ABOUT THE EDITORS

A. K. Haghi, PhD

A. K. Haghi, PhD, holds a BSc in urban and environmental engineering from University of North Carolina (USA); a MSc in mechanical engineering from North Carolina A&T State University (USA); a DEA in applied mechanics, acoustics and materials from Université de Technologie de Compiègne (France); and a PhD in engineering sciences from Université de Franche-Comté (France). He is the author and editor of 165 books as well as 1,000 published papers in various journals and conference proceedings. Dr. Haghi has received several grants, consulted for a number of major corporations, and is a frequent speaker to national and international audiences. Since 1983, he served as a professor at several universities. He is currently Editor-in-Chief of the *International Journal of Chemoinformatics and Chemical Engineering* and *Polymers Research Journal* and on the editorial boards of many international journals. He is a member of the Canadian Research and Development Center of Sciences and Cultures (CRDCSC), Montreal, Quebec, Canada.

Eduardo A. Castro, PhD

Eduardo A. Castro, PhD, is a Superior Researcher at the Argentina National Research Council. He is a full professor of theoretical chemistry at the Universidad Nacional de La Plata and a career investigator with the Consejo Nacional de Investigaciones Científicas y Técnicas, both based in Buenos Aires, Argentina. He is the author of nearly 1,000 academic papers in theoretical chemistry and other topics, and he has published several books. He serves on the editorial advisory boards of several chemistry journals and is often an invited speaker at international conferences in South America and elsewhere.

Sabu Thomas, PhD

Dr. Sabu Thomas is the Director of the School of Chemical Sciences, Mahatma Gandhi University, Kottayam, India. He is also a full professor of polymer science and engineering and the Director of the International and Inter University Centre for Nanoscience and Nanotechnology of the same university. He is a fellow of many professional bodies. Professor Thomas has authored or co-authored many papers in international peer-reviewed journals in the area of polymer processing. He has organized several international conferences and has more than 420 publications, 11 books, and two patents to his credit. He has been involved in a number of books both as author and editor. He is a reviewer to many international journals and has

received many awards for his excellent work in polymer processing. His h-Index is 42. Professor Thomas is listed as the 5th position in the list of Most Productive Researchers in India, in 2008.

P. M. Sivakumar, PhD

P. M. Sivakumar, PhD, is a Foreign Postdoctoral Researcher (FPR) at RIKEN, Wako Campus, in Japan. RIKEN is Japan's largest comprehensive research institution renowned for high-quality research in a diverse range of scientific disciplines. He received his PhD from the Department of Biotechnology, Indian Institute of Technology Madras, India. He is a member of the editorial boards of several journals and has published papers in international peer-reviewed journals and professional conferences. His research interests include bionanotechnology and biomaterials.

Andrew G. Mercader, PhD

Andrew G. Mercader, PhD, studied physical chemistry at the Faculty of Chemistry of La Plata National University (UNLP), Buenos Aires, Argentina, from 1995 to 2001. Afterwards he joined Shell Argentina to work as Luboil, Asphalts and Distillation Process Technologist, as well as Safeguarding and Project Technologist from 2001 to 2006. His PhD work, on the development and applications of QSAR/QSPR theory, was performed at the Theoretical and Applied Research Institute located at La Plata National University (INIFTA), from 2006 to 2009. After that he obtained a postdoctoral scholarship to work on theoretical-experimental studies of biflavonoids at IBIMOL (ex PRALIB), Faculty of Pharmacy and Biochemistry, University of Buenos Aires (UBA), from 2009 to 2012. He is currently appointed as a member of the Scientific Researcher Career in the Argentina National Research Council at INIFTA.

