

WORLD TRANSPLANTATION

Vol. 2

CONTENTS

BOOK II

ORGAN PROCUREMENT, PRESERVATION AND EARLY FUNCTION

Advances in Organ Preservation.....James H. Southard 1195

Techniques of Procurement

Endocrine Changes and Haemodynamic Stability After Brain Death.....K.M. Robertson,
I.M. Hramiak, and A.W. Gelb 1197

Cardiopulmonary Bypass with Profound Hypothermia: An Optimal Preservation Method for Multi-Organ
Procurement.....G. Melville Williams, Duke E. Cameron, Charles D. Fraser, Jr., Bruce A. Reitz,
Timothy J. Gardner, James F. Burdick, Sharon Augustine, Pamela D. Gaul, and William A. Baumgartner 1199

Donor Core Cooling for Multiple Organ Retrieval: New Application of Portable Cardiopulmonary Bypass for
Transplantation.....Hideo Adachi, Keisuke Ueda, Isamu Koyama, Takanoba Hoshino,
Ryozo Omoto, Charles D. Fraser, George J. Kontos, William A. Baumgartner, and Bruce A. Reitz 1200

A New Approach to Kidney Procurement from Non-Heart-Beating Donors: Core Cooling on Cardiopulmonary
Bypass.....I. Koyama, T. Hoshino, N. Nagashima, H. Adachi, K. Ueda, and R. Omoto 1203

Liver Transplantation from Non-Heart-Beating Donors by Core Cooling Technique.....T. Hoshino,
I. Koyama, N. Nagashima, M. Kadokura, M. Kazui, and R. Omoto 1206

Kidney and Liver Initial Graft Function Under Different Procurement Techniques.....L.S. Belli,
L. De Carlis, F. Romani, G.F. Rondinara, C. Tommasini Degna, B. Brando, E. Del Favero, B. Palmieri,
A. Meroni, M. Frangi, and L. Belli 1209

Organ Procurement from Non-Heart-Beating Cadaver Donors.....David Anaise, Marc J. Yland,
Masahiro Ishimaru, Moshe Shabtal, Steven Hurley, Wayne C. Waltzer, and Felix T. Rapaport 1211

Clinical Applications of In Situ Renal Cooling: Experience with 61 Cardiac-Arrest Donors.....T. Fujita,
M. Matsui, M. Yanaoka, M. Shinoda, and Y. Naide 1215

The Multiple Organ Donor: Prospective Multicenter Analysis of Outcome in the United States of America
T.G. Peters, W.K. Vaughn, and E.K. Spees 1218

Kidney

Donor and Recipient Management

Prevention of Delayed Graft Function by Diltiazem and Iloprost.....Hans-Hellmut Neumayer,
M thias Schreiber, and Karl Wagner 1221

The Effect of Perioperative Management on Initial Renal Allograft Function: An Analysis of Matched Donor Pairs
Christopher R. Shackleton, Martin T. Schechter, David N. Landsberg, Siegfried Erb, David W. Seccombe,
and Charles H. Scudamore 1225

(Continued on following page)

CONTENTS

(continued)

Mannitol Reduces ATN in Cadaveric Allografts.....	Kent F. Richards, Legrand P. Belnap, William V. Rees, and Lawrence E. Stevens	1228
A Prospective Randomized Study of the Protective Effect of Verapamil on Ischemic Renal Injury in Renal Allotransplants.....	Mohamed A. Sobh, Ahmed B. Shehab El-Din, Fatma E. Moustafa, Mohamed A. El-Far, Mowafake E. Hussein, Hosam M. Gad, and Mohamed A. Ghoneim	1230
Venous Flushing with Vasodilators Aids Recovery of Vasoconstricted and Warm Ischemic Injured Pig Kidneys	H. Kaneko and R.T. Schweizer	1233
Verapamil Pretreatment of Hemodynamically Unstable Donors Prevents Delayed Graft Function Post-Transplant	S. Korb, G. Albornoz, W. Brems, A. Ali, and J.A. Light	1236
Effect of Anastomosis Time and Intraoperative Organ Cooling on Primary Function in Renal Transplantation	G.H. Müller, U. Höhn, B. Greger, W. Schareck, U.T. Hopt, and W. Lauchart	1239
Cytoprotective Agents and Preservation		
Combined Cold Storage-Perfusion Preservation of the Kidney with a New Synthetic Perfusate.....	Folkert O. Belzer, Robert M. Hoffman, Robert H. Stratta, Anthony D'Alessandro, John Pirsch, Munci Kalayoglu, and Hans W. Sollinger	1240
Cold Ischemia Period and First Renal Allograft Survival in the Cyclosporin Era	F.A. Zantvoort, G.G. Persijn, and B. Cohen	1242
A Comparison of Early Function Between Kidney Grafts Protected with HTK Solution Versus Euro-Collins Solution	A.F. Groenewoud, F.E. Isemer, J. Stalder, C.D. Heideche, G. Florack, and M. Hoelscher	1243
First Clinical Experience with Superoxide Dismutase in Kidney Transplantation—Results of a Double-Blind Randomized Study	H. Schneeberger, W.D. Illner, D. Abendroth, G. Bulkley, F. Rutili, M. Williams, M. Thiel, and W. Land	1245
Efficacy of Cytoprotective Agents on the Function of the Hypothermically Preserved Dog Kidney During Normothermic Reperfusion.....	R.J. Ploeg, D. Goossens, J.F. McNulty, J.H. Southard, and F.O. Belzer	1247
Protective Effect on an Organic Germanium Compound on Warm Ischemia and Prolonged Kidney Preservation	Y. Masaki, K. Kumano, M. Iwamura, T. Endo, T. Sakai, K. Koshiba, K. Nakamura, K. Yokota, K. Sato, H. Uchida, and K. Aso	1250
Intermediate Normothermic Perfusion During Cold Storage of Ischemically Injured Kidneys.....	J.S. Maessen, G.J. van der Vusse, M. Vork, and G. Kooistra	1252
Improved Post-Transplant Renal Function by Recipient Hemodilution and Cold Storage in a Modified UW-Preservation Solution	Jeanette Jacobsson, Gunnar Tufveson, Bo Odland, and Jan Wahlberg	1254
Mechanisms of Preservation Injury		
Immediate Post-Transplant Renal Failure: Evidence for an Immunologic Pathogenesis	George S. Lipkowitz, Joon H. Hong, Mitchel L. Galischoff, Marvin McMillen, Nabil Sumrani, Patricia Hanson, Amir Tejani, and Khalid M.H. Butt	1256
Responses of Renal Cortical Mitochondria to Cyclosporine Following Warm Ischemia and Cold Preservation	R.B. Kauli, T. Strzelecki, B. McGraw, T. Takayama, S. Laxmanan, D. Diamond, and M. Menon	1258
Sensitivity of Ischemically Damaged Kidneys to Inflammatory Reactions.....	J.G. Maessen, J-W.M. Greve, W.A. Buurman, and G. Kooistra	1261
Early Extranuclear Effect of Triiodothyronine (T3) on Tissue Slices: Relevance to Organ Donor Viability	W.N. Wicomb, D. Novitzky, D.K.C. Cooper, M. Wells, and J.D. Hill	1263
Vasculitis in Pig Kidney Autografts from Human Albumin Perfusion Preservation	L. Roper and R.T. Schweizer	1265

(Continued on following page)

CONTENTS

(continued)

Assessment of Organ Damage

Clinical Experience with Pretransplant Assessment of Renal Viability by Phosphorus-31 Magnetic Resonance Spectroscopy (³¹ P-MRS) in 40 Recipient Patients	Peter N. Bretan, Jr., N. Baldwin, A.C. Novick, A. Majors, K. Easley, T.C. Ng, N. Stowe, S. Streem, D. Steinmuller, P. Rehm, and R. Go	1266
Assessment of Renal Viability by High-Field Phosphorus-31 Magnetic Resonance Spectrometry	S. Pomer, W.E. Hull, L. Röhl, and K. Möhring	1268
Measurement of Viability in Preserved Kidneys with ³¹ P NMR	Seiji Kunikata, Tokumi Ishii, Tsukasa Nishioka, Tadashi Uemura, Hidenori Kanada, Takeshi Matsuura, Takahiro Akiyama, and Takashi Kurita	1269
Assessment of Post-Ischemic Changes in Intrarenal Blood Flow Distribution	J.G. Maessen, K. Ruissen, and G. Kootstra	1272

Results

Early Graft Function in Primary and Re graft Recipients of Paired Cadaveric Kidneys	Michael T. Jaklitsch, Mark H. Deierhoi, Sharon Hudson, W. Henry Barber, Bruce O. Barger, Michael G. Phillips, and Arnold G. Diethelm	1274
Delayed Graft Function Following Cadaver Renal Transplantation in the Cyclosporine Era: Analysis of Acute Rejection and Graft Survival	W.D. Bauma, I.Y.S. Tang, M.S. Maddux, S.A. Veremis, R. Pollack, and M.F. Mozes	1276
Triple Therapy Improves the Survival of Cadaver Renal Allografts Affected by Acute Tubular Necrosis	A. Bakran, R.W.G. Johnson, P.A. Dyer, N.P. Mallick, and R. Gokal	1278
Prolonged Simple Cold Storage Does Not Adversely Affect Renal Allograft Outcome in Patients Receiving Cyclosporine	Daniel Shoskes, Mark L. Jordan, and Carl J. Cardella	1280
ATN Influence on Renal Transplant Function	H. Keller, J. Fischer, G. Kirste, and H. Wilms	1282
Prolonged Cold Storage and the Cadaveric Kidney Transplant Recipient	M.A. Koyle, M.T. MacFarlane, M. Rosen, H.A. Gritsch, M.B. Sender, J. Rajfer, R.J. Glasscock, and H.J. Ward	1283

