

DISEASES OF THE LIVER GALLBLADDER AND BILE DUCTS

BY

S. S. LICHTMAN, M.D., F.A.C.P.

*Assistant Professor of Clinical Medicine, Cornell University Medical College, Assistant
Attending Physician, New York Hospital, Adjunct Physician, Mt. Sinai Hospital,
Assistant in Post-Graduate Medical Instruction, University Extension, Columbia
University, New York*

SECOND EDITION, THOROUGHLY REVISED, WITH 147 ILLUSTRATIONS
AND TWO COLOR PLATES

LONDON
HENRY KIMPTON

PRINTED IN AMERICA

CONTENTS

PART I

DISEASES OF THE LIVER

CHAPTER I

THE STRUCTURE OF THE LIVER

The Liver Lobule	17
The Blood Supply of the Liver Lobule	19
The Liver Parenchyma	25
The Biliary Capillaries (Canaliculi; Bileiferous Tubules)	29
The Intrahepatic Bile Ducts	31
The Lymphatics of the Liver	32
The Connective Tissue	34
The Nerve Supply	34

CHAPTER II

PHYSIOLOGY OF THE LIVER

General Considerations of the Biliary Secretion	36
The Functions of the Liver	37
The Biliary Secretion	38
Functional Aspects of the Blood Supply of the Liver	40
Functional Relationship Between the Lobes of the Liver	42
The Biliary Secretion Pressure	45
Suppression of the Hepatic Secretion	46
Histo-chemical Manifestations of Biliary Secretion	46
The Biliary and Renal Secretions Compared	46
The Quantity of Bile Secretion	47
The Composition of the Bile	48
The Bile Acids	49
Factors and Substances Influencing the Bile Flow	51
The Function of Bile in the Digestive Tract	54
The Derivation of the Constituents of the Bile	61
Bilirubin	61
Bile Salts: Derivation and Fate	71
Cholesterol	74
Metabolic Activities of the Liver	77
Carbohydrate Metabolism	77
Internal Chemical Processes	78
Protein Metabolism	84
The Liver and Fat Metabolism	90
Other Functions of the Liver	100
Protective Functions of the Liver	100
The Scavenger Action of the Liver; Its Relation to Infection and Immunity	104
Liver Function and Mineral and Electrolyte Metabolism	108
The Liver in Blood Formation and Coagulation	109
The Liver and Normal and Malignant Growth	113
The Function of Regeneration of Liver Tissue	113
Cytochemistry and Liver Function	114
Vitamin Manufacture and Storage in the Liver	115

CHAPTER III

THE PATHOGENESIS AND PATHOLOGY OF JAUNDICE

The Pathogenesis of Jaundice	127
Mechanical, Regurgitation Jaundice	129
“ <i>Intrahepatic Obstructive Jaundice</i> ”	134
Pre-hepatic and Hepato-cellular Retention Jaundice	135
The Mechanism of Jaundice in Specific Diseases	139
Dissociated Jaundice	142
The Pathology of Jaundice	143
The Effect on the Body Cells of Biliary Constituents	143
The Effect of the Absence of, or Alteration of, the Bile in the In- testinal Tract	147
The Effects of Liver Injury	150

CHAPTER IV

THE SYMPTOMS AND SIGNS OF LIVER DISEASE

Jaundice	157
Itching	161
Bradycardia	163
Anorexia	164
Weight Loss	164
Muscular Weakness	164
Abdominal Pain	165
Fever	168
Liver Size	168
Gallbladder Enlargement	171
Enlargement of the Spleen	172
Hemorrhagic State	173
The Symptomatology of Portal Hypertension	173
Joint Pains; Sciatic Syndrome; Arthritis; Gout	174
Increased Peripheral Blood Flow in Jaundice	175
Liver Breath; (Fetor Hepaticus); (Amin Breath)	177
Edema	178
Cutaneous Lesions	178
Glycosuria-Hypoglycemia	181
Gastro-Intestinal Changes	181
Multiple Vitamin Deficiencies	184
Endocrine Changes	186
Hematologic Changes in Liver Disease	186
Urinary Changes; Azotemia	193
Tyrosinuria; Leucinuria	195
Melanuria	199
Terminal Stages of Liver Disease	200

