the memory of
WALTER B. LANCASTER, M.D.
and
RICHARD G. SCOBEE, M.D.*

PREFACE

This volume is based on the second Symposium on Strabismus sponsored by the New Orleans Academy of Ophthalmology. Insofar as possible the panel was composed of the same group who met some six years earlier in Iowa City, Iowa, for the first Symposium of this type.

The material again represents the viewpoints of the various authors without alteration in respect to material covered by other men in the Symposium. Editing of the papers has been limited almost entirely to the arrangement of the material in the proper order for publication.

It is interesting to the editor that although basic differences still exist, many differences which apparently existed in the first Symposium have been resolved through more careful use of terminology as suggested by the late Dr. Walter B. Lancaster. For that reason and because his message is still timely, two of his papers from the first Symposium are reprinted in the Appendix.

The editor wishes to acknowledge the invaluable assistance of Dr. Edmund Leckert, Jr., for recording the discussions; Dr. Roderick Macdonald, Jr., and Ruth and Mary Helen Allen, for their assistance in reading and checking proofs; the several hard working secretaries who typed and retyped the material; and the various authors and publishers, for permission to use several illustrations.

James H. Allen, M.D.

New Orleans, La.
