1949—58

Корь-Общая

- Власова, А. Н.:
О второй части болезни при кори.
Педиатрия, 1950 № 3.
- Волынская, В. А., Дадашьян, М. А.:
Корь.
Медгиз, 1957 Москва.
- Гуслиц, С. В.:
К вопросу сезонности при кори и коклюше.
Ж. М. Э. И. 1954 № 6. 39.
- Доброхотова, А. И.:
Влияние возрастного фактора на течение кори и коклюша.
В кн.: Вопросы педиатрии, М., 1951.
- Доброхотова, А. И.:
Задачи научно-исследовательской работы в области детских инфекции (скарлатина, корь, коклюш).
Педиатрия, 1954 № 4, 3.
- Додонова, О. Н.:
Современное состояние заболеваемости корью и эффективность мероприятий.
В кн.: Тезисы доклада межинститутской научной конференции по проблеме «Детские инфекции» М., 1955.
- Иванова, Л. В. и Лобанова, Л. С.:
Изучение заболеваний корью в детских учреждениях.
- В кн.: Ленинградский санитарно-Гигиенический медицинский институт. Студенческое общество, Л., 1954.
- Никитин, С. А. и Бергев, Е. А.:
Изучение вируса кори.
Врачебное дело. 1950, № 7.
- Патушинская, Р. А.:
Атипичная корь у детей.
Педиатрия. 2: 61-64, 1958.
- Пономарева, П. А.:
Повторная корь.
Ученые записки II МГМИ имени И. В. Сталина, т. 1, М., 1951.
- Шапиро, С. Л.:
Корь.
Здоровье, 1956 № 12, 12.
- Шапиро, С. Л. и др.
Связь кори и дизентерии.
Педиатрия, 1949. № 2.
- Шехина, Н. И.:
Витамин А и каротин в крови у детей, больных дизентерией и корью.
Диссертация Л., 1953.
- Элькина, Ю. А.:
О повторном заболевании корью.
Здравоохранение Белоруссии. 1956. № 4.

Вирус

- Сергиев, П. Г. и др.
Реакция нейтрализации вируса кори противокоревыми сыворотками.
Ж. М. Э. И. 1951, № 6.
- Козловская, Л. А.:
О прохождении вирусов кори и гриппа через плаценту.
Восросы вирусологии. 4: 241-242, 1958.
- Конова, К. П. и Пономарева, П. А.:
Опыты по изучению динамики вируса кори в организме коревых больных.
Ж. М. Э. И. 1949 № 6.
- Курицина, В. А.:
К вопросу о закрашенной карантинных сроков при кори.
Труды Ленинградского Санитарно-Гигиенического Института 32: 30-34, 1957.

Сергиев, П. Г. и Шамраева, С. А.:

Культивирование вируса кори во вращающихся пробирках с использованием коровой амниотической жидкости как питательной среды для культивирования.

Ж. М. Э. М. 7: 47-51, 1956.

Шамраева, С. А.:

Культивирование вируса кори в клетках

бластодиска яиц курицы во вращающихся пробирках.

Вопросы вирусологии 3(1): 46-47, 1958.

Шамраева, С. А.:

Изучение свойств вируса кори, культивируемого в культуре ткани.

Ж. М. Э. И. 11: 82-88, 1956.

Иммунология

Дмитрива-Равикович, Е. М. и др.

Иммунитет против кори и физическое состояние детей.

Педиатрия, 2: 43-47, 1951.

Зетель-Коган, Р. И., Шнейерова, А. Г.:

Течение митигированной кори у привитых детей.

В кн.: Реферативные научно-исследовательские работы по акушерству, гинекологии, педиатрии, в. 1, Свердловск, 1949.

Конова, К. П. и Пономарева, П. А.:

Серологические показатели продукции антител в сыворотках крови больных корью в ранние дни болезни.

Бюллетень экс. биол. и мед. 1951, 7.

Конова, К. П. и Пономарева, П. А.:

Опыт изучения динамики антител в сыворотке крови коревых больных и реконвалесцентов.

Ж. М. Э. И. 1950 № 10.

Равикович-Дмитриева, Е. М. и Пивоварова, Е. А.:

К вопросу об иммунитете при митигированной кори.

Ж. М. Э. И. 1952 № 1.

Хинина, Э. М. и Карева, В. А.:

Иммунопрофилактика кори гаммаглобулином.

Педиатрия, 2: 6-7, 1953.

Экспериментальная

Лозовская, Л. С.:

Метод биологического титрования в изучении вируса кори.

Вопросы вирусологии, 6: 11-15, 1956.