Liver

Donor and Recipient Management

Effect of Xanthine Oxidase Inhibition on Warm Ischemic Lesions of the Liver	P. Lamesch, B. Ringe, G. Blumhardt, and R. Pichlmayr	1285
Role of Free Radicals in Entero-Hepatic Dysfunction Caused by Portal Circulatory Disturbance: Effect of SOD Derivative....	Shunji Kawamoto, Masayasu Inoue, Seiki Tashiro, Yoshimasa Morino, and Yoshimasa Miyauchi	1287

Cytoprotective Agents and Preservation

Different Cytoprotective Effects of Calcium Blockers in Hypothermic Liver Preservation	K. Umeshita, M. Monden, T. Ukei, M. Gotoh, Y. Nakano, W. Endoh, J. Okamura, and T. Mori	1290
The 24- to 48-hour Preservation of Canine Liver by Simple Cold Storage Using UW Lactobionate Solution	N.V. Jamieson, R. Sundberg, S. Lindell, K. Claesson, J. Moen, P.K. Vreugdenhil, D.G.D. Wight, J.H. Southard, and F.O. Belzer	1292
Evaluation of Simplified Variants of the UW Solution Using the Isolated Perfused Rabbit Liver	N.V. Jamieson, S. Lindell, R. Sundberg, J.H. Southard, and F.O. Belzer	1294
Effects of Perfusion Temperature on Donor Graft Viability in Canine Orthotopic Partial Liver Transplantation	Yukihiko Tokunaga, Masazumi Zaima, Koichi Tanaka, Yuzo Yamamoto, Yoshiharu Sakai, Junichi Ueda, Nobuhiro Ozaki, Yoshio Yamaoka, and Kazuo Ozawa	1296

(Continued on following page)

CONTENTS

(continued)

Decreased Loss of Liver Nucleotides and Energy Charge During Hypothermic Preservation by Donor Pretreatment with Glucose—A Preliminary Report	John D. Palombo, Yulia Hirschberg, James J. Pomposelli, George L. Blackburn, Steven H. Zeisel, and Bruce R. Bistran	1299
Protective Effect of Alpha Tocopherol on Ca^{2+} Regulation by Microsomal Fractions Isolated from Preserved Rat Livers	T. Kawada, S. Ueda, Y. Watanabe, F. Nagachi, M. Sato, S. Kimura, M. Sumida, and H. Okuda	1301
Pharmacological Method (Triple-Drug Therapy) for Successful 24-Hour Preservation of Liver Allografts	F. Pereira, N.P. Mora, J.A. Cienfuegos, F. Tendillo, J. Herrera, and J.L. Castillo-Olivares	1303
Successful Orthotopic Liver Transplantation After -4°C Preservation in Rats	Yasuaki Nakajima, Akira Kakita, Shinya Tsuchimoto, Junichi Uchino, Takashi Natori, Wolf Isselhard, and Jurgen H. Fischer	1305
Usefulness of Rapid Machine Cooling in the Procurement of Livers	Takehide Asano, K. Enomoto, M. Ohtsuka, T. Goto, T. Nakagohri, T. Kenmochi, T. Ochiai, and K. Isono	1307
Prevention of Liver Damage by Using Free Radical Scavengers and Changes in Plasma PG Levels During Liver Ischemia	I. Ohhori, R. Izumi, K. Yabushita, T. Watanabe, T. Hashimoto, M. Takamori, H. Hirowawa, K. Shimizu, K. Konishi, and I. Miyazaki	1309
The Isolated Hepatocyte Preservation Model: A Comparison of Hypertonic Citrate and Lactobionate Solutions	I.D. Michell, J.K. Chipman, and P. McMaster	1312
Long-term Liver Preservation Using Artificial Blood Substitute	I. Nakajima, S. Fuchinoue, S. Teraoka, T. Tojinbara, H. Fujikawa, T. Kawai, H. Honda, T. Agishi, and K. Ota	1314

Mechanisms of Preservation Injury

Evidence for Damage Due to Free Radicals at Reperfusion in Porcine Liver Transplants	W.R. Maley, Y. Taguchi, M. Mitchell, J. Potter, G.B. Bulkley, and J.F. Burdick	1316
Changes in Activity of Oxygen Free Radical Scavengers and in Levels of Endogenous Antioxidants During Hepatic Ischemia and Subsequent Reperfusion	S. Marubayashi, K. Dohi, K. Sumimoto, J. Oku, K. Ochi, and T. Kawasaki	1317
Xanthine and Hypoxanthine Accumulation During Storage May Contribute to Reperfusion Injury Following Liver Transplantation in the Rat	Ingo Marzi, Zhi Zhong, Franz A. Zimmerman, John J. Lemasters, and Ronald G. Thurman	1319
Mitochondrial Respiratory Function, Adenine Nucleotides and Antioxygenic Enzymes in Pig Liver Transplantation	M. Sakurada, N. Ohkohchi, H. Kato, M. Koizumi, K. Fujimori, S. Satomi, T. Sasaki, Y. Taguchi, and S. Mori	1321
Preservation and Reflow Damage in Liver Transplantation in the Pig	M. Koizumi, N. Ohkohchi, H. Katoh, N. Koyamada, K. Fujimori, M. Sakurada, T. Andoh, S. Satomi, T. Sasaki, Y. Taguchi, S. Mori, S. Kataoka, and T.Y. Yamamoto	1323

Assessment of Organ Damage

Liver Preservation: ^{31}P and ^{13}C NMR Spectroscopic Assessment of Liver Energy and Metabolism After Cold Storage in Collins, Marshall, Ringer's Lactate, UW and Modified UW Solutions	J.F. Nedelec, M. Capron-Laudereau, R. Adam, J. Dimicoli, J. Gugenheim, J. Patry, M.L. Pin, G. Fredj, H. Bismuth, and J.M. Lhoste	1327
Pathologic Recognition of Preservation Injury in Hepatic Allografts with Six Months Follow-up	W. Tillery, J. Demetris, D. Watkins, R. Goldstein, S. Poplawski, B. Husberg, and G. Klintmalm	1330
Assessment of the Viability of Liver Allografts by Chemiluminescence	N. Ohkohchi, M. Kanno, T. Terashima, Y. Taguchi, S. Mori, R. Saeki, T. Usa, H. Inaba, and T. Miyazawa	1332

(Continued on following page)

CONTENTS

(continued)

Blood Ketone Body Ratio as an Indicator of Graft Viability in Rat Liver Allotransplantation <i>Katsuhiro Asonuma, Koichi Tanaka, Shinji Uemoto, Ryuji Okamura, Sadayuki Matsuoka, Hirofumi Utsunomiya, and Kazue Ozawa</i>	1335
---	------

Biochemical Differences Between Ringer's Lactate and Collins' Solution in Hepatic Preservation: Detection by ³¹ P Magnetic Resonance Spectroscopy	<i>W. Vine, W.J. Thoma, and K. Ugurbil</i> 1338
---	---

Internal Standardization for the Monitoring of Extraction Efficiencies During the Isolation and Purification of Liver mRNA	<i>E. Donnachie, D.W. Secombe, C.R. Shackleton, A.D. Forward, S. Erb, L.H. Dai, and C.H. Scudamore</i> 1340
---	---

Results

Clinical Results in Liver Transplantation Using UW Solution for Extended Preservation	<i>Munci Kalayoglu, Robert J. Stratta, Hans W. Sollinger, Robert M. Hoffmann, Anthony M. D'Alessandro, John D. Pirsch, and Folkert O. Belzer</i> 1342
---	---

Evaluation of Early Graft Function in Orthotopic Liver Transplants in Dogs	<i>S. Tashiro, S. Kawamoto, K. Nakakuma, N. Hayashida, K. Kanemitsu, S. Sugihara, T. Tsuji, R. Uchino, K. Nanakawa, M. Kimura, N. Saito, and Y. Miyauchi</i> 1344
--	---

Experimental Heart and Heart/Lung Procurement and Preservation

Resuscitation and Preservation of Agonally Arrested Hearts for Transplantation: A Study of 24 Hour Stored Canine Hearts	<i>Ryota Shirakura, Hajime Hirose, Hikaru Matsuda, Susumu Nakano, Seizou Nakata, Masakatsu Ohtani, Akira Kawaguti, Shuji Miyagawa, Hiroshi Takami, Yoshifumi Naka, and Yasunaru Kawashima</i> 1347
--	--

Prolonged Rat Cardiac Preservation with UW Lactobionate Solution	<i>Leonard Makowka, Tony R. Zerbe, Frances Chapman, Shiguang Qian, Hong Sun, Noriko Murase, Robert Kormos, James Snyder, and Thomas E. Starzl</i> 1352
--	--

