CARDIOLOGY  
1988**

**Proceedings**

# **Computers in Cardiology 1988**

 **IEEE Computer Society Press**

Washington • Los Alamitos • Brussels • Tokyo

 **IEEE Computer Society**

**The Institute of Electrical and Electronics Engineers, Inc.**

The papers in this book comprise the proceedings of the meeting mentioned on the cover and title page. They reflect the authors' opinions and are published as presented and without change, in the interests of timely dissemination. Their inclusion in this publication does not necessarily constitute endorsement by the editors, the IEEE Computer Society Press, or The Institute of Electrical and Electronics Engineers, Inc.

## Organizing Committee Members

### Chairmen

**Jerome R. Cox, Jr., Sc.D.**  
Department of Computer Science  
Washington University  
St. Louis, MO 63110 USA

**Jurgen Meyer, M.D.**  
II. Medical Clinic  
Johannes-Gutenberg University  
D-6500 Mainz, FRG

### Past Chairman

**Paul G. Hugenholtz, M.D.**  
Thoraxcentrum  
Erasmus University  
3000 DR Rotterdam, The Netherlands

### Secretaries

**William J. Sanders**  
Cardiology Division  
Stanford University Medical Center  
Stanford, CA 94305 USA

**Cees Zeelenberg, M.S.**  
Thoraxcentrum  
Erasmus University  
3000 DR Rotterdam, The Netherlands

### Treasurers

**Harold G. Ostrow, M.S.**  
Division of Computer Research and Technology  
National Institutes of Health  
Bethesda, MD 20892 USA

**Carlo Marchesi, Ph.D.**  
Department of Systems and Informatics  
University of Florence and  
CNR Institute of Clinical Physiology  
56100 Pisa, Italy

### Proceedings Editor

**Kenneth L. Ripley, M.S.**  
Pritzker Institute of Medical Engineering  
Illinois Institute of Technology  
Chicago, IL 60616 USA

### Associate Editor

**Alan Murray, Ph.D.**  
Regional Medical Physics Department  
Freeman Hospital  
Newcastle-upon-Tyne NE7 7 DN United Kingdom

### Continuing Education

**Roger G. Mark, M.D., Ph.D.**  
Massachusetts Institute of Technology  
Cambridge, MA 02139 USA

## Local Organizing Committee

### Chairman

**Harold G. Ostrow, M.S.**  
Division of Computer Research and Technology  
National Institutes of Health  
Bethesda, MD 20892 USA

### Members

**Robert O. Bonow, M.D.**  
National Heart, Lung, and Blood Institute

**Michael V. Green, M.S.**  
Clinical Center

**Kenneth M. Kempner, M.S.**  
Division of Computer Research and Technology  
National Institutes of Health  
Bethesda, MD 20892 USA

### Tutorials

**James J. Bailey, M.D.**  
Division of Computer Research and Technology  
National Institutes of Health  
Bethesda, MD 20892 USA

### Registration

**Harry Hayman**  
Silver Spring, MD USA

### Social

**Margaret A. Douglas**  
Division of Computer Research and Technology  
National Institutes of Health  
Bethesda, MD 20892 USA

### Conference Staff

**Secretarial**  
**Eve Kaszyneski**

**Technical**  
**Joseph Fessler**

**Proceedings**  
**Catherine D'Amico**

**Social**  
**Emily Dickenson**

**Registration**  
**Gerry Katz**  
**Edith Hayman**

## In Memoriam

**Floyd M. Nolle**

(1938 - 1989)

Floyd Martin Nolle was born in March, 1938, in St. Charles, Missouri. He received his formal education at Washington University in St. Louis, where in 1972 he earned his doctorate in electrical engineering. He served as a research assistant and, later, research associate at the Biomedical Computer Laboratory of Washington University from 1964 until 1975. In 1975, he left to become assistant professor in the Department of Medicine and the Department of Computer Sciences at Northwestern University in Chicago. In 1977, he moved to Omaha, Nebraska, where he served as associate professor in the Department of Medicine of Creighton University until he died of cancer on June 11, 1989.

As a graduate student under the tutelage of Jerome R. Cox, former Co-Chairman of Computers-in-Cardiology, Floyd began working on PVC detection in the surface ECG. What many perceived to be a simple textbook detection problem masked a complicated challenge which would not be well-tamed for more than a decade and a half. For Floyd, it became his doctoral thesis and, in turn, his life's work.

By the late 1960's, Floyd had implemented a real-time ECG monitoring system, which was installed in the new coronary care unit of Barnes Hospital in St. Louis. The system was labeled the "Arrhythmia Guard System" or "Argus" after the ever watchful guardian in Greek mythology. The front-end data-reduction scheme, AZTEC, became the foundation of scores of commercial and research ECG analysis systems. Real-time Argus was soon commercialized by Mennen Greatbatch, now Mennen Medical. Floyd then began to apply Argus to Holter ECG's for which he developed a high-speed version, Argus/H, before leaving St. Louis in 1975.

