# ABOUT THE EDITOR

---

**Margaret A. Skurka**, MS, RHIA, CCS, FAHIMA, is a Professor and Director of the Health Information Technology Program at Indiana University Northwest in Gary. She has served as Assistant Dean and Department Chair of HIM for the past 40-plus years at the university. She received her BS in Health Information Management (HIM) from the University of Illinois and was awarded a Master of Science from Purdue University. She has been actively involved in the American Health Information Management Association for her entire career. She served a six-year term on the national Board of Directors of AHIMA, and was the national president in 2000. She received the Association's highest honor of Distinguished Member in 2010. She was named the Alumnus of the Year in the Allied Health Professions at the University of Illinois at Chicago in 2002. Skurka was the president of the International HIM Association in 2013 and was on the board of that association for 12 years. She was named a Chancellor's Professor, one of the university's highest honors, at Indiana University Northwest in 2015. As a consultant, Skurka has provided consulting services to numerous physician practices and ambulatory surgery centers and conducted extensive nationwide training for AHIMA as an approved trainer for ICD-10-CM and PCS.

## ABOUT THE CONTRIBUTORS

---

**Dilhari R. DeAlmeida**, PhD, RHIA, is an Assistant Professor in the Department of Health Information Management at the University of Pittsburgh. She received her Bachelor of Science degree in Cell and Molecular Biology from University of Toronto, Canada. Prior to joining the HIM department, she had over 12 years of experience working in government, academic, and the private sector in the field of Molecular Biology. She received her Master of Science (HIS/RHIA option) and Doctorate degrees from the University of Pittsburgh. Her dissertation research involved evaluating the ICD-10-CM coding system for documentation specificity and reimbursement. Documentation specificity in the ICD-10 coding system and the Electronic Health Record have been a great area of interest and she is an AHIMA-approved ICD-10-CM/PCS trainer. In addition to research, she teaches both the undergraduate and graduate courses in HIM.

**Linda Galocy**, MS, RHIA, is a Clinical Assistant Professor and Program Chair in the Health Information Management programs at Indiana University Northwest in Gary, Indiana. She received her baccalaureate degree in Health Information Management from Indiana University Purdue University in Indianapolis (IUPUI), and Master of Science in Adult Education from IUPUI School of Continuing Education. Prior to joining the full-time faculty at Indiana University Northwest, she held a variety of roles in health information management in acute care. She has been active in her local professional association and the Indiana Health

Information Management Association. She is currently active at the national level for the American Health Information Management Association as a workgroup member for various committees of the Council on Excellence in Education. She continues to consult with physician practices, performing documentation and coding reviews and education. She has presented nationally and teaches a variety of course at the BS and AS level in the HIM programs at Indiana University.

**Katie Kerr**, MA, RHIA, is an Assistant Professor and the Academic Coordinator of Professional Practice Experiences for the Department of Health Informatics and Information Management at The College of St. Scholastica in Duluth, MN. She teaches in both the undergraduate and graduate HIM programs. Prior to joining the CSS HIIM Department, she was a Health Information Manager for Essentia Health in Sandstone, MN for seven years and the IT Department Manager at FirstLight Health System in Mora, MN for three years. Katie is an active Minnesota Health Information Management Association (MHIMA) member and currently co-chairs the Coding Key Focus Area. Mrs. Kerr has a Bachelor and Master's Degree in Health Information Management from The College of St. Scholastica and is currently pursuing her Ed.D. in Leadership in Higher Education at Bethel University in St. Paul, MN.

**Suzanne Paone**, MBA, DHA, RHIA, has a full-time appointment at Ashford University in Health Information Management and dual adjunct appointments at the University of Pittsburgh in the Department of Medicine's HIM Program and the Graduate School of Public Health's MHA program. She also has an adjunct appointment in the MBA Program at Carlow University in Pittsburgh, PA. She holds several not-for-profit board positions and has published on technology adoption, eHealth services innovation, and health data analytics. She has received awards from organizations such as the American Hospital Association and Microsoft for innovation in healthcare operations and IT strategy development. She has more than 10 years of teaching and curriculum

development experience in the academic community in the areas of analytics, informatics, health process transformation, business strategy, and HIM. She is an experienced speaker and a consultant to several academic and healthcare organizations.