Prevention of Pulmonary Edema in Autoperfusing Heart-Lung Preparation by FUT-175 and Leukocyte Depletion <i>Yoshifumi Naka, Hajime Hirose, Hikaru Matsuda, Susumu Nakano, Ryota Shirakura, Akira Kawaguchi, Yuji Miyamoto, Shuji Miyagawa, Norihide Fukushima, and Yasunaru Kawashima</i>	1353
--	------

Improved Cardioplegia Using New Perfusates	<i>W.N. Wicomb, G.M. Collins, J. Wood, and J.D. Hill</i> 1357
--	---

Effect of Retrograde Coronary Sinus Perfusion During Implantation of the Preserved Canine Heart <i>Yasuo Morishita, Ryohei Ishibe, Masahiko Hashiguchi, Yukinori Moriyama, Yoshifumi Iguro, Ryozo Kamimura, Hideaki Saigenji, Kazuhiro Arikawa, and Akira Taira</i>	1359
--	------

The Effect of Prostacyclin on Reperfusion Injury After Pulmonary Ischemia	<i>L. Dammenhayn, K. Yagyu, H.-J. Schäfers, and A. Haverich</i> 1363
---	--

Enhanced Myocardial Viability with Hypothermic Storage in Euro-Collins Solution	<i>D.J. Zielak, S. Raju, and S. Woolley</i> 1364
---	--

Value of Polyethylene Glycol (PEG) and Horseradish Peroxidase (HRP) for Hypothermic Rabbit Heart Perfusion <i>W.N. Wicomb, J. Wood, J.D. Hill, W.I. Bry, and G.M. Collins</i>	1366
--	------

Pancreas Preservation

Effective Preservation of Human Pancreas Grafts	<i>G. Florack, D.E.R. Sutherland, P. Morel, R. Condie, and J.S. Najarian</i> 1369
---	---

Changes in the Weight of the Pancreas During Preservation in Various Solutions	<i>Miroslaw P. Ruka, Arthur G. White, M.S. Anil Kumar, Ismail H. Al-Abdullah, and George M. Abouna</i> 1372
--	---

A New Simple Two Layer (Euro-Collins' Solution/Perfluorochemical) Cold Storage Method for Pancreas Preservation	<i>Takashi Kawamura, Yoshikazu Kuroda, Yasuyuki Suzuki, Hidetoshi Fujiwara, Kyosuke Yamamoto, and Yoichi Saitoh</i> 1376
--	--

(Continued on following page)

CONTENTS

(continued)

The Belzer-UW Solution for Effective Long-Term Preservation in Canine Pancreas Transplantation	R.J. Ploeg, D. Goossens, H.W. Sollinger, J.H. Southard, and F.O. Belzer	1378
The Role of Oxygen-Free Radicals in Preservation Injury in Pancreas Transplantation	L. Fernández-Cruz, J. Colomer, E.M. Targarona, F. Pi, A. Sáenz, A. Casas, G. Hotter, G. Gómez, J. Roselló, P. Puig-Parellada, and P. Amorim	1381

Blood Vessels and Preservation

Ischemia and Saphenous Vein Endothelial Integrity	Kelvin G.M. Brockbank, Harvey L. Bank, and Marcia Schmehl	1384
Vascular Changes Following Hypothermic Preservation	D.A.H. Neil, G.A. Pollock, G.S. Molyneux, and I.R. Hardie	1389

ORGAN DONATION AND ALLOCATION

Ethics and Priorities of Organ Procurement and Allocation	Robert A. Sells	1391
Ethics in Different Cultures: The 'West'	John B. Dossetor	1395
Role of the Transplant Co-ordinator and Multiple Organ Donation in the UK	Celia Wight	1398
Liver Donor Renal Transplantation in Iraq	Peter J. Little, Joseph P. McMullin, Alistair MacDonald	1400
Ethical Issues—A Middle East Perspective	A.S. Daar	1402
The Impact of Purposeful Sharing by HLA Matching in the South Eastern Organ Procurement Foundation (SEOPF)	W.W. Pfaff, F. Sanfilippo, B.A. Lucas, and W.K. Vaughn	1405
The Role of Blacks in Blood Donation and the Organ and Tissue Transplantation Process	James A. Bayton, Pamela S. Jennings, and Clive O. Callender	1408
Sectarianism, Uncertainty, and Fear: Mechanisms That May Reverse Attitudes Toward Organ Donation	F. Cantarovich, L. Castro, M. Dávalos, M. Cantarovich, A.M. Cerrajería, E. Cumpian, M. Abad, J. Ahumada, and R. Rodríguez	1409
The Delicate Question of the Donor Family	Pamela E. Buckley	1411
The Attitudes of Young Men to Cadaveric Organ Donation and Transplantation: The Influence of Background Factors and Information	Håkan Gäbel, Bo Book, Mats Larsson, and Gunilla Åstrand	1413
Is Allocation of Kidneys on Basis of HLA Match Equitable in Multiracial Populations?	V.A. Lazda and M.E. Blaesing	1415
Optimal Use of Cadaver Donor Kidneys: High-Risk and Low-Risk Recipients	J. Michael Cecka and Daniel J. Cook	1417
The Capacity for Organ Generation of Hospitals in Catalonia, Spain: A Multicentre Study	E. Espinel, R. Deulofeu, R. Sabater, M. Mañalich, P. Domingo, and M. Rué	1419
Renal Transplantation in Substance Abusers Revisited: The Howard University Hospital Experience	Daniel John, Clive O. Callender, Josefina Flores, Rose-Marie Toussaint, Curtis Yeager, Otis Bond, and J.C. Gear	1422

KIDNEY TRANSPLANTATION—CLINICAL

Kidney Transplantation—State-of-the-Art	W. Land	1425
What is Cyclosporine Nephrotoxicity?	Bryan D. Myers	1430
Long-Term Results and Complications of Transplantation: The Kidney	J.F. Mahony	1433

(Continued on following page)

CONTENTS

(continued)

Strategies in Chronic Rejection of Transplanted Organs: A Current View on Pathogenesis, Diagnosis, and Treatment <i>Bengt Fellström, Erik Larsson, and Gunnar Tufveson</i>	1435
Infection: The New Problems <i>R.H. Rubin and N.E. Tolkoff-Rubin</i>	1440
 Immunosuppression in Clinical Transplantation	
Cyclosporine A	
Metabolism and Pharmacokinetics	
The Effect of Obesity on Cyclosporin Pharmacokinetics in Uremic Patients <i>S.M. Flechner, M.C. Kolbeinsson, B. Lum, J. Tam, and T. Moran</i>	1446
Comparison of the in Vitro Immunosuppressive Effects of Cyclosporine A and Its Metabolites <i>K.R. Copeland, R.W. Yatscoff, D. Rush, and J.R. Jeffrey</i>	1449
 Actions and Interactions	
Interaction of Cyclosporin and Calcium Antagonists <i>K. Wagner, Th. Philipp, G. Heinemeyer, F. Bröckmüller, I. Roots, and H.H. Neumayer</i>	1453
Cyclosporin A and Prednisolone: An Additive Inhibitory Effect of Cell Proliferation and Interleukin-2 Production <i>R.C. Manfro, E. Pohanka, S. Tomlanovich, L.Z. Benet, and M.R. Garovoy</i>	1457
Cyclosporin-Diltiazem Interaction: Comparison of Cyclosporin Levels Measured with Two Monoclonal Antibodies <i>I. Sabaté, J.M. Griñó, A.M. Castela, J. Huguet, D. Serón, and A. Blanco</i>	1460
 Measurement and Monitoring	
Interleukin-2 Receptor as an Immunodiagnostic Tool to Differentiate Rejection from Nephrotoxicity <i>A.Y. Smith, F. Citterio, M. Welsh, R.H. Kerman, and B.D. Kahan</i>	1462
Effects of Cyclosporin on Nuclear Function of Transplant Recipient Lymphocytes <i>F. Citterio and B.D. Kahan</i>	1465
Optimal Cyclosporin Levels During the First Month After Cadaveric Kidney Transplantation <i>Y. Vanrenterghem, M. Waer, L. Roels, P. Michiels, and the Leuven Collaborative Group for Transplantation</i>	1467
Interleukin-2 Receptor Positive Cell Levels in Cyclosporin-versus Azathioprine-Treated Renal Transplant Patients <i>K. Mohring, S. Pomer, U. Daniel, and M. Rambašek</i>	1469
Increased Risk of Rejection in Renal Transplant Recipients with In Vitro Cyclosporin-Resistant Lymphoid Responses <i>L.G. Bowes, L.J. Dumble, G.J.A. Clunie, D.M.A. Francis, I.M. Macdonald, and P. Kincaid-Smith</i>	1470
Simultaneous Monitoring of Cyclosporin in Blood and Plasma with Four Analytical Methods: A Clinical Evaluation <i>A. Lindholm and S. Henricsson</i>	1472
New Specific Cyclosporine (CY) Assay Prompts Different CY Dosages in Renal Transplant Recipients <i>M. Weinbeck, E. Keller, G. Kirste, and H. Wilms</i>	1475
Comparison of Cyclosporine (CSA) Blood Levels and RIA/HPLC Ratios Among Renal Transplant Patients with Normal Allograft Function, CSA Nephrotoxicity or Rejection <i>S.A. Veremis, M.S. Maddux, I.Y.S. Tang, S.N. Millner, R. Prasad, R. Pollak, and M.F. Mozes</i>	1476
New Zealand Multicentre Comparison of Monoclonal (Sandimmun ^R) Versus Polyclonal (Cyclosporin-RIA) Radioimmunoassays for Cyclosporine Blood Monitoring <i>R. Cooke, T. Wilson, G. Tisch, J. Rawlins, and T.J. Neale</i>	1478
Cyclosporine Monitoring with Polyclonal and Specific Monoclonal Antibodies During Episodes of Renal Allograft Dysfunction <i>D.W. Holt, J.T. Marsden, A. Johnston, and D.H. Taube</i>	1482
Baseline Biopsies Define Cyclosporine Nephrotoxicity <i>LeGrand P. Belnap, Elizabeth H. Hammond, Robert Yowell, Kent F. Richards, William V. Rees, and Lawrence E. Stevens</i>	1485