His legacy was both a research environment and methodology which allowed Argus application and development to flourish for another decade. A second-generation Argus/2H processed ECG recordings for NIH-sponsored multicenter trials and was used to help develop the American Heart Association Database for Ventricular Arrhythmias. A version was exported to the Thoraxcentrum of Erasmus University and to Dalhousie University. An improved St. Louis Argus was eventually commercialized.

After working with ambulatory ECG analysis systems in his later years at Washington University and at Northwestern, Floyd returned to real-time ECG analysis when he joined the Cardiac Center of Creighton University in 1977. As Director of Computer Monitoring Research & Development, Floyd designed and implemented CREI-GARD, a system which simultaneously monitors the ECG rhythms of 81 patients in three separate critical care units of St. Joseph Hospital in Omaha as well as patients in remote hospitals. This system is a new concept that provides the clinical staff with an arrhythmia monitoring service that is operated 24 hours a day by specially-trained technicians. In recent years, Floyd's research interests focused on the detection of ventricular fibrillation. When Floyd presented the evaluation results of his VF detector to this Conference, it was second nature for him to publish his algorithm so others could replicate it.

Floyd was very active in Computers-in-Cardiology; he contributed several papers and often served as workshop or session chairman. He also served as a consultant to the National Heart, Lung, and Blood Institute where he evaluated contract proposals, participated in site visits, served on the Clinical Trials Review Committee, helped plan the Workshop on Holter Monitoring Techniques, and contributed to the Workshop on Ambulatory ECG Monitoring. He was a member of IEEE, Tau Beta Pi, Sigma Xi, the American Association for the Advancement of Science, and the Association for the Advancement of Medical Instrumentation.

Those of us who worked with Floyd will miss his warm friendship and engaging humor. When caught up in a scientific discussion, his easy manner yielded to a passion for the experimental results. No concession to expediency could dissuade him from the path toward scientific truth and honesty. His achievements in rhythm monitoring stand in testimony to his scientific integrity.

This past year was difficult and painful for Floyd. He did not give up but kept working despite the setbacks. His optimism and good cheer transcended the hardships and gave us a glimpse of the courage that lay just beneath the surface.

Floyd is survived by his wife, Sandy; three children: Christopher, Cindy, and Gregory; and two brothers: Harold and Orville.

## Introduction

Computers in Cardiology 88 will be the fifteenth annual meeting of a series that began in 1974 in Bethesda, Maryland. It is significant that we have returned to the city of our original meeting and again are indebted to Dr. Arnold W. Pratt, Director of the Division of Computer Research and Technology of the National Institutes of Health. "Scotty" Pratt is truly the grandfather of Computers in Cardiology since he asked the provocative question, "Is there a forum where physicians, engineers, and computer scientists can discuss scientific problems in the area of computers in cardiology?" Paul Hugenholz and Jerry Cox took over the role of cochairmen in the fledgling organizing committee for the 1974 meeting. We hope that Dr. Pratt is not too surprised that the organization has survived and prospered over the succeeding fifteen years.

As with the first meeting, this meeting is sponsored by the Division of Computer Research and Technology. Those of us on the organizing committee want to express our sincere thanks for their help, both ceremonial and financial, this year and over the years in between.

The program for Computers in Cardiology 88 is again an exciting one. New features include an industry forum entitled "Focus on Real-Time Solid-State Ambulatory ECG Arrhythmia Analyzers." Those of us who have attended each of the meetings of Computers in Cardiology have had the opportunity to observe the growth and now maturity of this important field, a field whose maturity can be judged by the strong interests that industry demonstrates by providing state-of-the-art systems for ambulatory arrhythmia analysis.

To give attendees a preview of future developments of interest to us all, Dr. John Watson and Dr. Alan Berson of the National Heart, Lung and Blood Institute have organized an invited session on cardiovascular technology. We are sure that all of you will be interested in the three talks that will cover exciting new research supported by NHLBI.

We send our congratulations to the local hosts. Beyond the excellent technical program, this return to Bethesda will be an occasion for much reminiscing for a few of us and an opportunity for many to visit our nation's capital, NIH and the once sleepy, but now thriving, city of Bethesda, Maryland.

