Burkhard A. Meier

Python GUI Programming Cookbook

Second Edition

Develop beautiful and powerful GUIs using the Python programming language

Packt>

Python GUI Programming Cookbook - Second Edition

Explore the beautiful world of GUI development using the Python programming language. You will learn how easy it is to get started, and you might be surprised how advanced you can become with just a small amount of coding. GUI development using Python is not a very well-known subject. The built-in tkinter GUI framework was limited, but with the latest versions of Python 3 and tkinter, all of this has dramatically changed.

This book will start with the very basics of creating a fully functional GUI in Python with only a few lines of code. Each and every recipe adds more widgets to the GUIs we are creating. While the cookbook recipes all stand on their own, there is a common theme running through them. As our GUIs keep expanding, using more and more widgets, we start to talk to networks, databases, and graphical libraries that greatly enhance our GUI's functionality.

Things you will learn:

- Create the GUI Form and add widgets
- Arrange the widgets using layout managers
- Use object-oriented programming to create GUIs
- Create Matplotlib charts
- Use threads to talk to networks
- Talk to a MySQL database via the GUI
- Perform unit testing and internationalization of the GUI
- Extend the GUI with third-party graphical libraries
- Get to know the best practices of creating GUIs

About the Author

Burkhard A. Meier has more than 17 years of professional experience working in the software industry as a software tester and developer, specializing in software test automation development, execution, and analysis. He has a very strong background in Python 3 software test automation development, as well as in SQL relational database administration, the development of stored procedures, and debugging code.

While experienced in Visual Studio .NET C#, Visual Test, TestComplete, and other testing languages (such as C/C++), the main focus of the author over the past five years has been developing test automation written in Python 3 to test the leading edge of FLIR ONE (now in its third generation) infrared cameras for iPhone and Android smart phones and handheld tablets, as well as assuring the quality of FLIR bolometer IR camera platforms.

Being highly appreciative of art, beauty, and programming, the author developed GUIs in C# and Python to streamline everyday test automation tasks, enabling these automated tests to run unattended for weeks, collecting very useful data to be analyzed, automatically plotted in graphs, and e-mailed to upper management upon completion of nightly automated test runs.

His previous jobs include working as a senior test automation engineer and designer for InfoGenesis (now Agilysys), QAD, InTouch Health, and FLIR Systems.

You can get in touch with him through his LinkedIn account, https://www.linkedin.com/pub/burkhard-meier/5/246/296.

I would like to thank all truly great artists, such as Leonardo da Vinci, Charles Baudelaire, Edgar Allan Poe, and so many more for bringing the presence of beauty into our human lives. This book is about creating very beautiful GUIs written in the Python programming language, and it was inspired by these truly great artists.

I would like to thank all of the great people that made this book possible. Without any of you, this book would only exist in my mind. I would like to especially thank all of my editors at Packt Publishing: Sonali, Anurag, Prashant, Vivek, Arwa, Sumeet, Saurabh, Pramod, Nikhil, and so many more. I would also like to thank all of the reviewers of the code of this book. Without them, this book would be harder to read and apply to real-world problems. Last but not least, I'd like to thank my wife, our daughter, and our parents for the emotional support they provided so successfully during the writing of the second edition of this book. I'd also like to give thanks to the creator of the very beautiful and powerful programming language that Python truly is. Thank you Guido.

About the Reviewer

Mohit (mohitraj.cs@gmail.com) is a Python programmer with a keen interest in the field of information security. He completed his bachelor's in technology in computer science from Kurukshetra University, Kurukshetra, and master's in engineering (2012) in computer science from Thapar University, Patiala. He is a CIEH, ECSA from EC-Council USA and former IBMer. He has published several articles in national and international magazines. He is the author of Python Penetration Testing Essentials and Python Penetration Testing for Developers, also by Packt Publishing.

Did you know that Packt offers eBook versions of every book published, with PDF and ePub files available? You can upgrade to the eBook version at www.PacktPub.com and as a print book customer, you are entitled to a discount on the eBook copy. Get in touch with us at service@packtpub.com for more details.

At www.PacktPub.com, you can also read a collection of free technical articles, sign up for a range of free newsletters and receive exclusive discounts and offers on Packt books and eBooks.

https://www.packtpub.com/mapt

Get the most in-demand software skills with Mapt. Mapt gives you full access to all Packt books and video courses, as well as industry-leading tools to help you plan your personal development and advance your career.

Why subscribe?

- Fully searchable across every book published by Packt
- Copy and paste, print, and bookmark content
- On demand and accessible via a web browser

Customer Feedback

Thanks for purchasing this Packt book. At Packt, quality is at the heart of our editorial process. To help us improve, please leave us an honest review on this book's Amazon page at https://www.amazon.com/dp/1787129454.

If you'd like to join our team of regular reviewers, you can e-mail us at customerreviews@packtpub.com. We award our regular reviewers with free eBooks and videos in exchange for their valuable feedback. Help us be relentless in improving our products!