Рязанцева, Н. Е.:

Экспериментальная корь у щенят.

Ж. М. Э. И. 5: 22-29, 1956.

Рязанцева, Н. Е., Смирнова, Е. В.:

Экспериментальное изучение кори на обезьянах.

Ж. М. Э. И. 11: 11-15, 1954.

Рязанцева, Н. Е., Стасилевич, З. К.:

Экспериментальная корь котят.

Вопросы вирусологии, 1: 26-30, 1956.

Сергиев, П. Г. и др.

Испытание на обезьянах вируса кори, введенного через организм щенка.

Ж. М. Э. И. 11: 88-93, 1956.

Эпидемиология

Гуслиц, С. В.:

Актуальные вопросы эпидемиологии важнейших «детских» инфекций-дифтерии, скарлатины, кори и коклюша.

Докторская диссертация, М., 1954.

Гутник, Р. Б.:

Вспышка кори в селе Западной Украины.

Ж. М. Э. И. 1955, № 12, 75-77.

Жданов, В. М.:

Экспериментальные материалы и наблюдения за вакцинированными противокоревой аллантоисно-тканевой вакциной.

Вопросы вирусологии 1955 № 2, 47.

Каменев, С. Н.:

Эпидемиология кори в населенных пунктах поселкового типа.

Диссертация, М., 1953.

Касрарова, Т. Ю.:
К вопросу об эпидемиологии кори и коклюша.
Ж. М. Э. И. 1957, (8), 116-122.

Рязанцева, Н. Е.:
Вспышка кори среди обезьян.
Ж. М. Э. И. 4: 88, 1956.

Смирнова, Е. В. и Струдовская, А. Л.:
Вспышка кори в Заполярном поселке.
Педиатрия, 1949, № 4.

Чжан, Х. С.:
Эпидемиологическая характеристика кори в детской учреждении и борьбу с ней, по материалам г. Ленинграда.
Труды Ленинградского Санитарно-Гигиенического медицинского института 21: 13-22, 1957.

Чжан, Х. С.:
Некоторые вопросы эпидемиологии кори.
Ленинградского Санитарно-Гигиенического Медицинского Института 32: 23-26, 1957.

Чжан, Х. С.:
О заразительности больных митигированной корью.
Труды Ленинградского Санитарно-Гигиенического Медицинского Института 32: 27-29, 1957.

Эльберт, Б. Я.:
Вопросы этиологии, эпидемиологии и специфической профилактики кори.
Здравоохранение Белоруссии, 1955.

Яблокова, М. Л.:
К вопросу о разобщении детей, контактировавших с больным корью.
Ж. М. Э. И. 1955, № 9, 68.

Патология

Сорокина, А. З.:
Обмен аскорбиновой кислоты при кори.
В кн.: Вопросы инфекционной патологии, Л., 1954.

Филатов, И. В.:
Морфологические изменения слизистой оболочки носа и придаточных пазух при кори и дизентерии.
Вестн. ото-рино-лар., 4: 36-41.

Диагностика

Бунин, К. В.:
К истории открытия развития раннего диагностического признака кори.
Педиатрия, 1952 № 5, 59.

Пискунова, Г. А.:
Ранняя диагностика кори реакцией преципитации.
Детские инфекции в. 1951.

Бунин, К. В.:
Снова о пятнах бельского-филатова как раннем диагностическом признаке кори.
Педиатрия. 6: 73-74, 1955.

Пономарева, П. А.:
Некоторые вопросы диагностики, клиники и лечения кори.
Диссертация докторская, М. 1953.

Клиника и Осложнения

Волынская, В. А.:
Клиника смешанной инфекции кори и скарлатины.
Диссертация, М., 1950.

Фельд. и акуш., 1949, 11, 60-61.

Волынская, В. А. и Бугаева, Г. П.:
Особенности клинической картины кори у детей в возрасте до 6 месяцев.
Педиатрия. 5: 52-53, 1957.

Степанова, И. И.:
Поражение гортани при кори.
Тезисы докладов юбилейной научной сессии, посвященной 200-летию 1 ММИ.
Терапевтическая секция, М., 1955.

Модель, М. М. и Симсон, Т. П.:
Нервно-психическое нарушения при кори.
Медицз, 1952.

Цинзерлинг, В. Д.:
О пневмониях при кори.
Ленинградский Санитарно-Гигиенического Мед. Института т. 8, Л., 1951 стр. 59.

Поталов, А. С.:
Уход за больными корью.

Шафранский, Л. Л.:
Гангрена нижних конечностей после кори.
Педиатрия. 4: 80, 1954.