(Continued on following page)

CONTENTS

(continued)

Cyclosporine Blood Level Measurements with Mono- and Polyclonal Antibodies During Clinical Renal Transplantation	<i>A.C. Foradori, L. Martinez, A. Loveluck, L. Correa, and L. Rodriguez</i>	1486
Biochemical Abnormalities in Serum and Urine from Renal Transplant Recipients Receiving Cyclosporine <i>M.C. Jones, P.H. Whiting, A. Innes, D.J. Propper, N. Edward, and G.R.D. Catto</i>		1987
Monitoring of Cyclosporine Blood Levels with Polyclonal and Monoclonal Assays During Episodes of Renal Graft Dysfunction	<i>L. Martinez, A. Foradori, A. Vaccarezza, P. Martinez, and L. Rodriguez</i>	1490
Physiological Effects		
Bone Repair in Cyclosporin Treated Renal Transplant Patients	<i>J.M. Wilmlink, J. Bras, S. Surachno, J.L.A.M. v Heyst, and J.M. vd Horst</i>	1492
Serial Glucose Tolerance Assessment During Cyclosporine Therapy	<i>P.J.A. Griffin, D.R. Owens, S. Luzio, and J.R. Salaman</i>	1495
Prospective Evaluation of Changes in Lipid Profiles in Cyclosporine-treated Renal Transplant Patients <i>M.S. Markell, C.E. Brown, K.M.H. Butt, and E.A. Friedman</i>		1497
Paradoxical Effect of Short-Term Protein Loading on CSA-treated Kidney Transplant Recipients	<i>S.C. Magalini, G. Nanni, S. Agnes, F. Serino, A.W. Avolio, R. Tacchino, and M. Castagneto</i>	1500
Comparative Effects of Immunosuppressive Therapy on Glucose Metabolism	<i>W.G.J. Smith, S. Thomas, P.J.A. Griffin, and J.R. Salaman</i>	1502
Cyclosporine and Urinary Prostaglandins	<i>T.L. Kho, K.M.L. Leunissen, J.J.J.M. Wirtz, P.J.H.M. van der Dries, T.Z. Noordziz, A. Rijnders, G.A.K. Heidendahl, P.J. Lijnen, and J.P. van Hooff</i>	1504
Does Cyclosporin A Affect Neurotransmitters? Studies After Kidney Transplantation	<i>H. Kopsa, A. Lapin, K. Derfler, F. Stockenhuber, G. Sunder-Plassmann, P. Balcke, R. Smetana, and W. Gebhart</i>	1506
Nephrotoxicity		
Cyclosporine Nephrotoxicity and Dermal Vascular Alterations in Renal Transplants	<i>Steve Y. Shen, Colin Wood, Akshay N. Amin, John C. Papadimitriou, Matthew R. Weir, and Thomas R. Coughlin</i>	1508
Verapamil Ameliorates Acute Cyclosporine A (CsA) Nephrotoxicity and Improves Immunosuppression After Cadaver Renal Transplantation	<i>Ingemar Dawidson, Pal Rooth, Daniel Fisher, William R. Fry, Candace Alway, Laura Coopender, and Joan Reisch</i>	1511
Urinary Levels of Basic Glutathione Transferase as an Indicator of Proximal Tubular Damage in Renal Transplant Recipients	<i>L. Backman, E.L. Appelkvist, O. Ringdén, and G. Dallner</i>	1514
Ultrastructural Study of Cyclosporine-Associated Arteriopathy in Renal Allografts	<i>Yutaka Yamaguchi, Satoshi Teraoka, Takashi Yagisawa, Kota Takahashi, Hiroshi Toma, and Kazuo Ota</i>	1517
Evolution of Renal Function in Cardiac vs Renal Allograft Recipients Receiving Long-Term Cyclosporine A (CsA) Immunosuppressive Therapy	<i>Richard M. Lewis, Charles T. Van Buren, Michael Macris, O. Howard Frazier, Robert P. Janney, James McAndrew, Ronald H. Kerman, and Barry D. Kahan</i>	1523
HLA-Class II Antigen Induction Does Not Exclude a Diagnosis of Cyclosporine Nephrotoxicity	<i>S.V. Fuggle, D.L. McWhinnie, and P.J. Morris</i>	1525
An Approach to the Renal Transplant Recipient with Persistent One-Month Graft Nonfunction	<i>H.A. Gritsch, M.A. Koyle, H.J. Ward, M.B. Sender, J. Rajfer, A.H. Cohen, R.J. Glasscock, and M.R. Mickey</i>	1527
The Course of Chronic, Progressive Renal Allograft Dysfunction During Cyclosporine Therapy is Modified by Addition of Azathioprine	<i>Leslie L. Rocher, Richard J. Hodgson, Robert M. Merion, Richard D. Swartz, Jeremiah G. Turcotte, and Darrell A. Campbell, Jr.</i>	1529
Changes in Renal Graft Function During Second Year Post Transplantation in Patients on Cyclosporine (CyA) Compared to Conventional Immunosuppression	<i>G. Tufveson, H. Brynager, M. Broyer, P.P. Brunner, S. Dykes, J. Ehrich, W. Fassbinder, W. Geerlings, G. Rizzoni, N.H. Selwood, and A.J. Wing</i>	1532

Is Chronic Nephrotoxicity Avoided by the Triple Drug Regimen?	<i>C. Hiesse, J.P. Gardin, O. Lantz, M. Cantarovich, H. Bensadoun, G. Benoit, J. Bellamy, M. Paillard, B. Charpentier, and D. Fries</i>	1534
Calcium Antagonist Treatment of Recipients Minimizes Early Cyclosporine Nephrotoxicity in Renal Transplantation: A Prospective Randomized Trial	<i>J.M. Morales, A. Andrés, C. Prieto, B. Ortuño, J. Estenoz, C. Dorado, J. Arenas, L.M. Ruilope, L. Fernández-Cruz, and J.L. Rodicio</i>	1537
Cyclosporin A (CsA) and Azathioprine (Aza) Overlap in Renal Allografts with Impaired Renal Function	<i>A.M. Castelao, J.M. Grifó, I. Sabaté, S. Gilvernet, E. Andres, R. Sabater, and J. Alsina</i>	1540
Cyclosporine Blood Level and Early Transplant Function of Cadaver Donor Kidneys	<i>J.H. Hong, N. Sumrani, G.S. Lipkowitz, B.J. Pilkington, and K.M.H. Butt</i>	1542
Effect of Sequential Minnesota-Antilymphocyte Globulin and Cyclosporine Therapy in Primary Cadaveric Renal Transplant Recipients with Delayed Graft Function.....	<i>K.K. Venkat, Warren Kupin, and Heung K. Oh</i>	1544
Systemic Administration of the PGE-1 Analogue Alprostadil for Prophylaxis of Early Kidney Graft Failure	<i>M.L. Broggi, B. Brando, G. Civati, C. Brunati, G. Busnach, A. Sperandeo, M. Seveso, and L. Minetti</i>	1546
Conversion to Triple Therapy in Renal Allograft Patients with Renal Dysfunction and Chronic Interstitial Lesions or Vascular Lesions on Renal Biopsy.....	<i>B. Leaker, G.H. Neild, C. Rudge, M. Mansell, and F.D. Thompson</i>	1548
The Use of Triple Therapy to Minimize Cyclosporine (CsA) Nephrotoxicity in Renal Transplantation	<i>D.N. Landsberg, A. Rae, A. Chiu, R. Werb, P. Taylor, C. Chan-Yan, and A.D. Manson</i>	1550
Chronic Cyclosporine Nephrotoxicity in Renal Transplantation: Is It the Effect of Preservation?	<i>M.S.A. Kumar, M. Samhan, P. John, M.S. Adwani, and G.M. Abouna</i>	1552
The Effect of Donor Age and Sex on Cyclosporine Associated Nephrotoxicity	<i>T. Iguro, H. Okazaki, T. Sato, M. Jimbo, and S. Oguma</i>	1554
Peri-Operative Antilymphoblast Globulin (ALG) and Delayed Initiation of Cyclosporine (CsA) Diminishes the Requirement for Prolonged Dialysis Therapy After Renal Transplantation	<i>Z. Jonathan Nestor, Leslie L. Rocher, Robert M. Merion, Richard D. Schwartz, Jeremiah G. Turcotte, and Darrell A. Campbell, Jr.</i>	1556