CHAPTER V

LIVER FUNCTION TESTS AND PROCEDURES—INTERPRETATION OF RESULTS

Introductory Remarks	207
Classification of Liver Function Tests	211
Theory, Technic and Interpretation of Practical and Special Liver Func- tion Tests and Diagnostic Procedures	213
Tests Applied to Urine and Feces	255
Methods for the Estimation of the Constituents of the Bile	267

Special Metabolic Tests	271
Tests Based on the Measurement of Oxidation, Conjugation and Detoxi- fication of the Test Substances	304

CHAPTER VI

ACUTE AND SUBACUTE INFLAMMATORY DISEASES OF THE LIVER

Acute and Subacute Hepatitis	330
Hepatitis Due to Toxic Agents	331
General Considerations	331
Specific Liver Poisons and Their Effects	334
Arsenical Compounds—Experimental Poisoning	344
Antimony Compounds	346
Cinchophen Toxicosis	346
Various Other Poisons; Sulfonamide Compounds	350
Aromatic Organic Compounds	359
Alcohol	361
Phosphorus Poisoning	362
Mushroom Poisoning (Mycetismus)	364
Physical Agents—Hyperthermia	366
Bacteria, Protozoa and Related Agents—Spirochetal Jaundice	373
Bacterial Infections	373
Pneumococcal Infection and Jaundice	374
Gonococcal Jaundice	376
Bacterial Agents	377
Protozoal Agents	378
Spirochetal Jaundice (Weil's Disease)	380
Yellow Fever	389

CHAPTER VII

ACUTE AND SUBACUTE INFLAMMATORY DISEASES
OF THE LIVER (CONTINUED)

Viral Hepatitis	394
Introduction	394
Historical Review	395
Viral Etiology of Infectious Hepatitis	400
Classification of Viral Hepatitis	401
The Epidemiology of Infectious Hepatitis	402
Pathology of Infectious Hepatitis and Allied Conditions	408
Pathomorphology	410
The Lobular Lesion	410
The Inflammatory Reaction	412
The Reticulo-Endothelial Reaction	412
The Portal Tracts	415
Proliferative Changes in the Bile Ducts	418
Disposition of Bile Pigment	418
The Transition of Infectious Hepatitis to Liver Atrophy and Cirrhosis	419
Acute, Subacute, Chronic Liver Atrophy	419
Post-Hepatitis "Cirrhosis"	420
Portal Cirrhosis and Healed Chronic Liver Atrophy Compared	421
Coarse Nodular Atrophy. Post-Necrotic Multiple Coarse Lobular (Nodular) Hyperplasia. A Sequel to Infectious Hepatitis.	423

The Clinical Aspects of Hepatitis	425
The Clinical Stages of Infectious Hepatitis	426
Acute Hepatitis without Jaundice	436
The Final Stage: Fulminant Epidemic Hepatitis	438
The Convalescent Posticteric Stage	439
Definition	439
Clinical Features	439
Convalescent Stage: Duration	439
The Clinical Course	440
Relapsing Hepatitis	441
Post-hepatitis Disability	442
Sequelæ	442
Prognosis	443
Laboratory Features	444
Tests of Hepatic Function	444
The Pre-Icteric Stage	444
The Convalescent Stage	446
Laboratory Signs of Abnormal Convalescence and Impending Relapse	446
The Individual Laboratory Tests	446
Serum Bilirubin	446
Galactose Tolerance Tests	447
Hippuric Acid Synthesis	447
Flocculation Tests: Cephalin Cholesterol Flocculation; Thymol Turbidity Reaction	448
Serum Proteins	449
Plasma Esterase	450
Plasma Cholesterol	450
Serum Phosphatase	450
Serum Iron	450
Plasma Vitamin A	451
Plasma Prothrombin Time	451
Tyrosinuria and Tyrosinemia	451
Methionine Tolerance	451
Water Tolerance; Extracellular Fluid; Blood Volume	451
Sodium in Blood, Ascitic Fluid	451
Changes in Cellular Elements of the Blood	451
The White Cells	452
Erythrocyte Fragility	452
Sedimentation Rate	452
Biologic False Positive Serologic Reactions	453
Serum Precipitation Reaction	453
Urine: Albuminuria, Bilirubinuria, Urobilinuria	453
Differential Diagnosis	455
Treatment and Management	457
Prevention and Control	457
General Management	459
Subacute and Chronic Infectious Hepatitis	464
The Pathologic Features of Subacute, Subchronic and Chronic Forms of Hepatitis.	465
Resumé of the Pathologic Sequelæ	470
Chemical Features	471
Clinical Types	471