**Jerome R. Cox, Jr., Sc.D.**  
**Jurgen Meyer, M.D.**

Cochairmen, Computers in Cardiology

# **1988 Computers in Cardiology Conference Washington, D.C.**

## **Table of Contents**

### **Plenary Session I**

#### **3-D Imaging**

J.R. Cox, Jr. and J. Meyer

---

**1**

#### **Ultrasonic Imaging of Arterial Structures Using 3D Solid Modelling**

R.I. Kitney, L. Moura, K. Straughan, C.J. Burrell, M.T. Rothman and  
A.H. McDonald

**3**

#### **Dynamic Display and Quantitative Analysis of Three-Dimensional Left Ventricular Pathology**

W.A. Barrett and J.K. Udupa

**7**

#### **3-D Quantitative Assessment of Coronary Luminal Morphology using Biplane Digital Angiography**

R.O. Kenet, E.M. Herrold, G.J. Tearney, K.K. Wong, J.P. Hill and J.S. Borer

**13**

#### **Three-Dimensional Echocardiographic Reconstruction and Geometric Analysis of the Human Mitral Valve**

M.D. Handschumacher, A.J. Sanfilippo, P. Harrigan, A.E. Weyman and  
R.A. Levine

**19**

#### **Computer-Generated 3D Ultrasound Images of the Carotid Artery**

R.H. Selzer, P.L. Lee, J.Y. Lai, H.J. Frieden and D.H. Blankenhorn

**21**

### **Plenary Session II**

#### **NHLBI Supported Research in Cardiovascular Diagnostic and Therapeutic Instrumentation: Invited Papers on the State-of-the-Art**

J.T. Watson

---

**27**

#### **Implantable Microprocessor-Based Devices for the Management of Arrhythmia**

R.C. Arzbaecher, T. Bump, K.L. Ripley, C.E. Yurkonis, J. Jenkins and K. Noh

**29**

### **Plenary Session III**

#### **Electrophysiological Mapping**

R. Ideker and L. Fananapazir

---

**35**

#### **Individualized Modeling of the Heart and Torso for Finite Element Method to Be Used in Forward Calculation of Body Surface Map**

M. Okajima, K. Doniwa, T. Yamana, K. Ohta, N. Suzumura, A. Iwata and  
K. Kamiya

**37**

#### **Multivariate Analysis of Body Surface Potential Maps in Left Ventricular Hypertrophy**

F. Kornreich, T.J. Montague, P.M. Rautaharju, M. Kavadias and M.B. Horacek

**43**

<b>Compression of Body Surface Potential Maps and Estimation of Their Dynamic Changes</b> D. Adam and S. Gilat	49
<b>Computed Bipolar Electrograms from Unipolar Epicardial Recordings</b> S.M. Blanchard, W.M. Smith, W.C. Buhrman, R.E. Ideker and J.E. Lowe	55
<b>Comparison of Electrophysiologic Data across Diverse Cardiac Geometries</b> S.L. Reiser, A.S.L. Tang, N.D. Danieleley, R.E. Ideker and W.M. Smith	61
<b>Session 1</b>	
<b>3-D Imaging</b>	65
S.L. Bacharach	
<b>Three-Dimensional Reconstruction of the Left Ventricle Using RP30A GSPECT</b> D. Sapoznikov, S. Rosenheck, D. Stone, S.H. Snyder, S. Yaffe, M.S. Gotsman and H. Atlan	67
<b>Determination of Intra-Arterial Volumes from Biplane Coronary Angiography</b> N. Guggenheim, P.-A. Dorsaz, P.-A. Doriot, P. Descouts and W. Rutishauser	71
<b>A Parallel-Processing Subsystem for Rapid 3-D Interpolation of CT Images</b> S.R. Cannon, S.J. Allan and W.A. Barrett	75
<b>A Comparison of Two Analytical Systems for 3-D Reconstruction from Biplane Videoradiograms</b> G.T. Daughters, W.J. Sanders, D.C. Miller, A. Schwarzkopf, C.W. Mead and N.B. Ingels, Jr.	79
<b>Session 2</b>	
<b>Repolarization Studies</b>	83
J.L. Willems	
<b>Quantitation of Ventricular Repolarization: A New Approach</b> M. Merri, M. Alberti, J. Benhorin, W.J. Hall, E. Locati and A.J. Moss	85
<b>Real-Time Detection of Ischemic ECG Changes Using Quasi-Orthogonal Leads and Artificial Intelligence</b> J. Oates, B. Cellar, L. Bernstein, B.P. Bailey and S.B. Freedman	89
<b>Frequency Response Characteristics of Ambulatory ECG Monitoring Systems and Their Influence on ST-Segment Performance</b> Th. Brüggemann, D. Andersen and R. Schröder	93
<b>Clinical Evaluation of a Bedside ST-Segment Monitor</b> M.P. Burns and W.G. Downs	97