**Sandra K. Rains**, MPA, MBA, RHIA, RHIT, is a Health Information Management Educator with more than 30 years of solid experience in university level Health Information Technology instruction, mentoring, and administration. She is presently employed as a Clinical Documentation Improvement Specialist (CDIS) and educator at a nationally known Children's Hospital. In addition, she possesses more than 30 years of experience in Health Information Management roles with skills in budgeting, staff training, coding, documentation improvement teams, revenue cycle and medical record review. Her education achievements include Master of Public Administration with an emphasis on Health Care and Master of Business Administration, RHIA, RHIT, and she is a certified ICD-10-CM/PCS trainer.

**Dorinda M. Sattler**, MJ, RHIA, CHPS, CPHRM, is a Clinical Assistant Professor in the Health Information Management programs at Indiana University Northwest in Gary, Indiana. She received both her associate degree in Health Information Technology and her baccalaureate degree in Health Services Management from Indiana University Northwest. She also earned her Master of Jurisprudence in Health Law degree from Loyola University Chicago School of Law. She is a Registered Health Information Administrator and is certified in Healthcare Privacy and Security from AHIMA. She is also a Certified Professional in Healthcare Risk Management from the American Hospital Association. Prior to joining the full-time faculty at Indiana University Northwest, she held a variety of roles in health information management and practice management, and most recently served as a hospital risk manager. At various times throughout her career, she has been active in her local and state health information management associations. She is currently active at the national level for

the American Health Information Management Association as a CHPS exam item writer, exam development committee member, and volunteer on the HIM Reimagined leadership initiative. Sattler has also been involved in the Indiana Society for Healthcare Risk Management, serving as co-president. She also owns a consulting company that specializes in health information and risk management consulting.

**Janelle Wapola, MA, RHIA**, is an Assistant Professor in the Department of Healthcare Informatics and Information Management at the College of St. Scholastica in Duluth, MN. She has published, presented, and taught various HIM topics during her career. Her teaching responsibilities also include student advisement, SHIMA advisor, IRB board member, academic committees, and virtual lab coordinator, and she is also an advocate for global HIM. A highlight was when she was able to help lead two study abroad groups to India and Germany to see firsthand about their healthcare system and culture. Prior to teaching, Wapola enjoyed the health information management profession, serving as a consultant, operations manager, release of information specialist, and trainer. She has been volunteering in her community and HIM for over 20 years. She received both her bachelor and master's degrees in Health Information Management from the College of St. Scholastica.

**Margaret J. (Margie) White, MS, RHIA, NHA, CPHQ**, was the first author of Chapter 7. She was the Director of the Health Information Technology Program at Marion Technical College in Marion, OH. She was a member of AHIMA and had earned multiple credentials from AHIMA and other associations including RHIA, CCS, CCS-P, NHA, and CPHQ. She passed away in Westerville, OH shortly after her first submission of the chapter. We thank her for her contribution to the content.

**Felecia Williams, MPA, RHIA**, is a Clinical Assistant Professor in the Health Information Management Program at the University of Illinois at Chicago (UIC). She received her baccalaureate in health information

management from UIC and a master's degree in Public Administration with a concentration in Health Services Management from Roosevelt University. Williams has presented at AOE and served on the board of the local CAHIMA chapter. She previously held positions of provider profiling manager, manager of the national provider finder, and vendor management with Blue Cross Blue Shield affiliates. She currently teaches both campus and online students in the bachelors and post-baccalaureate certificate programs.

**Karen Wright**, MHA, RHIA, was the Director of a large acute care Health Information Management department at a 365-bed acute care hospital in Ohio. Prior to that, she served as a manager of two physician's medical practices and served as a medical transcription supervisor. She was a consultant to Long Term Care, Mental Health and Substance Abuse facilities. She also served as Coordinator and primary professor of the Health Information Technology Program at Hocking College in Ohio. Ms. Wright has a Bachelor's Degree in HIM from The Ohio State University and a Masters in Health Services Administration from Ohio University.

# PREFACE

---

**H** *Health Information Management: Principles and Organization for Health Information Services*, sixth edition, recognizes the continuing need for guidance in developing efficient health information management (HIM) systems for healthcare institutions. This important revision of the 2003 edition is designed to capture the significant changes in the HIM field and profession in recent years.

The first edition of this book was published in 1984, and it replaced *Medical Record Departments in Hospitals: Guide to Organization*, which had originally been published by the American Hospital Association in 1962 and revised in 1972. Second and third editions of the book were published in 1988 and 1994, respectively, under the title *Organization of Medical Record Departments in Hospitals*. The fifth edition was published by Jossey-Bass in 2003.

