## PREFACE

In this age of ever increasing specialization, the Art of Medicine has been supplanted by the Science of Medicine. It would be well to recapture as much as we can the Art of Medicine, which yields such rich rewards to patient and doctor alike.

This book is written for the general practitioner. It is in no sense a text book. The design is to have a source of ready reference for the more common problems encountered in ear, nose and throat. It was a difficult problem to decide what to include and what to exclude. Brevity and clarity were the main objectives. Theoretical discussions and bibliographies are carefully avoided. The author's concept has always been that a knowledge of the applied anatomy is an absolute requisite for diagnosis and the rationale of therapy.

This book would not have reached a tangible form had it not been for the loyalty, devotion and constant expert concentration on this task of my secretary "par excellence," Miss Catherine Boyce. Indeed, the typing, correction of galley proofs and innumerable constructive suggestions have made Miss Boyce a co-author.

It is with mingled emotions that this book is submitted to the general practitioner. Above all else the hope is that it will prove helpful to those who deal with *all* the problems of Medicine.

New York 1957

# PRACTICAL OTOLARYNGOLOGY

# CONTENTS

## CHAPTER I

### *Applied Anatomy of the Ear* . . . . . 15

Peripheral Portion of the Auditory Apparatus.

The External Ear • The Middle Ear • Application of the Anatomy • The Internal Ear • The Semicircular Canals.

## CHAPTER II

### *Examination and Functional Test of the Ear* . . . . . 32

Examination of the External Ear and Tympanic Membrane  
• Use of the Head Mirror • The Kind of Light • The Use of an Aural Speculum, the Ear Probe • Aural Irrigation  
• Inspection of the Canal • Functional Examination of the Cochlea Apparatus.

Simple Voice Test • The Barony Noise Apparatus • Watch Test • Tuning Fork Tests • The Rinne, Schwabach, and Weber Tests • Low and High Limit Tests.

Clinical and Physical Application Audiometric Readings.

Middle Ear Disease • Inner Ear Disease • Combined Forms of Ear Disease • Deaf Mutisme.

Functional Examination of the Vestibular Apparatus.

## CHAPTER III

*Pathological Conditions of the External Auditory Canal . . . . .* 59

Ceruminous Glands.

Removal of Impacted Cerumen • The Auricle and External Auditory Canal • Perichondritis of the Auricle • Frost-bite • Otitis Externa.

## CHAPTER IV

*Diseases of the Middle Ear . . . . .* 66

Middle Ear Infection • Acute Eustachian Tube Salpingitis; Accidents.

Aero Otitis.

Acute Catarrhal Otitis Media • Acute Serous Otitis Media • Acute Purulent Otitis Media • Myringotomy; Accidents; Aftercare • The Differential Diagnosis of Earache or Otalgia • Chronic Catharral Otitis Media • Tinnitus • Chronic Purulent Otitis Media • Vertigo • Fistula Test • Facial Paralysis.

## CHAPTER V

*The Mastoid . . . . .* 107

Acute Mastoiditis • Indications for Simple Mastoid Operation • Surgery of the Mastoid.

Surgery of the Acute, and Chronic Infections of the Mastoid.

## CHAPTER VI

*Dizziness . . . . .* 128

Definition of Dizziness • Differential Diagnosis.

## CHAPTER VII

*Applied Anatomy of the Nose and Paranasal Sinuses* . . . 146

Examination of the Nose • Illumination • Posterior Rhinoscopy.

## CHAPTER VIII

*Diseases of the External Nose* . . . . . 159

Skin lesions, Infections, Injuries • Technique for the Reduction and Care of a Fractured Nose • Malignancies.

## CHAPTER IX

*The Common Cold. The Differential Diagnosis of Cough* 166

Etiology, Treatment and Complications.

The Differential Diagnosis of Cough • The Character of Cough • Cough in Children.

Extraneous or Atypical Causes of the Cough Reflex in Adults.

## CHAPTER X

*Chronic Hypertrophic Rhinitis, Nasal Polyps, Deviation and Malformations of the Nasal Septum, Indications for Surgery* . . . . . 193

Chronic Hypertrophic Rhinitis • Nasal Polyps • Septal Deviations and Malformations • Technique of the Submucous Resection.

## CHAPTER XI

*Allergic Rhinitis* . . . . . 199

Hay Fever • Pollinosis • Vasomotor Rhinitis.

Differential Diagnosis of Hay Fever and the Common Cold.

CHAPTER XII

*Nasal Hemorrhage. Foreign Bodies in the Nose . . . . .* 203

Epistaxis, Nosebleed • Technique for the Insertion of a Postnasal Plug.

Foreign Bodies in the Nose.

CHAPTER XIII

*Sinusitis . . . . .* 211

Acute Sinusitis.

Vasoconstrictors • Antihistamines • Antibiotics • Bacteriostatic or Bacteriocidal Drugs • Severe Infections • Chronic Sinusitis • Surgical Intervention.

CHAPTER XIV

*Surgery of the Paranasal Sinuses . . . . .* 221

Indications and Management • Reaction to Surgery.

The Ethmoid Sinus • Frontal Sinus • Sphenoid Sinus.

CHAPTER XV

*Sinusitis in Children . . . . .* 233

Symptoms • Diagnosis • Treatment • Complications.

CHAPTER XVI

*Postnasal Drip . . . . .* 237

CHAPTER XVII

*Applied Anatomy and Examination of the Pharynx . . . . .* 242

## CHAPTER XVIII

*The Tonsils* . . . . . 247

The Faucial Tonsils, Adenoids and Lingual Tonsils • Acute  
 Lacunar Tonsillitis • Hyperplasia of the Tonsil • Chronic  
 Fibrotic Tonsillitis • Acute Peritonsillar Abscess • De-  
 scription of Operative Technique • Vincent's Angina.

## CHAPTER XIX

*The Wet-Suction Irrigation Technique in the Treatment  
 of Infections of the Tonsil* . . . . . 258

## CHAPTER XX

*Surgery of the Tonsils* . . . . . 266

Indications for and Contraindications to Tonsillectomy  
 • Description of Tonsillectomy Operative Technique  
 • Complications • Anesthesia.

## CHAPTER XXI

*The Adenoid and Lingual Tonsil* . . . . . 274

Diseases of, Surgical Technique, Complications • Post-  
 operative Adenoid Hemorrhage.

## CHAPTER XXII

*Hoarseness* . . . . . 281

## CHAPTER XXIII

*Maxims in Otolaryngology* . . . . . 284

## CHAPTER XXIV

*Emergencies in Otolaryngology* . . . . . 288

Diagnosis and Treatment.

*Index* . . . . . 315