<b>Session 3</b>	
<b>Mathematical Modelling</b>	<b>101</b>
<b>M. Okajima</b>	
<hr/>	
<b>Adaptive and Sampled-Data Control of Blood Levels of Antiarrhythmic Drugs</b>	<b>103</b>
J.L. Larsen, R.C. Arzbaecher, J.M. Jenkins, C.E. Yurkonis and T. Bump	
<b>Intraaortic Balloon Pumping During Low Cardiac Output: Validation of a Mathematical Model</b>	<b>107</b>
W.J. Ohley, H.J. White, O. Lemaire and H. Gewirtz	
<b>A 3-Dimensional FEM Model of the Human Thoracic Cavity for Simulation of Impedance Cardiography</b>	<b>111</b>
D.J. Peters and T.L. Rhyne	
 <b>Session 4</b>	
<b>Edge Detection</b>	<b>115</b>
<b>W.J. Sanders and R. Brennecke</b>	
<hr/>	
<b>Detecting Heart Wall Boundaries by Tracking Features in an Echocardiogram Sequence</b>	<b>117</b>
C.-H.H. Chu and E.J. Delp	
<b>Improving Left Ventricular Border Recognition Using Probability Surfaces</b>	<b>121</b>
R.E. van Bree, D.L. Pope and D.L. Parker	
<b>Automated Detection of Left Ventricular Boundaries for Thallium-201 Scintigrams</b>	<b>125</b>
K.J. Cios, A. Sarieh and L.S. Goodenday	
<b>Real-Time Echocardiographic Noise Reduction, Border Extraction, and Velocity Derivation</b>	<b>129</b>
J.D. Thomas, R.A. Higginbotham, A.M. Waxman, A.D. Popovic and A.E. Weyman	
<b>Local Myocardial Deformation Computed from Speckle Motion</b>	<b>133</b>
J. Meunier, M. Bertrand, G.E. Mailloux and R. Petitclerc	
<b>Automated Endocardial Contour Detection in Short-Axis 2-D Echocardiograms; Methodology and Assessment of Variability</b>	<b>137</b>
J.G. Bosch, J.H.C. Reiber, G. van Burken, J.J. Gerbrands, W.J. Gussenhoven, N. Bom and J.R.T.C. Roelandt	
 <b>Session 5</b>	
<b>Signal Processing</b>	<b>141</b>
<b>C. Marchesi and J.M. Jenkins</b>	
<hr/>	
<b>Sampling Frequency of the Electrocardiogram for Spectral Analysis of the Heart Rate Variability</b>	<b>143</b>
M. Merri and E.L. Titlebaum	
<b>Assessment of Autonomic Regulation to Heart Rate Variability by the Method of Complex Demodulation</b>	<b>147</b>
S. Shin, S.S. Reisman, W.N. Tapp and B.H. Natelson	

<b>Heartbeat Detection in a Microwave Monitor Using an Adaptive Least Squares Lattice Filter</b> P.A. Mahoney, E.A. Needham and M. Siegel	151
<b>Electrocardiogram Signal Processing by Morphological Operators</b> C.-H.H. Chu and E.J. Delp	153
<b>Session 6</b>	
<b>Arrhythmia Analysis and Data Compression</b> K.L. Ripley and C. Zeelenberg	157
<hr/>	
<b>Arrhythmia Diagnosis Using Morphology and Timing from Atrial and Ventricular Leads</b> D. Lin, J.M. Jenkins, L.A. DiCarlo and R.S. MacDonald	159
<b>Improved Arrhythmia Detection in Noisy ECGs Through the Use of Expert Systems</b> S.D. Greenwald, R.S. Patil and R.G. Mark	163
<b>Evaluation of the "TRIM" ECG Data Compressor</b> G.B. Moody, R.G. Mark and A.L. Goldberger	167
<b>ECG Data Compression for Ambulatory Device</b> C. Lamberti and P. Coccia	171
<b>Multisource Comparative QRS-Wave Analysis of Premature Ventricular Beats and Monomorph Ventricular Tachycardia</b> W.A. Dijk, J.H. Kingma, H.J.G.M. Crijns, W. van der Velde, J.M. Verroste and N.M. van Hemel	175
<b>Session 7</b>	
<b>Medical Decision Making</b> T.A. Pryor	179
<hr/>	
<b>Expert Advisor System for the Management of Interventions in Acute Myocardial Infarction</b> J.L. Elion	181
<b>Differential Diagnosis Generation from a Causal Network with Probabilities</b> W.J. Long, S. Naimi, M.G. Criscitiello and G. Larsen	185
<b>Factor Analysis Applied to Acute Myocardial Infarction</b> S.H. Brooks, S.L. Norris, M. deGuzman and L.J. Haywood	189
<b>Representing Uncertainties in a Diagnostic Expert System for Coronary Arterial Stenosis</b> K.J. Cios, R.E. Freasier and L.S. Goodenday	193
<b>An Expert System for Thrombolysis in Acute Myocardial Infarction (ADMIT)</b> E.L. Alderman and A. Rappaport	197

