

1. Books

TABLE OF CONTENTS

1*	Books	
(1)	Noise and the design of buildings and services	1
(2)	Noise assessment and control	1
(3)	Industrial pneumatic systems; noise control and energy conservation	1
(4)	Noise control for engineers	2
(5)	Industrial noise and vibration control	6
(6)	Noise pollution A guide to information sources	12
(7)	Handbook of noise control	14
(8)	Transport and the environment	15
(9)	Quieting: A practical guide to noise control	17
(10)	Sound pollution	19
(11)	Industrial noise control manual	20
(12)	Acoustic design and noise control	23
(13)	Noise and vibration control	25
(14)	Handbook of industrial noise control	25
(15)	Machinery noise Engineering design guides 22	26
(16)	Noise	26
(17)	The control of noise in ventilation systems A designers' guide	28
(18)	Борьба с шумом вентиляторов	29
(19)	Производственный шум и меры защиты от него в черной металлургии	30
(20)	Контроль шума в промышленности	31
(21)	Борьба с шумом на автомобильных дорогах	32
2*	Proceedings of conference	
1*	Inter-noise proceedings	
(1)	Inter-noise 72 proceedings	33
(2)	Inter-noise 73 proceedings	36
(3)	Inter-noise 74 proceedings	40
(4)	Inter-noise 75 proceedings	45
(5)	Inter-noise 76 proceedings	52
(6)	Inter-noise 77 proceedings	57
(7)	Inter-noise 78 proceedings	64
(8)	Inter-noise 79 proceedings	72

(9)	Inter-noise 80 proceedings	80
2*	Inter-congress no acoustics	
(1)	Eighth inter-congress on acoustics symposium on noise in transportation	91
(2)	Tenth inter-congress on acoustics satellite symposium on engineering for noise control	92
3*	U.S. noise and vibration control conference	
(1)	proceedings of the technical program NOISEXPO 1974	93
(2)	proceedings of the technical program NOISEXPO 1975	95
(3)	proceedings of the technical program NOISEXPO 1976	99
(4)	proceedings of the technical program NOISEXPO 1977	102
(5)	proceedings of the technical program NOISEXPO 1978	104
4*	U.S. noise-con proceedings	
(1)	Noise-con 73 proceedings	105
(2)	Noise-con 77 proceedings	110
(3)	Noise-con 79 proceedings	111
5*	U.S. environmental sciences annual meeting	
(1)	Institute of environmental sciences 1975 proceedings	113
(2)	Institute of environmental sciences 1977 proceedings	114
(3)	Institute of environmental sciences 1978 proceedings	114
(4)	Institute of environmental sciences 1979 proceedings	115
(5)	Institute of environmental sciences 1980 proceedings	115
6*	U.S. noise-con proceedings	
(1)	Noise and vibration control engineering Proceedings of the Purdue noise control conference	115
(2)	Proceedings of the first annual AIChE southwestern OHIO conference on energy and the environment	119
(3)	Isolation of mechanical vibration, impact, and noise	120
(4)	Proceedings of the symposium on noise	121
(5)	Noise abatement and control highway research record	121
(6)	Reduction of machinery noise	122
(7)	Seminar on understanding digital control and analysis in vibration test systems	123
(8)	Third interagency symposium on university research in transportation noise	124
(9)	Proceedings of the MESA noise conference	124
(10)	Industrial pollution control measurement & instrumentation	125

(11)	Conference on aerospace polymeric viscoelastic damping technology for the 1980's	126
7*	U.K. noise—con proceedings	
(1)	Noise and vibration control for industrialists	128
(2)	Conference noise emitted by fluid power equipment Its causes and control	128
(3)	Conference on noise and vibration control	129
(4)	Vibrations and noise in pump, fan, and compressor installations	129
(5)	Seminar industrial noise and vibration problems	130
(6)	Noise in the process industry	130
(7)	European noise legislation symposium proceedings	131
(8)	Control of odours and noise in the process industries	132
(9)	Noise and vibrations of engines and transmissions	132
8*	Australian noise—con proceedings	
(1)	Vibration and noise control engineering	133
(2)	Proceedings of noise shock and vibration conference	135
9*	Other noise—con proceedings	
(1)	Technology to reduce noise from machine tool	137
(2)	Noise reduction in mechanical systems	138
(3)	Vibrations in environmental engineering	138
(4)	Diesel engine noise conference	139
(5)	Industrial noise and its reduction edited proceedings of the seminar Leamington Spa October 1975	140
3.	Noise control in plant	141-161