Other Effects and Complications

Parenchymal Calcifications in the Liver of Kidney Allograft Recipients: An Unrecognized Side-Effect of Cyclosporine	<i>G. Nanni, A.M. De Gaetano, G. Boldrini, F. Serino, U. Pozzetto, S.C. Magalini, and M. Castagneto</i>	1558
Erythrocytosis in Renal Graft Recipients Due to a Direct Effect of Cyclosporine.....	<i>F. Stockenhuber, K. Geissler, G. Sunder-Plassmann, R.W. Kurz, R. Steininger, F. Muehlbacher, W. Hinterberger, and P. Balcke</i>	1560
Infectious Diseases in 450 Kidney Transplant Recipients Treated with Cyclosporine in a Single Center	<i>K. Takahashi, T. Yagisawa, S. Teräoka, K. Tanabe, K. Ebihara, S. Fuchinoue, H. Honda, T. Toma, T. Agishi, and K. Ota</i>	1563
Cyclosporine-Associated Glomerular and Arteriolar Thrombosis Following Renal Transplantation	<i>M.R. First, R.D. Smith, M.A. Weiss, T.J. Schroeder, K.S. Kant, R. Munda, G.W. Stephens, I. Penn, and J.W. Alexander</i>	1567
Early and Late Complications of Cyclosporine Treatment in a 5-Year Follow-up of 250 Renal Transplant Recipients	<i>G. Civati, G. Busnach, M.L. Perrino, M.L. Broggi, B. Brando, M. Seveso, and L. Minetti</i>	1571

Clinical Trials and Results in Adults

Lymphocyte Responses

Immunosuppression Failure: A Function of Lymphocyte Steroid and Cyclosporin Resistance.....	<i>A.K. House, J.M. Potter, K.E. Pederson, B.F. Kinneaf, and K.B. Walker</i>	1573

Immunosuppressive Manipulation

A New Triple-Drug Induction Therapy with Low Dose Cyclosporine, Mizoribine and Prednisolone in Renal Transplantation	Y. Kokado, M. Ishibashi, H. Jiang, S. Takahara, and T. Sonoda	1575
Clinical Outcome in 36 Patients After at Least One and Up to 5 Years of Steroid Withdrawal Based Upon Specific Mixed Lymphocyte Reaction Hyporesponsiveness Toward the Living Related Donor	B.D. Kahan, R.H. Kerman, C.T. Van Buren, S.M. Flechner, D.L. Golden, and R.M. Lewis	1579
Cadaver Renal Transplantation Without Maintenance Steroids.....	R.W.G. Johnson, N.P. Mallick, A. Bakran, R.C. Pearson, P.D. Scott, P. Dyer, D. Donaghue, D. Morris, and R. Gokal	1581
Randomised Trial of Conversion from Cyclosporin to Azathioprine at One Year After Renal Transplantation	M.A. Watson, J.D. Briggs, B.J.R. Junor, M.A. McMillan, S.G. MacPherson, G. Murray, and R.M. Steward	1583
Long-Term Results of Controlled Cyclosporine Conversion at 3 Months After Renal Transplantation	A.M.M. Kootte, W.T. van Dorp, J.H. van Bockel, L.A. van Es, and L.C. Paul	1585
Use of Rabbit Globulin Anti-CD4 ⁺ Lymphocyte Clone Derived from a Rejected Kidney in the Prevention of Rejection in Kidney Transplantation: A Pilot Study	M. Hourmant, F. Babinet, D. Cantarovich, M. Latour, J. Carcagne, H. Vié, M. Bonneville, J.F. Moreau, E. Carosella, and J.P. Soulillou	1587
Does the Addition of Azathioprine (Aza) to CyA Monotherapy After a First Rejection Prevent a Second Rejection Episode in Kidney Transplant Patients?	M. Hourmant, J.L. Taupin, F. Leymerigie, D. Cantarovich, and J.P. Soulillou	1589
Cyclosporin (Cy) Monotherapy After Cadaveric Renal Transplantation	R. Margreiter, C. Bösmüller, M. Speilberger, Th. Schmid, and A. Königsrainer	1591
Is Sequential Low-Dose Immunotherapy the Preferred Treatment in Cadaveric Renal Transplantation?	M.P. Posner, G. Mendez-Picon, A. King, K.P. Nelson, H.G. Spicer, and H.M. Lee	1594
Studies on Immunosuppression with Low-Dose Cyclosporine Combined with Mizoribine in Experimental and Clinical Cadaveric Renal Allotransplantation	T. Osakabe, H. Uchida, Y. Masaki, K. Yokota, K. Sato, Y. Nakayama, M. Ohkubo, K. Kumano, T. Endo, K. Watanabe, and K. Aso	1598
Is Long-Term Therapy without Cyclosporin A (CsA) Indispensable or Dangerous? One-Year Results of a Prospective Randomized Trial	M. Büsing, H. Hölzer, W.D. Schareck, J. Mellert, B. Greger, U.T. Hopt, and W. Lauchart	1601
A Comparison of Triple Therapy with Double Therapy (Cyclosporine/Azathioprine) in Low-risk, First Cadaveric Renal Allograft Recipients.....	A.C. Restifo, J.J.B. Petrie, R.J. Rigby, I.R. Hardie, C.K. Jacob, G.R. Russ, and T.H. Mathew	1604
An Evaluation of Early Cyclosporine Versus ALG Therapy for Primary Cadaver Renal Allografts with Immediate Function	Mark B. Adams, Christopher P. Johnson, and Allan M. Roza	1606
Alternative Immunosuppressive Strategies in the Management of Recipients of Living Related Renal Transplants	E. Hodge, L. Banowsky, A. Novick, R. Lewis, S. Streem, D. Steinmuller, J. Holzmann, L. McFarlin, D. Graneto, and S. VanderBrug Medendorp	1609
Improved Cadaver Transplant Survival Using Individualized Quintuple Immunosuppression	Paul R.G. Cunningham, Francis Thomas, Cindy Sash, Donna Stelzer, Richard DeMasi, George Clark, and Judith Thomas	1615
Prednisone Withdrawal in HLA-Identical Living Related Donor Transplant Recipients	Sundaram Hariharan, M. Roy First, Rino Munda, Israel Penn, Timothy J. Schroeder, James Fidler, Patricia Weiskittel, and J. Wesley Alexander	1617
Withdrawal of Steroids After Cadaveric Kidney Allotransplantation on Maintenance Triple Therapy.....	D. Frei, G. Keusch, M. Hugentobler, W. Probst, G. Uhlschmid, F. Largiader, and U. Binswanger	1620
Steroid Withdrawal in Cyclosporine-treated Living Related Donor Renal Transplant Recipients	Warren Kupin, K.K. Venkat, and Heung K. Oh	1623

(Continued on following page)

