libro si no fuera porque mis padres, María Jesús y Pedro, se empeñaron en que yo tuviera todas las oportunidades que ellos no pudieron disfrutar, a ellos se lo debo todo y les dedico este libro.*

*The doctoral dissertation research on which this book is based has been awarded the ‘Lorenz von Stein’ and the ‘Juan J. Linz’ prizes*

<i>List of Tables</i>	xv
<i>Acknowledgments</i>	xix
<i>List of Abbreviations</i>	xxii
<b>1 Introduction</b>	<b>1</b>
1.1 Young people's political participation in Europe at the beginning of the 21st century – Research questions	3
1.2 Plan of the book	10
<b>2 Exploration and Development of Equivalent Measures of Political Participation in Europe</b>	<b>13</b>
2.1 Changes in political participation in Europe: the need for updated equivalent measures of political participation	14
2.1.1 Changes in political participation in recent decades	14
2.1.2 The need for equivalent instruments	16
2.1.3 An exploratory approach to the dimensionality of political participation	17
2.2 New instruments: the development of political participation scales	20
2.2.1 Analysis of secondary data	20
2.2.2 Examining the structure and dimensionality of the latent concept of political participation using Mokken Scale Analysis	23
2.2.3 The search for identical measures of the latent concept political participation in Europe	25
2.2.4 The search for equivalent measures of the latent concept of political participation across European countries	27
2.3 Institutional and non-institutional political participation in Europe	34
2.3.1 Political participation across countries	35

2.3.2	A note on the multidimensionality of political participation over time	38
2.4	Political participation across age	39
2.5	Conclusion	46
3	<b>Political Participation and Age: Building an Exploratory Model of Political Participation Based on Life Cycle, Cohort and Period Effects</b>	48
3.1	Age and social change: life cycle, cohort and period explanations	50
3.2	An explanatory model of changes in political participation based on age	57
3.2.1	Civic voluntarism model	58
3.2.2	Modernization theories	60
3.2.3	On mobilization agencies	61
3.2.4	Cognitive engagement theory	64
3.2.5	Social capital theory	66
3.2.6	General incentives theory	69
3.2.7	Institutional accounts	70
3.3	Summary of expectations	72
4	<b>What Does 'Being Young' Mean? Young People's Political Participation in Europe</b>	76
4.1	Methodological aspects in the study of life cycle, cohort, generational and period effects	77
4.2	What does 'being young' mean?	80
4.2.1	Youth as a life stage at the beginning of the 21st century	82
4.2.2	Evolution of youth as a life stage	85
4.3	Young Europeans' political participation	86
4.4	Conclusion	97
5	<b>Generational Change? Political Generations and Cohorts in Europe</b>	99
5.1	Political generations in Europe	101
5.2	Young Europeans: a differentiated political cohort?	108
5.2.1	A cohort of sophisticated critical citizens? Or alienated from the political system?	111
5.2.2	A cohort lacking mobilization networks?	132
5.2.3	An individualistic cohort?	137
5.2.4	A cohort of European citizens with common characteristics?	144

5.3	Cohort characteristics and political participation: an explanatory model	148
5.3.1	Effect of individual characteristics on political participation in 1974 and 2002	149
5.3.2	Effect of new cohort's characteristics on political participation	158
5.4	Conclusion	162
6	<b>Too Young to Participate? The Effect of the Transition to Adulthood on Political Participation</b>	165
6.1	Why does political participation change across the life cycle?	167
6.2	Changes in political participation as young people complete the transition to adulthood	170
6.3	Transition to adulthood and institutional participation: differentiated effects across countries, age, gender and time	181
6.3.1	The effect of specific events on institutional and non-institutional political participation	181
6.3.2	An exploration of short-term effects	187
6.3.3	The influence of the transition to adulthood on women's and men's institutional political participation	193
6.3.4	The influence of the transition to adulthood on institutional political participation across countries: different patterns	205
6.4	Conclusion	208
7	<b>Conclusions</b>	212
7.1	Summary of results	214
7.1.1	What is distinctive about young people's political participation at the beginning of the 21st century?	214
7.1.2	Why do young people participate relatively less in politics than four decades ago?	221
7.2	Discussion	229
7.2.1	Do young people participate differently due to distinctive cohort characteristics or due to a delayed and more complicated transition to adulthood?	229
7.2.2	Continuity and generational change	231
7.2.3	Period effects: 1974 versus 2002	233