(1)

NOISE AND THE DESIGN OF BUILDINGS AND SERVICES

1	The effects of noise on man	1
2	Environmental noise criteria	13
3	Experience of noise problems	23
4	Noise sources in buildings	29
5	The role of noise control in building design	47
6	Building noise case studies	65
7	Sound insulation, background and recent developments	77
8	Design aids and criteria for sound insulation	87
9	Case study some noise control problems encountered in the design of a local-authority housing development	101
10	Sound in large rooms	107
11	Noise in factories	115
12	Design of recent auditoria	121

(2)

NOISE ASSESSMENT AND CONTROL

1	Introduction	1
2	Noise and sound, noise units and their measurement	9
3	principles of noise control	21
4	Surface transport noise	41
5	Aircraft noise	61
6	Construction, excavation and demolition noise	71
7	Neighbourhood noise and noise due to industrial premises	79
8	Domestic noise problems and the noisy neighbour	87
9	Noise at a place of employment	95
10	The economics of noise	111
11	How noise legislation is evolved and how standards are set	117

(3) **INDUSTRIAL PNEUMATIC SYSTEMS, NOISE
CONTROL AND ENERGY CONSERVATION**

Mark D. Oviatt and Richard K. Miller

1	New Design Challenges	1
	History of pneumatics • Energy conservation • Noise control	

2	Getting Back to Basics	11
	Conversion to scfm • Pressure drops and pipe sizing • Measuring air flow • Measuring air pressure • Correction for pressure and temperature	
3	Compressors	24
	Multistaging • Mounting • Reciprocating compressors • Rotary compressors • Dynamic compressors • Portable air compressors • Compressor room noise control • Energy conservation • Heat recovery economics • Commercially available compressor systems • Compressor heat recovery • Controls for compressor systems • part-load efficiency	
4	Intake and Distribution	48
	Air-intake system • Air-distribution • Air leaks	
5	Pneumatic Tools and Devices	69
	Rotary tools • Percussive tools • Construction • Measurement of pneumatic tool noise • Pneumatic devices • Avoid compressed air for cooling • Tool-piece interaction noise	
6	Pneumatic Muffler Design	120
	Simple exhaust mufflers • Piped-away exhaust systems • Commercially available mufflers • Reactive mufflers • Adjoint inlet-outlet muffler • Conical connector • Finite tailpipe	
7	Maintenance for Energy Conservation and Noise Control	137
	Standard purchasing • Air intake filters • Compressors • Dryers • Filter-lubrication units • Gauges and calibrators • The cost of inefficient tools • Air tools • Air cylinders • Air leaks • Acoustical maintenance program • Survey procedures • Visual inspection	

(4)

NOISE CONTROL FOR ENGINEERS

PART 1 Fundamental Concepts of Sound

CHAPTER 1	The Nature of Sound and its Measurement	3
1.1	Introduction	3
1.2	Generation and propagation of Sound	4
1.3	Wave Nature of sound	6
1.4	Transmission, Reflection, and Absorption of Sound by Boundaries	7

1.5	Mathematical Description of Sound Waves	12
1.6	Physical Descriptors of Sound	15
1.7	Levels and Decibel	20
1.8	Measuring and Displaying Acoustical Data	27
1.9	Sound-Level Meter, Weighting Scales, Octave Bands	31
CHAPTER 2 EFFECTS OF NOISE ON PEOPLE		36
2.1	Introduction	36
2.2	Anatomy of the Ear	37
2.3	Normal Hearing Response	39
2.4	Noise-Induced Hearing Loss-Health and Safety Standards	42
2.5	Speech Interference	50
2.6	Annoyance-Perceived Noisiness	54
CHAPTER 3 DESCRIPTION OF SOUND FIELDS		58
3.1	Introduction	58
3.2	Sound sources and radiated sound fields	59
3.3	Near-and far-field characteristics	71
3.4	Free-field and reverberant-field characteristics	74
3.5	Anechoic and reverberant chambers	75
CHAPTER 4 ACOUSTICS OF ROOMS AND ENCLOSURES		77
4.1	Absorption and Transmission Coefficients, Room Absorption	77
4.2	Build-up and Decay of sound in a Room, Reverberation Time	81
4.3	Normal Modes of Vibration of an Enclosure	86
4.4	Steady-State Sound pressure Levels	89
4.5	Enclosures for Acoustical Measurements	93
PART 2 Practical Aspects of Noise Control		
CHAPTER 5 INSTRUMENTATION FOR MEASUREMENT AND ANALYSIS OF NOISE		103
5.1	Terminology and Fundamental Concepts	103
5.2	Frequency Analysis	106
5.3	Acoustical Instrumentation	113
5.4	Typical Applications	123
CHAPTER 6 ACOUSTICAL MEASUREMENTS		130
6.1	Reverberation Time	130
6.2	Absorption Coefficient and Acoustic Impedance	133
6.3	Directivity	139
6.4	Sound power	142
6.5	Attenuation of Sound by Structures	148

