CONTENTS

UNIT I

THE BODY, BODY TISSUES, ENVIRONMENT

CHAPTER 1	PAGE
THE BODY AS A WHOLE - - - - -	17

CHAPTER 2	
CELLS AND TISSUES - - - - -	21
Cells, 21; Tissues, 22; Epithelium, 22; Membranes, 25; Supporting Structures, 26; Fibrous Connective Tissue, 26; Reticular Tissue, 27; Adipose Tissue, 28; Cartilage, 28; Bone, 29; Neuroglia, 30; Muscle, 31; Nerve Tissue, 32; Blood, 33.	

CHAPTER 3	
THE NATURE AND ENVIRONMENT OF CELLS - - - - -	34
Chemical Nature of the Cell, 35; Cellular Metabolism, 36; Intracellular Environment, 37; Acidity, pH, 37; Osmotic Pressure, 37; Intracellular Sodium and Potassium, 39; Intracellular Structures, 39; Cell Differentiation, 40; Extracellular Environment, 41.	

CHAPTER 4	
SURFACE ANATOMY - - - - -	42
Head, 42; Neck, 43; Shoulder, 46; Arm, 46; Wrist, 49; Thorax and Abdomen, 52; Thigh, 53; Knee, 54; Ankle and Foot, 54.	

UNIT II

POSTURE AND MOVEMENT

CHAPTER 5	
THE SKELETON - - - - -	57
Bones of the Skull, 59; Frontal Bone, 62; Parietal Bones, 62; Occipital Bone, 62; Temporal Bone, 67; Sphenoid Bone, 70; Ethmoid Bone, 71; Nasal Bones, 72; Lacrimal Bones, 72; Maxillary Bones, 72; Inferior Nasal Conchae, 72; Zygomatic Bone, 73; Palatine Bone, 73; Vomer, 75; Mandible, 75; Hyoid, 77; Ear Bones, 77; Vertebral Column, 80; Cervical Vertebrae, 82; Thoracic Vertebrae, 82; Lumbar Vertebrae, 84; Sacrum, 84; Coccyx, 84; Bones of the Thorax, 84; Ribs, 84; Sternum, 86; Bones of Upper Extremity, 87; Scapula, 87; Clavicle, 87; Humerus, 87; Ulna, 88; Radius, 95; Carpus, 95; Hand Bones, 95; Bones of Lower Extremity, 97; Os Coxae or Os Innominatum,	

98; Femur, 100; Patella, 101; Tibia, 101; Fibula, 101; Tarsus, 101; Metatarsus, 105; Toe Bones, 105; Sex Differences in the Skeleton, 108; Age Changes in the Skeleton, 109.

CHAPTER 6

ARTICULATIONS - - - - - 123

Classification of Joints, 123; Mandibular Joint, 124; Atlanto-occipital Joints, 125; Atlantoepistropheal Joints, 125; Vertebral Joints, 126; Clavicular Joints, 127; Thoracic Joints, 128; Shoulder Joint, 128; Elbow Joint, Radioulnar Joints, 131; Wrist Joint, 134; Carpal Joints, 134; Hand Joints, 135; Sacroiliac Joint, 137; Pubic Symphysis, 137; Hip Joint, 137; Knee Joint, 138; Tibiofibular Joints, 140; Ankle Joint, 141; Foot Joints, 141.

CHAPTER 7

THE ACTIVITY OF MUSCLE - - - - - 150

Types of Muscle Cells, 150; Stimulation of Striate Muscle, 151; Strength of Stimulation, 152; Frequency of Stimulation, 153; Muscle Tone, 155; Muscle Contraction and Work, 155; The Energy for Muscle Contraction, 156; Contractile Protein of Muscle, 156; Energy for Muscle Contraction, 156; Muscle Energy Stores, 158; Fatigue, 158; Exercise and Muscle Development, 159.

CHAPTER 8

MUSCLES - - - - - 161

Muscles of Expression, 162; Muscles of Upper Extremity, 164; Muscles of Pectoral Region, 164; Muscles of Back Attached to Scapula, 166; Muscles of Shoulder, 168; Muscles of Upper Arm, 169; Muscles of Forearm, 169; Muscles of Hand, 176; Palmar Aponeurosis, 178; Muscles of Lower Extremity, 181; Muscles of Front of Thigh, 181; Muscles of Inner Side of Thigh, 182; Muscles of Buttock, 186; Hamstring Muscles, 189; Muscles of Front of Leg, 192; Muscles of Outer Side of Leg, 193; Muscles of Back of Leg, 193; Muscles of Foot, 198; Plantar Aponeurosis, 200; Functions of Lower Limb Muscles in Standing and Walking, 200; Muscles of Abdominal Wall, 201; Inguinal Canal, 202; Deep Muscles of Back, 204; Muscles Which Move the Head, 205; Muscles of Pelvis and Perineum, 205; Other Groups of Muscles, 209.

