1973—1993

前言

江蘇省腫瘤防治研究所成立於 1973 年 12 月 25 日，經過 20 年的不斷發展，現已成為具有自身特色的在國內處於前列的腫瘤專科醫療、科研單位。作為全省腫瘤防治研究中心，擔負着指導全省腫瘤的醫療、科研、預防及相關人才的培養任務。

建所初期，全所只有職工 178 人，床位 150 張。目前有職工近千人，具有正高級職稱的 21 人，副高級職稱的 56 人。現有正式床位 539 張，簡易床位 300 張。

診療手段不斷增加，診斷由建所初期簡單的方法發展為全方位的聲、光、影相結合的高科技綜合手段。臨床治療以放療、化療、手術三大手段為龍頭，中醫、介入、冷凍激光等相輔助，手段齊全，治療水平在國內處於領先地位。

建所以來，共有 9 個科研項目獲部、省級獎。發表論文千余篇。

隨着改革開放的不斷深入，以及綜合國力的不斷增強，我所的發展將進一步加快，在攻克癌症的道路上必將邁出堅實的步伐。

REAR - SERVICE AND SUPPLY

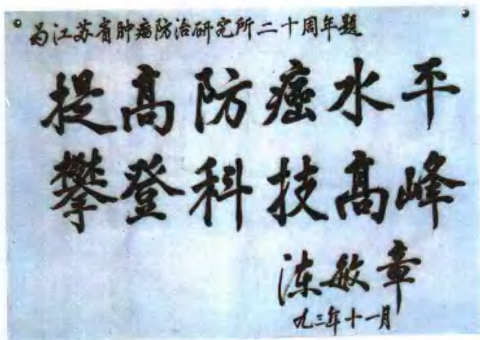

Jiangsu Institute of Cancer Research was established on December 25, 1973. Through the 20 years' continuous development, the institute, with its own unique characteristic, has been among the top institutes in the cancer treatment and research throughout the nation. As the cancer center of Jiangsu province, the institute has successfully taken the responsibilities of carrying out and guiding the provincial cancer treatment, research and prevention work and training the relevant specialized medical personnels for the whole province as well.

At the initial stage of establishment, the institute was only staffed with 178 people and equipped with 150 beds, but there are now almost 1,000 staff including 21 professors and 56 associate professors, and 539 regular beds plus 300 recovery ones at the institute.

With the great increase in diagnostic methods and the mighty advance in medical technology, from the early period of the founding of the institute until now, diagnostic methods used at the institute have developed from those simple, mainly based on clinical findings, to the comprehensive ones adopting the advantages of all kinds of advanced science and technology. In clinical treatment, not only radiotherapy, chemotherapy and surgery have been employed as main modalities at the institute, but also Chinese traditional medicine, interventional radiology (catheter infusion), liquid nitrogen cryotherapy and laser-fulguration have been used as adjuvant treatment methods. The therapeutic techniques are comprehensive and advanced, and the results of treatment are in the leading position in China.

Since the establishment of the institute, totally, 9 scientific research achievements have been awarded by the Ministry of Public Health and Jiangsu Province, respectively, and more than 1,000 academic theses have been published.

With the "Open and Reform" deepening and the comprehensive national strength increasing, it is certain that Jiangsu Institute of Cancer Research will develop more rapidly and will march a great leap forward on the way of conquering cancers.

建所初期，只有3層磚木式病房樓和2層門診樓，條件簡陋。20年來累計建房面積達38966平方米。擁有萬元以上儀器設備159臺，特別是近年來，增添了X-CT、E-CT、加速器、后裝治療機、鈾治療機、流式細胞儀、萬能顯微鏡等貴重精密醫療科研儀器，促進了醫療、科研工作的開展。

In the initial stage of the institute, there was only two old buildings, a three-story building for in-patient and a two-story one for out-patient, and the medical equipments were insufficient and vulnerable. After 20 years' development, however, the whole built-up area of the institute has increased to 38,966M² and there has been as many as 159 instrument(s) and equipments, each valued above 10,000 RMB yuan. Especially recently, we have purchased and installed computed tomography, emission computed tomography, linear accelerators, T-780C cobalt unit, afterloading therapy units, flow cytometry, multifunctionay microscope (VANOX) and so on, which have enable us to effectively develop the treatment and research of cancers.