The Symptoms and Signs of Chronic Hepatitis	472
Physical Findings	473
Laboratory Features	474
Chronic Cholangiolitic (Cholangiolitic) Hepatitis	474
Chronic Portal Hepatitis	477
Pathologic Features	478
Clinical Features	479
Differential Diagnosis	486
Prognosis	487
Treatment and Management	487

CHAPTER VIII

ACUTE AND SUBACUTE LIVER NECROSIS

Acute Diffuse Liver Necrosis; Acute Yellow Atrophy; Acute Red Atrophy of the Liver	499
Etiological Factors	503
Viral Hepatitis	503
Multiple Factors	504
Seasonal Incidence	505
Pathologic Features	506
Micropathology	507
Extrahepatic Lesions Associated with Acute and Subacute Liver Necrosis	508
Symptomatology	510
Liver Function Tests	515
Diagnosis	517
Treatment	518
Prognosis	519
Subacute Liver Atrophy	519
Pathologic Features	520
"Toxic Cirrhosis"	522
Clinical Features; Subacute Liver Atrophy; Toxic Cirrhosis	522
Laboratory Features	525
Prognosis	526
Treatment	526
Infrequent Forms of Subacute Liver Atrophy	526
Chronic and Healed Forms of Liver Atrophy	527
Pathologic Considerations	528
Coarse Nodular Hyperplasia (Marchand) vs. Coarse Nodular Cirrhosis	528

CHAPTER IX

CIRRHOSIS OF THE LIVER

General Considerations	532
Etiological Considerations	534
Underlying Causes	536
The Rôle of Nutrition	536
The Rôle of Alcohol	537
The Rôle of Syphilis in Cirrhosis of the Liver	541
The Rôle of Tuberculosis	542
The Rôle of Malaria	543
Miscellaneous Causes of Cirrhosis	543
Constitutional Factors	546

Experimental Cirrhosis	547
Classification of Cirrhosis	551
Pathology	558
Portal Cirrhosis (Laennec's)	565
Disturbed Architectural Relations of the Liver	568
Regeneration of Liver Tissue under Pathological Conditions	568
Pathologic Conditions Associated with Cirrhosis of the Liver	570
Symptoms and Signs	573
Compensated Stage	573
Decompensated Stage	576
Physical Findings	582
Decompensated Stage	582
Laboratory Features	610
Prognosis	622
Functional Status and Prognosis	623
Treatment	624
Principles of Medical Management	624
Surgical Treatment to Relieve Portal Decompensation	632
Biliary Cirrhosis: Special Types of Cirrhosis	644
Non-obstructive Biliary Cirrhosis	644
Obstructive Biliary Cirrhosis	649
Biliary vs Portal Cirrhosis	654
Special Forms of Cirrhosis	655
Pigment Cirrhosis	655
Hepatolienal Fibrosis	673
Hepatolenticular Degeneration	680

CHAPTER X

HEMOLYTIC JAUNDICE

Chronic, Familial, Hemolytic Jaundice	689
Acquired Hemolytic Jaundice	702

CHAPTER XI

NEW GROWTHS OF THE LIVER

Benign Neoplasms	717
Malignant Tumors	721

CHAPTER XII

ECHINOCOCCUS DISEASE OF THE LIVER

Echinococcus Cysticus	749
The Alveolar (Multilocular) Echinococcus	751
Alveolar Hydatid Tumor of the Liver	759