UNIT III

INTEGRATIVE MECHANISMS

CHAPTER 9

PHYSIOLOGY OF THE NEURON - - - - - 210

Structure of the Neuron, 210; Nature of the Nerve Impulse, 211; Speed of Transmission of the Nerve Impulse, 214; Metabolism of

Nerve Tissue, 214; The Synapse and Neurohumoral Transmission, 215; Nerve Degeneration and Regeneration, 216; Local Anesthetics and Nerve Block, 216.

CHAPTER 10

THE CENTRAL NERVOUS SYSTEM - - - - -	218
Brain, 218; Cerebrum, 218; Motor Areas, 220; Sensory Areas, 221; Association Areas, 223; Coverings of Brain, 224; Ventricles of Brain, 224; Cerebrospinal Fluid, 225; Growth of Brain, 226; The Cerebellum, 226; The Brain Stem, 228; Medulla Oblongata, 229; Pons, 229; Mesencephalon, 230; Diencephalon, 233; Spinal Cord, 234.	

CHAPTER 11

THE PERIPHERAL NERVOUS SYSTEM - - - - -	240
Spinal Nerves, 240; A Typical Nerve, 240; Cervical Plexus, 242; Brachial Plexus, 243; Lumbosacral Plexus, 252; Coccygeal Plexus, 254; Segmental Sensory Distribution, 254; Cranial Nerves, 254; Olfactory Nerve, 254; Optic Nerve, 254; Oculomotor Nerve, 256; Trochlear Nerve, 256; Trigeminal Nerve, 256; Abducent Nerve, 258; Facial Nerve, 258; Acoustic Nerve, 258; Glossopharyngeal Nerve, 259; Vagus Nerve, 261; Accessory Nerve, 261; Hypoglossal Nerve, 261; The Autonomic Nervous System, 261; Thoracolumbar Outflow, 262; Craniosacral Outflow, 267.	

CHAPTER 12

INTEGRATIVE ASPECTS OF THE NERVOUS SYSTEM - - - - -	272
Reflexes, 272; Conditioned Reflexes, 274; Autonomic Functions, 274; Sleep, 276; Consciousness, Memory, and Volitional Activity, 277.	

CHAPTER 13

SENSORY RECEPTION - - - - -	278
Sensations, 278; Sensory Nerve Endings, 280; Touch, 280; Pressure, 281; Temperature, 281; Kinesthesia, 281; Pain, 282; Taste, 283; Smell, 284; Hearing, 285; The Ear, 285; External Ear, 286; Middle Ear, 286; Inner Ear, 288; Physiology of Hearing, 290; Sound, 290; Sight, 294; The Eye, 294; Extrinsic Muscles of the Eye, 296; Eyelids, 297; Eyebrows, 297; Conjunctiva, 297; Lacrimal Apparatus, 298; Wall of the Eyeball, 298; Physiology of Vision, 300; The Optical System, 300; The Receptor System, 303; Binocular Vision, 305; Color Vision, 305.	

CHAPTER 14

HORMONAL INTEGRATION: THE ENDOCRINE SYSTEM - - - - -	308
Hypophysis, 310; Anatomy, 310; Functions of Adenohypophysis, 311; Functions of Neurohypophysis, 313; Thyroid Gland, 313; Anatomy,	

313; Functions, 315; Parathyroid Glands, 320; Anatomy, 320; Function, 320; Adrenal Glands, 320; Anatomy, 320; Paraganglia, 321; Functions of Adrenal Cortex, 321; Functions of Adrenal Medulla, 323; Pancreas, 323; Function of Pancreatic Islets, 323; Gonads, 324; Pineal Body, 324; Placenta, 325.

UNIT IV

MAINTENANCE OF THE BODY TISSUES

CHAPTER 15

BLOOD AND LYMPH - - - - -	327
Blood, 327; Functions of Blood, 327; Composition of Blood, 327; Erythrocytes, 328; Leukocytes, 328; Platelets, 329; Hemoglobin, 329; Pathologic Variations of Blood, 330; Blood Types, 331; Inheritance of Blood Types, 333; Rh Factor, 334; Antibodies, 334; Blood Clotting, 335; Vitamin K, 336; Lymph and Tissue Fluid, 336.	