Профилактика

Иоффе, В. И.:

О современном состоянии проблемы профилактики кори и очередных задачах исследований.

Гигиена и санитария, 1953 № 2, 39.

Доброхотова, А. И.:

Корь и борьба с ней.

Сов. мед. 8: 3-7, 1956.

Доброхотова, А. И.:

Успехи в борьбе с корью.

Сов. Здравоохранение 16(12): 28-34, 1957.

Конова, К. П. и Пономарева, П. А.:

К проблеме специфической профилактики кори.

Бюллетень экс. биол. и мед. 1951 № 2.

Равикович, Е. И. и Пивоварова, Е. А.:

Применение гамма-глобулина, в детских учреждениях для профилактики кори.

Педиатрия, 1949 № 4.

Соловьев, В. Д. и Марченко, В. И.:

Современные вопросы профилактики коклюша и кори.

Ж. М. Э. И. 2: 3-9, 1955.

Халютин, В. А.:

Борьба с внутрибольничными заражениями корью и скарлатиной.

В кн.: Скарлатина и стрептококковая инфекция, Л., 1954.

Хант, С. Л., Лупина, М. И.:

Дополнительные данные к использованию противокоревой сыворотки для производства гамма-глобулина.

Ж. М. Э. И. 1957, № 7, 15.

Цой, Д. М.:

Медикаментозная профилактика основных осложнений кори в условиях села.

Сов. Мед. 1957, № 6, 121.

Шапиро, С. Л.:

Задачи педиатра в борьбе с корью.

Сов. Мед. 1949, № 11, 15.

Яблокова, М. Л. и др.

Об условиях возникновения эпидемического гепатита при серопротекции кори.

Ж. М. Э. М. 1950 № 11.

Лечение

Абдулаев, Н. А.:

О лечении детей, больных корью, на дому.

Сов. Мед. 1953 № 11, 45.

Горкин, Е. Н.:

О влиянии симтомицина на течение кори.

Педиатрия. 1: 71-72, 1954.

Никонова, Т. Н. и др.

Опыт лечения антибиотиками детей при заболевании корью.

Здравоохранение Казахстана, 1950, № 9.

Тарабан, А. С.:

Терапевтическая эффективность некоторых антибиотиков у больных осложненным коклюшем и корью.

Педиатрия. 4: 47-49, 1954.

Чирешкина, Н. М. и Кронрод, А. П.:

Чувствительность у антибиотиков флоры верхних дыхательных путей у детей больных корью.

Педиатрия. 2: 58-60, 1958.

Казуистика

Фарбер, М. А.:

Редкий случай коревого энцефалита у

взрослого.

Сов. Мед. 5: 129, 1957.

MEASLES

1949-1958

MEASLES — General

- Armstrong, J. V.
Measles.
Brit. M. J. 1: 238-240, Jan. 28, 1950.
- Babbott, F. L. Jr., & Gordon, J. E.
Modern measles.
Am. J. M. Sc. 228: 334-361, Sept. 1954.
- Garrott, A.
Measles.
Portugal med. 37: 675-685, Dec. 1953.
- Graveleau, D.
Several recent ideas on measles.
Concours Medical 79 (23): 2809-2811, 1957.
- Librach, I. M.
Measles.
Med. Illust. Lond. 10 (3): 153-159, Mar. 1956.
- McLorinan, H.
Measles (morbilli).
M. J. Australia. 2: 248-349, Aug. 29, 1953.
- Shrewsbury, J. F. D.
Plague of Athens (possible identity with measles).
Bull. Hist. Med. 24: 25, Jan.-Feb. 1950.

ETIOLOGY

- Adams, J. M., & Imagawa, D. T.
Immunological relationship between measles and distemper viruses.
Proc. Soc. Exp. Biol. and Med. 96 (1): 240-244, 1957.
- Arakawa, S.
Further studies.
Ztschr. Hyg. 139: 227-349, 1954.
- Babbot, F. L. Jr.
Modern measles.
Am. J. Med. Sc. 228 (3): 334-361, 1954.
- Bech, V.
Studies on measles virus in monkey kidney tissue cultures. 2. Development of cytopathic changes and identification of the cultivated agents by complement fixation tests.
Acta Pathologica et Microbiologica Scandinavica. 42 (1): 86-96, 1958.
- Bech, V., & Magnus, P. von.
Studies on measles virus in monkey kidney tissue cultures. 1. Isolation of virus from 5 patients with measles.
Acta Pathologica et Microbiologica Scandinavica. 42 (1): 75-85, 1958.
- Benyesh, M., et al
Size and structure of ECHO, poliomyelitis, and measles viruses determined by ionizing radiation and ultrafiltration.
Virology. 5 (2): 256-274, 1958.
- Blattner, R. J.
Recent developments in the study of measles virus.
J. Pediat. S. Louis 51 (5): 611-613, Nov. 1957.
- Christensen, P. E., et al
Etiology.
Ugesk larger. 115: 755-762, May 14, 1953.
- Christensen, P. E.
Etiology, epidemiology and specific prophylaxis.
Ugesk larger. 115: 755-762, May 14, 1953.
- Elste, E. R.
Etiology.
Med. Monatsschr. 6: 771-773, Dec. 1952.
- Elste, E. R.
Pathogenesis.
Med. Monatsschr. 6: 689-692, Nov. 1952.

