# PREFACE 序言

***Staff Research and Scholarship Profile 1999*** contains information about academic publications, research projects, research interests and teaching specialisms of all academic staff members of The Hong Kong Institute of Education (HKIEd) in the past two academic years from 1 July 1997 to 30 June 1999.

The ***Profile*** aims at facilitating academic exchange between HKIEd staff members and other scholars from local and international universities. Further, it is expected that the ***Profile*** will help strengthen research networks and promote research collaboration.

Preparatory work of the ***Profile*** commenced in 1998. The processes of data collection, data entry and verification continued until December 1999. As there had been some staff turnover during the period, the ***Profile*** presents only the aforementioned information of regular staff members who are in the service of the Institute as of December 1999.

The ***Profile*** consists of four major sections. Section I provides a list of publications of academic staff members of the Institute. Section II registers the research projects being pursued by HKIEd staff members. Project titles are listed under academic departments in alphabetical order. Joint research projects are listed under the respective departments of the chief investigators and the co-investigators. This arrangement facilitates ***Profile*** readers in locating various research projects undertaken by staff members of particular departments. Section III records staff research interest areas and teaching specialisms, listed in the order of the Directorate, Academic Centres, Divisions, Offices, Schools and Departments. Section IV presents a list of 113 groups of academic staff members clustered according to their research interests.

The ***Profile*** provides a portrait of research activities at the Institute and accomplishment of HKIEd academic staff. We trust that it will serve as a handy reference on the Institute's research achievements and interests, and that it will open many doors for further research collaboration.