CHAPTER 16

THE CIRCULATORY SYSTEM - - - - -	338
Heart, 341; Chambers of Heart, 344; Pericardium, 346; Arteries, 347; Pulmonary Artery, 347; Thoracic Aorta and Branches, 347; Abdominal Aorta and Branches, 351; Veins, 361; Superficial Veins, 361; Azygos Veins, 366; Venous Sinuses Within the Cranium, 366; Portal Vein, 369; Vertebral Venous System, 369.	

CHAPTER 17

PHYSIOLOGY OF CIRCULATION - - - - -	371
The Heart as a Pump, 371; Cardiac Output, 372; Heart Sounds, 373; Rhythmicity of the Heart, 374; Changes in Heart Rate, 375; Arterial Blood Pressure, 375; Factors Which Influence Blood Pressure, 377; Pressoreceptor Reflexes, 377; Capillary and Venous Blood Pressure, 378.	

CHAPTER 18

THE LYMPHATIC SYSTEM - - - - -	380
Macrophages, 382; Lymphatics of Head and Neck, 382; Lymphatics of Upper Extremity, 384; Axillary Nodes, 384; Lymphatics of Lower Extremity, 388; Lymphatics of Pelvis, 392; Lymphatics of the Abdomen, 392; Lymphatics of the Thorax, 396; Terminal Collecting Trunks, 396; Spleen, 399; Thymus, 401.	

CHAPTER 19

THE RESPIRATORY SYSTEM - - - - -	402
Nose, 402; Air Sinuses of the Skull, 405; Pharynx, 409; Larynx, 409; Cartilages of Larynx, 411; Cavity of Larynx, 413; Muscles of Larynx,	

CONTENTS

PAGE

413; Trachea, 416; Bronchi, 419; Thoracic Cavity, 419; Lungs, 420; Muscles of Respiration, 421; Physiology of Respiration, 427; Mechanics of Respiration, 428; Respiratory Volumes, 429; Gas Exchange, 431; Partial Pressure, 432; Blood Transport of Oxygen and Carbon Dioxide, 432; Regulation of Respiration, 434; The Hering-Breuer Reflex, 435; The Effect of Carbon Dioxide on the Respiratory Center, 437; The Effect of Oxygen Lack on the Respiratory Center, 437; Chemoreceptor Reflexes, 437; Artificial Respiration, 439.

CHAPTER 20

DIGESTIVE SYSTEM AND ABSORPTION OF FOOD - - - - - 444

The Mouth, Pharynx, and Esophagus, 445; Salivary Glands, 448; Saliva, 450; Teeth, 450; Muscles of Mastication, 453; Pharynx, 454; Tonsils, 457; Esophagus, 458; Swallowing, 458; Abdominal Cavity, 460; The Stomach, 461; Gastric Digestion, 463; Gastric Motility, 464; Vomiting, 465; The Small Intestine, 465; Duodenum, 470; Jejunum, Ileum, and Mesentery, 470; Pancreas, 471; Pancreatic Juice, 472; Liver, 473; Hepatic Ducts and Gall Bladder, 477; Bile, 479; Intestinal Digestion, 479; Neutralization of Gastric Acidity, 480; Enzymes Acting in the Small Intestine, 480; Intestinal Movements, 480; Absorption From the Small Intestine, 481; The Large Intestine, 482; Cecum, 485; Ascending Colon, 486; Transverse Colon, 486; Descending Colon, 486; Iliac Colon, 486; Pelvic Colon, 486; Rectum, 487; Anal Canal, 487; Function of the Colon, 487; Defecation, 488.

CHAPTER 21

METABOLISM - - - - - 490

Energy of the Body, 490; Measurement of Body Energy, 490; Direct Calorimetry, 491; Indirect Calorimetry, 491; Basal Metabolic Rate, 492; Respiratory Quotient, 494; Daily Caloric Requirements, 495; Sources of Energy for the Body, 495; Carbohydrates, 495; Catabolism of Glucose, 496; Glucose Tolerance Test, 498; Fats, 499; Protein, 500; Dietary Protein, 500; Biologic Value of Proteins, 501; Caloric Equivalents of Food, 502; Minerals, 502; Vitamins, 502; Vitamin A, 503; Vitamin B Complex, 503; Vitamin C, 503; Vitamin D, 504; Vitamins E and K, 504; An Adequate Diet, 505.

