Preface

The Ministry of Light Industry Published a roll of 169 large and medium-sized plastics processing enterprises, which would be given priority support in light industrial enterprises, in Document Code Qin-Zong-Ji-Zi (90) No. 26. There are 29 large-sized enterprises and 140 medium-sized enterprises in the 169 enterprises. In the spirit of “fully elaborating the mainstay of large and medium-sized state-owned enterprises” during the period of further readjustment and rectification based on the “Resolution of the CPC (Communist Party of China) Central Committee for Further Readjustment and Rectification and Deepening the Reform” and in accordance with relevant stipulations of the state Planning Commission, these enterprises were assessed by the Ministry of Light Industry.

The present assessment of large and medium-sized enterprises for priority support by the Ministry of Light Industry is to further carry out the decision of the Central Committee for readjustment and rectification and deepening the reform, fully elaborating the mainstay of large and medium-sized enterprises. The state and the Ministry of Light Industry will gradually give priority support in various scopes for the production, construction and technical progress etc. and create developing conditions for these enterprises according to needs and possibilities.

The assessed large and medium-sized enterprises accord with relevant classification criterion of the country on large and medium-sized enterprises and their products accord with the present estate policy of the country. In the field of economic efficiency, management administration, technical progress and exporting and earning foreign exchanges, etc., these enterprises all lead in their lines of business. We hope these factories, which have already made greater contributions to the development of the national economy, will continue maintaining and carry forward their honour, making more contributions for the construction of four modernizations. The aim of editing “A Roll of Large and Medium-sized Plastics Processing Enterprises in Light Industry” for China Plastics Processing Industrial Association is to propagate and introduce these large and medium-sized enterprises for them to be better understood by all, so that these enterprises will better elaborate the mainstay and leading function. The age is advancing. Being a developing trade, the plastics processing trade is rapidly expanding and growing. We hope more plastics processing enterprises will go into the rank of large and medium-sized enterprises to further prosper the plastics processing trade.