7.2.4	Future directions for young people's political participation research	235
-------	---	-----

## Appendices

<b>Appendix A: Information Accompanying Chapter 2</b>	<b>243</b>
A.1 Replication of institutional and non-institutional participation scales with items' difficulties weighted	243
A.2 Replication of institutional and non-institutional political participation scales with the PAS	244
A.3 Relationship between institutional and non-institutional political participation in 17 European countries, 2002	245
<b>Appendix B: Information Accompanying Chapter 4</b>	<b>246</b>
B.1 Robustness tests of average levels of political participation: young people and adults	247
B.2 Pearson correlations between institutional and non-institutional participation across countries and life stages, 2002	249
<b>Appendix C: Information Accompanying Chapter 5</b>	<b>250</b>
C.1 Young people's frequency of political discussions over time and across countries, 1973–2003	250
C.2 Average levels of postmaterialist values of young people and adults over time	252
C.3 Young people's and adults' membership in at least one association in 2002	253
C.4 Young people's difference in confidence in political parties and politicians from adults	254
C.5 Young people' and adults' norms of citizenship	256
C.6 Surveys used and their complete references	257
C.7 Surveys used and sample sizes	259
<b>Appendix D: Information Accompanying Chapter 6</b>	<b>263</b>
D.1 Transition to adulthood and political participation, OLS models	264
<b>Appendix E: Marginal Effects of the Transition to Adulthood Across Age</b>	<b>282</b>
<i>Notes</i>	288
<i>References</i>	306
<i>Index</i>	323

# List of Figures

2.1	Average participation in institutional activities in 17 European countries, 2002	36
2.2	Average participation in non-institutional activities in 17 European countries, 2002	37
2.3	Average levels of institutional and non-institutional participation in 17 European countries, 2002	37
2.4	Pearson correlations between institutional and non-institutional participation in seven European countries at two points in time	40
2.5	Participation in institutional activities across age in 17 European countries, 2002	41
2.6	Participation in non-institutional activities across age in 17 European countries, 2002	43
2.7	Participation in institutional activities across age in seven European countries, 1974 and 2002	44
2.8	Participation in non-institutional activities across age in seven European countries, 1974 and 2002	44
2.9	Participation in institutional activities across age and countries, 1974 and 2002	45
2.10	Participation in non-institutional activities across age and countries, 1974 and 2002	46
4.1	Evolution of the transition to adulthood markers in Europe	85
4.2	Average levels of political participation of young people and adults	88
4.3	Average levels of institutional political participation of young people and adults in 2002 across countries	91
4.4	Average levels of non-institutional political participation of young people and adults in 2002 across countries	92
4.5	Average levels of institutional political participation of young people and adults in the 1970s	93
4.6	Average levels of non-institutional political participation of young people and adults in the 1970s	94
4.7	Pearson correlations between institutional and non-institutional participation in seven European countries for young people and adults, 1974 and 2002	97

5.1	Average institutional political participation across political generations in six European countries, 2002	106
5.2	Average non-institutional political participation across political generations in six European countries, 2002	107
5.3	Young people's political interest compared to adults over time and across countries	115
5.4	Young people's frequency of political discussion compared to adults over time and across countries	118
5.5	Young people's difference in frequency of reading political news on newspapers in comparison to adults over time and across countries	122
5.6	Young people's difference in internal political efficacy in comparison to adults over time and across countries	124
5.7	Young people's difference in external political efficacy in comparison to adults over time and across countries	124
5.8	Young people's difference in satisfaction with democracy in comparison to adults over time and across countries	127
5.9	Young people's difference in postmaterialist values in comparison to adults over time and across countries	128
5.10	Young people's and adults' membership in at least one association, 1974 and 2002	137
5.11	Young people's difference in social trust in comparison to adults over time and across countries	141
5.12	Young people's difference in confidence in parliament in comparison to adults over time across countries	142
5.13	Marginal effect of being young on institutional and non-institutional participation across levels of political interest in Denmark	160
6.1	Marginal effect of being young on levels of non-institutional participation as respondents move forward in the transition to adulthood, 2002	177
6.2	Marginal effect of being young on levels of institutional participation as respondents move forward in the transition to adulthood, 2002	178
6.3	Marginal effect of being young on levels of institutional participation as respondents move forward in their transition to adulthood, 1974	180
6.4	Marginal effect of being young on institutional participation across country-specific scales of the transition to adulthood	185
6.5	Marginal effect of having a job on institutional political participation across age in Austria	190