CHAPTER 7	NOISE CRITERIA, STANDARDS AND REGULATIONS	161
7.1	Introduction	161
7.2	Criteria for Indoor Noise Environments	165
7.3	Indoor Noise Standards and Regulations	175
7.4	Rating Schemes for Outdoor Noise Environments	186
7.5	Community (Environmental) Noise Regulations	201
7.6	EPA Model Community Noise Control Ordinance and Strategy Guideline Manual	207
CHAPTER 8	ACOUSTICAL MATERIALS AND STRUCTURES	214
8.1	Introduction	214
8.2	Absorptive Materials and Structures	216
8.3	Dissipative and Reactive Silencers	228
8.4	Attenuating Materials and Structures	240
8.5	Damping of Thin panels	258
8.6	Vibration Isolation	263
CHAPTER 9	PRINCIPLES OF NOISE CONTROL	276
9.1	Principle 1: Identify Sources of Noise and Their Relative Importance	276
9.2	Principle 2: List and Evaluate Possible Noise Control Procedures as They Apply to Source, Path, and Receiver	280
9.3	Principle 3: Identify Relative Contributions from Direct and Reflected Sound	281
9.4	Principle 4: Distinguish between Absorption and Attenuation of Noise	284
9.5	Principle 5: Identify and Evaluate Significance of Flanking paths	285
9.6	Principle 6: Identify and Evaluate Significance of Structure-Borne Noise	287
CHAPTER 10	CASE STUDIES IN NOISE CONTROL	292
10.1	Reduction of Noise Levels in a Food-Packaging Area	292
10.2	Reduction of Engine-Generator Cooling-Fan Noise	294
10.3	Reduction of Noise from a Mine Ventilation Fan	296
10.4	Reduction of Railcar Retarder Noise	298
10.5	Reduction of Mechanical Equipment Noise in a Penthouse Apartment	300
10.6	Guidelines for Control of Airborne Duct Noise in an HVAC System	302
10.7	Reduction of material Handling Impact Noise	304

10.8 Noise Reduction of Air Exhaust and Jet Thrust Devices	314
CHAPTER 11 ESTABLISHING AN INDUSTRIAL NOISE CONTROL PROGRAM	
11.1 Introduction	324
11.2 Identifying Unacceptable Noise Areas and Work Environments—Initial Noise Survey	325
11.3 Identifying Major Sources of Worker Noise Exposure—Compliance Noise Survey	326
11.4 Diagnostic Measurements	334
11.5 Documentation for the Noise Survey	338
11.6 Determining Noise Control Methods—Assessing Feasibility	339
11.7 Written Noise Abatement Plan—Establishing priorities	341
11.8 Establishing a Review procedure	346
11.9 Personal Hearing Protection—Educational Program	346
11.10 Establishing an Audiometric Testing Program	348
PART 3 Laboratory and Field Experiments	
Introduction to the Laboratory Exercises	353
LAB 1 MEASUREMENT OF SOUND	355
L1.1 The Sound-Level Meter	355
L1.2 Components	356
L1.3 Calibration	356
L1.4 Experiment	357
LAB 2 EVALUATION OF NOISE ENVIRONMENTS	359
L2.1 The Sound-Level Meter as an Evaluation Tool	359
L2.2 Combined Octave-Band Levels	359
L2.3 Weighted Levels from Octave-Band Levels	361
L2.4 Evaluating Environments from Octave-Band Levels	363
L2.5 Experiment	368
LAB 3 FIELD MEASUREMENTS OF ROOM ABSORPTION AND REVERBERATION TIME	370
L3.1 Prediction of Sound Levels in Enclosures	370
L3.2 Practical Aspects of Measuring Reverberation Times	371
L3.3 Experiment	372
LAB 4 FIELD MEASUREMENTS OF TRANSMISSION LOSS AND NOISE REDUCTION	375
L4.1 Prediction of Noise Reduction through Partitions	375
L4.2 Practical Aspects of Measuring Transmission Loss or Noise Reduction	376
L4.3 Experiment	378