Session 8  
**Myocardial Perfusion**  
R.O. Bonow

201

**Automated Analysis of Contrast Echocardiographic Time-Intensity Curves to Predict Myocardial Perfusion**

203

C. Boyle, R. Saleh, A. Kemper, D. Nickerson and A. Parisi

**Computerized Analysis of the Transmural Distribution of Myocardial Echo-Contrast Effect**

207

E.M. Ferdeghini, D. Rovai, M. Lombardi, A. Benassi and A. L'Abbate

**Computerized Radio-Frequency Analysis of Concentration and "Decay" of Echo-Contrast Agents**

211

G. De Pieri, D. Rovai, A. Mazzarisi, L. Landini, M. Lombardi, A. Distante, L. Taddei, A. Benassi and A. L'Abbate

**The Accuracy of Densitometric Time Parameters in the Analysis of Myocardial Perfusion**

215

G.J.H. Uijen, N.H.J. Pijls, A. Hoevelaken and T. van der Werf

**Arterial Blood Concentration Curves by Cardiac PET without Arterial Sampling or Image Reconstruction**

219

S.L. Bacharach, A. Cuocolo, R.O. Bonow, R.E. Carson, E.F. Unger  
C. Sheffield, R. Finn, S. Stein, P. Herscovitch and M.V. Green

Session 9

**Stress Electrocardiography**

221

R. Degani

**A Knowledge Base Controlled Signal Processing and Scoring System for the Exercise ECG**

223

R. Liang, T.A. Pryor and F. Yanowitz

**Computer ST Segment Measurement during Transesophageal Atrial Pacing Stress**

227

H. Jadvar, J. Jenkins and R.C. Arzbaecher

**Comparison of Exercise Algorithms for Diagnosis of Coronary Artery Disease**

231

J.W. Deckers, B.J. Rensing, R.V.H. Vinke and M.L. Simoons

Session 10

**Modelling of Arrhythmia Mechanisms**

235

R.J. Cohen

**Multiple Oscillatory and Steady State Solutions in an Excitable Cardiac Cell Model**

237

M. Landau and P. Lorente

**Hysteresis Phenomena in Excitable Cardiac Cells Analyzed by a Microcomputer System**

241

P. Lorente, C. Delgado, M. Delmar, D. Henzel and J. Jalife

<b>Model Studies of Infarct Zone Epicardial Electrograms</b> D.B. Geselowitz and E.J. Berbari	<b>245</b>
<b>Entrainment in Modulated Parasystole</b> C.A. Swenne	<b>249</b>
<b>Session 11</b>	
<b>Nuclear Cardiology</b> M.V. Green and D.F. Vitale	<b>253</b>
<hr/>	
<b>Improved Radionuclide Ventricular Volume Analysis using a Computerised Non-Homogeneous Torso Model</b> G.E. Haloutsos, J.M. Beattie, J.P. Fox, P.J. Roberts, W.A. Littler and R.G. Murray	<b>255</b>
<b>Parallel Distributed Processing as a Decision Support Approach in the Analysis of Thallium-201 Scintigrams</b> G. Porenta, G. Dorffner, J. Schedlmayer and H. Sochor	<b>259</b>
<b>ART3H Reconstruction of 7-Pinhole Tomographic Myocardial Perfusion Imaging in the Evaluation of Coronary Angioplasty</b> J.H.Z. Bánki, P.P. van Rijk, J.W. van Giessen, A. van Dongen, E.O. Robles de Medina and C.A. Ascoop	<b>263</b>
<b>Nonparametric Comparison of Two Tests of Cardiac Function on the Same Patient Population Using the Entire ROC Curve</b> G. Campbell, M.A. Douglas and J.J. Bailey	<b>267</b>
<b>Diffuse Coronary Atheromatosis and Sensitivity/Specificity to Detect Coronary Stenosis by Exercise Thallium-201 Scintigraphy</b> C.-G. Ericsson, U. de Faire, A. Hamsten, L. Mesko, A. Szamosi, S. Zetterquist and L. Erhardt	<b>271</b>
<b>Session 12</b>	
<b>Left Ventricular Wall Motion</b> R.O. Cannon III	<b>275</b>
<hr/>	
<b>Measurement of End Diastolic Shape Deformity Using Bending Energy</b> J.S. Duncan, A. Smeulders, F. Lee and B.L. Zaret	<b>277</b>
<b>Physiologically Based Non-Linear Segmentation of LV Borders</b> J. Sitomer, M.T. LeFree, S.F. Deboe, S.B. Simon, E.G. Anselmo, P.R. Williamson, S.J. Kalbfleisch and G.B.J. Mancini	<b>281</b>
<b>An Algorithm for Coronary Artery Shortening Applied to the Assessment of Regional Wall Motion During Coronary Angioplasty</b> R.A. Perry, P.F. Wankling, A. Seth, A.C. Hunt, F. Westwood, S.C.H. Smith, J.A. Newell and M.F. Shiu	<b>285</b>
<b>Optical Flow Restoration of X-Ray Images of the Heart Using the Theory of Convex Projections</b> G.E. Mailloux and M. Bertrand	<b>289</b>
<b>Computational Geometry of Heart Surfaces</b> G. Coppini, M. Demi, A. L'Abbate and G. Valli	<b>293</b>