CHAPTER XIII

LIVER ABSCESS

Pyogenic Liver Abscess	761
Amebic (Non-Pyogenic) Abscess of the Liver. Amebic Hepatitis	767

CHAPTER XIV

THE LIVER IN HYPERTHYROIDISM

Liver Function in Hyperthyroidism	784
---	-----

CHAPTER XV

THE LIVER IN PREGNANCY

Hepatic Changes in Hyperemesis Gravidarum and Eclampsia	792
The Symptomatology of "Hepatoxemia" of Pregnancy	793
Spontaneous Rupture of the Liver	795
Liver Function in Normal and Pathologic Pregnancy	795
The Effect of Jaundice on Gestation. Indications for Therapeutic Abortion	799
The Influence of Hepatic Dysfunction and Jaundice on Menses	800
The Biliary Passages in Pregnancy; Gallstones in Pregnancy	801

CHAPTER XVI

METABOLIC HEPATOMEGALIES

Glycogen Disease; Von Gierke's Disease; Hepato-Nephro Megalia Glycogenica	804
Fatty Liver	809
The Enlarged and Fatty Liver of Diabetes Mellitus	812
Hepatomegaly and Lipoidosis	815
Essential Xanthomatosis	816
Xanthomatous Hepatosplenomegalies	816
Schüller-Christian Disease	816
Xanthomatous Biliary Cirrhosis	817
Xanthomatous Cholangitis	820
Xanthomatous Hepatosplenomegaly Without Cirrhosis and With- out Jaundice	820
Secondary Xanthomatous Diseases Characterized by Xanthoma Formation in the Liver and Spleen	821
Amyloid Disease	821
The Pigment Liver	824

CHAPTER XVII

THE LIVER IN HEART DISEASE

Chronic Congestion of the Liver	827
Factors Causing Jaundice in Heart Failure	835
Pericarditic Pseudocirrhosis of the Liver, "Pick"	838

CHAPTER XVIII

DISEASES OF THE BLOOD VESSELS OF THE LIVER

Diseases of the Hepatic Artery	842
Anemic Infarction of the Liver	842
Hepatic Involvement in Periarteritis Nodosa	846
Aneurysm of the Hepatic Artery	847
Acute Necrotizing Hepatic Arteritis	850
Diseases of the Hepatic Veins	850
Thrombosis of the Hepatic Veins	851
Stricture of the Hepatic Veins	854
Diseases of the Portal Vein	855
Thrombosis of the Portal Vein (Pylethrombosis)	856
Suppurative Pylephlebitis	864
Other Infections of the Portal Vein	870
Portal Hypertension	871

CHAPTER XIX

SPECIFIC INFECTIONS OF THE LIVER

Syphilis of the Liver	876
Congenital Syphilis of the Liver	876
Acquired Syphilis	877
Early Syphilis	878
Late Syphilis	882
Syphilitic Cirrhosis	886
Hepatic Complications of Treatment of Syphilis	887
Post-arsphenamine Jaundice	887
Treatment Cirrhosis	901
Jaundice in Therapeutic Malarial Inoculation	901
Tuberculosis	902
Localized Forms of Tuberculosis	903
Tuberculogenic Hepatic Changes	903
Hepatic Sarcoidosis	907
Hepatic Lepromatous Leprosy	907
Actinomycosis	908
Hepatic Involvement in Hodgkin's	909
Hepatic Histoplasmosis	913

CHAPTER XX

HEPATIC DISEASE AND THE HEMATOPOIETIC APPARATUS	917
---	-----

CHAPTER XXI

DIFFERENTIAL DIAGNOSIS: GENERAL CONSIDERATIONS

Incidence of Common Types of Jaundice	921
Differentiation of the Types and Degrees of Obstructive Jaundice	921
Diagnostic Value of Clinical Features	923
Diagnostic Errors	925
Special Diagnostic Procedures	928