Is Long-term Triple Drug Therapy Required for Maintaining Kidney Allograft Tolerance? Effect of Azathioprine Withdrawal at Three Months Posttransplantation	A. Oncevski, G. Rostoker, C. Buisson, G. Fruchaud, A. Benmaadi, D. Belghiti, D. Chopin, C. Abbou, P. Bierling, P. Romano, B. Weil, and P. Lang	1625
Immunosuppressive Conversion from Cyclosporine A to Azathioprine in Renal Transplant Patients	A.R. Paraiso, E.T. Ona, F.A. Alano, C.P. Ramos, and M. De Luna	1627
Early Conversion from Cyclosporine to Combination Therapy with Azathioprine in Living Related Kidney Transplantation	T. Oka, Y. Omori, I. Aikawa, T. Yasumura, N. Yoshimura, and T. Yoshida	1628
Elective Cyclosporine Conversion from Triple Therapy	J.R. Chapman, R.D. Allen, H. Ekberg, S. Lawrence, and J.H. Stewart	1631
Cyclosporin A Treatment with Successful Selective Conversion After Six Months in 70 Renal Recipients	M.C. Venning, T.W.J. Lennard, M.E. Stevens, G. Proud, M.K. Ward, R.W. Elliott, R.M.R. Taylor, and R. Wilkinson	1633
Elective Conversion from Cyclosporine to Azathioprine and Prednisolone in Patients After Cadaveric Renal Transplantation: Observations on Graft Survival and Renal Function	A.M. Tegzess, W.J. van Son, E.F. de Maar, J.M. Beelen, W.J. Sluiter, and R.M. Huisman	1635
Consequences of Conversion from Cyclosporine to Conventional Therapy in Renal Transplantation	M. Abbud-Filho, J.B. Barberato, H.J. Ramalho, L.B. Saldanha, D.M. Casassanta, E.R.M. Denadai, S. Zerati, and A.G. Bezas	1638
Effect of Discontinuing or Restricting Cyclosporine on Late Renal Allograft Rejection and Function	E. Steve Woodle, Thomas G. Heffron, Joan K. Stuart, J. Richard Thistlethwaite, Jr., and Frank P. Stuart	1641
Cyclosporine as Treatment for Corticosteroid-Resistant Rejection Episodes in Renal Transplantation	V.D. Garcia, J.C. Goldani, C.D. Garcia, G.P. Cantisani, A. Losekann, A. Messias, D.B. Mattos, S.P. Vitola, and J.J. Bianchini	1643
Triple-Drug Regimen (TDR)—AZA + CsA + P: New Definition of Factors Influencing Kidney Graft Survival at a Single Center	C. Hiesse, P. Prevost, M. Busson, N. Neyrat, O. Lantz, M. Cantarovich, P. Rieu, J. Bellamy, G. Benoit, B. Charpentier, and D. Fries	1646
Renal Transplantation and End-Stage Lupus Nephropathy in the Cyclosporine and Precyclosporine Era	C.P. Zara, G.S. Lipkowitz, N. Perri, N. Sumrani, J.H. Hong, E.A. Friedman, and K.M.H. Butt	1648
The Impact of Quadruple Versus Triple Drug Immunosuppression on Clinical Results of Cadaver Renal Transplantation	K. Venkateswara Rao and Robert C. Anderson	1652
Recipient Age—An Important Factor for the Outcome of Cadaver Renal Transplantation in Patients Treated with Cyclosporine	G. Lundgren, H. Persson, D. Albrechtsen, H. Brynger, A. Flatmark, L. Frödin, C.G. Groth, A. Lindholm, and H. Weibull	1653
Donor Source, Number of Transplants, Age at Transplant, and Diabetes: Risk Factors in the Cyclosporine Era	D.S. Fryd, L.V.G. Kruse, R.L. Simmons, D.E.R. Sutherland, W.D. Payne, and J.S. Najarian	1655
Low-Dose Cyclosporin, Prednisolone, and Anti-Lymphocyte Globulin Immunosuppressive Treatment in Cadaveric Kidney Transplantation	Y. Ono, S. Ohshima, T. Fujita, T. Kinukawa, O. Matsuura, S. Hirabayashi, and N. Takeuchi	1657
Inhibition of Chronic Kidney Allograft Rejection by Cyclosporine	M. Abbud-Filho, H.J. Ramalho, J.B. Barberato, J.E. Corrente, M. Zerati-Filho, C.B.M. Verona, R.C. Martucci, and A.G. Bezas	1660
Uselessness of Donor-Specific Transfusions and Prophylactic ALG with Therapeutic Cyclosporine Doses in Living Related Renal Transplantation Between One-Haplotype Matched Pairs	J. Yamauchi, N. Akiyama, H. Sugimoto, S. Tomikawa, K. Mita, Y. Bekku, Y. Ogawa, and T. Imai	1663
Cyclosporine as Primary Therapy For A-Matched Living Related Donor Kidney Graft Recipients ..	A.S. MacDonald, P. Belitsky, H. Bitter-Suermann, and A. Cohen	1667

Immunopathology of Renal Grafts

Phenotypic Analysis of Interstitial Infiltrates in Kidney Allograft Biopsies After One Year of Cyclosporine Therapy <i>D.J. Versluis, F.J.W. ten Kate, G.H. Wenting, and W. Weimar</i>	1670
Renal Graft Histology in Patients Treated with Different Doses of Cyclosporine <i>H.E. Wilczek, S.-O. Bohman, and C.G. Groth</i>	1672
Pathology of Two-Year Renal Biopsies in Cyclosporine and Conventionally Immunosuppressed Renal Transplants <i>G. Santelli, C. Hiesse, D. Schovaert, S. Fassi-Fihri, O. Lantz, H. Bensadoun, G. Benoit, B. Charpentier, E. Martin, and D. Fries</i>	1674
Histological Changes in Renal Allografts After Successful Conversion from Cyclosporin A to Azathioprine <i>B.J.R. Junor, I.A.R. More, J.A. Bradley, J.D. Briggs, K.F. Kyle, E. McGregor, M.A. McMillan, S.G. MacPherson, W. Vander Merwe, R.S.C. Rodger, and M.A. Watson</i>	1677
Glomerular Rejection in Kidney Allografts Under Cyclosporin <i>S. Onitsuka, Y. Yamaguchi, H. Toma, T. Yagisawa, K. Takahashi, S. Teraoka, and K. Ota</i>	1680

Clinical Trials and Results in Children

Influence of Immunosuppressive Therapy, HLA Matching and Donor Age on Long-Term Cadaveric Pediatric Renal Allograft Survival <i>A.F. Groenewoud, G.G. Persijn, J. D'Amaro, P. de Lange, and B. Cohen</i>	1683
Renal Transplantation in Children Using Cyclosporin A and Azathioprine <i>A.G.B. Clark, S.P.A. Rigden, K.I. Welsh, M. Bewick, G. Koffman, G.B. Haycock, and C. Chantler</i>	1685
Cyclosporin A as Sole Immunosuppressive Agent for Renal Transplantation in Children: Effect on Catch-up Growth <i>E.M. Hodson, J.F. Knight, A.G.R. Sheil, and L.P. Roy</i>	1687
Factors Influencing the Improvement in Cadaveric Renal Transplant Survival in Pediatric Recipients <i>R.B. Ettenger, J.T. Rosenthal, J. Marik, S. Forsythe, M.H. Malekzadeh, E. Kamil, I.B. Salusky, and R.N. Fine</i>	1693
Cadaver Renal Transplantation in Children Using Low Dose Triple Immunosuppression <i>D.M.A. Francis, R.J. Millar, R.G. Walker, A.J.F. d'Apice, and G.J.A. Clunie</i>	1696
Somatic Growth and Renal Function in Pediatric Renal Transplantation with Alternate-Day Steroid Immunosuppression Using Cyclosporine (CsA) in Japan <i>Hiroshi Kawaguchi, Yasuhiro Komatsu, Motoshi Hattori, Michio Nagata, Katsumi Ito, Kota Takahashi, Satoshi Teraoka, Hiroshi Toma, and Kazuo Ota</i>	1698
Pediatric Renal Transplantation Results are Improved with Triple-Drug Therapy with Cyclosporine, Azathioprine, and Prednisone..... <i>Robert C. MacDonell, Jr., Keith Johnson, Robert Richie, William Nylander, Yvonne McMahon, Gary Niblack, Wayne Green, Jerry Morrissey, and Christina Ynares</i>	1701
Cyclosporin A and Hypertension in Pediatric Renal Transplant Recipients..... <i>M.R. Ogborn, J.F.S. Crocker, P. Belitsky, A.S. MacDonald, H. Bitter-Suermann, and S.C. Digout</i>	1705
Successful Cadaveric Renal Transplantation in Infants and Young Children <i>R.B. Ettenger, J.T. Rosenthal, J. Marik, I.B. Salusky, E. Kamil, M.H. Malekzadeh, and R.N. Fine</i>	1707

Azathioprine and Prednisone, Lymphocytophoresis, and Cyclophosphamide

Renal Transplantation Without Prednisone: Effects on Bone Marrow Tolerance to Azathioprine <i>J.A. Schulak, C.E. Moritz, and D.E. Hricik</i>	1709
Prednisone Used as Treatment for Rejection Correlates with Poor Outcome <i>Rose-Marie Toussaint, Clive O. Callender, Georgia M. Dunston, Josefina Flores, Curla S. Walters, Daniel John, Curtis Yeager, Otis Bond, Carolyn Thompson, and J.C. Gear</i>	1712

(Continued on following page)

CONTENTS

(continued)

Hepatotoxicity of Azathioprine in Renal Transplant Recipients	<i>H.J. Ramalho, E.G. Terra, E. Cartapatti, J.B. Barberato, V.A.F. Alves, L.C.C. Gayotto, and M. Abbud-Filho</i>	1716
Interleukin-2 and Immunoglobulin Increases with H ₂ -Antagonists in Humans	<i>Francesca Aweeka, Patty Lizak, Marvin Garovoy, William Amend, Jytte Birnbaum, MaryAnn Gumbert, and John Gambertoglio</i>	1718
Lymphocytophoresis as Pretransplant Immunosuppression	<i>A. Tajima, Y. Aso, K. Suzuki, Y. Ohtawara, N. Ohta, M. Hata, T. Ushiyama, M. Nakano, and Y. Yaguchi</i>	1722

Antithymocyte and Antilymphocyte Globulins

Effect of Duration of MALG Therapy in a Quadruple Immunosuppressive Protocol	<i>R.J. Stratta, A.M. D'Alessandro, M.J. Armbrust, J.D. Pirsch, H.W. Sollinger, M. Kalayoglu, and F.O. Belzer</i>	1726
Improved Immunosuppression for Secondary Cadaver Renal Transplants (SCT) in High Risk Patients Using Quadruple Immunosuppression with Cyclosporine A (CsA) and Rabbit Anti-Thymocyte Globulin (RATG)	<i>R. DeMasi, F. Thomas, P. Cunningham, C. Sash, G. Clarke, and J. Thomas</i>	1729
Comparison of 10-Day and 21-Day ATG-Antirejection Treatment in Renal Transplant Patients Treated With Either Cyclosporine or Azathioprine as Basic Immunosuppression	<i>A.J. Hoitsma, R.G.W.L. Tiggele, J.F.M. Wetzels, J.H.M. Berden, and R.A.P. Koene</i>	1732
Multicenter Comparison of Rejection Reversal: Rabbit Anti-Human Lymphocyte Serum (ATS) Versus Horse Anti-Human Lymphocyte Globulin (ATGAM®)	<i>Keith Johnson, Gary Niblack, Robert Richie, Robert MacDonell, William Nylander, Philip Walker, William Sterling, Gilbert Ross, Arthur Humphries, and Darwin Peterson</i>	1734
Rabbit Antithymocyte Globulin Treatment of Steroid Resistant Rejection in Renal Allograft Recipients Immunosuppressed with Cyclosporine A	<i>D.J. O'Donoghue, R.W.G. Johnson, N.P. Mallick, R. Gokal, R.W. Ballardie, A. Bakran, R. Pearson, and P. Scott</i>	1736