CHAPTER 22

URINARY SYSTEM - - - - - 506

Kidney, 506; Ureter, 515; Urinary Bladder, 517; Urethra, 517; Micturition, 519; Physiology of Urine Formation, 519; Formation of Glomerular Filtrate, 519; Tubular Reabsorption, 521; Kidney Adaptation, 522; Specific Gravity of the Urine, 522; Renal Threshold, 522; Control of Kidney Activity, 523; Kidney Failure, 523; Kidneys and Blood Pressure, 524; Detoxifying Activity of the Kidneys, 524; Renal Function Tests and the Clearance Concept, 524; Excretion, 525.

CHAPTER 23

	PAGE
THE SKIN AND SUBCUTANEOUS TISSUES - - - - -	527
Skin, 527; Hair, 530; Sebaceous Glands, 530; Sudoriferous Glands, 530; Nails, 531; Superficial Fascia, 531; Deep Fascia, 539; Bursae, 539; Tendon Sheaths, 539.	

CHAPTER 24

BODY TEMPERATURE AND ITS CONTROL - - - - -	540
Balance of Heat, 540; Ways of Losing Body Heat, 540; Regulation of Heat Loss, 541; Responses to Cold, 542; Chills and Fever, 542; Responses to Heat, 542; Acclimatization to Heat or Cold, 542.	

UNIT V

REPRODUCTION

CHAPTER 25

REPRODUCTION - - - - -	544
Determination of Sex, 545; Genes, 545; The Male Reproductive System, 546; Testis, 546; Ductus Deferens, Seminal Vesicle, 548; Scrotum, 550; Penis, 551; Prostate, 552; Bulbourethral Glands, 552; Male Reproduction, 552; Male Sex Hormones, 554; The Female Reproductive System, 554; Ovary, 554; Uterine Tube, 557; Uterus, 557; Menstruation, 560; Menopause, 561; Female Sex Hormones, 561; Vagina, 563; External Genitalia, 566; Development of the Fertilized Ovum, 566; Fetal Circulation, 567; Parturition, 569; Mammary Gland, 569; Lactation, 571.

PREFACE

The third edition of this combined textbook of anatomy and physiology has been so extensively revised that the change in title to *Integrated Anatomy and Physiology* is, we feel, quite necessary. We are convinced that structure cannot be understood without a knowledge of function, and that it is impossible to discuss function without a basis of structure.

The sections on physiology have been rewritten. Much of the material has been rearranged, and the number of chapters has been increased to twenty-five. Some illustrations have been replaced and new ones added. We have considered the various organ systems and in turn have presented the anatomy and physiology of each. In some areas it has been possible to discuss both within a single portion of one chapter. In other areas it has been necessary to devote several chapters to a single system.

From the vast amount of available information on our disciplines we have selected the material which, in our opinion, will be of the most general value. Of necessity, a great deal of factual information has been omitted. In physiology we have deliberately omitted certain controversial topics. Many physiologic processes are still incompletely understood, but we have endeavored to present mechanisms upon which there is general agreement.

The book has been designed as a textbook for the student who requires a basic knowledge of the human body and a general concept of its functions.

We have continued to use the B.N.A. or its English equivalent as a basis for terminology, but have indicated a number of changes proposed by an international committee on nomenclature (1955). For the physiology we have selected terms currently in use.

We wish to acknowledge our indebtedness to colleagues in the Departments of Anatomy and Physiology of Western Reserve University, who gave freely of their time and wisdom. Space does not permit us to mention by name each person who read sections bearing on his particular field of interest and who made valuable suggestions.

CONTENTS

UNIT I

THE BODY, BODY TISSUES, ENVIRONMENT

CHAPTER 1

	PAGE
THE BODY AS A WHOLE - - - - -	17

CHAPTER 2

CELLS AND TISSUES - - - - -	21
Cells, 21; Tissues, 22; Epithelium, 22; Membranes, 25; Supporting Structures, 26; Fibrous Connective Tissue, 26; Reticular Tissue, 27; Adipose Tissue, 28; Cartilage, 28; Bone, 29; Neuroglia, 30; Muscle, 31; Nerve Tissue, 32; Blood, 33.	