## Session 13

### Heart Rate Variability

R.I. Kitney and G.B. Moody

297

#### Nonlinear Interactions between Respiration and Heart Rate: Classical Physiology or Entrained Nonlinear Oscillators

J.P. Saul, D.T. Kaplan and R.I. Kitney

299

#### A Study of Non Stationary Phenomena of HRV During 24-Hour ECG

##### Ambulatory Monitoring

F. Kauffmann, P. Maison-Blanche, B. Cauchemez, J. Deschamps,  
J. Clairambault, P. Coumel, J. Henry and M. Sorine

303

#### Use of a Phase-Locked Loop to Correct Heart Rate Variability Artifacts in Data from Human Cardiac Transplant Recipients

M.L. Appel and R.J. Cohen

307

#### Estimation of Heart Rate Power Spectrum Bands from Real-World Data: Dealing with Ectopic Beats and Noisy Data

P. Albrecht and R.J. Cohen

311

#### Circadian Changes of Heart Rate Variability

Y. Ichimaru, Y. Kodama and T. Yanaga

315

#### HRV during Exercise in Sedentary Subjects and Athletes

G. Baselli, S. Cerutti, T. Interdonato, C. Orizio, R. Perini,  
and A. Veicsteinas

319

## Session 14

### Detection of Ventricular Fibrillation

R.C. Arzbaecher and A.E. Aubert

323

#### Detection of Ventricular Fibrillation by Sequential Testing

Y.-S. Zhu and N.V. Thakor

325

#### Coherence Measures of Cardiac Arrhythmias from Intra-Cardiac and Epicardial Leads

A.V. Sahakian, K. Ropella, J. Baerman and S. Swiryn

329

#### Relation among Power Spectrum, Refractory Period and Conduction Time during Ventricular Fibrillation

M.T. Arredondo, G. Martin, S. Guillén, M. Such and A. Quesada

333

#### Evaluation of a Frequency-Domain Algorithm to Detect Ventricular Fibrillation in the Surface Electrocardiogram

F.M. Nolle, R.W. Bowser, F.K. Badura, J.M. Catlett, R.R. Gudapati, T.T. Hee,  
A.N. Mooss and M.H. Sketch, Sr.

337

#### Recognition of Ventricular Fibrillation and Tachycardia from Electrogram Analysis

A.E. Aubert, B.N. Goldreyer, M.G. Wyman, H. Ector and H. De Geest

341

## Session 15

### Vessel Measurement

G.D. Walford

#### Automated Morphometric Analysis of Coronary Artery Lesions: An Extension of Quantitative Coronary Arteriography

S.B. Simon, M.T. LeFree, M.J. McGillem, S.J. Kalbfleisch,  
E.G. Anselmo, J. Sitomer, S.F. DeBoe, S. Ellis and G.B.J. Mancini

347

#### Derivative-Based Edge Detection in Quantitative Coronary Angiography Is Not Independent of Vessel Size

D.M. Herrington, M. Siebes, G.D. Walford and R.H. Selzer

351

#### Optical Distortion Due to Geomagnetism in Quantitative Angiography

U. Solzbach, H. Wollschläger, A. Zeiher and H. Just

355

#### Spatial Orientation of Segments of the Coronary Arteries Evaluated from 100 Coronary Angiograms

U. Solzbach, H. Wollschläger, A. Zeiher, B. Willer, A. Philipp and H. Just

359

#### Effects of Cardiac Phase on Diameter Measurements from Coronary Cineangiograms

R.H. Selzer, M. Siebes, C. Hagerty, S.P. Azen, P.L. Lee, D.H. Blankenhorn and  
A. Shircore

363

## Session 16

### Late Potentials

M.E. Cain

367

#### A Cardiac Mapping System for Identifying Late Potentials: Correlation with Signal Averaged Surface Recordings

E.J. Berbari, P. Lander and D.B. Geselowitz

369

#### Spectral Analysis of the Entire Cardiac Cycle from Signal-Averaged ECGs for the Detection of Patients Prone to Ventricular Tachycardia