This book serves as a comprehensive general reference to patient medical records and HIM. It is useful to a healthcare institution's chief executive, chief operating and financial officers, and information systems technology personnel. It is also essential reading for health professionals who need a general overview and understanding of HIM practices. The text also covers appropriate information for faculty and students in health information administration and technology educational programs. It serves as an introduction to HIM practices and issues for information systems. In addition, individuals in smaller healthcare institutions will find this book useful in applying the basic principles of HIM. As the appropriate application of

these basic principles requires a careful analysis of the individual healthcare institution's needs, various operations in HIM are discussed herein. The healthcare industry continues to undergo constant change and the technology used in managing health information has experienced very rapid change.

Throughout this book, the term *health information management practitioner* will encompass both the registered health information administrator (RHIA) and the registered health information technician (RHIT). Both levels of the profession hold a variety of positions within the HIM discipline. These include management and supervisory positions, as well as clinical documentation specialists, coders, quality managers, and more.

The American Health Information Management Association (AHIMA) has over 100,000 members. Many additional credentials are available for HIM professionals besides the long-standing RHIA and RHIT. Readers are encouraged to visit the website, [www.ahima.org](http://www.ahima.org), for a significant amount of information regarding the field and the profession.

—Margaret A. Skurka

# ACKNOWLEDGMENTS

---

A significant thank you goes out to my contributing authors for this sixth edition of *Health Information Management: Principles and Organization for Health Information Services*. Without their assistance, this work would not have been possible. They each contributed their long-time experience in the specific areas of health information management in which they work and/or teach, which gives this text a hands-on feeling. They were timely and on point, consistently.

Thank you:

Felecia Williams

Linda Galocy

Dilhari R. DeAlmeida

Suzanne Paone

Dorinda M. Sattler

Sandra K. Rains

Margie White (deceased)

Karen Wright

Janelle Wapola

Katie Kerr

A special thank you also goes to my two work colleagues at Indiana University Northwest, Linda Galocy and Dorinda Sattler, who shouldered the additional work in the department when I was on sabbatical. And, as always, a thank you to my husband Richard, who is accustomed to my long evenings in my home office at my computer. He has always understood and accepted my intensity and commitment with regard to the Health Information Management profession, and for that I am grateful.

This book is dedicated to my three now-grown children — Erik Skurka, Kirstin Skurka Johnston, and Erin Skurka. They are all young professionals working in Chicago. I wish to them in their respective fields the same wonderful 40-plus years I've enjoyed in my profession. It is a good thing to love what you do.

—Margaret A. Skurka

# Health Information Management and the Healthcare Institution

Felecia Williams

The more things change, the more they stay the same.

—Jean-Baptiste Alphonse Karr

To say that the field of health care has evolved over the past decade would be an understatement, but the quote from Mr. Karr is as true today as it was the day he made the statement. But with all that has changed, some things have remained the same. People still get sick and seek care at the hospital or clinic and physicians, nurses, therapists, and a host of other health professionals continue to provide care, in hopes of a healthier world. Additionally, the terms *health* and *medical* are still used interchangeably; this is even more pronounced when speaking of health/medical records in an electronic format.

In reality, medical and health are very different colors in the wide spectrum of the field of medicine. Health care, much like the health record, is not limited by the activities or documentation of activities that take

place under the care of a physician and/or hospital. Health care not only includes services provided by a physician, but also includes a patient's lifestyle (i.e., food choices, physical activity, sleep patterns) and genetic predispositions. Where health incorporates outside forces, medical care and the medical record are driven by services provided under the care of health professionals.

Advancements in technology have changed the manner in which health information management (HIM) professionals perform their work, but it hasn't changed the work. Timely, accurate, and complete health records are still the foundations for high-functioning HIM departments, which contribute to the overall success of a hospital.

In this chapter the discussion will focus on the roles and responsibilities of professionals that work within or for the hospital and their relationship to the HIM department. This will include the Board of Trustees, the CEO/President and the Medical Staff. This chapter will also discuss the functional areas of the HIM department, the HIM professional, and finally, the interactions between HIM and other departments and healthcare professionals within the facility.

Figure 1.1 shows a sample hospital organization chart. In this case, the HIM department's executive reporting structure falls under the medical staff. This is not always the case. To begin the discussion on the hospital hierarchy and roles of key players, it should be noted that the role of HIM is not restricted to a single reporting line.

## RESPONSIBILITY OF THE BOARD OF DIRECTORS

At the top of a hospital hierarchy resides the Board of Directors. The board of directors for a hospital, or any organization for that matter, has the ultimate responsibility for the success and/or failure of the organization. Members of the Board of Directors are generally leaders in their professional area of study, which is not restricted to health care, and are also considered to be upstanding citizens in the community. These members may be