LAB 5	PLNAT NOISE SURVEYS	381
L5.1	Introduction	381
L5.2	Conduct of Noise Surveys	381
L5.3	Records and Accessories	385
L5.4	Experiment	387
LAB 6	IDENTIFICATION OF SOURCES	390
L6.1	Components of Combined Sound Fields	390
L6.2	Direct Methods of Identification	390
L6.3	Comparison Methods of Identification	393
L6.4	Experiment	395
LAB 7	DETERMINATION OF SOUND POWER LEVEL IN SEMIREVERBERANT ENVIRONMENTS	398
L7.1	Sound-Pressure Level in the Sound Field Surrounding a Source	398
L7.2	Basic Equations Governing Techniques for sound Power Determination	399
L7.3	Practical Aspects of Sound Power Measuremnt	401
L7.4	Comparison Methods for Determining Sound Power Level in Semireverberant Fields	403
L7.5	Experiment	404
LAB 8	MEASUREMENT OF NORMAL INCIDENCE ABSORPTION COEFFICIENT IN A STANDING WAVE TUBE	409
L8.1	Sound Absorption Coefficients of Acoustical Materials	409
L8.2	The Standing Wave Tube Method of Measuring Absorption Coefficients	409
L8.3	Experiment	411

(5)

INDUSTRIAL NOISE AND VIBRATION CONTROL

1	SOUND LEVELS, DECIBELS, AND DIRECTIVITY	1
1.1	Introduction	1
1.2	Sound Wave Characteristics	1
1.2.1	Frequency, Period, and wavelength	2
1.2.2	Velocity of sound	3
1.3	Levels and Decibels	5
1.3.1	Sound Power Level	6
1.3.2	Sound Pressure Level	8
1.3.3	Adding, subtracting, and averaging decibels	9

1.3.3.1	Adding decibels	9
1.3.3.2	Subtracting decibels	13
1.3.3.3	Averaging decibels	15
1.3.3.4	Approximation of $\bar{L}_p$	16
1.4	Directivity	18
1.4.1	Directivity factor, Q	18
1.4.2	Directivity Index	20
1.4.3	Determination of $\bar{L}_p$	21
1.4.3.1	Measurements in anechoic full space	22
1.4.3.2	Measurements in anechoic hemispherical space	26
2	HEARING, HEARING LOSS, AND PSYCHOLOGICAL EFFECTS OF NOISE	32
2.1	Introduction	32
2.2	The Human Ear	32
2.2.1	Anatomy	32
2.2.2	Frequency and Loudness response	34
2.3	Hearing Loss	36
2.4	Psychological Response to Noise	36
2.4.1	Loudness interpretation	36
2.4.2	Perceived noise Level	41
2.4.3	Noise-criteria curves	45
2.4.4	Sound Level	47
2.4.5	Speech interference Level	51
2.4.6	Masking	53
3	NOISE CONTROL CRITERIA AND REGULATIONS	58
3.1	Introduction	58
3.2	The Occupational Safety and Health Act of 1970	59
3.3	Noise Control Act of 1972	61
3.4	Performance Indices for Environmental Noise	61
3.5	Major Sources of Noise	66
3.6	Noise From Industrial plants	67
3.7	Trends in State and Local Governments	68
4	INSTRUMENTATION	72
4.1	Introduction	72
4.2	Measurement Environment	73
4.2.1	Indoor measurements	73
4.2.2	Outdoor measurements	77
4.3	Microphones	77
4.3.1	Types of microphones	77

