Foreword

The proceedings of the XIth International Congress of Nephrology held in Tokyo in 1990, form the most international and complete document of the present state of basic and clinical science in nephrology. In addition, they document the progress made in this field during the 3 years since the London Congress. The result is nothing short of impressive. The material presented by the invited lecturers and the participants of the symposia all show a remarkable pattern; not only the "height" of the science, but also the depth of the specialized knowledge, both prerequisites of excellency in science, which do not necessarily imply narrowness of outlook. On the contrary, this written document of the Tokyo Congress is a witness to the enormous progress made over the last few years in communication between basic scientists and clinical scientists.

The International Society of Nephrology is a fine example of how fruitful and productive this interaction can be, if it is conducted with the desire to understand each other. The members of the Scientific Program Committee of the Tokyo Congress are to be congratulated, not only for a thoughtful and well designed program, but also for carefully selecting those speakers who, besides their own contribution to nephrological science, also have the talent of being able to communicate with a large, international audience. In particular, I would like to express my deep appreciation to the editors of the Proceedings for their commitment and industriousness which made it possible for this publication to appear so soon after the Congress.

Since the first Congress of the International Society of Nephrology in Evian in 1960, nephrologists have witnessed a phenomenal increase in knowledge, a progress which still continues and will do so in the future. The present proceedings are a snapshot of this process. The counterpoint to the intellectual challenge of acquiring deeper understanding is the duty and promise to utilize that understanding for the benefit of our patients.

KLAUS THURAU, M.D.
President,
International Society of Nephrology
(1987-1990)

Preface

The XIth International Congress of Nephrology was held in Tokyo, Japan from July 15-20, 1990.

Since the first congress in Evian, France in 1960, this is the first time that this prestigious congress has been held in Asia. Therefore, enthusiastic expectations were held by nephrologists not only in Japan but also throughout the world.

In organizing the congress under the estimable guidance of Prof. Klaus Thurau, President of the International Society of Nephrology, the ISN Executive Committee and the International Advisory Committee, Prof. Michinobu Hatano, Chairman of the local organizing committee as well as the organizing committee made every effort to make the congress a success.

Over three thousand participants from 71 countries attended the congress. These included 1,470 participants from Japan, 472 from the United States, 150 from France, and 128 from Italy. We were particularly pleased to welcome eight representatives from Czechoslovakia as well as an increased participation from other eastern European countries, the Soviet Union, and China. Forty-nine delegates from Taiwan were also in attendance.

The opening ceremony was held at the New Takanawa Prince Hotel in the presence of the Crown Prince, whose address noted that progress in nephrology would contribute greatly to the welfare of patients worldwide.

The scientific program consisted of 15 state-of-the-art lectures, 36 symposia, 11 workshops, 256 oral and 1,778 poster presentations. Following the advice of the ISN Executive Committee, the Scientific Program Committee encouraged the presentation of clinical and research papers at the same time in each session. This ensured that throughout the scientific program, discussions were constructive, and this helped to make the congress both stimulating and fruitful.

A total of 12 ISN satellite symposia, 4 overseas and 8 in Japan, were also held. The specific topics discussed at each symposium, combined with sightseeing tours at each site, contributed greatly to exchanges of both friendship and information.

Finally, we would like to express our sincere thanks and appreciation to the ISN Committee and all the participants of the congress.

KENZO OSHIMA, M.D.
President

Contents of Volume I

Foreword	V
Preface	VII
Contents of Volume II	XXI
List of Contributors	XXIX

State of the Art Lectures

Pathogenesis of Glomerulonephritis—1990

R.C. ATKINS	3
-------------------	---

Functional Morphology of the Nephron

C.C. TISHER, K.M. MADSEN, and J.W. VERLANDER	19
--	----

Function of Thin Segments of Henle's Loop

M. IMAI, K. YOSHITOMI, Y. KONDO, J. TANIGUCHI, C. KOSEKI, T. ISOZAKI, K. TABEI, and S. KOYAMA	39
---	----

IgA Nephropathy: Recent Views on Pathogenesis and Treatment

H. SAKAI	61
----------------	----

Pathophysiology of Obstructive Nephropathy

S. KLAHR	77
----------------	----

Very Long-Term Dialysis

Y. HIRASAWA	95
-------------------	----

Mechanisms of Na^+ , Cl^- , and HCO_3^- Transport in the Proximal Tubule

P.S. ARONSON	99
--------------------	----

Biology of Acid-Base Transport in Distal Urinary Epithelia

P.R. STEINMETZ	117
----------------------	-----

Osmolytes and Cell Osmoregulation in the Kidney

F.X. BECK, K. THURAU, M. SCHMOLKE, and W.G. GUDER	135
---	-----

The Pathogenesis of Tubulointerstitial Nephritis

G. WOLF, P.S. HEEGER, and E.G. NEILSON	151
--	-----

Lipids and the Pathogenesis of Kidney Disease

J.F. MOORHEAD	165
---------------------	-----

Symposia

Immunological and Cellular Mechanisms of Glomerulonephritis

Glomerular Injury Induced by the C5b-9 Membrane Attack Complex of Complement W.G. COUSER	182
Platelets in Immune Mediated Glomerular Disease R.J. JOHNSON	191
The Role of Eicosanoids in Glomerular Immune Injury R.A.K. STAHL	201
Mechanisms of Glomerular Fibrin Deposition in Glomerulonephritis S.R. HOLDSWORTH and P.G. TIPPING	209
Hapten-Specific Cellular Immune Response Producing Glomerular Injury T. OITE	222

Role of Potassium in Acid-Base Disturbances

Acid-Base Implications of the K-NH ₄ Interactions R.L. TANNEN	228
Reabsorption of Bicarbonate Along the Nephron: Importance of Potassium G. CAPASSO, R. UNWIN, and G. GIEBISCH	234
Role of Acid-Base Disturbance on Potassium Transport Along the Nephron K. TABEI, S. MUTO, H. FURUYA, Y. SAKAIRI, Y. ANDO, and Y. ASANO	242
Mechanisms of Transcellular Potassium Shifts in Acid-Base Disorders H.J. ADROGUÉ	252
Hypokalemia in Metabolic Alkalosis: A New Look at an Old Controversy F.J. GENNARI	262

Role of Kidney in the Pathogenesis of Hypertension

The Renin Angiotensin System, the Kidney, and the Pathogenesis of Hypertension N.K. HOLLOWBERG and G.H. WILLIAMS	272
Renal Microcirculation in Essential Hypertension K. HAYASHI, M. EPSTEIN, and R.D. LOUTZENHISER	280
The Pathogenesis of Salt-Sensitive Hypertension T. FUJITA	291
Ion Transport Abnormalities in the Development of Hypertension G. BIANCHI, D. CUSI, P. FERRARI, M.G. TRIPODI, and B. BARBER	303

Cellular and Integrative Functions of the Juxtaglomerular Apparatus

Cell Volume Regulation and Transport Characteristics of Macula Densa Cells A.E.G. PERSSON, M. SALOMONSSON, P. WESTERLUND, R. GREGER, E. SCHLATTER, and E. GONZALEZ	314
Intracellular and Membrane Events in the Activation of Afferent Arteriolar and Granular Cells A. KURTZ	323
Macula Densa Control of Renin Secretion J.P. BRIGGS, J.N. LORENZ, H. WEIHPRECHT, and J. SCHNERMANN	338
Macula Densa Control of Renin Secretion and Proximal Tubular Pressure P.P. LEYSSAC	348
The Afferent Arteriole in Tubuloglomerular Feedback and Autoregulation L.C. MOORE and D. CASELLAS	356
