

百年华诞

SHANXI UNIVERSITY
THE CENTENNIAL ANNIVERSARY

简介

山西大学，前身是山西大学堂，创办于1902年5月。与京师大学堂(今北京大学)、北洋大学堂(今天津大学)一起开辟了中国近代高等教育的新纪元。在民主主义革命时期，山西大学以“得天下英才而育之”为己任，培养了大批优秀人才，为点燃中国近代科学文明的火花，倡导和兴起历次爱国民主运动和反帝反封建的革命斗争做出了突出的贡献。

建国后，山西大学赢得了新生，迅速扩充为文、理、医、工、法五个学院，成为当时全国规模较大的高校之一。1953年全国院系调整中，文、理两院合并改称山西师范学院，医、工两院分别独立为山西医学院(今山西医科大学)和太原工学院(今太原理工大学)，法学院改称财经学院划归中国人民大学，冶金工程系划归北京钢铁学院(今北京科技大学)，纺织和采矿工程系并入西北工学院(今西北工业大学)。1961年6月，山西师范学院与1959年成立的新山大合并，恢复了山西大学校名。

改革开放以来，山西大学快速发展。1992年九十周年校庆之际，江泽民总书记亲笔题写了校名，薄一波同志题写了校训。1996年李岚清副总理亲临学校视察，极大鼓舞了全校师生的工作和学习热情，使学校面貌发生了巨大变化。

近年来，学校抓住机遇发展自己，迄今已成为包括哲学、法学、经济、教育、文学、历史、理学、工学、医学、管理学等十大学科门类的山西唯一一所综合性大学。目前学校占地近2000亩，拥有21个院系，65个本科专业，58个硕士学位授予点，9个博士学位授予点，2个博士后流动站。在校学生23000多人，教职员工近3000人。学校不仅是国家大学生文化素质教育基地，还建有国家理科基础科学研究和教学人才培养物理基地、国家华文教育基地、国家职教师资培训基地。量子光学实验室是国家重点实验室，科学技术哲学研究中心是教育部确定的“人文社会科学重点研究基地”。科学技术哲学和光学学科是国家重点学科。

在“基础研究上水平，应用开发出效益”的科研方针指引下，在为山西地方培养高素质人才的同时，山西大学加强科技服务，为山西经济社会发展提供强有力的智力支持。近年来，先后承担国家“973”项目、“863”项目、国家自然科学基金和社会科学基金项目等各级各类项目1100余项，有300多项科研成果获得省部级以上奖励，15项成果获得国家专利。在全国高校中，SCI排名一直保持在60名以内。学校还以基础研究为依托，着眼山西产业结构调整，推出了一批科技含量高、应用价值广的高科技成果，有已销往美、法等发达国家的激光器为主的系列光电产品、以生物菌肥、生物制药为主的系列生物产品，以激光全息防伪、电镀添加剂、无尘粉笔为主的化学化工产品等，创造了巨大的经济效益和社会效益。

学校始终坚持教学质量第一的办学思想，加强素质教育，教育教学质量稳步提高，赢得了良好的社会声誉。近年来学生第一志愿报考率一直名列全省首位，2001年被教育部评为全国普通高校毕业生就业先进单位。第六届“挑战杯”全国大学生课外科技作品大赛排第六名。在全国大学生体育技能大赛、数学建模大赛、电子设计、英语竞赛、健美操等比赛中，连获8个一等奖。

百年传承，薪火相继。即将走过百年历程的山西大学将以百年校庆为契机，继往开来，拼搏发展，力争早日实现“把山西大学建成具有地方特色和地区示范作用的一流的教科研型现代化综合性大学”的宏伟目标。

A Brief Survey

Shanxi University, known as the Imperial Shanxi University in its early days, was founded on May 8th, 1902. Its establishment, together with that of the Imperial Peking University (now Peking University) and Peking University (now Tsinghua University) inaugurated a new era in the history of higher education in modern China. During the Period of the Democratic Revolution, Shanxi University, honoring its commitment to nurturing lofty ideals in young people and to spreading the sparks of modern scientific civilization in China, brought forth a great number of well-educated people and carved out a fine name in advocating and initiating many a patriotic democratic movement against imperialism and feudalism.