LIST OF CONTRIBUTORS

Nima Ahmadi

Mechanical Engineering Department, Urmia University, of Technology, Iran

R. Anyszka

Lodz University of Technology, Faculty of Chemistry, Institute of Polymer and Dye Technology, 90-924, Lodz, Poland

Mohamad Sadeghi Azad

Mechanical Engineering Department, Urmia University, of Technology, Iran

Heinrich Badenhorst

LIST OF ABBREVIATIONS

AFM	atomic force microscopic
ANN	artificial neural network
ASA	active surface area
CA	contact angle
CCBB	continuous configurational boltzmann biased
CCD	central composite design
CP	conducting polymer
CVD	chemical vapor deposition
DB	degree of branching
DFT	density functional theory
DTA	differential thermal analysis
HBP _s	hyperbranched polymers
EB	electron beam
EBID	electron-beam-induced deposition
EDS	X-ray energy dispersive spectroscopy
EDX	energy dispersive X-ray
EHT	energy of electrons
FTIR	fourier transform infrared spectroscopy
HA	hyaluronic acid
HBP _s	hyperbranched polymers
LDA	local density approximation
MC	monte carlo
MD	molecular dynamics
NEMD	non-equilibrium molecular dynamics
NNG	natural source
OIT	oxidation induction time
PEMFC _s	proton exchange membrane fuel cells
PET	poly(ethylene terephthalate)
PUE	polyurethane elastomers
RSM	response surface methodology
SAD	selected-area diffraction
SBR	styrene-butadiene rubber
SEM	scanning electron microscope
SFE	surface free energy
SiC	silicon carbide
TBMD	tight bonding molecular dynamics

TEM	transmission electron microscope
TES	tear strength
TGA	thermogravimetric analyzer
TS	tensile strength

LIST OF SYMBOLS

a	water activity
C	molar concentration (mol/m ³)
D	mass diffusion coefficient (m ² /s)
F	faraday constant (C/mol)
I	local current density (A/m ²)
J	exchange current density (A/m ²)
K	permeability (m ²)
M	molecular weight (kg/mol)
n_d	electro-osmotic drag coefficient
P	pressure (Pa)
R	universal gas constant (J/mol-K)
T	temperature (K)
t	thickness
\vec{u}	velocity vector
V_{cell}	cell voltage
V_{oc}	open-circuit voltage
W	width
X	mole fraction

Greek letters

ρ	water transfer coefficient
ρ	effective porosity
ρ	density (kg/m ³)
μ	viscosity (kg/m-s)
σ_e	membrane conductivity (1/ohm-m)
λ	water content in the membrane
η	stoichiometric ratio
η	over potential (v)
λ_{eff}	effective thermal conductivity (w/m-k)
ϕ_e	electrolyte phase potential (v)

SUBSCRIPTS AND SUPERSCRIPTS

a	anode
c	cathode

ch	channel
k	chemical species
m	membrane
MEA	membrane electrolyte assembly
ref	reference value
sat	saturated
w	water

PREFACE

This book skillfully blends and integrates polymer science, plastic technology and rubber technology. The fundamentals of polymerization, polymer characteristics, rheology and morphology as well as the composition, technology, testing and evaluation of various plastics, rubbers, fibers, adhesives, coatings and composites are comprehensively presented. The book is highly suitable for all entrepreneurs and professionals engaged in production of as well as research and development in polymers. It will also be found immensely useful by advanced-level research students of physics, chemistry, and materials science, specializing in polymers, as well as students of chemical and metallurgical engineering having courses in polymer technology/materials science and technology.

This volume highlights the latest developments and trends in advanced polyblends and their structures. It presents the developments of advanced polyblends and respective tools to characterize and predict the material properties and behavior. The book provides important original and theoretical experimental results that use nonroutine methodologies often unfamiliar to many readers. Furthermore chapters on novel applications of more familiar experimental techniques and analyses of composite problems are included, which indicate the need for the new experimental approaches that are presented.

Technical and technological development demands the creation of new materials that are stronger, more reliable, and more durable, i.e. materials with new properties. Up-to-date projects in creation of new materials go along the way of nanotechnology.

With contributions from experts from both industry and academia, this book presents the latest developments in the identified areas. This book incorporates appropriate case studies, explanatory notes, and schematics for more clarity and better understanding. This book will be useful for chemists, chemical engineers, technologists, and students interested in advanced nanopolymers with complex behavior and their applications.

This new book:

- Gives an up-to-date and thorough exposition of the present state of the art of polyblends and composites.
- Familiarizes the reader with new aspects of the techniques used in the examination of polymers, including chemical, physicochemical, and purely physical methods of examination.
- Describes the types of techniques now available to the polymer chemist and technician and discusses their capabilities, limitations, and applications.

