Sketch Map of Location of Shenlingzhai National Geopark in Luoning County, Henan

Shenlingzai National Geopark is situated at the northern foot of the Mount Xiong'ershan, about 26 km away from the south of Luoning County, Henan Province. Its geographic coordinates are: longitude $111^{\circ} 35' 27'' - 111^{\circ} 48' 49''$ E, latitude $34^{\circ} 12' 59'' - 34^{\circ} 19' 55''$ N. Its total area comes to approximately 209 km². The whole geopark is divided into three scenic areas: Jinmen River, Shenlingzai and Lotus-shaped Peak. It is a comprehensive geological park, characterized mainly by typical granite landforms such as waterfall-shaped stone walls, in addition, dotted with the primeval ecological conditions and rich human civilization relics.

石瀑奇观

Wonder of the Waterfall-shaped Stone Walls

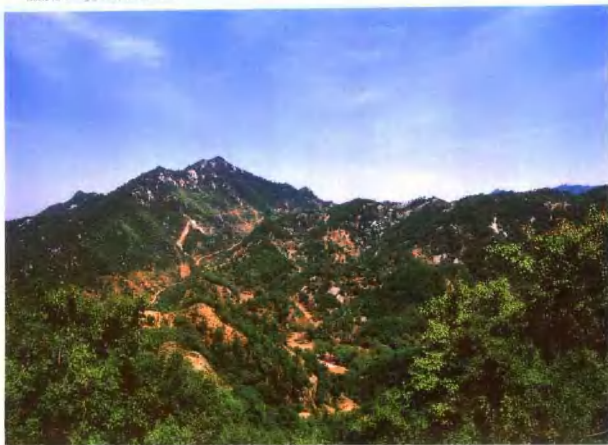

神灵寨石瀑群，集中分布在花山主峰的两侧，最大的石瀑，面积达 10 万平方米，最小的石瀑面积也在 1000 平方米以上。

The waterfall-shaped stone walls are mainly distributed at two sides of Huashan Peak. Of them the largest one's area attains to 10,000 m² and the smallest more than 1000m².

地瀑 Dike-shaped "Waterfall"

巍巍花山 Lofly Mount Huashan

“中华大石瀑”，瀑布高达218米，宽578米，而且集悬瀑、帘瀑、叠瀑于一身，堪称石瀑中的珍品。

Especially the Grand Waterfall-shaped Stone Wall in China, about 218 meters high and 578 meters wide, is a rare one, composed of several shapes stone walls, and is a natural wonder made of coincidence and excellence.