- Frankel, J. W., & West, M. K.
Cultivation of measles virus in stable line of human amnion cells.
Proc. Soc. Exp. Biol. and Med. 97 (4): 741-742, 1958.
- Grist, N. R.
Pathogenesis, review of literature and discussion of problem.
Glasgow M. J. 31: 431-441, Dec. 1950.
- Giradi, A. J., et al
Growth and CF antigenicity of measles virus in cells deriving from human heart.
Proc. Soc. Exp. Biol. and Med. 98 (1): 18-22, 1958.
- Hsiung, G. D., et al
Plaque assay of measles virus on Erythrocytes patas monkey kidney monolayers.
Proc. Soc. Exp. Biol. and Med. 98 (1): 68-70, 1958.
- Imagawa, D. T., & Adams, J. M.
Propagation of measles virus in suckling mice.
Proc. Soc. Exp. Biol. and Med. 98 (3): 567-569, 1958.
- Katz, S. L., et al
Propagation of measles virus in cultures of chick embryo cells.
Proc. Soc. Exp. Biol. and Med. 97 (1): 23-29, 1958.
- Lacorte, J. G.
Dermotropic viruses measles.
Rev. brasil med. 6: 678-686, Oct. 1949.
- Papp, C.
Infection pathway of measles virus.
Archives françaises de Pédiatrie. 14 (10): 1049-1052, 1957.
- Papp, K.
Virus infection across intact conjunctiva; measles, mumps, rubella.
Rev. Immunol. 18: 380-390, 1954.
- Reagan, R. L., et al
Electron microscope studies.
Texas Rep. Biol. & Med. 10: 655-659, 1952.
- Ruckle, G.
Measles virus.
Semaine des Hopitaux de Paris. 33 (72/8): 4267-71, 1957.
- Ruckle, G.
Studies with measles virus. III. Attempts at isolation from post-mortem human tissue.
J. Immunol. 79 (5): 361-369, 1957.
- Ruckle, G.
Studies with the monkey-intra-nuclear-inclusion-agent (Minia) and foamy-agent derived from spontaneously degenerating monkey kidney culture. I. Isolation and tissue culture behavior of the agents and identification of MINIA as closely related to measles virus.
Arch. f. d. ges. Virusforschung. 8 (2): 139-166, 1958.
- Toniolo, G.
Exanthematic rash in incubation period.
Clin. Pediat. 33: 43-50, Jan. 1951.
- Yonis, Z.
In repatriation camp.
Harefuah 39: 32, Aug. 1, 1950.

EXPERIMENTAL

- Arakawa, S.
Experimental study.
Jap. J. Exper. Med. 20: 351-366, Dec. 30, 1949.
- Arakawa, S.
Successful production of typical measles in monkeys inoculated with measles virus from mouse brain.
Yokohama Med. Bull. 5 (6): 412-418, 1954.
- Black, F. L., et al
Propagation of measles virus in a strain of human epidermoid cancer (Hep-2).
Proc. Soc. Exp. Biol. and Med. 93 (1): 107-108, Oct. 1956.
- Cohen, S. M., et al
Fluorescent antibody and complement-fixation tests of agents isolated in tissue culture from measles patients.
Proc. Soc. Exp. Biol. and Med. 90 (1): 118-122, Oct. 1955.
- Dekking, F., et al
Propagation of measles virus in human carcinoma.
Proc. Soc. Exp. Biol. and Med. 93 (1): 1-2 1956.

- Durank, P.
Inoculation of measles by the respiratory route in small rodents.
Comp. rend. des seances Soc. de Biol. & Filiales. 150 (8-9): 1567-1569, 1956.
- Enders, J. F. & Peebles, T. C.
Propagation in tissue cultures of cytopathogenic agents from patients.
Proc. Soc. Exper. Biol. and Med. 86: 277-286, June, 1954.