- Provides a balance between materials science and mechanics aspects, basic and applied research, and high-technology and high-volume (low cost) composite development.

CONTENTS

<i>List of Contributors</i>	ix
<i>List of Abbreviations</i>	xiii
<i>List of Symbols</i>	xv
<i>Preface</i>	xvii
1. A Detailed Review on Characteristics, Application and Limitation of Amorphous Glassy Polymers as Natural Nanocomposites	1
G. V. Kozlov, I. V. Dolbin, Jozef Richert, O. V. Stoyanov, and G. E. Zaikov	
2. Structure of Graphitic Carbons: A Comprehensive Review.....	51
Heinrich Badendorst	
3. Radiation Crosslinking of Acrylonitrile-Butadiene Rubber	81
Katarzyna Bandzierz, Dariusz M. Bielinski, Adrian Korycki, and Grazyna Przybytniak	
4. Rubber Vulcanizates Containing Plasmochemically Modified Fillers	91
Dariusz M. Bieliński, Mariusz Siciński, Jacek Grams, and Michał Wiatrowski	
5. Modification of the Indian Rubber in the Form of Latex with Ozone... 	103
L. A. Vlasova, P. T. Poluektov, S. S. Nikulin, and V. M. Misin	
6. Influence of the Structure of Polymer Material on Modification of the Surface Layer of Iron Counterface in Tribological Contact	111
Dariusz M. Bieliński, Mariusz Siciński, Jacek Grams, and Michał Wiatrowski	
7. Boron Oxide as a Fluxing Agent for Silicone Rubber-Based Ceramizable Composites	125
R. Anyszka, D. M. Bieliński, and Z. Pędzich	
8. Application of Micro-dispersed Silicon Carbide Along with Slurries as a Functional Fin Fire and Heat Resistant Elastomer Compositions	139
V. S. Liphonov, V. F. Kablov, S.V. Lapin, V. G. Kochetkov, O. M. Novopolitseva, and G. E. Zaikov	
9. Thermal Stability of Elastic Polyurethane.....	145
I. A. Novakov, M. A. Vaniev, D.V. Medvedev, N. V. Sidorenko, G. V. Medvedev, and D. O. Gusev	

10. PAN/Nano-TiO₂-S Composites: Physico-Chemical Properties	155
M. M. Yatsyshyn, A. S. Kun'ko, and O. V. Reshetnyak	
11. Viscoelastic Properties of the Polystyrene	173
Yu. G. Medvedevskikh, O. Yu. Khavunko, L. I. Bazylyak, and G. E. Zaikov	
12. Nanostructured Polymeric Composites Filled with Nanoparticles	211
A. K. Mikitaev, A. Yu. Bedanokov, and M. A. Mikitaev	
13. Structure, Properties and Application of Dendritic Macromolecules in Various Fields: Molecular Simulation Techniques in Hyperbranched Polymer and Dendrimers	241
M. Hasanzadeh and B. Hadavi Moghadam	
14. A Study on Influence of Electrospinning Parameters on the Contact Angle of the Electrospun PAN Nanofiber Mat Using Response Surface Methodology (RSM) and Artificial Neural Network (ANN)	261
B. Hadavi Moghadam and M. Hasanzadeh	
15. Fabrication and Characterization of the Metal Nano-Sized Branched Structures and the Composite Nanostructures Grown on Insulator Substrates by the EBID Process	279
Guoqiang Xie, Minghui Song, Kazuo Furuya, and Akihisa Inoue	
16. A Case Study on Hyperbranched Polymers	297
Ramin Mahmoodi, Tahereh Dodel, Tahereh Moieni, and Mahdi Hasanzadeh	
17. A Study on Network of Sodium Hyaluronate with Nano-Knots Junctions	307
Shin-ichi Hamaguchi and Toyoko Imae	
18. The Magnetic Photocatalyst Conversion to the Magnetic Dye-Adsorbent Catalyst via Hydrothermal Followed by Typical Washing and Thermal Treatments	323
Satyajit Shukla	
19. Solid Polymer Fuel Cell: A Three-Dimensional Computation Model and Numerical Simulations	339
Mirkazem Yekani, Meysam Masoodi, Nima Ahmadi, Mohamad Sadeghi Azad, and Khodadad Vahedi	
Index.....	363