CHAPTER XXII

THE TREATMENT OF LIVER DISEASE

Prophylactic Measures	933
The General Care of the Patient	933
The Treatment of Liver Damage	934
Diet and Nutrition	934
Dietary Adjuncts	936
Lipotrope Therapy	948
Liver Extract	951
Xanthine Therapy	952
Calcium Therapy	952
Testosterone-Estrogen Therapy	953
Thiouracil Therapy	953
Physical Measures	953
Symptomatic Treatment	954
Anemia—Hypoproteinemia	955
The Hemorrhagic Tendency	955
The Treatment of Ascites and Edema	958
The Treatment of Pruritus	959

The Treatment of Bile Stasis	961
The Treatment of Hepatic Coma	964
Chemotherapy—Antibiotic Therapy	965
Surgical Intervention	965
Anesthesia, Surgical Trauma and Liver Damage	965
Preoperative Measures	966
Indications for Surgical Intervention	967

PART II

DISEASES OF THE GALLBLADDER AND BILIARY PASSAGES

CHAPTER XXIII

ANATOMIC FEATURES	975
Histologic Features of the Biliary Tract	981
Anatomic Variations and Anomalies	983

CHAPTER XXIV

PHYSIOLOGY OF THE EXTRAHEPATIC BILIARY TRACT

The Modification of the Composition of the Bile	986
Biliary Tract Kinetics	987

CHAPTER XXV

DISEASES OF THE GALLBLADDER

Gallstones	1000
Inflammation of the Gallbladder (Acute and Chronic Cholecystitis)	1012
Acute Torsion of the Gallbladder	1023
Perforation or Rupture of the Gallbladder	1023
Actinomycosis of the Gallbladder	1023
Parasitic Disease of the Gallbladder	1023
Tumors of the Gallbladder	1024

CHAPTER XXVI

DISEASES OF THE EXTRAHEPATIC BILE DUCTS

Functional Disorders of the Bile Ducts	1032
Post-Cholecystectomy Syndrome	1035
Physiologic Blockade	1036
Infected Lesions of the Bile Ducts	1037
Extrahepatic Biliary Obstruction	1039
Congenital Obstructive Lesions of the Bile Ducts	1044
Congenital Atresia	1044
Choledochus Cyst; Congenital Diverticulum of Common Bile Duct	1045
Acquired Gross Mechanical Obstructive Lesions	1048
Intrinsic Obstructive Lesions of the Bile Duct	1048
Common Duct Stone	1048
New Growths Involving the Lumen of the Extrahepatic Ducts	1056
Foreign Bodies in the Biliary Ducts	1061
Parasitic Disease of the Bile Ducts	1061
Xanthomatous Lesions of the Bile Ducts	1062

Extrinsic Lesions Producing Obstruction of the Extrahepatic Bile	
Ducts	1062
Carcinoma of the Duodenum	1062
Diverticulum of the Duodenum	1063
Cicatrized Duodenal Ulcer and Obstructive Jaundice	1064
Lymphadenopathies; Granulomata; Postoperative Adhesions	1064
Pancreatic Enlargement and Tumors	1065

CHAPTER XXVII

DIAGNOSTIC PROCEDURES IN EXTRAHEPATIC BILIARY TRACT DISEASE

The Cholic or Acholic Stool	1075
Diagnostic Biliary Drainage	1076
Cholecystography	1079
Cholangiography	1080

CHAPTER XXVIII

THE TREATMENT OF BILIARY TRACT DISEASE

Principles of Medical Treatment	1084
Indications for Surgical Treatment of Biliary Tract Disease	1088
Preoperative and Postoperative Management	1088
Postoperative Management	1089
Postoperative Complications	1090
Special Surgical Procedures: Operative Results	1090
The Surgical Treatment of Cholelithiasis and Cholecystic Disease	1091
The Status of Biliary-Intestinal Anastomosis	1096
Contraindications to Cholecystectomy	1097
Partial Cholecystectomy	1097
Prognosis and Mortality	1097

DISEASES OF THE LIVER GALLBLADDER AND BILE DUCTS

BY

S. S. LICHTMAN, M.D., F.A.C.P.

*Assistant Professor of Clinical Medicine, Cornell University Medical College, Assistant
Attending Physician, New York Hospital, Adjunct Physician, Mt. Sinai Hospital,
Assistant in Post-Graduate Medical Instruction, University Extension, Columbia
University, New York*