H.D. Ambos, J. Markham, S.M. Moore and M.E. Cain

373

#### Signal Averaging of Ventricular Late Potentials using Holter Recordings

P. Lander, J.S. Steinberg, J.T. Bigger, Jr. and E.J. Berbari

377

## Session 17

### Ventricular Fibrillation

D.R. Adam and S.M. Blanchard

381

#### Directional Variability of Cardiac Fibres Stimulation Threshold: Relationship with Orthogonal Defibrillation Shocks

A. Bardou, J. Degonde, J.M. Chesnais, P.J. Birkui and P. Auger

383

#### Computer Simulation of Ventricular Fibrillation and of Defibrillating Electric Shocks

P.M. Auger, A.L. Bardou, A. Coulombe and J.M. Chesnais

387

#### Computer Generation of Fibrillation in a 3-Dimensional Model of Heart

N.V. Thakor and L.N. Eisenman

391

**Three Dimensional Finite Element Model of Electric Fields in Internal Defibrillation**

N. Thakor, K. Kothiyal, R. Shankar and L. Fogelson

395

**A Model of the Heart's Conduction System Using a Self-Similar (Fractal) Structure**

D. Eylon, D. Sadeh, Y. Kantor and S. Abboud

399

**Refractory Period Dynamics and Cardiac Stability: Results from a Computer Model**

D.T. Kaplan and R.J. Cohen

403

**Poster Session**

407

**A Novel Quadrature Interference Subtraction Technique in ECG Noise Reduction**

H. Köymen, Y.Z. Ider, G. Hizarci, F. Küçükdeveci, F. Tüzün and I. Yaylali

409

**The Pseudo-Inverse Solution: Attenuation Compensated Body Surface Potential Maps**

D.M. Monro, S.W. Edwards and D.L. Wilson

413

**Digital Angiography: An Open-System Dedicated to Left Ventricular Function Studies**

C. van Eyll, O. Gurne, M.F. Rousseau, J. Etienne, A.A. Charlier and H. Pouleur

417

**Some Results on a Fractal-Like Behavior of ECG Signals**

A. Casaleggio, S. Pestelli, G.S. Mela and S. Ridella

421

**Complex Irregular Dynamics in a Computer Model of Vagal Control of the Cardiac Pacemaker**

D.C. Michaels, D.R. Chialvo and J. Jalife

425

**Left Ventricular Analysis from Cardiac Images Using Deformable Models**

L.H. Staib and J.S. Duncan

427

**Improved Personal Computer-Based System Supports Qualitative and Quantitative Applications of 3D Body Surface Precordial Maps**

F.J.S. Almeida, N.F.S. Especial, A.C. Da Cunha, J.A. Comprido, J.C.R.L. Fernandes, A.M. Aleixo, V. Gil and R. Seabra-Gomes

431

**A Portable and Simple Microcomputer System for Quantitative Assessment of Cardiovascular Therapy in Critical Patients**

S.G. Lage, M.A. Gutierrez, M.C. Monachini, C.P. Melo, G. Bellotti and F. Pileggi

435

**A Computerized System to Measure Intracellular Enzymes in Cardiac Muscular Fibers**

C.A. Pasqualucci, S.G. Lage, N. Macha and F. Pileggi

439

**Performance Evaluation of Algorithms for Late Potentials Detection: A Simulated Study**

G. Pinna, G. Orsi, M. Mingon, A. Tangenti and E. Traversi

443

**An MR Workstation for Quantitative Analysis of Cardiac Images**

L.T. Andrews, P.T. Tam, R.F. Leighton, G. Williams, W.J. Potvin, R.A. Brinker and J.W. Klingler

445

**Synthesis of the 12 Lead Electrocardiogram from a 3 Lead Semi-Orthogonal Subset Using Patient-Specific Linear Transformation Arrays**