4.3.2	Sensitivity	79
4.3.3	Special application considerations	81
4.4	Sound Level Meter	83
4.5	Spectrum Analyzers	84
4.5.1	Octave-band analyzers	91
4.5.2	Narrow-band analyzers	92
4.6	Magnetic Tape Recorders	99
4.7	Real-Time Analyzers	103
4.8	Environmental Noise Measurements	109
4.9	Laboratory Instrumentation	111
5	SOURCES OF NOISE	114
5.1	Introduction	114
5.2	Estimation of Noise-Source Sound Power	115
5.3	Fan or Blower Noise	116
5.4	Electric Motors as a Source of Noise	123
5.5	Pump Noise	124
5.6	Air Compressor Noise	126
5.7	Noise Produced by Typical Building and Construction Equipment	129
5.8	Home Appliance Noise	132
6	ROOM ACOUSTICS	136
6.1	Introduction	136
6.2	Sound Field Designation	136
6.3	Energy Density	138
6.3.1	Potential energy	138
6.3.2	Kinetic energy	140
6.3.3	Total Energy density	140
6.3.4	Energy density as a function of the room	143
6.3.4.1	Absorption coefficient and the steady-state energy density	146
6.3.4.2	Direct and reverberant energy	151
6.3.4.2.1	Room configuration consideration	152
6.3.4.2.2	Energy density in a progressive spherical wave	153
6.3.4.2.3	Sum of the energy density in the direct and reverberant fields	155
6.4	Pressure and Power Levels	159
6.4.1	Air attenuation by atmospheric absorption	166
6.4.2	Sound Level	167

6.4.3	Sound power Level	168
6.4.3.1	Sound power Level by means of a reference source	171
6.5	Reverberation	173
6.5.1	Reverberation time	175
6.5.2	Room-constant determination from the reverberation time	180
7	ACOUSTICS OF WALLS, ENCLOSURES, AND BARRIERS	185
7.1	Introduction	185
7.2	Transmission Loss and Transmission Coefficients	185
7.2.1	Transmission-loss frequency dependence	187
7.2.2	Sound transmission class	189
7.3	Noise Reduction of a wall	190
7.3.1	Sound pressure level away from the wall	198
7.4	Composition and Multiple Construction of Walls	200
7.5	Indirect Sound Paths	202
7.6	Enclosures	203
7.6.1	Factors that affect the performance of enclosures	203
7.6.2	Full Enclosures or hoods	205
7.6.2.1	Noise reduction of a hood	205
7.6.2.2	Hood Insertion loss	208
7.6.3	Small enclosures	212
7.6.4	Partial enclosures	213
7.7	Acoustic Barriers	213
7.7.1	Sound pressure level without the barrier	214
7.7.2	Sound pressure level with the barrier	214
7.7.3	Barrier insertion loss	216
7.7.3.1	Reverberant field with the barrier	216
7.7.3.2	Barrier diffracted field	217
7.7.3.3	Barrier insertion loss formulation	219
7.7.3.4	Special cases of the insertion loss	221
7.7.3.5	Insertion loss approximation for barriers	226
8	ACOUSTICAL MATERIALS AND STRUCTURES	237
8.1	Introduction	237
8.2	Sound-Absorbing Materials	237
8.2.1	Porous materials	238
8.2.2	Noise-reduction coefficient	239

8.2.3	Panel absorbers	247
8.3	Duct Noise	248
8.3.1	Flow noise in ducts	248
8.3.2	Duct design considerations	249
8.4	Mufflers	249
8.4.1	absorptive mufflers	250
8.4.1.1	Lined ducts	250
8.4.1.2	Parallel and blocked-line-of sight baffles	251
8.4.1.3	Lined bends	251
8.4.1.4	Plenum chambers	253
8.4.2	Reactive mufflers	255
8.4.2.1	Expansion chambers	255
8.4.2.2	Cavity resonators	258
8.4.3	Prefabricated mufflers	262
8.5	Pipe-Wrapping Waterials	263
9	VIBRATION CONTROL SYSTEMS FOR INDUSTRIAL APPLICATIONS	267
9.1	Introduction	267
9.2	Vibration Systems	268
9.2.1	The model	268
9.2.2	Free vibration	269
9.2.3	Forced vibration	279
9.2.3.1	Harmonic excitation	279
9.2.3.2	Impulse excitation	283
9.2.3.3	Static deflection	284
9.3	Vibration Control	285
9.3.1	Transmissibility	285
9.3.1.1	Force Excitation	285
9.3.1.2	Motion excitation	286
9.3.2	Design curves	287
9.3.2.1	Transmissibility vs.damping ratio	287
9.3.2.2	Isolation efficiency vs W and Wn	289
9.3.2.3	Static deflection vs.natural frequency	290
9.3.3	Control techniques	293
9.3.3.1	Source alteration	293
9.3.3.2	Isolation	294
9.3.3.2.1	Metal springs	294
9.3.3.2.2	Elastomeric mounts	297