Monoclonal Antibodies

Comparison of Minnesota Antilymphocyte Globulin and OKT3 for Induction of Immunosuppression in Renal Transplant Patients	<i>J.A. Light, N. Khawand, A. Ali, W. Brems, and A. Aquino</i>	1738
A Randomized Trial Comparing the Efficacy of OKT3 Used to Prevent or to Treat Rejection	<i>H. Kreis, N. Chkoff, L. Chatenoud, A. Debure, M. Lacombe, Y. Chrétien, C. Legendre, S. Caillat, and J.F. Bach</i>	1741
Discordant Expression of CD3 and T-Cell Receptor Antigens on Lymphocytes from Patients Treated with OKT3	<i>H.M. Gebel, L.L. Lebeck, S.C. Jensik, A.L. Landay, and R.A. Bray</i>	1745
Single Center Randomized Trial Using ATG vs OKT3 Treatment in Steroid Resistant Rejection Crises After Kidney Transplantation	<i>M. Blümke, G. Kirste, U. Wanner, and H. Wilms</i>	1747
OKT3 Monoclonal Antibody Treatment in Renal Transplant Recipients—Clinical Experience in 49 Patients	<i>J. Kovarik, G.J. Zlabinger, J. Wolfram, M. Pecherstorfer, B. Watschinger, O. Traindl, E. Pohanka, A. Sonnleitner, and W. Ulrich</i>	1748
Immune Monitoring During Retreatment with OKT3	<i>M.R. First, T.J. Schroeder, P.E. Hurtubise, M.E. Mansour, I. Penn, R. Munda, W.F. Balistreri, J.W. Alexander, D.B. Melvin, J.P. Fidler, F.C. Ryckman, and M.E. Brunson</i>	1753
Concomitant Low-Dose Cyclosporine and OKT3 Therapy for Renal Transplant Rejection	<i>Donald E. Hricik, Joseph Zarconi, and James A. Schulak</i>	1755
Low-Dose Oral Acyclovir for Prevention of Herpes Simplex Virus Infection During OKT3 Therapy	<i>I.Y.S. Tang, M.S. Maddux, S.A. Veremis, W.D. Bauma, R. Pollak, and M.F. Mozes</i>	1758
Viral Complications of OKT3 Monoclonal Antibody Therapy in Children Undergoing Renal Transplantation	<i>Timothy E. Bunchman, Thomas E. Nevins, S. Michael Mauer, and Blanche M. Chavers</i>	1761

(Continued on following page)

CONTENTS

(continued)

Infection in OKT3-Treated Patients Receiving Additional Antirejection Therapy	<i>R. Munda, M. Hutchins, M.R. First, M. Carey, T. Schroeder, and J.W. Alexander</i>	1763
Early Experience With Anti-Tac in Clinical Renal Transplantation	<i>R.L. Kirkman, M.E. Shapiro, C.B. Carpenter, E.L. Milford, E.L. Ramos, N.L. Tilney, T.A. Waldmann, C.E. Zimmerman, and T.B. Strom</i>	1766
Anti-IL2 Receptor Monoclonal Antibody (33B3.1) in Prophylaxis of Early Kidney Rejection in Humans: A Randomized Trial Versus Rabbit Antithymocyte Globulin	<i>D. Cantarovich, B. Le Mauff, M. Hourmant, M. Giral, M. Denis, Y. Jacques, and J.P. Souillou</i>	1769
Prevention of Renal Allograft Rejection by Perfusion With Antileukocyte Common Monoclonal Antibodies Is Dependent on Good Uptake of Antibody by Interstitial Dendritic Cells	<i>Y. Brewer, M. Bewick, A. Palmer, A. Severn, K. Welsh, and D. Taube</i>	1772
Lack of Xenoantibody Response in Recipients of Renal Transplants Pretreated With a Mixture of Antihuman Leukocyte Common Monoclonal Antibodies	<i>C.M. Lloyd, M.A.B. Thomas, M.J. Raftery, D.H. Taube, and K.I. Welsh</i>	1774
Experience With a New Monoclonal Antibody in Clinical Kidney Transplantation	<i>G. Hillebrand, E. Rothaug, C. Hammer, W.D. Illner, St. Schleibner, J. Racenberg, H.J. Gurland, and W. Land</i>	1776
Treatment of Acute Cellular Kidney Allograft Rejection With T ₁₀ B ₉ 1A-31A Anti T-Cell Monoclonal Antibody <i>Thomas H. Waid, Bruce A. Lucas, John S. Thompson, Steve Brown, Donald Moore, Peter Amlot, and George Janossy</i>		1778
Treatment of Acute Kidney Rejection Episodes With Monoclonal Antibody Directed Against IL2 Receptor: A Pilot Study	<i>D. Cantarovich, B. Le Mauff, M. Hourmant, M. Giral, M. Denis, M. Hirn, Y. Jacques, and J.P. Souillou</i>	1785

Donor Antigen Infusion

Use of Cryopreserved Donor Bone Marrow in Cadaver Kidney Allograft Recipients	<i>W. Henry Barber, David A. Laskow, Mark H. Deierhoi, Bruce A. Juilian, John J. Curtis, and Arnold G. Diethelm</i>	1787
---	---	------

Lymphoid Irradiation

Long-Term Follow-Up of Kidney Grafts in High-Risk Patients Under TLI and CsA Therapy <i>R. Cortesini, E. Renna Molajoni, P. Berloco, A. Bachetoni, P. Cinti, A. Trovati, F. Sallusto, R. Pretagostini, M. Iapelli, M. Caricato, M. Rossi, and D. Alfani</i>		1790
Total Lymphoid Irradiation (TLI) in the Cyclosporine Era—Use of TLI in Resistant Cardiac Allograft Rejection <i>B. Levin, L. Bohannon, V. Warvariv, W. Bry, and G. Collins</i>		1793
Factors Determining the Success Rate of Total Lymphoid Irradiation in Clinical Kidney Transplantation <i>M. Waer, P. Leenaerts, Y. Vanrenterghem, L. Roels, E. van der Schueren, M. Vandeputte, and P. Michielsen</i>		1796
Long-Term Clinical Studies of High-Risk Renal Retransplant Recipients Given Total Lymphoid Irradiation <i>Dixon B. Kaufman, Tae H. Kim, Shimon Slavin, John S. Najarian, and David E.R. Sutherland</i>		1798
Function and Numbers of Natural Killer (NK) Cells in Patients Conditioned With Total Lymphoid Irradiation (TLI)	<i>C.M. Gray, J.A. Smit, and J.A. Myburgh</i>	1800

Blood Transfusion and Effects

Analysis of Immunomodulation Induced by Donor-Specific Blood Transfusion (DST): Establishment of a Human-Mouse Hybridoma Secreting the MLR Inhibiting Factor	<i>Takenori Kawamura, Kenichi Sakagami, and Kunzo Orita</i>	1802
Anti-idiotypic Antibodies to HLA After Donor-Specific Blood Transfusion (DST)	<i>E. Pohanka, R.C. Manfro, C. Oto, B.W. Colombe, J. Melzer, N. Feduska, O. Salvatierra, Jr., and M.R. Garovoy</i>	1806
Cytoplasmic Free Calcium Concentration and Inhibition in MLC After Blood Transfusion	<i>Toma Hiroshi and Yasuo Mineko</i>	1810

(Continued on following page)

CONTENTS

(continued)