Table of Contents

Preface	1
Chapter 1: Creating the GUI Form and Adding Widgets	7
Introduction	7
Creating our first Python GUI	9
Getting ready	9
How to do it	10
How it works	10
There's more	11
Preventing the GUI from being resized	12
Getting ready	12
How to do it	12
How it works	13
Adding a label to the GUI form	14
Getting ready	14
How to do it	14
How it works	15
There's more	16
Creating buttons and changing their text property	16
Getting ready	17
How to do it	17
How it works	18
There's more	18
Text box widgets	19
Getting ready	19
How to do it	19
How it works	20
Setting the focus to a widget and disabling widgets	21
Getting ready	21
How to do it	21
How it works	23
There's more	23
Combo box widgets	24
Getting ready	24
How to do it	24

How it works	25
There's more	26
Creating a check button with different initial states	26
Getting ready	26
How to do it	27
How it works	28
Using radio button widgets	28
Getting ready	29
How to do it	29
How it works	30
There's more	31
Using scrolled text widgets	31
Getting ready	31
How to do it	32
How it works	33
Adding several widgets in a loop	34
Getting ready	34
How to do it	34
How it works	35
There's more	35
Chapter 2: Layout Management	37
Introduction	37
Arranging several labels within a label frame widget	39
Getting ready	39
How to do it	39
How it works	41
There's more	42
Using padding to add space around widgets	42
Getting ready	42
How to do it	42
How it works	43
How widgets dynamically expand the GUI	45
Getting ready	46
How to do it	46
How it works	50
There's more	50
Aligning the GUI widgets by embedding frames within frames	50
Getting ready	50
How to do it	51

How it works	54
Creating menu bars	55
Getting ready	56
How to do it	56
How it works	62
There's more	63
Creating tabbed widgets	63
Getting ready	63
How to do it	64
How it works	69
Using the grid layout manager	69
Getting ready	69
How to do it	69
How it works	71
Chapter 3: Look and Feel Customization	73
Introduction	73
Creating message boxes – information, warning, and error	74
Getting ready	75
How to do it	75
How it works	77
How to create independent message boxes	79
Getting ready	79
How to do it	79
How it works	82
How to create the title of a tkinter window form	83
Getting ready	83
How to do it	83
How it works	83
Changing the icon of the main root window	84
Getting ready	84
How to do it	84
How it works	85
Using a spin box control	85
Getting ready	85
How to do it	85
How it works	89
Relief, sunken and raised appearance of widgets	89
Getting ready	89
How to do it	90

How it works	91
Creating tooltips using Python	92
Getting ready	92
How to do it	93
How it works	95
Adding a progressbar to the GUI	96
Getting ready	96
How to do it	97
How it works	99
How to use the canvas widget	99
Getting ready	99
How to do it	100
How it works	100
Chapter 4: Data and Classes	103
Introduction	103
How to use StringVar()	105
Getting ready	105
How to do it	106
How it works	108
How to get data from a widget	111
Getting ready	111
How to do it	111
How it works	112
Using module-level global variables	113
Getting ready	113
How to do it	113
How it works	114
How coding in classes can improve the GUI	117
Getting ready	118
How to do it	118
How it works	123
Writing callback functions	123
Getting ready	124
How to do it	124
How it works	124
Creating reusable GUI components	125
Getting ready	125
How to do it	125
How it works	129

Chapter 5: Matplotlib Charts	131
Introduction	131
Creating beautiful charts using Matplotlib	132
Getting ready	132
How to do it	133
How it works	135
Installing Matplotlib using pip with whl extension	135
Getting ready	135
How to do it	138
How it works	141
Creating our first chart	142
Getting ready	142
How to do it	142
How it works	143
Placing labels on charts	144
Getting ready	144
How to do it	144
How it works	149
How to give the chart a legend	150
Getting ready	150
How to do it	150
How it works	153
Scaling charts	153
Getting ready	154
How to do it	154
How it works	155
Adjusting the scale of charts dynamically	156
Getting ready	156
How to do it	156
How it works	160
Chapter 6: Threads and Networking	161
Introduction	161
How to create multiple threads	163
Getting ready	164
How to do it	164
How it works	167
Starting a thread	167
Getting ready	167

How to do it	169
How it works	172
Stopping a thread	173
Getting ready	173
How to do it	173
How it works	176
How to use queues	177
Getting ready	177
How to do it	178
How it works	183
Passing queues among different modules	183
Getting ready	184
How to do it	184
How it works	186
Using dialog widgets to copy files to your network	187
Getting ready	187
How to do it	187
How it works	197
Using TCP/IP to communicate via networks	198
Getting ready	198
How to do it	198
How it works	201
Using urlopen to read data from websites	201
Getting ready	201
How to do it	201
How it works	205
Chapter 7: Storing Data in our MySQL Database via our GUI	207
Introduction	207
Installing and connecting to a MySQL server from Python	209
Getting ready	209
How to do it	212
How it works	215
Configuring the MySQL database connection	215
Getting ready	216
How to do it	216
How it works	219
Designing the Python GUI database	220
Getting ready	220
How to do it	220
