The best children's books are 4 very difficult nor very simple, and satisfy(令……满意) the child who hears the story and the adult who reads it. 5, there are in fact few books like this, so the 6 of finding the right bedtime story is not easy to solve. This may be 7 many of the books for children were in fact written for adults.

If we leave the children by themselves, they often show the worst possible 8 in literature(文学). Just leave a child in a 9 or a library and he will choose the books written 10 an imaginative way, or have a look at the most children's 11, full of the stories and jokes which are the objections(反对) of teachers and righting-thinking 12.

Perhaps we parents should 13 trying to brainwash children into following our taste in literature. After all, children and adults are 14 that we parents should not expect that they will enjoy the same books. So I 15 we'll just have to compromise(妥协) over the bedtime stories.