Donor-Specific Transfusion (DST) with Intermittent Administration of Azathioprine Induces Suppressor T Cells and MLR-Inhibiting Factors Without Sensitization	<i>M. Haisa, K. Sakagami, T. Matsumoto, T. Kawamura, S. Uchida, T. Fujiwara, S. Shiozaki, M. Inagaki, and K. Orita</i>	1814
Changes in Donor-Specific Cell-Mediated Lympholysis (CML) Response Associated with Success of Early Steroid Withdrawal in DST-Azathioprine-Treated Renal Transplant Recipients	<i>W.J. Burlingham, A. Grailer, and H.W. Sollinger</i>	1818
Antidiotypic Activity and Sensitization After Donor-Specific Transfusion (DST) Given With and Without Cyclosporin A (CsA)	<i>A.N. Hillis, A.M. MacLeod, I.A. Al-Muzairai, A. Innes, K.N. Stewart, D.A. Power, M.J. Bone, R.A. Sells, and G.R.D. Catto</i>	1820
Humoral and Cell-Mediated Immune Responses After Donor-specific Transfusion (DSBT)	<i>T. Kovithavongs, R. Sharma, J. Schlaut, D. Burzminski, F. Pazderka, F. Harley, and J.B. Dossetor</i>	1822
Hepatitis in Renal Transplant Recipients With and Without Donor-specific Blood Transfusion	<i>Z. Morad, A.B. Suleiman, and C.T. Kong</i>	1825
The Effect of a Pretransplant Blood Transfusion on Lymphokine Production in Patients with Renal Failure	<i>R.M. McKenna, P. Bakkestad-Legare, D.N. Rush, and J.R. Jeffery</i>	1827
Concomitant Immunosuppression and Donor-specific Transfusion Prior to Renal Transplantation	<i>C.B. Anderson, M.D. Jendrisak, M.W. Flye, D.W. Hanto, C.K. Anderman, G.E. Rodey, and G.A. Sicard</i>	1828
Transplant Outcome with Donor-Specific Buffy-Coat and Lymphocyte-Transfused Patients	<i>Hajime Okazaki, Hisashi Takahashi, Masayuki Jimbo, Takashi Iguro, Takaomi Satoh, and Makoto Ishizaki</i>	1832
Donor Nonspecific Blood Transfusions Before Renal Transplantation from Haplo-mismatched Living Related Donors	<i>Z. Shapira, R. Zamir, E. Livni, A. Yussim, D. Shmueli, and H. Yehoshua</i>	1834
Outcome of Donor Specific Transfusion Renal Transplants Across B Cell Positive Crossmatches	<i>K. Balakrishnan, R. Munda, M.R. First, and J.W. Alexander</i>	1836
Comparative Analysis of DST Alone and DST With Intermittent Coverage by Cyclophosphamide	<i>I. Kasai, K. Kumano, M. Iwamura, K. Yoshida, S. Mashimo, T. Endo, T. Sakai, K. Koshiba, K. Iitaka, H. Uchida, and K. Watanabe</i>	1837
Prediction of Acute Rejection Before Kidney Transplantation Treated With Donor Specific Transfusion Plus Azathioprine	<i>A. Aikawa, M. Tashiro, K. Arai, T. Ohara, Y. Iwashita, I. Kimura, K. Hirata, and A. Hasegawa</i>	1839
Immunological Monitoring and Diagnosis of Rejection		
Urine Sediment Cytology in the Management of Renal Allograft Recipients	<i>P.N. Madras, M.A. Simpson, A.J. Cornaby, R.A. Dempsey, G.H.A. Clowes, and A.P. Monaco</i>	1842
Evaluation of Monocyte Procoagulant Activity as a Parameter for Immunologic Monitoring in Renal Transplantation ...	<i>S.M. Zappala, R.B. Khauli, C. Miller-Graziano, T.K. Takayama, J.S. Stoff, and M. Menon</i>	1844
Subpopulations of Peripheral Blood Mononuclear Cells Are Reliable for Monitoring Infiltrating Mononuclear Cells	<i>Shiro Takahara, Izumi Sakakibara, Seiichi Suzuki, Hiroshi Amemiya, Yukito Kokado, Michio Ishibashi, and Takao Sonoda</i>	1846
Contribution of T-Cell Subset Monitoring of Renal Transplant Recipients in the Cyclosporine Era	<i>P.S. Khanuja, L.H. Toledo-Pereyra, D.A. Gordon, K.O. Bandlien, and J.I. Whitten</i>	1852
Immunopharmacologic Effects of Immunosuppressive Agents Explored by a New Effector Monocyte Generation Assay	<i>M. Ishibashi, S. Jiang, Y. Kokado, S. Takahara, and T. Sonoda</i>	1854
Comparison of Lymphocyte Subsets of Peripheral Blood and Grafts in Renal Transplant Recipients	<i>M. Tashiro, A. Aikawa, I. Sato, I. Kimura, Y. Iwashita, K. Arai, T. Ohara, K. Hirata, and A. Hasegawa</i>	1859
Pre-operative Interleukin 2 and Interleukin 2 Receptor Levels May Predict Subsequent Renal Allograft Rejection	<i>A.J. Cornaby, M.A. Simpson, P.N. Madras, R.A. Dempsey, G.H.A. Clowes, and A.P. Monaco</i>	1861

(Continued on following page)

CONTENTS

(continued)

A Critical Analysis of Serum and Urine Interleukin 2 Receptor Assays in Renal Allograft Recipients <i>Robert B. Colvin, Frederic I. Pfeffer, Thomas Fuller, Michael Brown, Steven Ip, Patrick Kung, and A. Benedict Cosimi</i>	1863
Postoperative Endogenous Serum Cortisol Levels as an Index of Acute Rejection and Severe Infection in Renal Allograft Recipients <i>M. Kozaki, T. Hirano, K. Oka, M. Honma, X. Kang, E. Sakurai, T. Tamaki, and I. Tamaki</i>	1864
Serum Beta ₂ Microglobulin Monitoring in Cadaver Kidney Transplant Recipients with Oliguric Renal Failure <i>R.T. Schweizer, L. Roper, D. Hull, and S. Bartus</i>	1867
Monitoring the Response to Anti-rejection Therapy with Serum Neopterin <i>A.E. Smillie, R.J. Rigby, and J.J.B. Petrie</i>	1869
Serum Alpha-1 Microglobulin Levels as Indicators of Renal Function in Allograft Recipients <i>Frans Duraj, Lars Bäckman, Francesco Dati, and Olle Ringden</i>	1871
Immunocytology of Urinary Sediments in the Diagnosis of Rejection of Renal Allografts <i>Ph. M.M. Dooper, M.J.J.T. Bogman, C.N. Maass, G.P. Vooys, and R.A.P. Koene</i>	1873
Combined Measurements of Urinary Neopterin, β_2 -Microglobulin, and Serum Gamma-Interferon for Early Detection of Renal Graft Rejection Following Change from Cyclosporin A to Immunosuppressive Combination Therapy <i>C.Y. Lin, T.Y. Shann, W.Y. Lui, and F.K. Peng</i>	1874
Monoclonal Antibody Identification of Nucleated Cells in Urine: Diagnosis of Allograft Rejection <i>M. Segasothy, D.F. Birch, K.F. Fairley, and P. Kincaid-Smith</i>	1878
Modified Two-Dimensional Electrophoresis of Urinary Proteins for Monitoring Early Stages of Kidney Transplantation <i>A. Lapin, H. Kopsa, R. Smetana, W. Ulrich, P. Perger, and F. Gabl</i>	1880
A Comparative Assessment of Two Quantitative Analyses of Fine-Needle Aspirate Biopsies in Comparison to Core Biopsy Specimens Post-Renal Transplantation <i>Donald R. Steinmuller, Chris Boshkos, Andrew C. Novick, Stevan B. Streem, Robert J. Cunningham, Andrew J. Fishleder, and Barbara Dlugosz</i>	1882
Immunohistologic Staining of Renal Transplant Biopsies with Monoclonal Antibody WT14: A New Parameter for the Diagnosis of Rejection <i>M.J.J.T. Bogman, Ph.M.M. Dooper, K.J.M. Assmann, J.G.J. van de Winkel, W.J.M. Tax, C.N. Maass, and R.A.P. Koene</i>	1886
Immunohistology or Conventional Histology for the Diagnosis of Renal Allograft Rejection? <i>D.L. McWhinnie, D. Hughes, S.V. Fuggle, M.S. Dunnill, N.P. Carter, and P.J. Morris.</i>	1888
Aggressive Needle Biopsy Protocol Prevents Loss of Renal Allografts to Undetected Rejection During Early Posttransplant Dysfunction <i>J. Richard Thistlethwaite, Jr., E. Steve Woodle, James T. Mayes, Joan K. Stuart, Thomas G. Heffron, Benjamin H. Spargo, and Frank P. Stuart</i>	1890
Duplex Doppler Evaluation of Renal Allograft Dysfunction <i>G. Marchal, H. Rigauts, B. Van Damme, Y. Vanrenterghem, M. Waer, H. Verbrugge, A. Baert, and P. Michielsens</i>	1893
Doppler Assessment in Renal Transplantation <i>D.C.H. Harris, V. Antico, R. Allen, S. Gruenewald, S. Lawrence, J.H. Stewart, and J.R. Chapman</i>	1895
Duplex Doppler Studies in Acute Renal Transplant Rejection <i>Colin Evans, D.L. Cochlin, C. Ferguson, P.J. Griffin, and J.R. Salaman</i>	1897
The Predictive Value of Renal Cortical Perfusion Indices During Acute Allograft Rejection Crises <i>Moshe Shabtai, David Anaise, Frederick Miller, Zvi H. Oster, Harold Atkins, Wayne C. Waltzer, Marc J. Yland, and Felix T. Rapaport</i>	1899
Usefulness and Limitations of Doppler Ultrasonography in the Evaluation of Postoperative Renal Allograft Dysfunction <i>Wayne C. Waltzer, Moshe Shabtai, David Anaise, and Felix T. Rapaport</i>	1901
Use of Duplex Ultrasound Scanning in Renal Transplantation <i>W.D. Soper, T. Bergman, T. Harward, C. Huang, L. Peterson, and J.S. Wolf</i>	1903
