More and more advertisements appear on the Web. You have to be careful not to be fooled or tricked(欺骗) by the advertisements on the Internet. Something is said to be a bargain(便宜物品), but it isn't always cheap. And some so-called new things just have a new outside.

However, shopping online is a kind of fashionable thing today. I love to buy things of everyday use, so I often get lots of information about them on websites online. For example, if I want an MP3, I can choose my favorite one, and look for what the users like or don't like about it, then decide whether to buy or not. And at the same time, you don't have to go to a shop or walk around a crowded shopping area, so you don't have to waste much time. The Internet is really useful for shopping, but be careful not to spend too much.

请根据下面短文回答第 61—65 题:

Some vegetables need a lot of sunshine. A vegetable expert at the University of Marine advised planting these vegetables where they can get eight to ten hours of sunlight a day.

Tomatoes, melons, squash and peppers are among those that need the most sunshine.

Farmers often feel it needs a lot of sunshine to produce a good crop. The Rodale Institute in Pennsylvania, however, says that lots of vegetables grow well without much sunshine. The research center published a report about this subject some years ago in its magazine *Organic Gardening*. The report says many different kinds of crops from blueberries to beans can be grown in the shade.

The Rodale Institute says a garden should be planned carefully especially if you grow different kinds of vegetables. For example, rows of vegetables should be planted in an east-west direction. In that way, as the sun passes overhead, all the plants will receive an equal amount of light. This is especially important when the plants grow to different heights.

Some fruits also grow well without a lot of sunlight. In the United States, blueberries and several kinds of pears need only a little sunshine each day. In Asia, the hardy kiwi grows well in the shade.

- ()61. Which plant needs eight to ten hours of sunshine a day according to the expert at the University of Marine?
[A] Blueberries. [B] Pears. [C] Tomatoes.
- ()62. If we want the plants to receive the same amount of sun-shine, what should we do?
[A] Plant them in an east-west direction.
[B] Plant them in the shade.
[C] Plant them in the high place.
- ()63. Which of the following is NOT true according to the passage?
[A] Not all fruits can grow well in the sun.
[B] Melons need less sunshine than a kiwi.
[C] The magazine *Organic Gardening* is published in America.
- ()64. What kind of articles will appear in the magazine *Organic Gardening*?
[A] Some secrets about famous people.
[B] How to get cheaper clothes.
[C] Scientific reports.
- ()65. The passage mainly tells us _____.

[B] crops can grow well without much sunshine