9.3.3.2.3	Isolation pads	301
9.3.3.3	Inertia blocks	303
9.3.3.4	Absorption	303
9.3.3.5	Active systems	306
9.3.3.6	Damping	307
9.3.3.6.1	Measures of damping	308
9.3.3.6.2	Damping mechanisms	310
9.4	Structural Support Considerations	314
9.5	Critical Shaft Speeds	317
9.6	Vibration in Ducts	318
9.7	Vibration Measurements	321
9.7.1	Measurement quantities	321
9.7.2	Measurement systems	324
9.7.2.1	Transducers	325
9.7.2.1.1	Velocity pickups	326
9.7.2.1.2	Accelerometers	327
9.7.2.2	Preamplifiers	328
9.7.2.3	Processing and display equipment	329
9.7.2.4	Overall measurement system performance	330
9.7.2.5	Mechanical impedance and mobility	333
9.8	Measurement of Structural Dynamics	335
10	MACHINE PROTECTION AND MALFUNCTION DIAGNOSIS	356
10.1	Introduction	356
10.2	Causes of Vibration	356
10.2.1	Unbalance	357
10.2.2	Rubs in rotating machinery	358
10.2.3	Misalignment	359
10.2.4	Looseness	360
10.2.5	Excitation of resonances due to insufficient damping	360
10.2.6	Oil whirl and oil whip	360
10.3	Basic Rotor Dynamics	362
10.3.1	Modeling	362
10.3.2	Critical speed	364
10.3.3	System response	366
10.3.4	Stability	371
10.4	Instrumentation	374
10.4.1	Transducer	375
10.4.2	Processing and display equipment	376

10.4.2.1	Vibration monitor	376
10.4.2.2	Eccentricity monitor	376
10.4.2.3	Axial position monitor	376
10.4.2.4	Tachometers	377
10.4.2.5	Oscilloscope	377
10.4.2.6	Tape recorders	378
10.4.2.7	Filters and phase meters	378
10.4.2.8	Real-time analyzers	379
10.4.2.9	Computer systems	379
10.5	Diagnostic Analyses	380
10.5.1	Rotor balancing	380
10.5.1.1	Instrumentation	380
10.5.1.2	Orbits	382
10.5.1.3	Balancing procedure	384
10.5.2	Rotating-machinery rubs	396
10.5.3	misalignment	398
10.5.4	Looseness and oil whirl	399
10.5.5	Summary	400

(6)

NOISE POLLUTION A GUIDE TO INFORMATION SOURCES

Volume 5 in the man and the environment information guide series

CHAPTER 1. PHYSIOLOGICAL EFFECTS

A. Auditory	1
B. Cardiovascular	23
C. Other	28
D. General	32

CHAPTER 2. BEHAVIORAL EFFECTS

A. Psychological Response	49
B. Communication	75
C. Sleep	80
D. Task Performance	91
E. General	103

CHAPTER 3. ABATEMENT: ENGINEERING AND ARCHITECTURAL CONTROLS

A. Product Control	111
--------------------	-----

B. In-plant Noise	142
C. Architectural Control	155
D. Materials	171
E. General	176
CHAPTER 4. ABATEMENT; GOVERNMENTAL AND ADMINISTRATIVE CONTROLS	185
A. Legal	158
B. Programs and Enforcement	207
C. Land Use	223
D. General	234
CHAPTER 5. COMMUNITY NOISE	241
A. Air Transportation	241
B. Road Transportation	261
C. Rail Transportation	284
D. Water Transportation	290
E. Industry	292
F. Other	295
G. General	300
CHAPTER 6. ENVIRONMENTAL IMPACT	321
A. Structure	321
B. Land Use	327
C. General	332
CHAPTER 7. ACOUSTICS	339
A. Physics of Sound	339
B. Instrumentation	345
C. Measurement	356
D. Standards	391
CHAPTER 8. EDUCATION	403
A. Graduate programs	403