J.A. Scherer and J.M. Nicklas

449

<b>Automatic Detection of Echocardiographic LV-Contours: A New Image Enhancement and Sequential Tracking Method</b> A.P. Monteiro, J.P. Marques de Sá and C. Abreu-Lima	453
<b>Using Hypermedia to Teach Cardiovascular Imaging: A Prototype System Based on Hypercard</b> J.W. Klingler, R.F. Leighton and L.T. Andrews	457
<b>Dynamic Frequency Spectrum Analysis: Application in Organized and Disorganized Electrocardiographic Signals</b> P.-W. Hsia, S.R. Jolly and R. Mahmud	461
<b>Electrocardiographic Data Compression Using Preceding Consecutive QRS Information</b> P.-W. Hsia	465
<b>A Workstation Network for Cardiac Electrophysiology</b> N.D. Danieleley, P.D. Wolf, R.E. Ideker and W.M. Smith	469
<b>A Technological Environment and A Software Product for Teaching Dynamic Electrocardiography</b> F. Pinciroli, V. Castelli and G. Mosca	473
<b>A Respiration-Related EKG Database</b> F. Pinciroli, G. Pozzi, R. Rossi, M. Piovosi, A. Capo, R. Olivieri and M. Della Torre	477
<b>Improved Alignment Methods in ECG Signal Averaging: Application to Late Potentials Detection</b> R. Jané, P. Caminal, H. Rix, E. Thierry and P. Laguna	481
<b>Non-Invasive Determination of Cardiac Output by Transesophageal Doppler Ultrasound: Clinical Application and Validation</b> M. Haude, Th. Gerber, R. Brennecke, R. Erbel and J. Meyer	485
<b>ARCA: Integrated System for Cardiac Pathologies Diagnosis and Therapy</b> E. Oliveira, J. Rocha, C. Abreu-Lima and J.P. Marques de Sá	489
<b>Comparison of Two Methods for Removing Baseline Wander in the ECG</b> J.R. Gradwohl, E.W. Pottala, M.R. Horton and J.J. Bailey	493
<b>Steps to a Fully Computerized Cardiac Catheterization Laboratory</b> D.G.W. Onnasch and P.H. Heintzen	497
<b>A Computer System for the Analysis of Left Ventricular Pressure and Volume</b> L.P. van der Linden, W.A. Goos and C.A. Swenne	501
<b>Image Selection for Volume Calculations in Digital Ventriculography</b> J.-E. Angelhed	505
<b>Framework for a Comprehensive Method of Evaluating Heart Rate and Arrhythmia Monitors</b> R.M. Armington and W.R. Crosby	509
<b>Left Ventricular Aneurysmectomy and Jatene Ventriculoplasty: Early Functional and Morphological Results</b> C. Vassanelli, G. Morando, M. Turri, G. Menegatti, G. Besa and P. Zardini	513
<b>Arrhythmias Diagnostic Expert System in Veterans General Hospital, Taipei</b> C.-Y. Chen, S.-R. Chen, T. Kao and B.C. Yu	517

<b>Knowledge-Based Method for Quantification of Doppler Spectral Data</b> S.M. Lobodzinski, T. Loevenskiold, L.E. Ginzton and M.M. Laks	521
<b>Knowledge Engineering in Cardiology: The Importance of the Human Expert</b> W.R.M. Dassen, P. Brugada, J.R.L.M. Smeets, P. Torner, R. Mulleneers and H.J.J. Wellens	523
<b>Computer Simulation of Reentry Tachycardias</b> M.J.S. Begemann, W. Dassen and K. den Dulk	527
<b>Implementation of a Computerized Nuclear Cardiology Database on the Veterans Administration Fileman System</b> F.C. Robinson, D.W. Lum, A. Beyoglu, A.J. Robinson-White, J.J. Smith and R.D. Fletcher	531
<b>Design of Integrated DSP Solutions for Cardiac Problems Using Revolutionary VLSI Methodologies</b> H. Vandenbogaerde, J. Verbeke, J. Vanneuville, A. Sinnaeve, A.E. Aubert and H. De Geest	535
<b>CADANS: Design and Implementation of a Data Network for Cardiology: A Progress Report</b> G.T. Meester, O.E. Sartorius, D. Fanggidaej, F. van Rappard, P.C. Lauret, E. vd Berge, M.G. Gerritsen and J.v. Kester	539
<b>A Computer PC Solution for the Electrophysiology Laboratory</b> A.J. van der Steld, L.R.B. Dohmen, J. Smeets, P. Brugada and H.J.J. Wellens	541
<b>A Quantitative Cardiac Angiography System for Use in a Clinical Trial</b> W. Sanders, B. Hollak, M. Stadius and E. Alderman	543
<b>An Automated Video Image Analysis for Detection and Tracking Implanted Myocardial Markers</b> A. Macerata, W.J. Sanders, E.L. Alderman and D.C. Miller	547
<b>A Fuzzy Pattern Matching Technique for Diagnostic ECG Classification</b> G. Bortolan, R. Degani and W. Pedrycz	551
<b>Beat-to-Beat Spectral Analysis of Epicardial Electrogram Under Acute Ischemia in Dogs</b> V. Mor-Avi, B. Shargorodsky and S. Akselrod	555
<b>Detection of Ventricular Fibrillation and Ventricular Tachycardia from the Surface Lead Electrocardiogram</b> S.H. Meij, C. Zeelenberg and A. Algra	559
<b>Industry Forum</b> <b>Focus on Real-Time Solid-State Ambulatory ECG Arrhythmia Analyzers</b> K.M. Kempner and R.G. Mark	561
<b>Frequency Response Characteristics of Digital Ambulatory ECG Recording Systems as Compared to Tape Based Ambulatory ECG Recording Systems as Required for ST Segment Analysis</b> J.H. Brown and S. Halpin	563
<b>The Evolution of Compas Algorithm Development for Arrhythmia and ST Segment Analysis</b> J.M. Carson, Jr.	565