6.6	Marginal effect of having a job on institutional political participation across age in the Netherlands	191
6.7	Marginal effect of having a job on institutional political participation across age in Germany	191
6.8	Marginal effect of having a job on institutional political participation across age in seven European countries, 1974	193
6.9	Marginal effect of being married on institutional political participation across age in seven European countries, 1974	194
6.10	Marginal effect of having at least one child on institutional political participation across age in three European countries, 1974	194
6.11	Expected values of institutional participation of men and women in paid employment, 2002	200
6.12	Expected values of institutional participation of men and women living with a partner, 2002	201
6.13	Expected values of institutional participation for men and women being in paid employment, 1974	202
6.14	Expected values of institutional participation for men and women being married, 1974	202
A.1	Pearson correlations between the cumulative scales used in this study and an alternative computation of the scales that weights the scores according to difficulty	243
A.2	Pearson correlations between institutional and non-institutional participation in 17 European countries, 2002	245
B.1	Average levels of institutional participation in three waves of the ESS: young people and adults, 2002–2006	247
B.2	Average levels of non-institutional participation in three waves of the ESS: young people and adults, 2002–2006	248
B.3	Pearson correlations between institutional and non-institutional participation, young people and adults, 2002	249
C.1	Young people's frequency of political discussions over time and across countries, 1973 to 2003	251
C.2	Average level of postmaterialist values of young people and adults over time	252
C.3	Young people's and adults' membership in at least one association, 2002	253
C.4	Young people's difference in confidence in political parties in comparison to adults across countries	254

C.5	Young people's difference in confidence in politicians in comparison to adults across countries	255
C.6	Young people's difference in norms of citizenship in comparison to adults across countries, 2002	256
E.1	Marginal effect of living with a partner on institutional political participation across age in 17 European countries	283
E.2	Marginal effect of having a job on institutional political participation across age in 17 European countries	284
E.3	Marginal effect of having at least one child on institutional political participation across age in 17 European countries	285
E.4	Marginal effect of having completed the transition to adulthood on institutional political participation across age in 17 European countries	286
E.5	Young people and completed steps in the transition to adulthood across countries, ESS (2002)	287

# List of Tables

2.1	Characteristics of the two scales constructed from the pooled data set: items included, their frequency and scalability coefficients	26
2.2	Characteristics of the two cross-country identity scales constructed from the pooled data set: items included, their frequency and scalability coefficients	27
2.3	Coefficients of the identity-set scales across countries	28
2.4	Final equivalent institutional participation scale: properties and country-specific items included	30
2.5	Final equivalent non-institutional scale: properties and country-specific items included	32
2.6	Robustness test of equivalent scales of institutional and non-institutional political participation	34
3.1	The concept of generation: an update of its definitions and contents	51
3.2	Civic voluntarism model: summary of main factors, changes and their implications	60
3.3	Modernization theories: summary of main factors, changes and their implications	62
3.4	Mobilization agencies: summary of the main factors, changes and their implications	64
3.5	Cognitive engagement theory: summary of the main factors, changes and their implications	67
3.6	Social capital theory: summary of the main factors, changes and their implications	68
3.7	General incentives theory: summary of the main factors, changes and their implications	69
3.8	Summary of expectations	72
4.1	Markers of the transition to adulthood: average age in 2005	83
4.2	Markers of the transition to adulthood: average ages in 1977	87
4.3	Summary of differences between young people's and adults' levels of participation in 1974 and 2002	95
5.1	Political generations in six European countries	103
5.2	A cohort of sophisticated or politically alienated citizens? Summary of expectations and indicators	113

5.3	Summary of characteristics of the youngest cohort in 2002 across countries	130
5.4	A cohort lacking mobilization networks? A summary of indicators	133
5.5	An individualistic cohort? A summary of indicators	138
5.6	Summary of young cohorts' characteristics by country	145
5.7	Effect of individual factors on political participation, 1974 and 2002	151
5.8	Effect of individual characteristics on institutional participation in 16 European countries, 2002	152
5.9	Effect of individual characteristics on non-institutional participation in 16 European countries, 2002	153
5.10	Effect of individual characteristics on institutional participation in seven European countries, 1974	154
5.11	Effect of individual characteristics on non-institutional participation in seven European countries, 1974	155
6.1	Effect of the transition to adulthood on institutional and non-institutional political participation in 17 European countries	173
6.2	Summary of the effects of the transition to adulthood on institutional political participation in 17 European countries, 2002	174
6.3	Summary of the effects of the transition to adulthood on non-institutional political participation in 17 European countries, 2002	175
6.4	Effect of individual events of the transition to adulthood on institutional participation across countries, 2002	183
6.5	Events included in country-specific transition to adulthood scales	184
6.6	Effect of individual events of the transition to adulthood on non-institutional participation across countries, 2002	187
6.7	Effect of individual events of the transition to adulthood on institutional political participation for each country and by gender, 2002	197
6.8	Effect of individual events of the transition to adulthood on institutional political participation for each country and by gender, 1974	198
6.9	Summary of effects of individual events on institutional participation across age in 17 countries for men and women, 2002	204