Liberation brought about the regeneration of Shanxi University. It shortly grew into a higher-education institution of nationwide significance with 5 schools, i.e. the Schools of Arts, Sciences, Medicine, Engineering, and Law. With the reorganization of the country's colleges and universities in 1953, the merger of the Schools of Arts and Sciences made Shanxi Teachers' College, the Schools of Engineering and Medicine became independent as Taiyuan Institute of Engineering (now Taiyuan Polytechnic University) and Shanxi Medical College (now Shanxi Medical University), the School of Law was reshaped into an institute of finance and economics which was in turn annexed by the People's University of China, the Department of Metallurgical Engineering was incorporated into Beijing Iron and Steel Engineering Institute (now Beijing University of Science and Technology), and the Departments of Textile and Mining Engineering was transferred to Northwestern Engineering Institute (now Northeastern Polytechnic University). In June, 1961, Shanxi Teachers' College amalgamated with a new school which established in 1959, assumed the name of Shanxi University. And thus the original university name was restored.

Shanxi University has seen a rapid development since the country adopted the policy of reform and opening. At the time of the 90th anniversary of the university in 1992, General Secretary Jiang Ze-min and the former senior state leader Bo Yi-bo inscribed the university name and the university motto respectively in their own hands. In 1996, Li Lan-qing, vice-premier of the State Council, came personally to inspect the university. The attention the leaders showed to the university greatly encouraged the faculty and the students and since then the university has changed much.

In the past few years, the university has taken advantage of the favorable circumstances and further sped up its development. Now it has become a local comprehensive university that consists of 21 schools/departments, offering 65 undergraduate, 58 graduate, 9 doctoral programs and 2 postdoctoral research fellowship programs, covering all the ten main faculties of philosophy, law, economics, pedagogy, literature, history, sciences, engineering, management, and medicine. The university covers an area of nearly 2000 mu (about 133 hectares). It has a faculty of about 3000 and the students number some 24,000. It has been designated by state as a Base of Whole-person Education for University Students, a Training Base for Physics Teachers and Researchers, a Base of Chinese Education for Overseas Chinese, a Training Base for Teachers of Vocational Education. The Laboratory of Quantum Optics and Quantum Devices is the State's Key Laboratory and the Research Center of Philosophy of Science and technology the Educational Department's Key Research Base of Humanities and Social Sciences. And the above 2 programs are also the state's key programs.

In research, Shanxi University adopts the policy of "high standards in basic studies and high economic benefit in applied development". While adhering to its emphasis on bringing forth high-quality personnel to the local area, it has enhanced its awareness of scientific and technical service and provided forceful intellectual support to the economic and social development of Shanxi Province. In recent years, it has undertaken about 1,100 state and provincial research projects including the National "973" Projects, the National "863" Projects, the National Social Sciences Foundation Projects, and the National Natural Sciences Foundation Projects, of which more than 300 have received provincial/ministerial-or-above-level commendation and 15 have been granted national patents. It has annually remained within 60 on the SCI ranking of Chinese universities. Based on its tremendous resources in basic research and having anyeye on the needs of the province in the present process of regularizing its industrial structure, the university has developed quite a number of high-tech products that promise great value in application and dissemination, e.g. the laser devices and other optical-electronic products that have been marketed in America, France and other developing countries, the series of biological products centering on bacterial manure and bio-pharmaceuticals, the chemical products such as counterfeit proof laser hologram film, electroplate additives, and dustless chalk.

Persistent in pursuing a high-quality whole-person education, Shanxi University has gained widespread prestige. In successive years, it has topped all the other colleges and universities of the province in the number of first-choice applications they have respectively received from among high school graduates. In 2001, it was commended by the Ministry of Education as the province's Advanced Unit in Graduate Career Development. It won the sixth place in the 6th National Contest of University Students for Extra-curricular Science and Technological Projects. And in the past few years the university has collected eight top prizes in national university students' contests in areas of physics, mathematical modeling, electronic design, English proficiency, calisthenics and so forth.

Priding itself on the splendid work of generation after generation of the dedicated people working here and taking the centennial anniversary as an opportunity for further development, the one-hundred-year-old university is now forging steadily ahead for the goal: "a first-rate modern comprehensive university with a balanced emphasis on both teaching and research, a university with local characteristics and playing the role of a demonstration higher-education institution of the province".

SUPPORT FROM MANY SIDES 关怀篇

Shanxi University the Centennial Anniversary

山西大学百年华诞

- 改革开放以来，山西大学得到党和国家领导以及省市领导的亲切关怀。特别是1992年在九十周年校庆之际，江泽民同志为学校题写了校名，薄一波同志为学校题写了校训，1996年，李岚清同志到学校视察，极大地鼓舞了全校师生员工再铸辉煌的信心和决心，推动了学校各项工作的开展，使百年老校勃发出新的生机和活力。