CHAPTER 3

THE NATURE AND ENVIRONMENT OF CELLS - - - - -	34
Chemical Nature of the Cell, 35; Cellular Metabolism, 36; Intracellular Environment, 37; Acidity, pH, 37; Osmotic Pressure, 37; Intracellular Sodium and Potassium, 39; Intracellular Structures, 39; Cell Differentiation, 40; Extracellular Environment, 41.	

CHAPTER 4

SURFACE ANATOMY - - - - -	42
Head, 42; Neck, 43; Shoulder, 46; Arm, 46; Wrist, 49; Thorax and Abdomen, 52; Thigh, 53; Knee, 54; Ankle and Foot, 54.	

UNIT II

POSTURE AND MOVEMENT

CHAPTER 5

THE SKELETON - - - - -	57
Bones of the Skull, 59; Frontal Bone, 62; Parietal Bones, 62; Occipital Bone, 62; Temporal Bone, 67; Sphenoid Bone, 70; Ethmoid Bone, 71; Nasal Bones, 72; Lacrimal Bones, 72; Maxillary Bones, 72; Inferior Nasal Conchae, 72; Zygomatic Bone, 73; Palatine Bone, 73; Vomer, 75; Mandible, 75; Hyoid, 77; Ear Bones, 77; Vertebral Column, 80; Cervical Vertebrae, 82; Thoracic Vertebrae, 82; Lumbar Vertebrae, 84; Sacrum, 84; Coccyx, 84; Bones of the Thorax, 84; Ribs, 84; Sternum, 86; Bones of Upper Extremity, 87; Scapula, 87; Clavicle, 87; Humerus, 87; Ulna, 88; Radius, 95; Carpus, 95; Hand Bones, 95; Bones of Lower Extremity, 97; Os Coxae or Os Innominatum,	

98; Femur, 100; Patella, 101; Tibia, 101; Fibula, 101; Tarsus, 101; Metatarsus, 105; Toe Bones, 105; Sex Differences in the Skeleton, 108; Age Changes in the Skeleton, 109.

CHAPTER 6

ARTICULATIONS - - - - - 123

Classification of Joints, 123; Mandibular Joint, 124; Atlanto-occipital Joints, 125; Atlantoepistropheal Joints, 125; Vertebral Joints, 126; Clavicular Joints, 127; Thoracic Joints, 128; Shoulder Joint, 128; Elbow Joint, Radioulnar Joints, 131; Wrist Joint, 134; Carpal Joints, 134; Hand Joints, 135; Sacroiliac Joint, 137; Pubic Symphysis, 137; Hip Joint, 137; Knee Joint, 138; Tibiofibular Joints, 140; Ankle Joint, 141; Foot Joints, 141.

CHAPTER 7

THE ACTIVITY OF MUSCLE - - - - - 150

Types of Muscle Cells, 150; Stimulation of Striate Muscle, 151; Strength of Stimulation, 152; Frequency of Stimulation, 153; Muscle Tone, 155; Muscle Contraction and Work, 155; The Energy for Muscle Contraction, 156; Contractile Protein of Muscle, 156; Energy for Muscle Contraction, 156; Muscle Energy Stores, 158; Fatigue, 158; Exercise and Muscle Development, 159.

CHAPTER 8

MUSCLES - - - - - 161

Muscles of Expression, 162; Muscles of Upper Extremity, 164; Muscles of Pectoral Region, 164; Muscles of Back Attached to Scapula, 166; Muscles of Shoulder, 168; Muscles of Upper Arm, 169; Muscles of Forearm, 169; Muscles of Hand, 176; Palmar Aponeurosis, 178; Muscles of Lower Extremity, 181; Muscles of Front of Thigh, 181; Muscles of Inner Side of Thigh, 182; Muscles of Buttock, 186; Hamstring Muscles, 189; Muscles of Front of Leg, 192; Muscles of Outer Side of Leg, 193; Muscles of Back of Leg, 193; Muscles of Foot, 198; Plantar Aponeurosis, 200; Functions of Lower Limb Muscles in Standing and Walking, 200; Muscles of Abdominal Wall, 201; Inguinal Canal, 202; Deep Muscles of Back, 204; Muscles Which Move the Head, 205; Muscles of Pelvis and Perineum, 205; Other Groups of Muscles, 209.

UNIT III

INTEGRATIVE MECHANISMS

CHAPTER 9

PHYSIOLOGY OF THE NEURON - - - - - 210

Structure of the Neuron, 210; Nature of the Nerve Impulse, 211; Speed of Transmission of the Nerve Impulse, 214; Metabolism of
